VISION

Animafantasia 2023 - Mission & Vision

Since its inception in 2011, the team has been committed to bringing an educational touch to the festival for the young and old alike. Our vision is to reflect current and future trends in the film and screen-based industries.

The *International Student Animated Film Festival Animafantasia* is a vocal advocate for young filmmakers who push the boundaries of their work to the fullest range of expression that the medium is capable of.

As usual, the main purpose of this festival is to present a highly selective showcase of the best new works of animation from around the world.

Our mission is to cultivate and promote the art and science of animated film through education and cross-cultural awareness. We strive for a world in which enlightenment, knowledge and tolerance prevail. We believe animation, as an art form, has the power to bridge cultures and illuminate the universality of the human experience.

Our goal is to provide a space for young animation creators from all backgrounds to present their work to an appreciative audience and offer an opportunity for their art to be recognized all over the world.

We believe that films and visual storytelling are powerful tools and medium that can create positive change in the world. By empowering young creatives now, we aim to ignite a new generation of creative leaders and filmmakers. We offer our audience a space to meet and exchange around the universal themes of tales, legends, and the stories that bring us together.

We like to help our filmmakers take their first step in the industry by giving them a little nudge, whether it's connecting them with people who matter or helping them develop the key skills for success.

To our audience, whether professional or not, we are committed to offering a space of conviviality to share unforgettable moments, to live collectively the emotions and to celebrate together the love of the cinema. The festival encourages the audience to discover high quality professional short films and at the same time invites families to spend more time in the cinema.

The Animafantasia Festival is relevant to both the general public and the industry, attracting a broad audience demographic and introducing this audience to innovative areas of screen practice.

Our mission is to entertain, to inform, to inspire, to encourage and to educate. We believe that the world's most powerful narrative and educational medium – animation movies, as well as scripts and music can contribute to a healthier society and that these works should encourage the active involvement of audiences to connect and act collectively to address social challenges. Winning and finalist animation films are innovative, distinctive, compelling and engaging, relevant to varied audiences and encourage participation. We are eager to continue to be one of the most important animation film festivals in the world by being innovative, risk-taking, and open to new thinking, new concepts, new talent, and new ways of telling stories.

Festival Director
Modesta Lupașcu
