Company history

IT ALL STARTED BACK IN 2024…

Our DJ Business began as a division of Pioneer Corporation in 1994 when it released the world's first commercially available flat-top DJ CD player, the CDJ-500. It was rated highly by top DJs, and as word spread throughout the dance music world, it received much media attention, glowing reviews, and prestigious awards. As part of the team involved in the design of the CDJ-500, I'm still hugely proud of how it was received.

The year 2024 will mark the 9th anniversary since our company became independent from Pioneer Corporation. This year, we're proud to announce we'll release new products, under the brand AlphaTheta, that will propel us into the future while maintaining the quality and innovation you've come to expect from us. These products will bear the AlphaTheta brand logo, which symbolizes diversity and growth, as well as the merging of different energies that resonate harmoniously.

Looking ahead, the AlphaTheta and Pioneer DJ brands will keep bringing you new experiences.

As a company, we'll continue to evolve, create innovative products and services, strive for the development of the music industry, its culture, and take on new challenges.

We look forward to another great year in music and hope our valued customers will continue to support AlphaTheta. As always, everyone at our company will work hard each day, to achieve our mission: One Through Music.

January 2024

Professional 4-channel Rotary Mixer

Built-in Send FX to bring depth and breadth to your sound

< Back to Index

Euphoric sound with digital clarity and analog richness from Rupert Neve Designs transformer

The Euphonia rotary mixer embodies a blend of tradition and innovation, showcasing a "two-tone, two-layer" design. Its channel strip integrates classic mixer components, accented by matte and gloss textures to delineate from the modern display section. This design fuses analog and digital elements, highlighted by the warm copper tones of the main knobs and sleek black wood side panels.

The mixer includes five built-in spatial effects—Delay, Tape Echo, Echo Verb, Reverb, Shimmer, along with a high-pass filter (HPF)—to enrich your music's depth and texture. Additionally, a Send/Return section allows for external effects integration. Each channel features a dedicated knob to adjust the send level for precise effect application.

The unique time knob, designed specifically for the Euphonia, offers a clicking sensation that synchronizes with BPM for certain effects, while providing a smooth, click-free adjustment for others, enabling precise control over effect timing.

OMNIS-DUO

Portable All-in-one DJ System

PORTABILITY AND PLAYABILITY:

Turn Any Location Into A Party Venue Instantly

< Back to Index

Introducing the AlphaTheta Omnis-Duo, a revolutionary all-in-one DJ system that blends cutting-edge technology with portability and style. Designed for DJs on the move, the Omnis-Duo offers a range of professional features packed into a sleek, compact unit that's as at home at a spontaneous beach party as it is in a professional club setting.

The AlphaTheta Omnis-Duo combines portability with powerful DJ functionalities. Its compact, lightweight design easily fits into a backpack, while the stylish indigo hue and minimalist top plate enhance its sophisticated look. The system boasts a 2-deck + mixer layout with touchscreen modes adaptable for any lighting condition, ensuring optimal usability.

It offers up to five hours of playtime on a single charge, with an optional Eco mode for extended battery life, and can also be powered through an AC adapter or USB Type-C.Unique in its class, the Omnis-Duo features Bluetooth audio output, allowing DJs to play music in various settings without conventional setup limits, and includes professional XLR and RCA outputs. It also supports Bluetooth audio Input, enabling seamless integration of music from external devices.

The system plays music from USB drives, SD cards, or directly via USB Type-C, and is compatible with rekordbox and Serato DJ Lite. Wi-Fi® capability expands access to music from multiple devices, removing the need for physical media.Additionally, the Omnis-Duo incorporates SonicLink technology for ultra-low-latency, wireless DJing, making it highly adaptable for performances in any venue, from outdoor settings to professional environments.

This makes the AlphaTheta Omnis-Duo a versatile tool for DJs seeking to enhance their performance capabilities.

The AlphaTheta Omnis-Duo is not just a DJ system; it's a statement of style and a testament to technological advancement in the world of mobile DJing.

DDJ-FLX2

Compact 2-channel DJ Controller

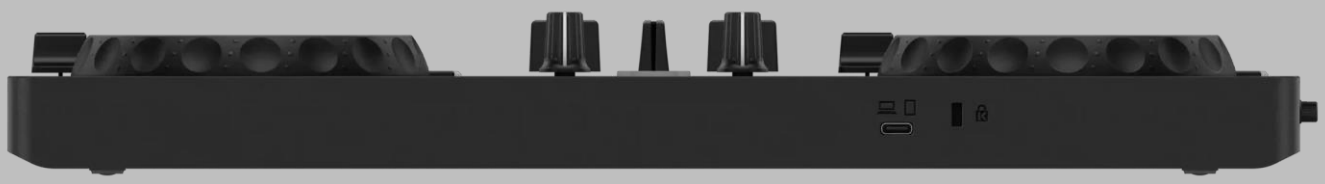
GETTING INTO DJING IS SUPER EASY!

All you need is some gear and a love for music.
It's a fun and awesome way to really enjoy music.

< Back to Index

The DDJ-FLX2 is all you need to kick off your DJing journey and enjoy music your way.

Getting into DJing is super easy! All you need is some gear and a love for music. It's a fun and awesome way to really enjoy music.



•Versatile DJ Software Compatibility
The DDJ-FLX2 works seamlessly with popular DJ applications like rekordbox and djay, making it perfect for both beginners and pros. Simply install your preferred app on your smartphone, tablet, or PC/Mac, connect to the controller, and start mixing. Ready for a challenge? Use advanced DJ software like Serato DJ Lite to take your skills to the next level.

•Stream Music Effortlessly
Access millions of tracks through top music streaming services, including Beatport Streaming, Beatsource Streaming, SoundCloud Go+/DJ, and TIDAL. If you're using djay, you can even stream from Apple Music. Please note that availability depends on your chosen app and location.

•Compatible with Your Favorite Devices
Whether you prefer mixing on a smartphone, tablet, or PC/Mac, the DDJ-FLX2 lets you DJ without the need to buy new gear.

•Lightweight & Portable Design
Designed to be lightweight and compact, the DDJ-FLX2 is easy to carry and loaded with intuitive features that help you mix like a pro right from the start.

rekordbox

Mix support functions
It's easy to replicate the seamless song mixing of professional DJs thanks to the Smart CFX* and Smart Fader* features on the DDJ-FLX2.

DDJ-GRV6

4-channel Performance DJ Controller

FIND YOUR GROOVE

DDJ-GRV6 offers everything you need to elevate your DJ performance. Featuring large jog wheels, perfect for precise scratching, and 8 Performance Pads positioned just like on the flagship CDJ-3000 multi player, this controller is designed for professionals and enthusiasts alike.

With Beat FX from the DJM-A9 integrated into the mixer, you can seamlessly combine scratching with advanced pad and effect techniques, delivering dynamic performances that feel like you're working on club-standard equipment.

Take your sets to the next level with expressive control and versatility—perfect for crafting unforgettable moments in any club setting!

Unleash Your Creativity with the Groove Circuit

The DDJ-GRV6 strikes the perfect balance between functionality and simplicity. Its minimalistic display and intuitive indicators ensure seamless access to essential features, while the Groove Circuit sits conveniently above the Performance Pads. The innovative “step-up” design prevents accidental touches on the jog wheels, allowing you to stay focused on crafting intricate or straightforward performances with ease.Groove Circuit: Redefining Live RemixingThe Groove Circuit lets you freely manipulate drum parts, making remixing tracks effortless. Replace drum loops on-the-fly with just a button press, transforming genres and creating unique live remixes. Add effects to drum parts to craft fills, build-ups, and breakdowns, taking your sets to new creative heights.Whether you’re exploring Amapiano, Deep House, or other genres, this sleek design empowers DJs in South Africa to deliver truly innovative performances.

rekordbox

Multi-device compatibility

You can choose to use the DDJ-GRV6 with not only rekordbox for Mac/Windows but also rekordbox for iOS/Android.

AlphaTheta

XDJ-AZ

4-channel Professional All-in-one DJ System

The XDJ-AZ brings the layout and feel of the flagship CDJ-3000 and DJM-A9 to your fingertips, offering an intuitive and seamless experience.

Whether you're mixing Amapiano, Deep House, or other genres, the XDJ-AZ ensures every performance is smooth, professional, and packed with possibilities.

Experience Club-Standard Performance with the XDJ-AZ

- Equipped with full-size jog wheels inspired by the CDJ-3000, the XDJ-AZ delivers an ultra-smooth experience for pitch bending and scratching.
- The mixer section adopts the intuitive layout of the DJM-A9, with strategically placed controls to maximize playability and user-friendly buttons for assigning Beat FX, allowing you to truly express your creativity.
- By mastering the XDJ-AZ, you'll feel right at home with professional club equipment, making transitions to club performances seamless and effortless.
- With 4-deck playback support, the XDJ-AZ offers unmatched versatility. Add layers to your mix, create live mashups, collaborate back-to-back with other DJs, or prepare multiple tracks to drop at just the right moment.
- The system is PRO DJ LINK™ compatible, enabling seamless integration with CDJs and syncing beat and on-air information across players, ensuring you stay in full control of your performance.
- Compared to its predecessor, the XDJ-XZ, the XDJ-AZ features noticeable upgrades, including a 32-bit D/A converter from ESS Technology. This enhancement significantly improves sound quality, delivering clear and dynamic audio that resonates powerfully in both large venues and intimate club settings.

Hardware Unlock

The XDJ-AZ is a Hardware Unlock device. Simply plug the XDJ-AZ into a PC / Mac running the rekordbox application and you can use the software.

AlphaTheta

CDJ-3000X

Next-Generation Professional DJ Player

CRAFTED THROUGH TIME.

DEFINED BY PURPOSE.

ELEVATED BY DESIGN.

You're in control.
Every move matters.

< Back to Index

The AlphaTheta CDJ-3000X is a professional DJ player designed to give performers maximum flexibility, speed, and creative freedom. It supports a wide range of media options, including cloud storage, streaming services, Wi-Fi connectivity, NFC access, and USB-C integration, making it easy to access music in almost any performance setup. Whether you're playing from the cloud, a connected device, or external media, the CDJ-3000X adapts seamlessly to modern DJ workflows.

A large 10.1-inch touchscreen enhances track browsing and performance preparation by displaying up to 16 tracks at once and supporting fast searches, playlist editing, and a Global Tag List. Creative features such as Smart Cue, Gate Cue, and Touch Cue allow DJs to analyze tracks on the fly, trigger cue points smoothly, and explore new performance ideas with confidence and precision.

Built for professional use, the CDJ-3000X delivers outstanding reliability and sound quality. Reinforced play and cue buttons are designed for heavy use, while improved jog wheel tension ensures accurate control. Cached playback helps prevent interruptions, and a high-performance ESS DAC combined with a refined power supply delivers clear, balanced audio with enhanced bass and reduced noise. The player also integrates smoothly with professional DJ software, including rekordbox Performance Mode and Serato DJ Pro, and features a lockable power cable for secure, dependable performances.

With a durable design, improved jog wheel, Hot Cue creativity, and superior sound quality, this player delivers reliability, innovation, and powerful audio for DJs worldwide.

AlphaTheta

DJM-V5

Professional 3-Channel DJ Mixer

The Art of Mixing, Elevated

< Back to Index

Studio sound, club power — total control in every mix.

The DJM-V5 is a professional 3-channel DJ mixer from AlphaTheta that brings high-end performance and refined control into a compact, club-ready design. It draws on the DNA of the flagship DJM-V10 by offering studio-grade sound processing with 96 kHz/64-bit DSP and ESS Technology 32-bit A/D and D/A converters for clear, warm, detailed audio even with dense mixes.

The mixer provides 4-band EQ, dedicated compressors, long-throw 60 mm channel faders, and a Soft Mix Curve feature for smooth, natural blending of tracks. Six Send FX (Short Delay, Reverb, Shimmer, Tape Echo, PingPong, Echo-Verb) and a three-mode filter system (low-pass, high-pass, cross-pass) give creative effects and tonal shaping options for expressive performance.

It also includes a built-in SonicLink transmitter for ultra-low-latency wireless headphone monitoring, PRO DJ LINK support for BPM-synced control with compatible players, and dual USB-C and extensive analog I/O for flexible connectivity with software like rekordbox and Serato DJ Pro. The unit's compact footprint and professional feature set make it suitable for club booths, studios, and mobile DJ setups.

RMX IGNITE

Professional DJ Effector

EXPRESSION BEGINS WITH A BURST OF ENERGY

Unleash your energy and IGNITE the dancefloor.

< Back to Index

Effects Engine3:
- Band FX section that processes low, mid, and high frequencies independently.
- Lever FX — Echo, Reverb, Juggle, Reverse, Solo, Stretch for instant dramatic effects.
- Isolate FX — Tape Echo, Reverb, Drive, Filter, Ducker, Rhythm for smooth dynamic control.
- Release Echo — One-button reset with natural echo tail transitions.

Sampler Section:
- 20 built-in samples from Loopmasters included.
- 4 sample trigger pads with overdub and loop capabilities.
- Sample Roll — 10 rhythmic roll patterns plus Groove Roll for expressive performance.
- Sampler Color FX — Echo, Space, Filter, Pitch, Decay, Swing for shaping sample playback.

Integration & Connectivity:
- PRO DJ LINK support for BPM/grid sync and loading samples via connected players.
- Digital send/return via USB with compatible mixers (e.g., DJM-A9, DJM-V10).
- Analog TS input/output for standard signal routing.

Sound Quality:
- 96 kHz / 64-bit mixing DSP for high-resolution processing.
- 32-bit ESS A/D and D/A converters for clear, detailed audio.

Display & UI:
- Multicolour screen shows FX parameters, sample data, BPM and I/O levels.

Sample Management:
- Use RMX-IGNITE Sample Manager to import your own samples via USB or PRO DJ LINK.

The AlphaTheta RMX-IGNITE is a DJ effects processor and sampler that enhances live sets with hands-on controls. It features a 3-Band FX engine, Sampler with 20 built-in sounds, and Pro DJ Link for syncing with CDJs/mixers.

SLAB

Elemental Beatmaking

THE ULTIMATE BEAT-MAKER

Effortlessly create high-quality beats with Serato Studio's slick workflow

< Back to Index

SLAB is the first-ever MIDI pad controller that puts Serato Studio's sampling, sequencing, and performance capabilities directly into your hands. It brings the raw instinct, feel, and speed of beat-making back to its elements.

- **Transport Section:** Use the dial to seamlessly switch between functions such as library navigation and scrubbing.
  With Focus Control, you can freely control plugin parameters in real time without the need for manual mapping.

- **Dial Modes:** In EQ, Stems, FX, and Parameter modes, you can fine-tune your sound. Simply use the dial to instantly view assignment and control settings. Shape your sounds quickly, intuitively, and with confidence.

- **Encoder Modes:** Precisely control parameters such as filter, pitch, effects level, and swing in real time.

- **Touch Strip:** The high-visibility RGB indicators and ergonomic design naturally guide your fingers for accurate and smooth control.

- **Performance Pads**: Control pad, Pad FX, Trigger, and Step Sequencer modes with the highly sensitive and responsive pads.
  Velocity support and adjustable aftertouch help you create dynamic performances.
  LED bars synchronized with the Serato Studio and Sample GUI offer clear visibility so you can easily grasp control states while you're playing.
  Each 29 x 29 mm pad offers an exceptional feel and responsive touch, capturing every nuance of your performance.

AlphaTheta

CHORDCAT

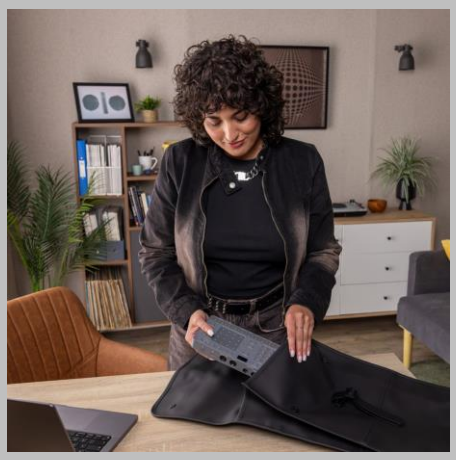
8 – Track Groovebox

FIND HARMONY, SPARK CREATIVITY

Unlocking Your Potential And Fueling Your Musical Imagination

< Back to Index

Introduction to the AlphaTheta Cordcat, a portable groovebox designed to inspire music creation through intuitive chord progression tools. Featuring Cord Cruiser mode, it suggests compatible chords to help users build musical ideas quickly, with an 8-track sequencer and flexible USB-C or battery power for use anywhere.



The CHORDCAT offers powerful sequencing and performance control with 8 independent tracks, allowing drums, bass, synths, and other sounds to play simultaneously, each with its own volume and pan for precise mixing. With 16 patterns per track and a Pattern Chain feature, users can quickly build dynamic arrangements and smooth transitions. Detailed sequencing is supported by 128 steps, organized as 16 steps per bar across eight pages, enabling accurate timing and intricate rhythmic or melodic creation.

Designed for flexibility and mobility, CHORDCAT integrates easily with external synthesizers and DAW software via MIDI IN/OUT/THRU and USB-C. Chord Play and Chord Cruiser modes allow intuitive chord control for connected devices, while Chordcat Manager enables easy pattern import and export between hardware and DAWs, supported by the included Ableton Live Lite. Its compact, lightweight design makes it ideal for creating on the go, with USB-C or AA battery power providing uninterrupted music creation anywhere.

Chordcat's chord suggestions feed creativity – unlocking your potential and fueling your musical imagination.

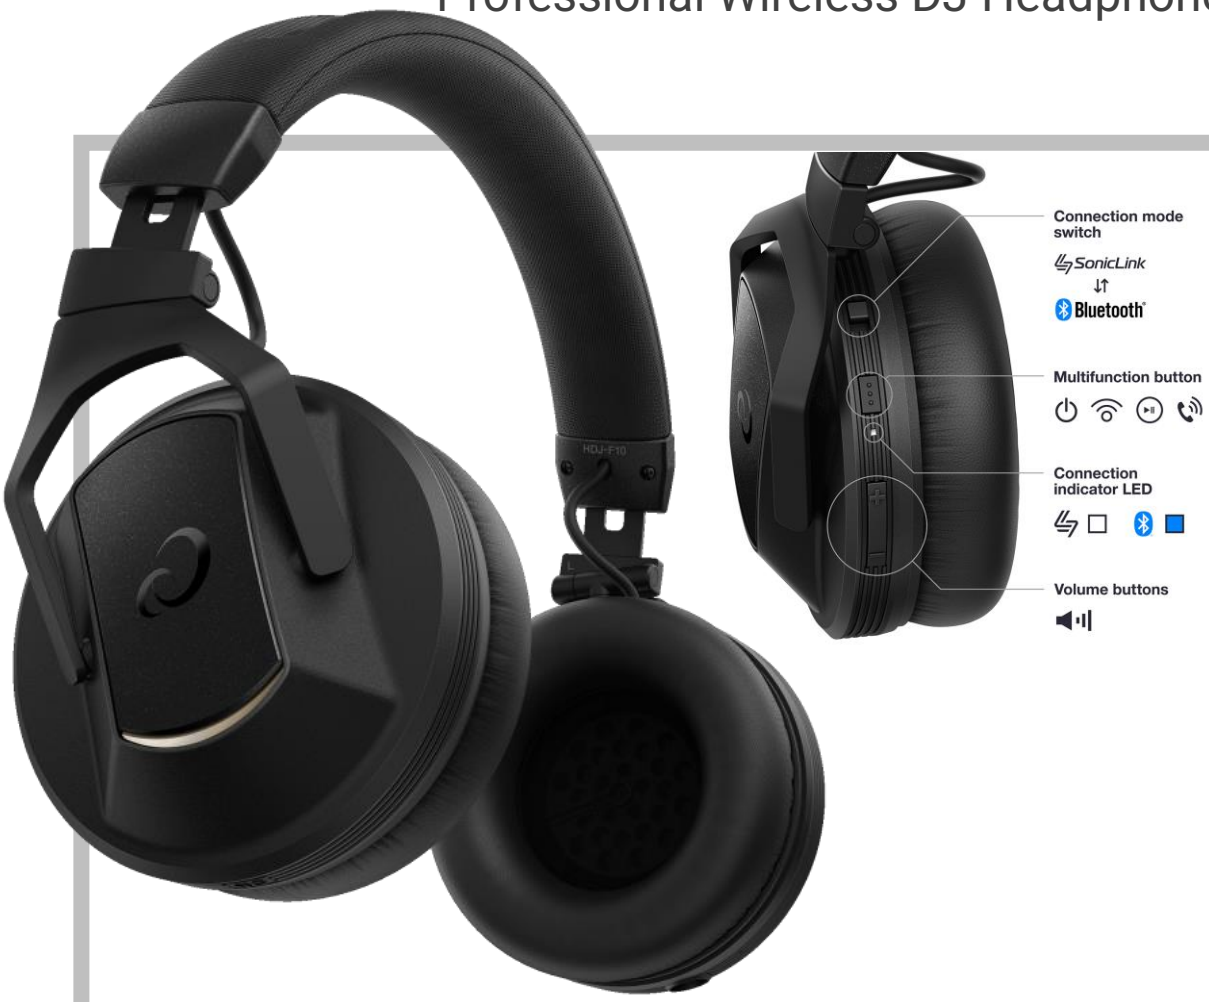
HDJ-F10

Professional Wireless DJ Headphones



UNLEASH YOUR CREATIVITY WITH THE HDJ-F10 HEADPHONE

Experience unparalleled freedom in the DJ booth or on stage with the revolutionary HDJ-F10 system, featuring SonicLink technology.

< Back to Index

HDJ-F10: Built for Precision and Durability

Crystal-Clear Monitoring in Any Environment
With the SonicLink wireless connection, the HDJ-F10 headphones let you hear your music loud and clear, even in the most chaotic DJ booths or on stage. Designed for high-quality sound reproduction at high volumes, they ensure accurate monitoring when it matters most. Featuring newly developed earpads and housing structures, these headphones offer exceptional sound insulation, surpassing even the industry-leading HDJ-X10 model, so you can focus entirely on your performance. Engineered for Professional Use.

Long battery life for extended DJ sets

Feel confident that your headphones will go the distance, even if you're playing a long DJ set. A full battery gives you 9 hours' use with SonicLink.

AlphaTheta

HDJ-F10TX

Professional Wireless DJ Headphones With Transmitter

EXTRA COMFORTABLE MONITORING WITH ULTRA-LOW LATENCY WIRELESS COMMUNICATION VIA SONICLINK

< Back to Index

Superior Sound and Unmatched Durability
Impeccable audio, even in noisy environments, with the HDJ-F10 headphones and their SonicLink wireless technology.

Designed for high-volume playback and accurate monitoring, these headphones ensure your music is delivered with precision. Their newly developed earpads and housing structures provide superior sound insulation, surpassing the performance of Pioneer DJ's flagship HDJ-X10 model, so you can focus entirely on your mix.

Built for the Demands of Professionals The HDJ-F10 headphones are engineered to withstand the rigors of professional use. Tested to meet the US Military Standard MIL-STD-810H Shock test, they offer unparalleled durability and reliability, ensuring they're ready to perform wherever your gigs take you.

Perfect for the intense demands of DJs and live performers, these headphones are built to last.

Dedicated transmitter which enables SonicLink connection

The dedicated transmitter HP-TX01 instantly transfers sound to the HDJ-F10 via ultra-low latency wireless communication with simply connecting to DJ mixer. Any DJ mixer equipped with a PHONE or 3.5 mm stereo mini jack monitor output can be used with the HDJ-F10. It is compact, lightweight, and easy to carry with your gear.

WAVE-EIGHT

8" Portable DJ Speaker With Soniclink

LOW LATENCY
MEETS
PORTABILITY.

ZERO HASSLE,
100% FUN

TAKE POWERFUL
SOUND ANYWHERE.

< Back to Index

This state-of-the-art speaker offers a seamless DJing experience thanks to its SonicLink technology, an ultra-low-latency wireless feature that transmits audio much faster than traditional Bluetooth. This ensures that sound plays almost instantly after pressing play, allowing for flawless live mixing.

The WAVE-EIGHT is not just about connectivity; it also excels in sound quality. Powered by a highly efficient Class D amplifier and equipped with a newly developed 8-inch driver, the speaker delivers clear and powerful audio. It also features a Vortex Bass Accelerator, which pumps out clear and impactful bass, perfect for keeping the energy high at any event, even outdoors.

Designed for versatility, the WAVE-EIGHT offers multiple sound modes including Mono, Stereo, and Subwoofer settings that can be changed with a single switch to suit different types of events or spaces. For larger venues or events, it’s easy to expand your setup by connecting additional WAVE-EIGHT units using the SonicLink connection. This allows for configurations like two speakers in stereo or adding a third as a dedicated subwoofer to enhance the bass further.

Durability and portability are also key features of the WAVE-EIGHT. The speaker's battery can last up to 8 hours on a full charge, allowing you to keep the music going all night long. It’s also waterproof with an IPX4 rating, making it ideal for outdoor use. The design includes an extendable handle, casters, and additional grab handles for easy transportation. Plus, there's a built-in pole socket for mounting the speaker on a stand to optimize sound projection.

Additional practical features include a USB Type-C port for charging devices such as smartphones, ensuring you never run out of battery during an event. The speaker also has a dedicated compartment for storing the wireless transmitter, simplifying the setup and connectivity process.

The AlphaTheta WAVE-EIGHT is designed to meet the rigorous demands of DJs who require freedom from cables and desire robust sound and flexible performance capabilities.

AlphaTheta
