HikCentral Professional

Access Control

Secure your access every time

Access Granted
Monica Davis
2020/01/15 10:00

HikCentral Professional provides a centralized, user-friendly access control system that enables physical, biometric, and mobile credentials. It ensures the security of both personnel and assets while offering seamless one-stop management.

Challenges

Using a single access control credentials

Compromised security, hard to manage, inflexible to meet diverse needs

Complex rights administration

Requires significant efforts to administer, particularly lacking a unified system

Delayed issue response

Inability to identify and resolve access issues swiftly

What **We Offer**

Flexible **Credentials**

- A diverse range of credentials available for numerous scenarios
- Hybrid credential options
