Defensehere is an online defense industry media platform that publishes in 5 languages: English, Arabic, Turkish, Russian, and Ukrainian.

This is the sixth issue of Defensehere Magazine. Defensehere Magazine is not a periodical, it is published exclusively for trade fairs. Each issue is prepared in two languages, one in English and the other in the language of the country where the fair is held. This magazine is distributed to the stands of all companies participating in the fair and given to the civilian and military delegations coming to the fair.

The fifth issue, published in English and Arabic, was distributed at the World Defense Show held in Riyadh, the capital of Saudi Arabia, on 04 – 08 February 2024.

The digital format of Defensehere magazine, which aims to contribute to the business development and marketing of defense industry companies, is also sent to more than 5000 defense industry employees in more than 50 countries by e-mail.

CANiK

CANiK, the world's leading manufacturer of light and medium caliber weapons, kicked off 2024 with a giant launch. CANiK will be exhibiting at the world's largest and most comprehensive fairs throughout the year.

CANiK entered 2024 with an important partnership. CANiK's new specially designed weapon, the TTI Combat, will now be the go-to weapon for Hollywood celebrities.

CANiK introduced its new specially designed weapon CANiK TTI Combat, produced in cooperation with Taran Tactical Innovations (TTI). Taran Butler, the founder of Taran Tactical Innovations (TTI), is one of the world's most famous gun designers and shooters, who is also the shooting instructor of Hollywood celebrities and leading actors in many masterpieces, such as the John Wick movie. Dubbed CANiK's next evolution in the firearms family, the TTI Combat, was developed in collaboration with CANiK R&D, Taran Butler and the TTI team. Taran Butler is a globally recognized firearms instructor and professional competition shooter, known for his exceptional skills in gun handling and tactical training. Taran Butler has also made many contributions to the entertainment industry, training a long list of writers, producers and actors including Keanu Reeves, Halle Berry and Will Smith. Taran's expertise has brought realistic gunplay to the big screen worldwide. Leveraging Taran's knowledge and experience, CANiK has partnered with Taran Tactical Innovation to bring this groundbreaking pistol to market. Thus, the TTI Combat will be the choice of actors in Hollywood's leading movies in the near future.

Featuring an all-new polymer frame designed by Taran Butler, the TTI Combat brings a one of a kind performance package to the CANiK series. This sleek design is built by the best, for the best and includes all the features a world champion like Taran Butler needs for success. The TTI Combat features; a unique aggressive grip texture both internally and externally, a fast compensator compatible barrel, CANiK patented quick-attach stabilizer (compressor), 90-degree break trigger with diamond-cut flat face, TTI +3 magazine base pads, aggressive-finish slide retainer, a TTI holster with adjustable compression force, a waterproof carrying case and an optical mount that allows the low profile attachment of many brands of reflex sights such as Trijicon SRO as well as the MECANIK optics series.

“TTI Combat will create a serious value for our country”

Cahit Utku Aral, General Manager of CANiK, said: “As CANiK, we are proud to be one of the three companies that export the most to the USA, which keeps its fingers on the pulse of the world arms industry. We continue to lead the industry with our investments in the USA and our products, for which we receive awards every year.

With CANiK TTI Combat, which we developed in cooperation with Taran Butler, the leading name in Hollywood productions, and the TTI team, we are bringing together CANiK’s performance, superior technology, quality and high production capacity with a brand in the upper segment of the special design pistol market. Instead of the TP9 Elite Combat model, which we developed with Salient Arms International, which has achieved great success in the past, we are now offering the TTI Combat, which we developed with Taran, for the use of shooters.

In addition, thanks to the prestigious position of the TTI brand in Hollywood projects, we will contribute to promoting the already proven quality of our products to a wider audience by ensuring that CANiK products are featured more in Hollywood projects. This gun, which bears the signature of Taran, one of the world-renowned designers and shooters, will be available not only in the US but all over the world.

With this partnership, our company, which is the 5th largest pistol manufacturer in the world today, will improve its position. Thank you for supporting us in this exciting process.”

SPECIFICATION

Weight	29.3 oz / 831.2 g
Caliber	9x19
Magazine Cap.	18 Rounds
Barrel Length (MM/INCH)	4.6 in / 116.8 mm
Length	7.85 in / 199.3 mm
Height	5.87 in / 149.3 mm
Width	1.41 in / 36 mm
Firing System	Semi-Auto Striker Fired
Safety System	Firing pin block / Trigger Safety

TURAÇ

Turaç, the first private sector ammunition production factory in Türkiye, has become an international manufacturer of both firearm ammunition and shotgun shells. Turaç rose to fame not only by producing cartridges in known calibers and diameters, but also with the products it has developed through its own R&D studies.

Aiming to increase its market share in the world with new product innovations, Turaç has been receiving positive results from the R&D studies it has carried out under the Sterling brand in recent years and stands out in the market with unique products:

9x19 mm shiny surfaced steel cartridge known as being "Indispensable for Target Practice" 12-caliber Anti-Drone shells which have become increasingly important in recent years "Mini Slug" with a special 50 mm long sleeve that allows the magazine to hold more cartridges in semi-automatic and pump-action rifles, for hunting and shooting.

.45 ACP and 7.65x17 mm Browning cartridges, developed especially in line with the demands of professional shooters and gun enthusiasts, can be counted as some of them.

The primary strategical goal of Turaç is to make the Sterling brand famous for its quality and reliability in the international military and civilian markets. Turaç produces all its products in its own facilities, has them tested in modern labs and closely follows the delivery process to the customers whose feedback is meticulously evaluated.

Turaç continues to increase its production capacity and its market share in domestic and international markets while continuing to present its wide range of products at international fairs non-stop.

In addition to exporting to 94 countries, Turaç also participates in fairs in these countries, and its last stop will be the World Defense Show 2024, which will be held in Saudi Arabia.

Turaç will exhibit the products of its Sterling, Kaiser and V-Sport brands in the seven international fairs in the field of military and hunting it will participate in 2024.

HUGLU

The Ovis G2: The Next Generation of Bolt Action

The Ovis G2 is a bolt-action hunting rifle from Huglu, a Turkish firearms manufacturer with a long history of producing quality shotguns and rifles. The Ovis G2 is designed to be a versatile and accurate rifle that is suitable for a variety of hunting applications.

Features

The Ovis G2 has a number of features that make it a desirable choice for hunters. These features include:

- A sub-MOA accuracy guarantee, which means that the rifle is capable of shooting groups of less than 1 inch at 100 yards.
- A 20-inch barrel, which makes the rifle lightweight and easy to maneuver in the field.
- A 1/10" twist rate, which is ideal for stabilizing heavier bullets.
- A 3+1 or 5+1 magazine capacity, which gives the hunter multiple shots on target.
- A Turkish walnut and polymer stock, which is both attractive and durable.

Performance

The Ovis G2 is a capable hunting rifle that is accurate and reliable. The rifle's sub-MOA accuracy makes it ideal for long-range shooting, while its lightweight and maneuverable design make it well-suited for hunting in close quarters. The Ovis G2 is also a versatile rifle that can be used for a variety of hunting applications, from varmint hunting to big game hunting.

Conclusion

The Ovis G2 is an excellent choice for hunters who are looking for a rifle that is accurate, reliable, and versatile. The rifle's sub-MOA accuracy and lightweight design make it a well-rounded rifle that is suitable for a variety of hunting applications.

TISAŞ

TISAŞ Exhibits New Products in Europe

TISAŞ, one of Türkiye's and the world's leading small arms manufacturers, is exhibiting three new models that it has developed and plans to offer to professionals for the first time in Europe at the EnforceTac exhibition.

Pioneering innovations in the sector with its thirty-two years of know-how and experience, TISAŞ is presenting its activities for 2024 to users in Germany this time. Ahmet ALEMDAROĞLU, Chairman of the Board, gave information on the subject: "The defense industry in our country has a very dynamic structure. Well-established companies can easily offer solutions to many problems that professionals need with their know-how. As TISAŞ, we are proud to take part in this structure. Through our partnerships, we identify the needs of law enforcement officers on site and try to offer them permanent solutions. We combine our experience with our technological infrastructure, capabilities and capabilities to offer innovative products to users. In this context, our three new pistol models in the 9x19 mm category, developed by our R&D center, with polymer (hybrid)

barrels and double-row magazine feed, are taking part in both the EnforceTac exhibition for law enforcement agencies and the IWA Outdoor Classic exhibition, one of the largest trade fairs in Europe, which is attended by individual users. Following our launch in the USA last month, we will be exhibiting these products for the first time in Europe. I think that our new products will create awareness in this respect and there will be an intense interest in our new products as in the USA."

Export is the way to growth

Stating that they export to more than 60 countries, Alemdaroğlu said, "90% of our production line is export-oriented. In this field, we respond to the needs of both law enforcement agencies and individual users. We are carrying out different projects to achieve the same success in Infantry Rifles as we have achieved in pistols. I am confident that in 2024, we will achieve a higher sales value in the infantry rifle, as in the pistol, and that we will offer solutions to the needs of many law enforcement agencies. In addition to this, we are planning to offer our new products, which we are working on in a similar class, to the use of our law enforcement agencies in a short time. Thus, TİSAŞ will become a structure that can offer more solutions especially for law enforcement forces."

PX-9 Gen.3 pistol for Turkish Law Enforcement

Stating that they recently signed an agreement with the Turkish Ministry of National Defense for the supply of pistols, Ahmet ALEMDAROĞLU said, "Within the scope of the contract, we will meet the 9x19 mm semi-automatic Forces Command for three years and the Air Force Command for five years with our PX-9 Gen.3 model. We will soon make the first delivery of this model, which has successfully passed the challenging firing tests within the scope of NATO standards and is in the inventories of many countries. This model in our inventory is a product that can easily meet all the needs of our law enforcement agencies, with which we have been cooperating for many years. In addition, we are nearing the end of two different projects that we are carrying

out especially in the Asian region. Our PX-9 Carry model, which we plan to offer to the use of the Police Organization, has attracted a lot of interest from the Institution thanks to its compact size and ergonomic grip structure. I hope that we will receive good news from this project in the very near future. Thus, we will offer our PX-9 Carry model to the use of the police organization in this region."

DERYA ARMS

DERYA WEAPON INDUSTRY AND TRADE LIMITED COMPANY

We're excited to announce our presence at the prestigious ENFORCE TAC taking place from 26 February to 28 February. Find us at Hall 8, Booth Number 8-425, where we'll be showcasing our latest firearms. Also, join us at IWA OutdoorClassics 2024, taking place from 29 February to 3 March. Find us at Hall 3, Booth Number 3-531, where we'll be showcasing our cutting-edge products. Don't miss the chance to explore our offerings and meet our team.

We will present our rifle models, which we have produced for the development and growth of our country's defense industry, to visitors from all over the world in the best way possible.

In particular, we will present our ZY9 pistol/rifle models, which we started producing and exporting in 2022, and our DY9 pistol models, which we started to produce in 2023, to our visitors.

With our visionary approach and quality R&D team, we continue to launch our new products to the market unabated.

In this context, we started exporting our newest product, the TM22 .22LR Feather model, as of 2023 and we continue mass production.

As of now, with a monthly production capacity of thirty thousand, we are exporting to more than 78 countries of the world. We will continue to produce without compromising our quality.

We have already started our preparations intensively for domestic and international fairs related to our industry for the year 2024.

We are very pleased with the contributions we have made to our country's economy and defense industry.

SARSILMAZ

MACHINE GUN FAMILY

SAR 127 MT AIR

SAR 127 MT Air is a version of the SAR 127 MT which is entirely designed and developed by Sarsilmaz and characterized as Türkiye's largest caliber weapon. SAR 127 MT Air is developed and produced with local and national resources to be integrated into aircrafts, and was designed to provide powerful airborne firing support with range of up to 7 km and effective 1.8 km. This 12.7 x 99 millimeter caliber, NATO-standard gun is mounted on the Hürkuş-C in a special pod developed by TR Mekantronik, which was established in partnership with Sarsilmaz-TUSAŞ. SAR 127 MT Air incorporates higher shooting capacity compared to the surface version thanks to its fixed barrel equipped with rapid cooling elements and lightened inner parts. SAR 127 MT Air is capable of firing 900-1250 shots per minute (ammunition belt) feeding system.

Caliber: 12.7x99 mm
 Firing Mode: Full Auto
 Muzzle Velocity: 890 m/s
 Total Length: 1610 mm (63.3")
 Unloaded Weapon Weight: 33000 gr

SAR 15T

SAR 15T, one of the latest models of Sarsilmaz, is a 100 percent locally produced version of the AK-47 platform, a legend in the field of military weapons.

SAR 15T, whose receiver cover and upper and lower forends have been modernized with Picatinny rails, is in the inventory of the Turkish Armed Forces.

SAR 15T stands out as a much lighter infantry rifle while featuring a modern design with its high-strength polymer magazine, buttstock and forend reinforced with steel parts.

Caliber: 7.62x39 mm
 Firing Mode: Single and continuous shot
 Effective range: 600 – 1000m

With its 5-staged folding stock and superior performance in all climatic conditions, the SAR 15T provides the user with a comfortable experience. With a 7.62x39 mm caliber, this legendary assault rifle offers single and serial firing options with a gas piston driven system.

SAR 556 MT

The SAR 556 light machine gun, one of SARSILMAZ's latest products, is designed for use by special forces as well as infantry squads in residential areas. The SAR 556 light machine gun, which uses NATO standard 5.56 mm rounds, has the technical capabilities to meet requirements in various conditions, whether on the front line or in residential areas.

Caliber: 5.56x45 mm
 Firing Mode: Safe, Single, Serial Shot
 Effective range: 600 – 1000m

SAR 127 MT

The heavy machine gun SAR 127 MT, which is manufactured to provide the strong fire support needed in the combat environment, has the ability to operate fully automatically and fire one by one.

The weapon can also be easily adapted to the structure of the remote controlled systems in which it is integrated or the position where it is placed, thanks to the ammunition supply, which can be made from the right or left.

The effective range of SAR 127 MT series, which can be mounted on land, sea and air vehicles by making the necessary interface connections and weighs approximately 38 kilograms, can reach 1.830m, while its maximum range reaches 6.764 m.

Caliber: 12.7x99 mm (50 QCB)
Bullet Capacity: Ammunition Belt
Unloaded Weapon Weight: 38100 gr
Rate of Fire: 600 shots/min
Muzzle Velocity: 930m/s (±50mm)

SAR 762 MT

The family of 7.62 mm SAR 762 MT machine guns, all five versions of which were qualified at the same time, entered the service of the Turkish Security Forces and Armed Forces as well as the Special Forces Command. These guns can be integrated into remote-controlled gun turrets and 4x4 armored tactical vehicles. There are five different versions of the SAR 762 MT: A, B, C, D, and E. The SAR 762 MT-A can be used with remote-controlled weapon turrets. The SAR 762 MT-B is designed for use by the infantry and is mounted on a bipod or tripod. The SAR 762 MT-C is designed for use as a coaxial machine gun on both wheeled and tracked armored vehicles. The rate of fire of the SAR 762 MT-D, which has features similar to the SAR 762 MT-B, can be controlled by its a three-position gas regulator. The latest version in the series, the "SAR 762 MT-E", can be used onboard naval platforms thanks to its corrosion-resistant structure.

Caliber: 7.62x51 mm
Accuracy life: 25000 rounds
Effective range: 800m
Maximum range: 3725m

VAV WEAR

VAV WEAR is a brand with 20 years of experience in textile production and military clothing. It is established to use this experience in the domestic and international markets, to make a name for itself with its quality to the customer base who prefer outdoor and tactical clothing, and to be the best in this field.

Our main goal is to make a difference in all components used in the products. This difference is embodied in the final product with the final form of the product with quality, high-level raw materials, modern-day technological innovations, R&D studies, design studies at every stage, starting from the yarn of the products to the dye group used in the fabric and from design to sewing.

With the approval of professional users, we bring all our products to you, our valuable customers who love outdoor and tactical wear.

Our goal is to improve further every day, to gain the love and appreciation of our valued customers, to be known worldwide and to be at the top of the field.

For this, we strive to participate in all exhibitions held at home and abroad. We are also a participant of the IWA OUTDOOR CLASSICS 2024, which stands out among such events. We are happy to exhibit our locally produced products at this exhibition which we have been participating in for the last 3 years and where we have met with great interest. It is a source of pride for us to represent our country in such a difficult field in the international arena.

We have never compromised in our effort to take our quality to the next level. All materials used in our products, from fabrics to yarns, are carefully selected for quality and long-lasting use due to the nature of our products. Our facility has a fully integrated structure that covers yarn, weaving, dyeing and finally garment. We also have stores in Istanbul and Ankara.

VAV WEAR has had an ever-increasing momentum since its launch. In the first place, it proved itself in domestic sales, and then reached serious export figures in a short time. Today, its products have become a preferred brand in more than 10 countries and receive very good feedback from its customers.

VAV WEAR has a wide range of products from tactical wear to outdoor wear, from tactical bags in different sizes to assault vests, from casual t-shirts to ski sportswear. Also, tactical shirts, pants, jackets, fleece jackets and much more.

As ATA,
we are the leader of firearms production and exporter in Türkiye for more than 60 years.

We are proud of exporting many firearms that we have pioneered in the sector to more than 70 countries in different parts of the world and raising a Turkish brand to this success in the international market.

Since our foundation in 1955, we have always been a guide in the firearms sector. We produced the first side-by-side (1967), the first over & under (1973), the first semi-automatic shotguns (1992), the first bolt-action hunting rifle (2015), the first multi caliber sniper rifle (2019) in Türkiye and led up the industry.

In addition, since 2008 we have produced the famous American rifle brand Weatherby SA-08, Orion and Element. The Element model won the NRA Golden Bullseye Awards in 2016.

After obtaining rifle production permit, our company started to operate in the field of defense industry and produced the main parts of national rifle MPT 76 model and immediately pressed the button for the production of sniper rifle and assault rifle.

In the same period, our grenade launcher project speeded up and in 2018 we won the tender of the Defense Industry Presidency. ATA, which produces semi-automatic rifle to the Turkish Land Forces and semi-automatic rifle to the Turkish Naval Forces, also delivered to the armed forces of countries such as Georgia, Bahrain, Kazakhstan and Egypt.

ATA now shows up in several defense industry exhibitions both in Türkiye and abroad.

In the near future, we aim to produce for the armed forces of many countries in the world and has begun to take steps for this goal rapidly.

TURQUA

First Bolt Action Rifle of Türkiye

After the first Side by Side, Over and Under and Semi-Automatic Shotgun of Türkiye, ATA now proudly presents the First Bolt Action Rifle of Türkiye: TURQUA

The 100% Turkish-made TURQUATM is another engineering innovation from Türkiye’s leading firearms manufacturer.

TURQUATM is distinguished from the other bolt actions rifles with its 3-stage safety and 2-stage adjustable trigger. TURQUATM’s 60-degree bolt lift is shorter (compared to typical 90-degree bolt throw) that allows faster loading on follow-up shots. The free-floating feature maintains barrel to stock spacing for consistent accuracy.

SUB MOA is guaranteed with this button-rifled barrel. The ergonomic stock made of selected Turkish Walnut is designed for accurate and comfortable shooting.

All these features make TURQUA one of the best value on the global market.

CALIBER (TWIST RATE)	.308 Win (1:11") / .243 Win (1:10") / 6.5 Creedmoor (1:8") / 30.06 Spring. (1:10") / 270 Win (1:10")

GİRSAN

The MC P35

Giresun-based Turkish arms manufacturer GİRSAN FIREARMS crowned its export success in the USA, one of the world's largest civilian arms markets, with an award. The YAVUZ 14 / MC P35 model pistol was selected as the best pistol of the year 2024, winning the American Rifleman Golden Bullseye Award, which has been organized for 22 years and awarded by the National Rifle Association's (NRA) respected juries. GİRSAN FIREARMS, which proved its success by winning this award, which has great prestige worldwide, also became the first Turkish company to receive this award.

The MC P35 with 9x19 mm caliber, 840 gram weight and 15-round magazine was deemed worthy of this award by NRA juries for its quality, ergonomics, innovation and performance. The MC P35 is also the successor to the legendary P35 model designed by John Browning in 1922. GİRSAN FIREARMS has brought this model, which has been a favorite of enthusiasts for more than a century, back to the world with a modern approach while preserving its classic lines and distinctive features. With this award, MC P35 has surpassed industry standards and surpassed its world giant competitors, while also setting a new standard for excellence in firearms production.

Commenting on the award, Veysel Cürgül, Chairman of the Board of Directors of GİRSAN FIREARMS, said: "This success has gone down in history as an important milestone not only for GİRSAN FIREARMS and our export brand GİRSAN, but also for the entire Turkish defense industry sector. This award, which we won thanks to our company's commitment to excellence and innovation, has once again confirmed our strength in the global market. While we are proud to win this award for the first time for Türkiye, leaving the world's leading arms manufacturers behind, we are also excited to bring the legendary pistol GİRSAN, which has been proudly used by our glorious Turkish army and police for years, back to the users in our country with its renewed model range."

GİRSAN FIREARMS exports its products to 55 countries under the name of GİRSAN and is the official supplier of the armed forces of many countries. GİRSAN FIREARMS, which is also an official supplier of the Turkish Armed Forces, is bringing the legendary GİRSAN pistols of a period back to Turkish users with a modern understanding.

GİRSAN FIREARMS, which established a new production base in Giresun with an investment of 10 million dollars, increased its production capacity and accelerated its R&D activities. GİRSAN FIREARMS, which has modernized GİRSAN weapons, which have become legendary for their high firing performance and trouble-free use in the Turkish Armed Forces and law enforcement agencies for many years, by equipping them with the latest technologies, is on its way to becoming the leader of the sector again with more than 30 years of experience in weapon manufacturing.

The product range of the company, which has been producing domestic and national pistols since 1994, includes iconic pistol models such as YAVUZ-16, YAVUZ-1911, YAVUZ-14, YAVUZ-9, as well as shotguns such as the MC-312. The company's products are offered for sale by MKE in Türkiye.

LARGE ROBOTİK

Sealing Machine

The primer pocket and case sealing machine utilize a sophisticated system, integrating servo motor and pneumatic controls. This system facilitates the injection of sealing liquid into the primer pocket and case, which are positioned on the feeding conveyor by the operator within a rotational feeder.

The operator feeds the casings to the feeding conveyor which moves upwards and discharges the loaded casings into the rotational feeder. With the rotation of the rotational feeder, the casings go up and fall into the ring lines. The fill rate of the rotational feeder is checked by the sensor inside. If the line is filled; the line is closed with the help of blowers. The casings passing through the ring line descend to the feeder actuator.

The feeder actuator brings the casings to a position suitable for lacquering to be pushed into the rotating tambour by the casing slider piston and while in this position, the casing inserter piston pushes the casings into the rotating tambour.

After the casings are inserted into the rotating tambour, the casing sensors check the casings, and the tambour rotates 1 turn. Then sealing liquid is injected into the primer pocket and mouth of the casings. After completing the round, the casings are pushed down towards the exit conveyor with the help of the casing unloader piston. Fans on the top of the conveyor allow the sealing liquid injected into the casings to dry. The dried casings fall from the end of the exit conveyor.

Installed Power	3 kW
Air Consumption	6 bar
Lacquering Tank Quantity	9 x 19mm, 5.56mm, 7.62mm: 6 pcs 12.7mm: 4pcs
Suitable For	9 x 19 mm, 5.56 mm, 7.62 mm, 12.7 mm

Production Speed

Description	Capacity (Quantity/Minute)
9 x 19 mm casing	180 pcs
5.56 x 45 mm casing	150 pcs
7.62 x 51 mm casing	150 pcs
12.7 x 99 mm casing	60 pcs

Optical Inspection Machine

An ammunition optical inspection machine utilizes advanced optical technologies, it conducts visual inspections, precise dimensional analyses, and surface defect detection, using optical sensors to guarantee each round meets specified tolerances, it automatically sorts and rejects rounds based on inspection results, contributing to efficient production. Equipped with data logging and an intuitive user interface, the machine records results for quality control and compliance, playing a crucial role in identifying and eliminating defects before ammunition reaches end-users.

Productivity

Description	Quantity/Minute
9 x 19 mm case-Cartridge	250 pcs
5.56 x 45 mm case-Cartridge	200 pcs
7.62 x 51 mm case-Cartridge	200 pcs
12.7 x 99 mm case-Cartridge	120 pcs
Installed Power	3 kW
Air Consumption	6 bar
Suitable For	9 x 19 mm, 5.56 mm, 7.62 mm, 12.7 mm
Accuracy	±50µ

Visual Inspection Stacker Machine

Ammunition Visual Inspection / Stacker Machine This machine has been specifically engineered for the purpose of packaging 9x19mm pistol cartridges through the stacking of 50 cartridges into each block. The apparatus systematically organizes these 50 cartridges into plastic trays, which are subject to visual inspection by the operator stationed in front of the machine. Cartridges are advanced along the conveyorthrough a rotating mechanism. The operator is responsible far manually segregating any cartridges that are found to be defective during the inspection process. Furthermore, these operators are tasked with the placement of fully loaded trays into cardboard packages. it is worth noting that our machine is fully compliant with the safety requirements stipulated under ATEX Zone 2 regulations.

Installed Power	2 kW
Air Consumption	350 lt / min
Ammo Tray Capacity	50 pcs
Production Speed	110 pcs / min
Suitable For	9 x 19 mm Cartridge

Productivity

Description	Capacity (Quantity/Minute)	Quantity in Trays
9 x 19 mm Cartridge	110-pcs	50

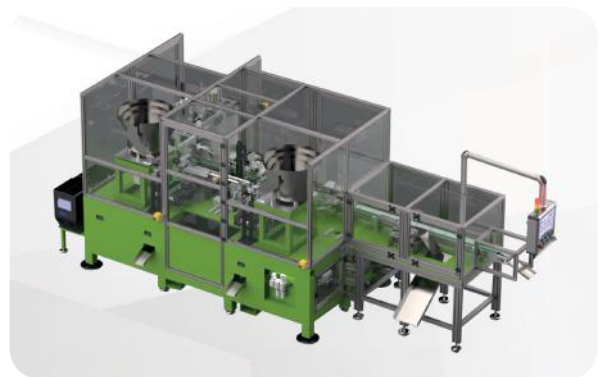

Packing Machine

The ammunition packing machine is a servo motor and pneumatically controlled system which the cartridges placed by the operator in the feeding conveyors are automatically packed with cartons placed by the operator in the box form unit. The cartons placed flat on the box form unit of the machine are formed into boxes here and dropped onto the main conveyor. The cartridges dropped into the feeding conveyors pass through the cartridge stairs and are placed on the cartridge conveyors. From here, they are pushed to the cartridge taking position with the help of a piston. The cartridges lined up in the cartridge taking positions are picked up by the ammunition carrier arms and dropped into the box waiting on the conveyor. The boxes are glued and closed and then delivered to the product check unit. in this unit, the boxes are weighed and underfilled boxes are discharged in this unit. Boxes with correct weight are pushed back to the main conveyor and discharged at the end of the conveyor.

Installed Power	6 kW
Air Consumption	2000 lt / min
Ammo Box Capacity	5.56 mm : 30 pcs 7.62 mm : 20 pcs
Suitable For	5.56 mm , 7.62 mm

Production Speed

Description	Capacity (Quantity/Minute)	Quantity in Package
5.56 x 45 mm Cartridge	180- pcs	30
7.62 x 51 mm Cartridge	180 - pcs	20
7.62 x 39 mm Cartridge	180- pcs	20

CEONIC ARMS

In 1999, our President Süleyman Celep's journey in the sector, after a background as a shooting trainer and a gun expert, started with the company he established in Germany in 2000 under the name CELEP GmbH. Afterwards, he continued his journey with Dost Arms and Hunting Supplies Company, which he established in Türkiye in 2014. In 2015, the company formed under the name Ceonic Arms & Defense Industry became a local and national brand with international recognition, constantly improving itself based on various skills including design, production, material science, machine operations and business management with its expert staff. Ceonic Arms & Defense, which does not compromise on distinguished service, professionalism and quality, and advances step by step towards its self-developing goals, has rapidly taken its place among Türkiye's leading defense industry exporting companies.

Since its establishment, Ceonic Arms & Defense has adopted the principle of being a company that constantly renews itself, always open to innovation in its departments and has adopted the principle of serving with its technical staff. With the power of its dynamic, professional and researcher identity, it keeps the quality and satisfaction of its customers at the highest level by designing modern models with quality materials in accordance with the technical equipment and usage features brought by the age in the arms industry.

Ceonic Arms, by increasing its name recognition in the sector, offers all innovations to the sector by examining and evaluating the developments in parallel with the developing world technology on site and on time.

CEONIC ARMS & DEFENSE IS THE ONLY COMPANY IN THE SECTOR THAT PRODUCES LICENSED PRODUCTS IN BLANK FIREARM PRODUCT GROUPS WITH SIG SAUER AND ISSC BRANDS.

Ceonic Arms & Defense, which is preferred not only domestically but also globally with our quality and product options, exports to different countries (in 7 regions) that have a say in the arms industry in the world. Although Ceonic Arms has proved its quality required in the sector with its licensed productions, it aims to become a world brand by transferring these better products to its future productions.

Ceonic Weapon and Defense has added an extra power to Turkish defense with CEON-9, a completely domestic and national new model with its R&D studies as of 2021. With its new models Ceon-9 and Ceon 380 and its advanced versions and with the different models and designs still being developed, it is rapidly growing its place in the sector.

This long-term journey, combined with an innovative understanding, today serves with a wide range of products ranging from military weapons to pistols. It maintains its position at the top with its licensed brands SIG SAUER and ISSC in the blanks pistol sector. Underlying this success is an understanding that brings together innovative production processes and quality, corporate organizational structure and customer satisfaction, innovative design and production processes and future R&D activities.

Ceonic Ceon-9 is a brand that exports to different countries in 7 continents of the world; its products are used by civilian users, law enforcement agencies and armies of many countries of the world.

Ceonic Ceon-9 9x19mm Pistol

Designed for professionals, the Ceon-9 is highly trusted by law enforcement and military personnel for its unmatched reliability, optimal magazine capacity of 17+1 rounds in a standard magazine and low weight. With its signature "safe action" trigger system, the Ceon-9 mm pistol is safe, easy, and fast - exactly the reliable pistol you need in critical situations.

The Ceon-9 is a brand of polymer-framed, short-recoil, locked breech-loaded semi-automatic pistol designed and manufactured by Ceonic Arms & Defense.

The Ceon-9 allows for easy customization of the grip to add comfort, regardless of the shooter's hand size; the new generation features a new and effective frame roughening as well as interchangeable ridges. The Ceon-9 is available in three handset options: small, medium, and large.

Ceonic CPT 517 5.56 Nato Rifle

The Ceonic CPT 517 is a selective fire, gas-operated, air-cooled, magazine-fed rifle designed by Turkish arms manufacturer Ceonic Arms & Defense and manufactured in Türkiye. The CPT 517 model AR-15 was designed to be a lightweight rifle and to fire a new, high-velocity, lightweight, small-caliber cartridge to allow infantrymen to carry more ammunition.

Mil-Spec Components and Compatibility

The CPT517 AR15 5.56 is built to mil specifications, ensuring compatibility with a wide range of aftermarket parts and accessories. This allows users to customize and tailor their rifle to their specific preferences and shooting needs. Whether you want to add optics, lights, grips or other accessories, the CPT517 AR15 5.56 provides a solid foundation for customization.

Seamless Operation and Controls

The CPT517 AR-15 5.56 features a direct gas impact system, a time-tested operating mechanism known for its simplicity and reliability. This system directs gas from fired rounds into the bolt carrier group, ensuring consistent cycling and reliable operation. The rifle's controls, including the charging handle, magazine release and safety selector, are intuitive and ergonomically placed, facilitating quick and effective operation.
