Sets alerts so you know what's happening at the exact right moment

It's like having the right teammate
on site at the exact right time —
no matter where it is.

Stronger Site-wide Security:

Spots risks in real-time while optional talk-down audio hardware can stop intruders in their footsteps.

Uses motion detection
to identify trespassers

Deters intruders with
alarms and strobes

Collaborates with
emergency responders

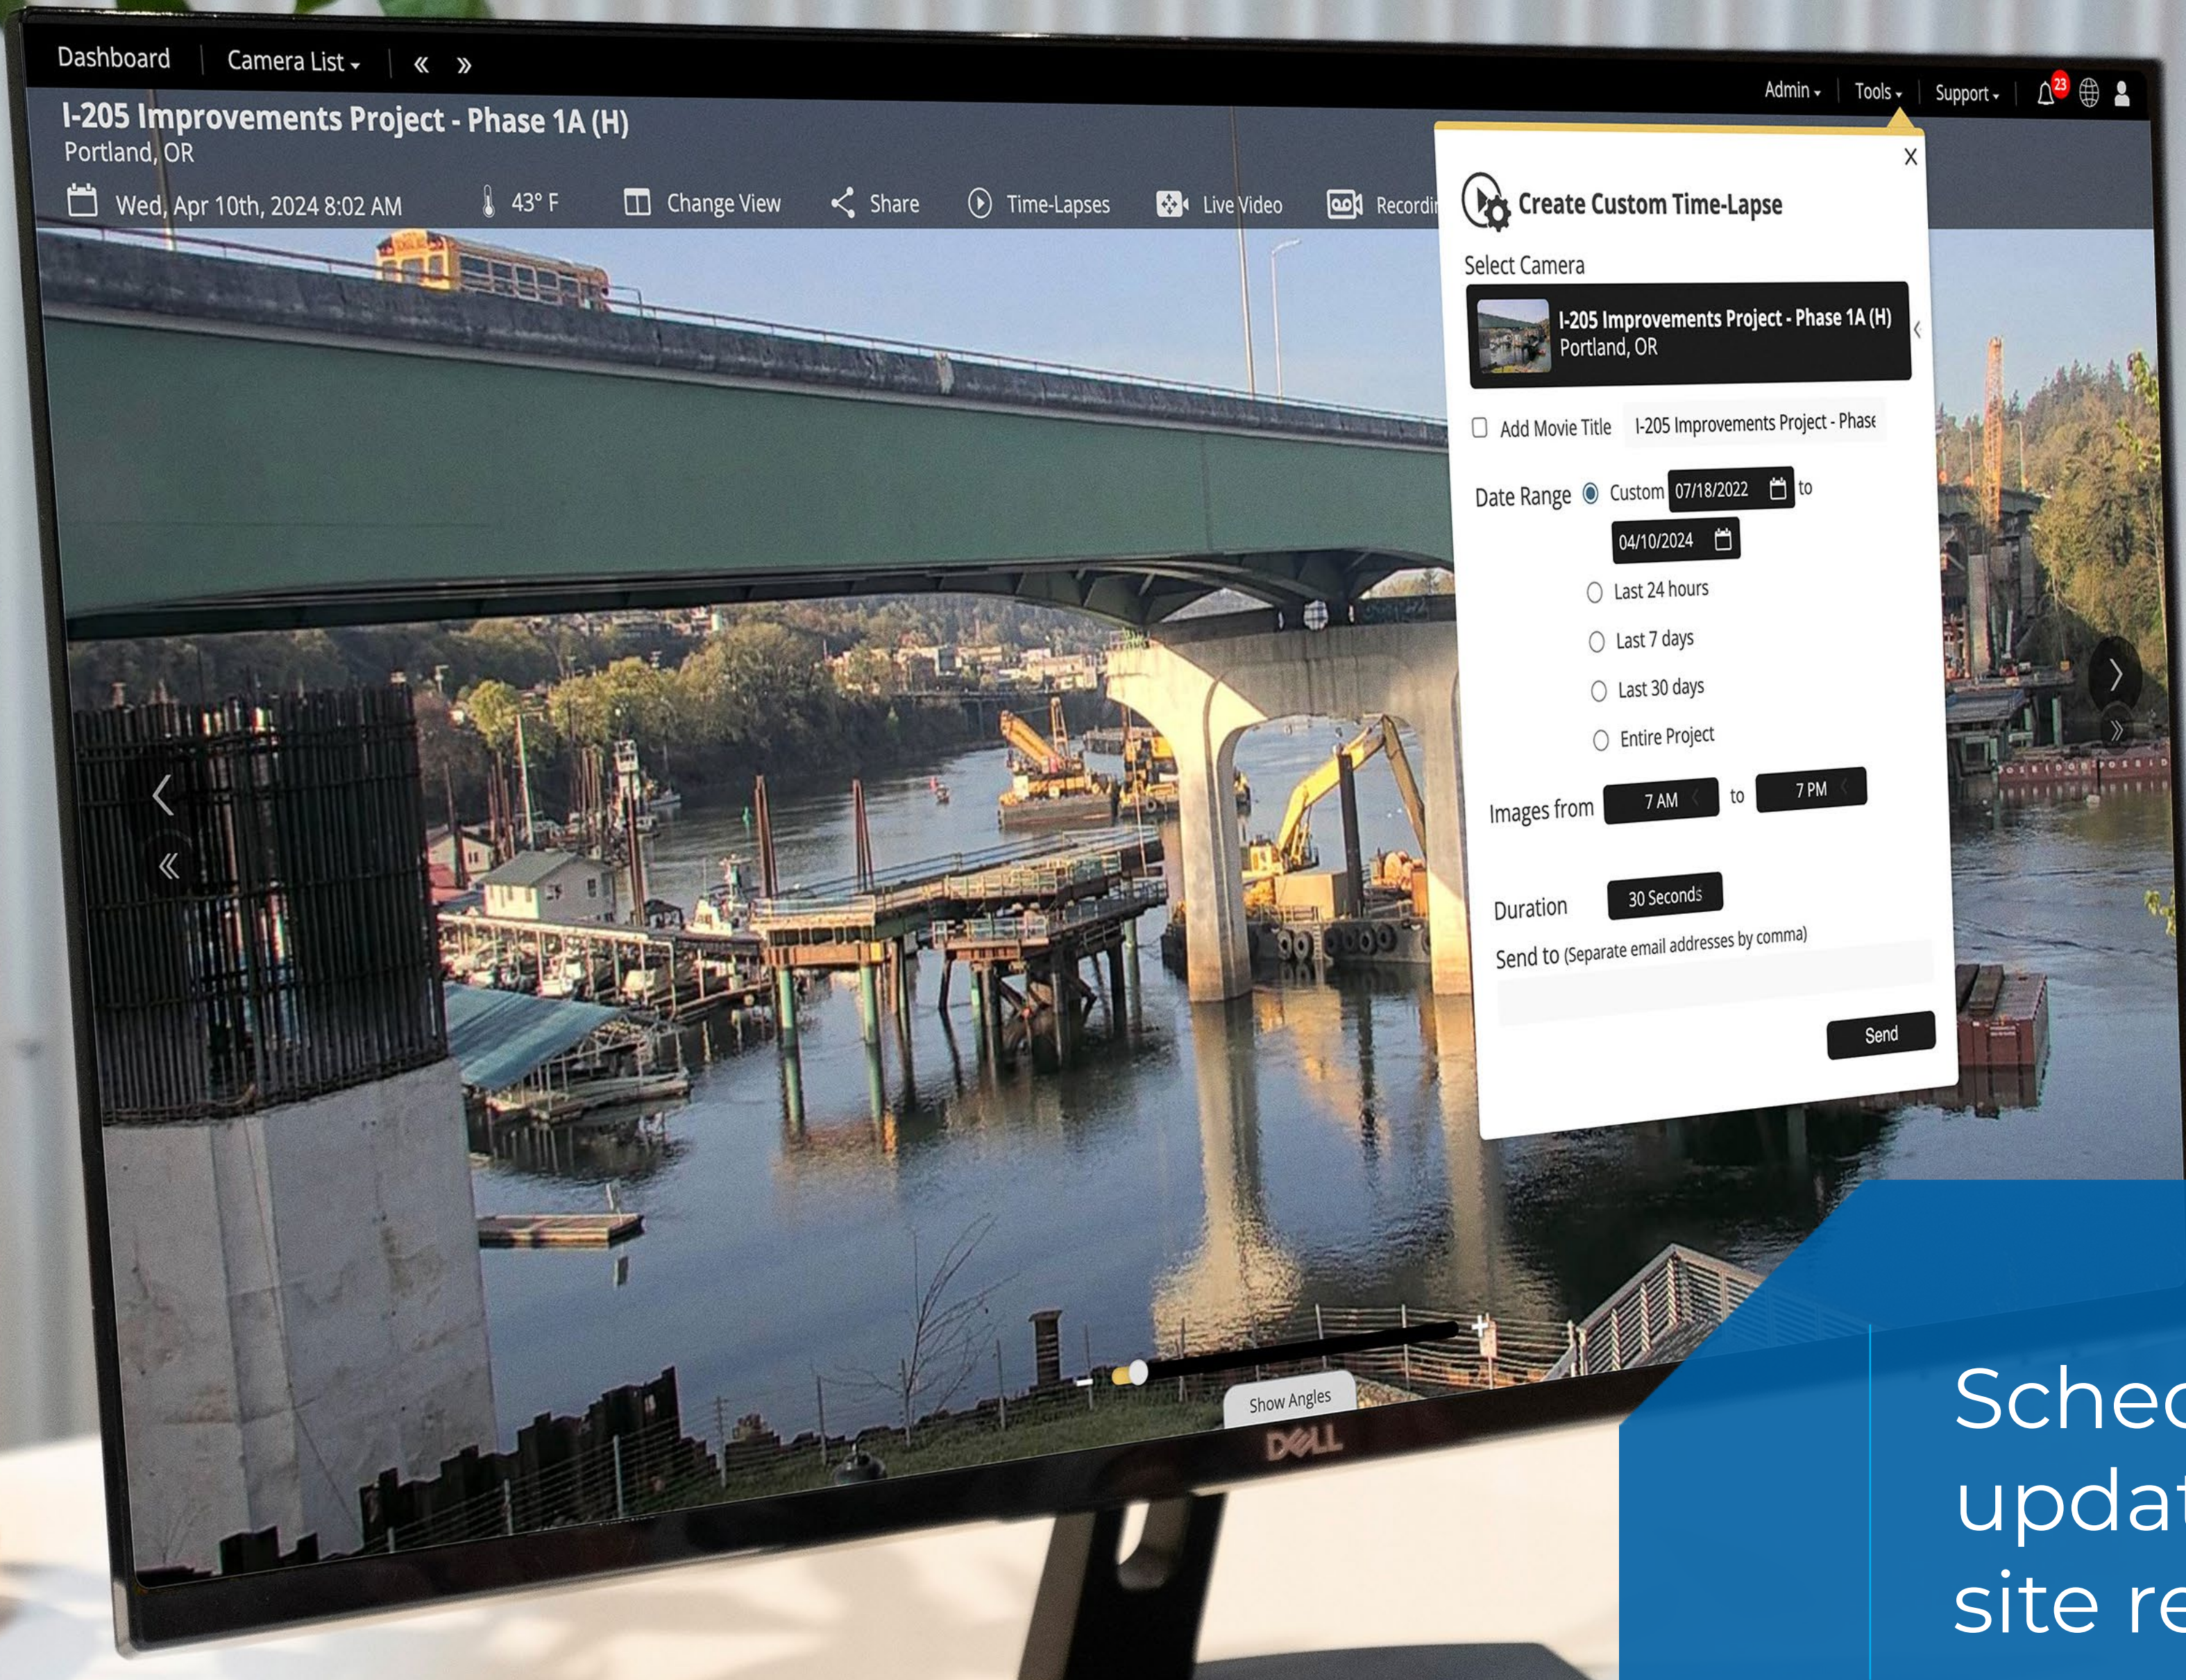

It's like having a reliable security guard that never needs to take a break.

Clearer Communication and Collaboration:
Shares insight and updates on project progress
using artificial intelligence and time-lapses.

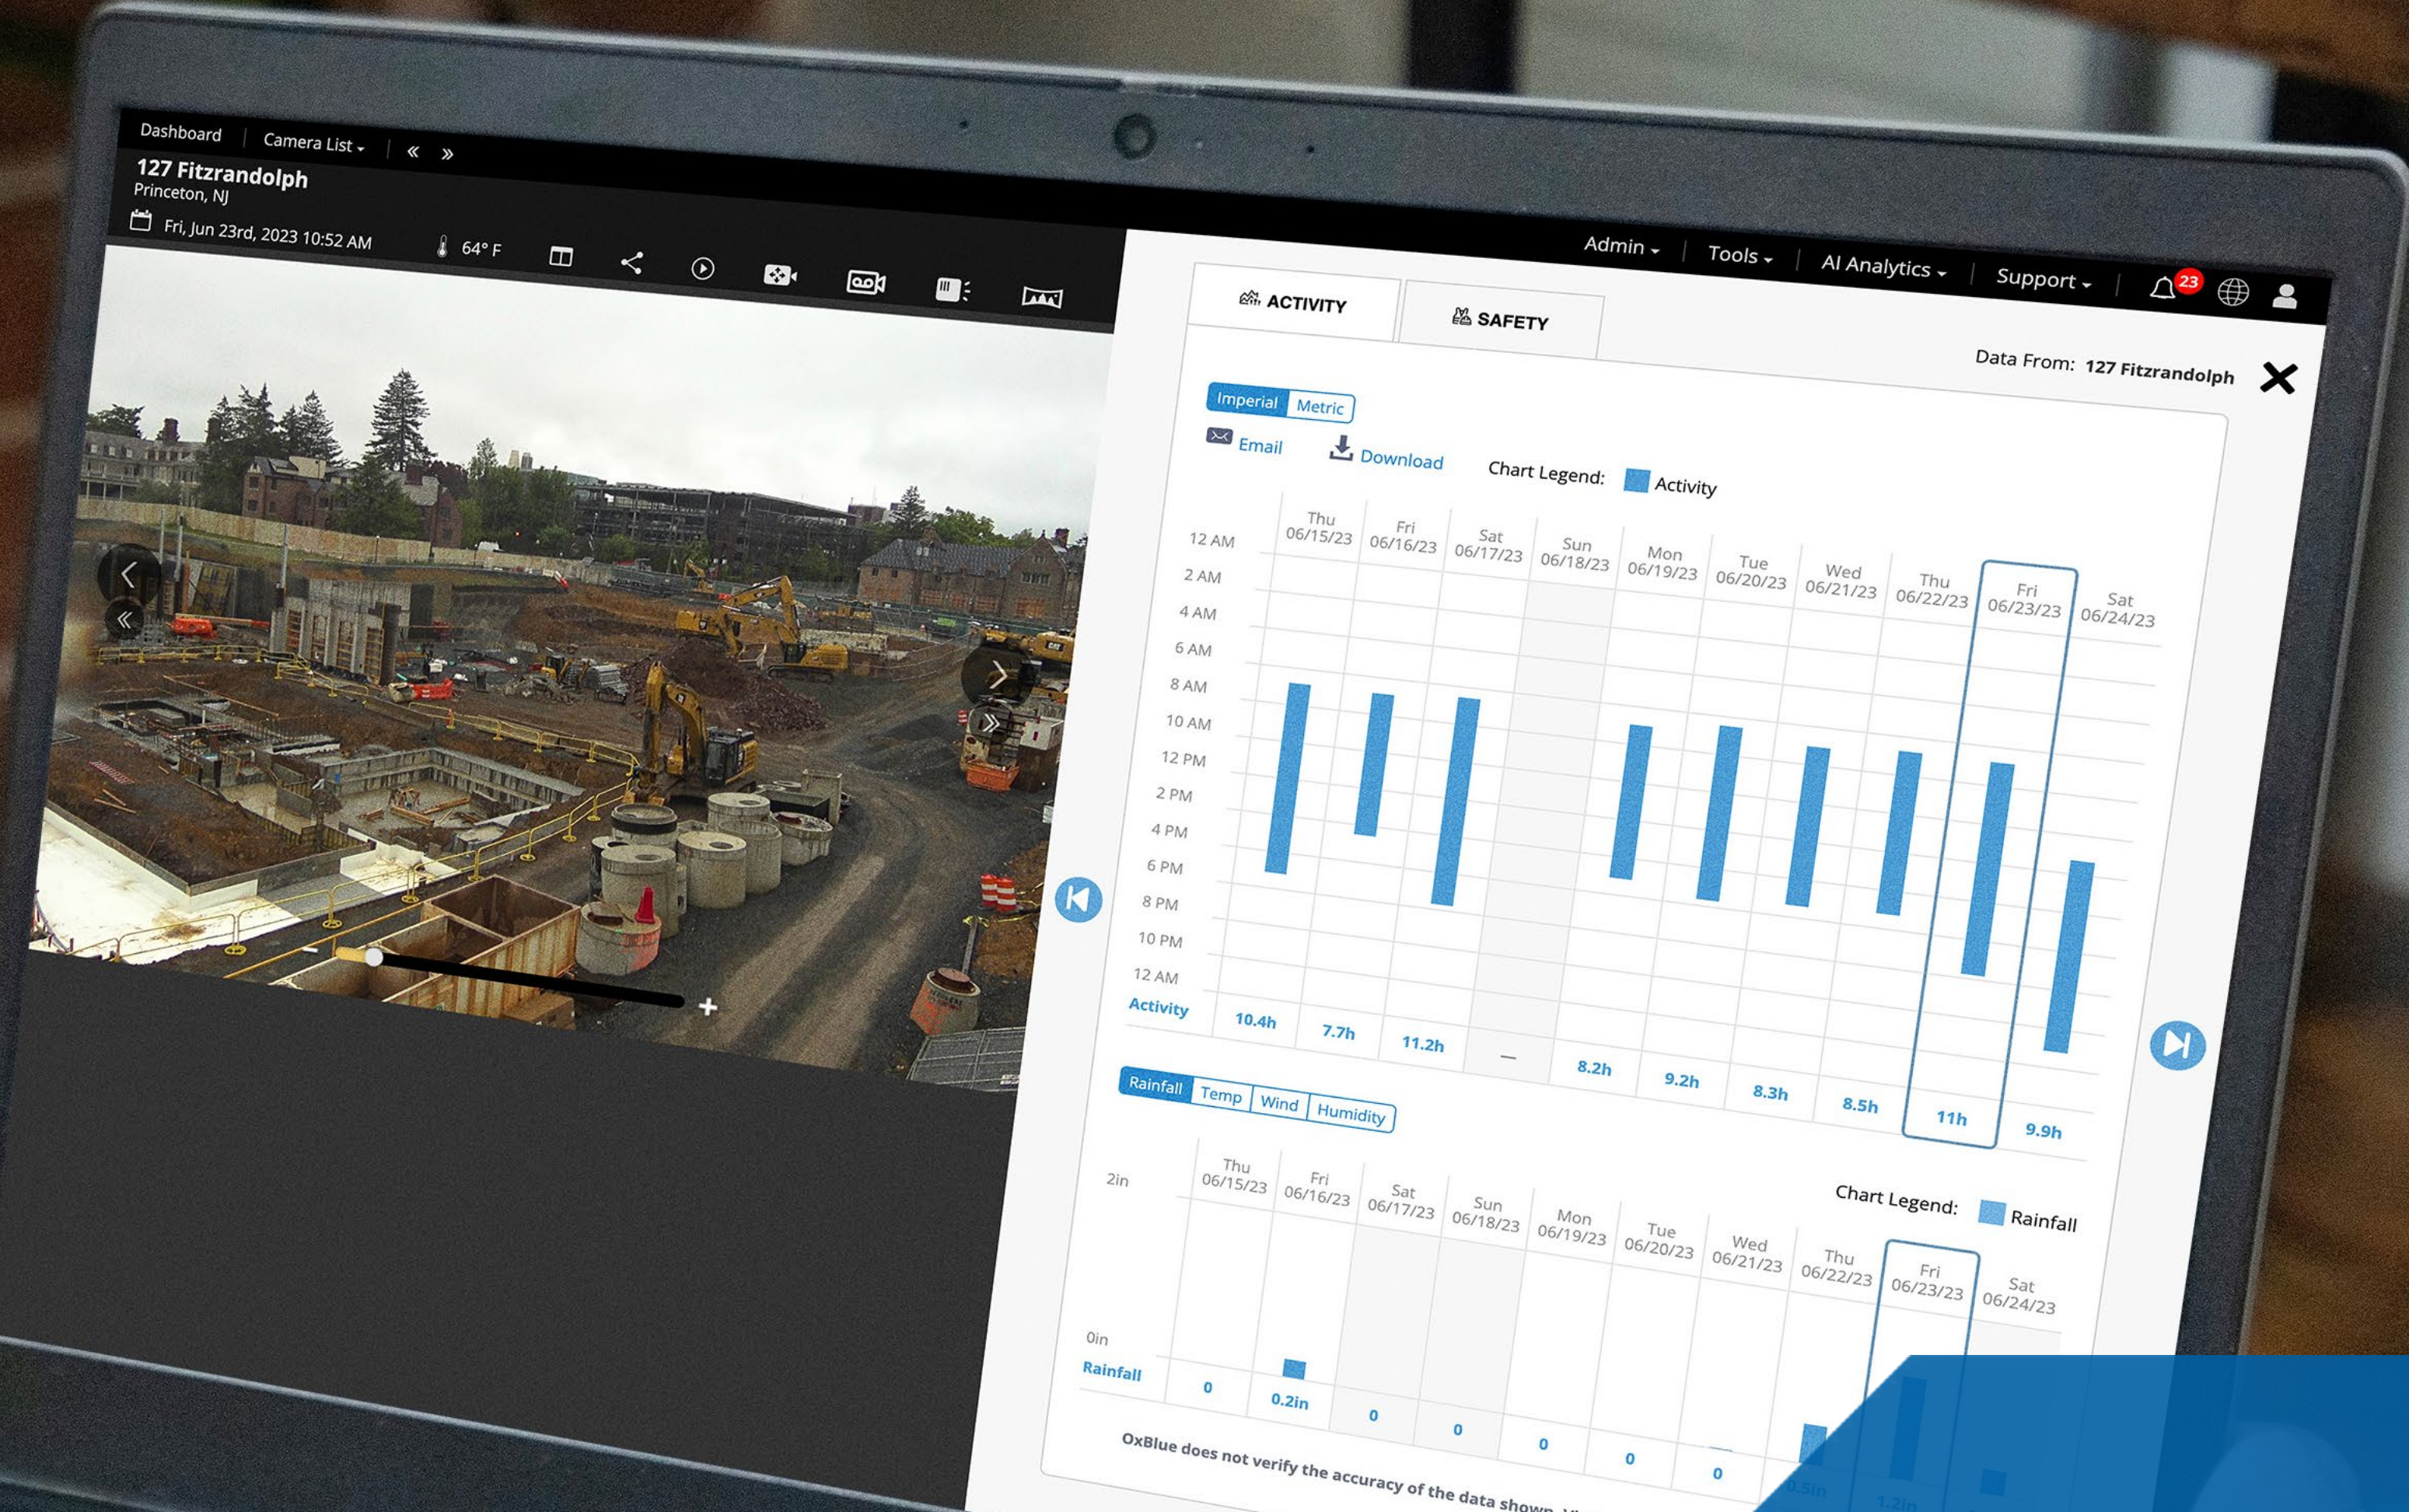

Keeps all parties
up-to-date

Schedules routine updates for quick site reviews

Gathers data on activity, weather and safety compliance

It's like having an assistant who always knows how to make you look good in meetings.
