

EXHIBITION GUIDE & PROGRAMME

ONS ²⁰/₂₄ IMAGINE

Welcome to Stavanger & ONS 2024

It is an honour and a great pleasure to welcome you to Stavanger and to ONS 2024.

Since 1974, the international energy industry has gathered in Stavanger to debate, share knowledge, network, do business and plan for the future. The energy industry and ONS have evolved significantly these past 50 years. However, I believe this event is more important than ever.

We have been through a time of Transition, Innovation, Trust, and now it is time to Imagine for the future. This year's theme is IMAGINE, which will set the scene for ONS 2024.

This week we will reflect on the energy industry's role to design, build and shape the sustainable energy future.

We have gathered the industry's top executives, sustainability leaders, technical experts, researchers, and analysts to discuss the future of the energy world. Close to 750 speakers will share their insight with you.

At the exhibition, exhibitors from all over the world are gathered to showcase their latest innovations and solutions. These companies are the innovators and problem solvers of the future - ready to tackle any challenges that lay ahead.

At our arena, Net Zero Markets people will meet and hear the latest on topics such as CCUS, hydrogen, battery storage, solar energy and offshore wind.

My hope for the coming week is that you will have a chance to experience the industry first hand, connect with people from all areas within the energy sector and get new contacts that hopefully will generate business for you and your company.

Your contribution to the meeting place ONS is significant and may very well influence and shape the future of the energy world.

Thank you for your participation.

Leif Johan Sevland
President and CEO,
ONS Foundation

Welcome to Stavanger, the energy capital of Norway, and welcome to ONS 2024!

It is a great honour to once again welcome participants from all over the world to Stavanger and Norway, and to a week of meetings, expertise, diversity, and creativity.

We are very proud to say that ONS is one of the world's leading meeting places for the international energy industry. ONS is a very important actor in bringing the world to Stavanger. Energy has been a driving factor in making Stavanger to an international city with 190 nationalities.

Like other cities we compare ourselves to, Stavanger has high ambitions when it comes to green transformation and sustainability. We are also all affected by conflicts and uncertainty in the world, but the cities cannot solve everything alone. This year's conference theme is IMAGINE. Co-creation with the citizens and close cooperations with businesses and organizations are very valuable when we are to find the best solutions for the future. By gathering some of the world's leading expertise and putting the most important challenges on the agenda, ONS once again makes Stavanger the most important place to be right now.

Welcome to a week of setting agenda and welcome to a week of energy.

Enjoy your stay!

Sissel Knutsen Hegdal
Mayor of Stavanger

ONS+

Every night during ONS, Stavanger Harbour will be transformed into a small urban village. Pavilions placed along-side the harbour offer food, drinks, and networking, as well as being the hosts for our new concept: debates, discussions, and presentations around the theme energy in society.

You may choose to listen to debates while having a meal, or you can simply have a drink with friends.

Innovation Award Finalists

ONS Innovation Awards

Through the Innovation Awards ONS recognise the crucial importance of cutting-edge technologies and solutions. The awards reflect our long-standing commitment to presenting and promoting innovative ideas to the international oil, gas and energy industry. This year we received 100 applications for our innovation awards.

The awards ceremony will be held at the conference session “Energy Security and Energy Transition” on Tuesday 27 August from 10.00 - 11:30

The Innovation Award

For larger companies, who already have sizable sales and a large market share in place, the Innovation Award can help them further promote their product and can also be used internally to help promote more innovative work.

Finalists:

- **Siemens Gamesa Renewable Energy**
- **Welltec**
- **NOV Subsea Products**
- **Hitachi Energy**
- **Aker Carbon Capture**

SME Innovation Award

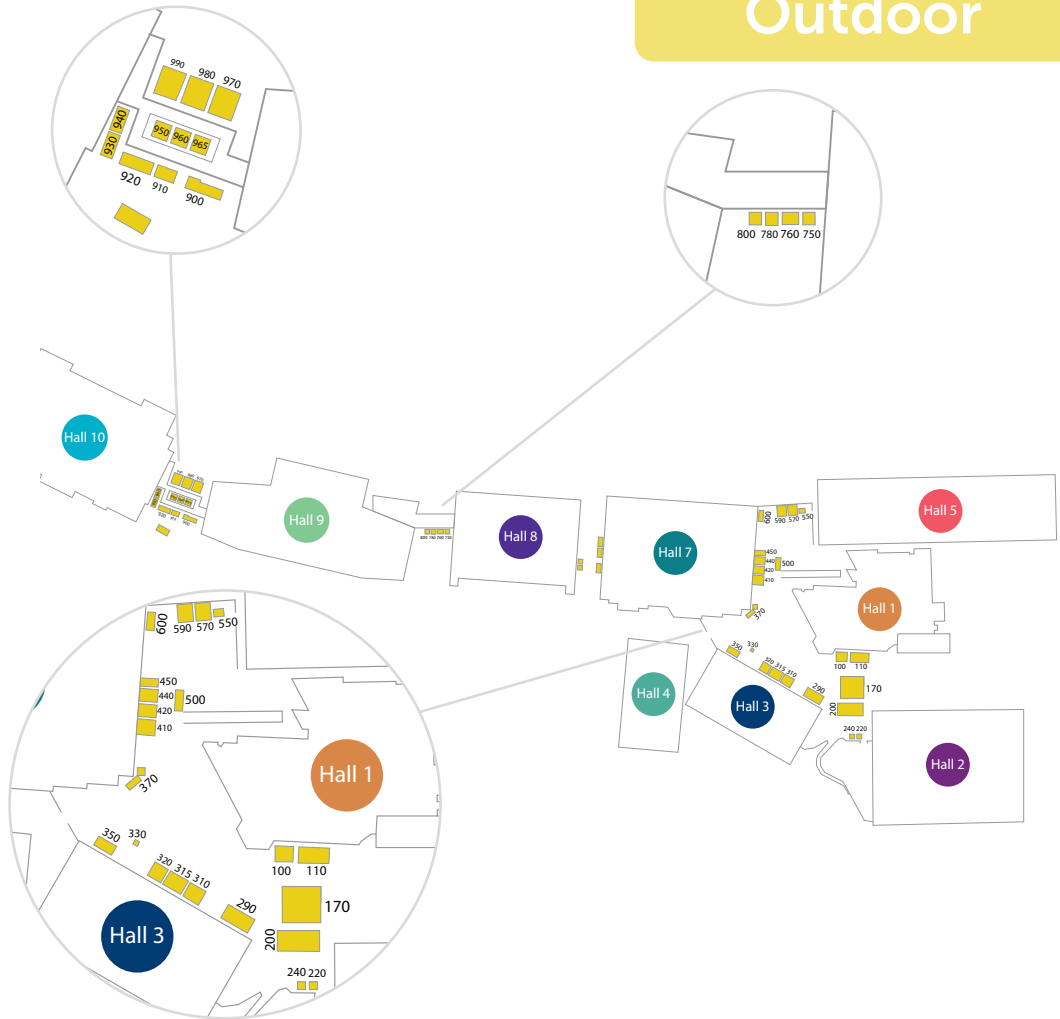

The SME Innovation award offers small and medium-sized enterprises a chance to highlight their new developments. The award can help them boost their visibility in the market and give them the opportunity to be discovered by potential customers.

Finalists:

- **Evyon**
- **Amogy**
- **Mocean Energy**
- **Geotherma / Green Therma**
- **Hystar**
