What exactly is MetaboFix?

MetaboFix is a dietary supplement marketed by Metabo-Fix.com. The product is intended to anybody who desires weight loss without dieting or exercise.

According to the official website, consuming MetaboFix for four seconds every morning as part of a "red juice ritual" will result in quick weight loss within days, regardless of how much you eat or exercise.

It is claimed that by taking MetaboFix everyday, you may lose between 35 and 57 pounds of fat without missing meals, adhering to a rigorous diet, or engaging in any physical activity. The vitamin promises to swiftly flatten your tummy, even if you spend the whole day on the sofa.

MetaboFix is offered only via Metabo-Fix.com, where each tub costs around \$69. All purchases are covered by a 60-day return policy.

How does MetaboFix function?

MetaboFix is a red superfood supplement that promises to help you lose weight by regulating your metabolism. Taking one scoop of MetaboFix daily with water, a smoothie, or your preferred beverage is said to provide

your body with the vitamins, minerals, mushroom extracts, probiotics, plant extracts, herbs, and teas associated with weight reduction.

Supposedly, by consuming MetaboFix for just four seconds each morning, you may experience the following advantages:

Without exercise, flatten your stomach quickly.

Lose 35 to 57 pounds without missing meals or adhering to a rigorous diet.

Reduce the size of your thighs, waist, and hips.

Enhance mental attention, comprehension, and focus

Any age, even 45 and beyond, is appropriate for weight loss.

Enjoy sustainable, all-day energy

Your energy is derived from your metabolism. The meals you consume are converted by your metabolic system into useful energy. Some individuals have a "faster" metabolism than others, meaning they burn more calories at rest. You may also increase your metabolism via exercise and dietary changes.

However, according to Metabo-Fix.com, you may boost your metabolism without dieting or exercise; all you need are natural chemicals. The mixture includes a

combination of superfoods associated with weight reduction, antioxidant properties, digestion, and other benefits. MetaboFix might assist you in losing a substantial quantity of weight with less effort by targeting weight reduction from several angles.

## The History of MetaboFix

To comprehend how MetaboFix works, it is necessary to comprehend the supplement's history. The recipe was created by a guy who wished to assist his wife in shedding pounds.

This guy saw his wife engage in many diet and exercise regimens in an effort to shed weight. She experimented with spin classes, tight diets, high-intensity interval training, and popular exercises. She dropped weight temporarily before gaining it all back. She was becoming more and more irritated.

To assist his wife in losing weight, the developer of MetaboFix began investigating natural weight reduction remedies. He discovered across a hidden West African weight loss substance. After administering this component to his wife, he saw her shed 3 pounds of fat in the first three hours, followed by an additional 32 pounds in the following weeks.

After taking this superfood from West Africa for many weeks, the man's wife shed a large amount of weight and maintained it. She seemed fifteen years younger. In addition, she shed substantial weight from her thighs and lowered her waist circumference by burning stubborn abdominal fat.

Today, the man's wife eats everything she wants and does not exercise, yet she maintains her weight. She just takes the MetaboFix solution every day.

After seeing his wife drop 32 pounds with MetaboFix and maintain her weight loss, the supplement's developer decided to manufacture and market the product. Today, the guy offers MetaboFix online at [Metabo-Fix.com](http://Metabo-Fix.com), claiming that anybody may lose 32 to 57 pounds of fat without exerting any effort.

How can MetaboFix support metabolic function?

Important for weight reduction, vitality, and general health and fitness. If your metabolism is slow, you will feel lethargic. It may be difficult to reduce weight. MetaboFix, as you may have guessed from the product's name, is marketed as a metabolism booster.

MetaboFix employs polyphenols, which are plant-based antioxidants, to boost the metabolism. Targeting free radicals, polyphenols may support inflammation throughout the body. The presence of free radicals is associated with sickness, toxicity, and weight gain. By focusing on this information, the superfood combination in MetaboFix is said to make weight loss simple.

Vegetables and fruits are high in polyphenols. Increasing research has linked these polyphenols to important health advantages. Certain fruits and vegetables have more polyphenols than others. There is a reason why a diet rich in fruits and vegetables is considered healthy: fruits and vegetables are high in polyphenols, which may promote substantial health advantages, such as weight reduction and a healthy metabolism.

What is MetaboFix used for?

According to the manufacturer of MetaboFix, the recipe includes polyphenols that have tremendous weight reduction and health benefits on the whole body.

Here are some of the claims claimed on the MetaboFix official website:

**Lose Weight Without Diet or Exercise:** According to MetaboFix, you do not need to miss meals or exercise to lose weight with their product. In fact, the MetaboFix website is loaded with testimonials from individuals who have lost significant amounts of weight by including the supplement into their diet. One lady reportedly dropped three pounds within the first three hours of using the solution. Others claim to have shed between 32 and 57 pounds without dieting or exercise. MetaboFix allowed them to consume anything they wanted, engage in as little activity as they desired, and yet lose considerable weight.

**Reanimate Dead Mitochondria:** Mitochondria are essential for cellular energy production. When your mitochondria are healthy and functioning, you feel physically and mentally more invigorated. MetaboFix's polyphenols reportedly promote inflammation and oxidation, which may restore dead mitochondria. Mitochondrial death often results in cell death. MetaboFix promises to bring cells back from the dead by reviving dead mitochondria throughout the body, hence boosting your metabolism and making weight loss simpler.

**Blocks Fat Absorption at the Source:** Imagine eating meals without gaining weight. MetaboFix's developer says that you can lose weight without dieting if you take

his supplement. Polyphenols inside the formula are responsible for this impact. These polyphenols inhibit your body's ability to store fat from the meals you consume. The polyphenols in MetaboFix are said to inhibit the creation of new fat in the intestines, hence decreasing the amount of dietary fat storage. Instead, it is eliminated without causing considerable weight gain.

MetaboFix is promoted primarily to overweight women over the age of 45. MetaboFix might help anybody lose weight, but it is most popular among women over 45. As you age, your metabolism slows down. A sluggish metabolism causes the body to burn less calories during rest. This makes it more challenging to reduce weight. MetaboFix improves your metabolism, enabling you to reverse your age and "return to burning fat and calories at a quicker pace," according to the product's manufacturer.

### MetaboFix Components

MetaboFix comprises a multitude of substances, such as digestive enzymes, fiber, natural laxatives, tea extracts, adaptogens, antioxidants, fruit and vegetable extracts, and more.

However, the majority of MetaboFix's efficacy derives from its four "thinning polyphenols." These plant-based

polyphenols are associated with considerable weight reduction advantages.

**Thinner Polyphenol #1: Mango, Green:** In the past decade, green mango extract has been one of the most popular components in diet pills. According to the manufacturer of MetaboFix, the formula's green mango extract may lead to considerable changes in body weight, body fat percentage, body composition, and waist circumference. Additionally, it might affect cholesterol and blood sugar. MetaboFix's thinning polyphenols and other compounds include:

**Thinner Polyphenol Number Two: Aronia Berry:** Aronia berries are regarded for their high vitamin C content. In fact, it is one of the most abundant natural sources of vitamin C. According to the designer of MetaboFix, the Aronia berry used in the mix reduces body fat, blood sugar, and insulin, among other advantages. Aronia berry may also target abdominal fat in a manner not seen in other weight reduction pill components.

**Mulberry Fruit - Thinner Polyphenol No. 3** The mulberry fruit increases your metabolism, allowing you to burn more calories each day. Compared to a placebo, mulberry fruit lowered body weight by 7.9% in one research. Other

research has shown that mulberry fruit is very effective in targeting brown adipose tissue (BAT). Activating BAT is essential for weight management since BAT is associated with metabolism and calorie expenditure.

Fourth Thinner Polyphenol: Cinnamon Bark MetaboFix includes cinnamon bark, which is often found in diabetic supplements but uncommon in weight reduction products. AMPk, an enzyme that inhibits fat accumulation in cells, is regulated by cinnamon bark, according to the designer of MetaboFix. By modulating AMPk, cinnamon bark extract is said to facilitate weight loss.

Each serving of MetaboFix includes 2.1 grams of a polyphenol mixture. This mixture contains every thinning polyphenol described above. Other fruit and vegetable constituents include acai fruit extract, strawberry, grape skin extract, blueberry fruit concentrate, orange, and cantaloupe. Polyphenols are plant-based antioxidants associated with health, wellbeing, and weight reduction. MetaboFix is said to aid in weight loss by supplying your body with high quantities of these substances.

Each dose of MetaboFix includes 465mg of a metabolic combination including Shilajit. Shilajit extract is the first stated component in this metabolic combination. Shilajit

is a fungi-like material that has been utilized for millennia in traditional Ayurvedic therapy. Studies have verified the use of shilajit for energy and metabolism, and for this reason, many weight reduction products include shilajit. Some claim that it is a superfood, while others assert that it is abundant in antioxidants and other energy-boosting components.

**Tea Extracts:** MetaboFix's metabolic mix comprises numerous tea extracts, including green tea extract and white tea extract. Green tea extract is rich in antioxidants such as epigallocatechin gallate (EGCG), which multiple studies have connected to weight reduction and inflammation. Numerous individuals consume green tea extract everyday for these benefits. White tea extract functions differently from green tea extract, although various studies have also connected it to weight reduction.

MetaboFix is formulated with numerous strains of probiotic bacteria. Each serving of MetaboFix includes 3 billion CFUs of *Bifidobacterium infantis*, *Bifidobacterium longum*, *Lactobacillus rhamnosus*, *Lactobacillus reuteri* HA-188, and *Lactobacillus acidophilus*. Each strain operates in a somewhat different manner, but they have all been related to improved

digestive function, which makes it easier to lose weight in general.

Many of the plant extracts, fruits, vegetables, and other substances in MetaboFix are rich in vitamins and minerals. MetaboFix provides considerable amounts of B vitamins that are essential for energy and metabolism, including thiamin, riboflavin, niacin, vitamin B6, folate, vitamin B12, biotin, and pantothenic acid. MetaboFix also includes high concentrations of selenium and chromium, two essential minerals for good health.

**Fiber & Prebiotics:** Organic blue agave inulin, a kind of fiber that works as a prebiotic, completes the mix. As a prebiotic, inulin nourishes the probiotic bacteria in the digestive tract. It provides your probiotic bacteria with the nutrients necessary for survival and growth. Without inulin and other prebiotic fiber sources, the probiotic bacteria in your gut cannot function properly. Per serving, MetaboFix contains about 100 mg of organic blue agave inulin.

### MetaboFix Components List

MetaboFix's manufacturers provide the complete list of components and the majority of doses up front. Although the majority of components are concealed inside unique

blends, we are aware of the dose of each proprietary blend, similar to how other superfood formulations operate.

The complete list of components in each 2.8g scoop of MetaboFix is as follows:

Blend of Polyphenols (2.1g): Cherry, carrot, papaya, Aronia berry extract, green mango, mulberry fruit, European black currant fruit extract, apple, beetroot, cranberry fruit extract, acai fruit extract, strawberry, grape skin extract, blueberry fruit concentrate, pomegranate, blackberry, acerola fruit, red raspberry extract, pineapple extract, orange, cantaloupe, grape, watermelon, hibiscus, lemon

Shilajit extract, ginger root, cinnamon bark extract, green tea extract, white tea, turmeric extract, bitter melon extract, and black pepper fruit extract make up the Metabolic Blend (465mg).

Organic blue agave inulin, *B. infantis*, *B. longum*, *L. rhamnosus*, *L. reuteri* HA-188, and *L. acidophilus* make up the Digestive Blend (100mg).

MetaboFix has no further declared components than the sweetener rebaudioside A. Other superfood blends may include fillers, sugars, binders, preservatives, or other substances; however, the MetaboFix label does not identify any of them. MetaboFix contains just the components listed above, according to the product's official website.

## Can MetaboFix Help You Lose Weight Without Diet and Exercise?

The MetaboFix website stresses frequently that weight loss is possible without diets or exercise. MetaboFix should be used daily to lose 32 to 57 pounds in a short amount of time, including 3 pounds within three hours of taking the supplement.

The following are some of the weight reduction promises made by Metabo-Fix.com:

Within the first few hours of using MetaboFix, a lady shed 3 lbs.

Without hard diets or exercise, the lady dropped a total of 32 pounds and four pant sizes, shedding a total of 10 pounds in the next 10 days.

Another lady reports that using MetaboFix alone helped her lose 57 pounds.

Losing between 32 and 57 pounds is essential for every diet. Metabo-Fix.com, however, asserts that you may drop this amount of weight without eating or exercise.

What is the MetaboFix price?

MetaboFix is available solely via Metabo-Fix.com, where each bottle costs \$70. By purchasing six bottles, the price per bottle may be reduced to \$39 per bottle.

Each MetaboFix bottle has 30 servings (30 scoops). The manufacturer suggests one scoop each day for weight reduction; thus, each tub should last around one month.

1 Bottle of MetaboFix is \$69 plus \$9.95 Three MetaboFix bottles are sent for \$147 plus \$9.95. Shipping Six Bottles of MetaboFix: \$234 plus \$9.95

According to Metabo-Fix.com, a lady who took the solution dropped a large amount of weight within three hours.

Included Extras with MetaboFix

When you purchase MetaboFix now, you will get a bundle of weight loss-enhancing extra goods, including:

7-Day Rapid Fat Burning Protocol: This e-book instructs the reader on how to quickly burn fat in only seven days.

In the next days, you can supposedly burn a large quantity of fat by executing the protocol's suggested alterations. In fact, the book asserts that it is possible to lose weight while eating pizza, ice cream, and cheeseburgers.

**12-Hour Flat Stomach Detox:** Numerous individuals suffer with abdominal fat. It is tenacious and tough to defeat. This eBook shows you how to cleanse your stomach and burn belly fat in only 12 hours, without fasting or drinking odd juices.

**30 Fat-Burning Bedtime Sweets** is an e-book including recipes for fat-burning desserts. The author of the e-book suggests consuming these sweets before night to aid with weight loss. According to the author, it is possible to lose weight while consuming meals such as triple chocolate ice cream, chocolate chip cookies, and lava cake.

**Can I Receive a MetaboFix Refund?**

MetaboFix is supported by a 60-day refund guarantee. Within sixty days of purchase, you may request a full refund with no questions asked.

You are entitled to a full refund if you are dissatisfied with the results of MetaboFix or if you did not lose a

considerable amount of weight during the first two months of use.

### The Gold Vida

MetaboFix is manufactured by the firm Gold Vida. Gold Vida has its headquarters in London, Ontario, Canada. Metabo-Fix.com states that the solution was created by a guy in collaboration with a physician. This weight reduction method was based on an extract of West African herbs (African mango).

You may reach Gold Vida and the MetaboFix team via the following methods:

Email: [support@goldvida.com](mailto:support@goldvida.com)

Gold Vida is also well-known for producing nutritional supplements such as CarboFix, a weight control solution that supports blood sugar and blood pressure.

### Conclusion

MetaboFix is a weight reduction supplement that comes in powder form. Supposedly, the solution may boost your metabolism, making weight loss simpler.
