ROPE™ -3	2-PIECE COMPOSITE	2⅝"	EBB5RPE3	30" 31" 32" 33" 34"

- **Two-Piece Composite Construction:** Composite handle + composite barrel creates a larger barrel, with the biggest sweet spot and an unmatched feel
- **3D Ropecoil Composite:** Easton's patented 3-dimesional composite rope is wrapped 360 degrees, vertically, around the center of the barrel at the sweet spot. Surrounded by optimized thickness composite sections toward the end cap and taper to maximize performance outside of the sweet spot, creating the widest max performance area across the entire barrel. This unique design governs performance set directly at the performance limit.

- **ConneXion Max®:** Utilizes an elastomer connector to interlock the handle to the barrel, eliminating vibration for optimal feel
- **Optiflex Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite BBCOR athlete

- **Pro-Stiff Carbon Handle™:** Designed with extra-stiff carbon fibers to create a more-solid handle, giving the elite athletes a stiffer feel

GENERATIVE AI TECHNOLOGY

WHAT IS ARTIFICIAL INTELLIGENCE (AI)?

In its simplest form, artificial intelligence (AI) is a field, which combines computer science and robust datasets, to enable problem-solving. It also encompasses sub-fields of machine learning and deep learning, which are frequently mentioned in conjunction with artificial intelligence. These disciplines are comprised of AI algorithms which seek to create expert systems which make predictions or classifications based on input data. (Source: IBM.com)

HOW CAN AI HELP MY SWING?

Whether it's your batting average or swing velocity, baseball is a game of numbers where the smallest variance can make the biggest difference. Working with the most technologically advanced and skilled experts in this area, Rawlings has pioneered new breakthroughs in bat construction that will directly correlate to improved offense. Our patent pending AI technology utilizes a system of supercomputers to develop and evaluate thousands of inner wall variations. The result is the most optimal, finely tuned barrel design made to date. This process results in increased precision and consistency to ensure you're getting the most out of each at bat.

Compression refers to the pounds of force (lbs) necessary to compress the ball ¼ inch.

RED DOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

Balls without Rawlings' C-LOK™ and poly-core combination can absorb moisture and lose compression (get softer).

C-LOK™ plus Rawlings' proprietary dense cell poly-core technology repels moisture and maintains higher compression.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, ASA®, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings' patented Dream Seam® Technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.
