

Surgery Center Essentials

Empowering you to deliver care with confidence

We understand the crucial role that surgery centers play in providing exceptional patient care and driving business performance. As your trusted business partner, we are dedicated to supporting your success by providing a comprehensive range of critical operating room supplies.

With our extensive product portfolio, we aim to simplify your procurement process and ensure that you have access to the high quality supplies needed for optimal patient outcomes. From surgical instruments to medical equipment, we have carefully curated a selection of products that meet the stringent standards of surgery centers.

Our commitment to your success goes beyond just delivering supplies. The knowledgeable team at Cardinal Health Canada is always available to assist you in navigating the complexities of your supply needs, offering personalized recommendations and solutions tailored to your specific requirements.

Experience our unwavering commitment, exceptional service, and the comprehensive range of products that will empower your surgery center to thrive. We are here to help you streamline your operations and maximize efficiency, so you can focus on delivering quality care to your patients with peace of mind.

Together, let's enhance patient care.

A Solenis Company

Simplify your supply chain with **Presource[®]** **Procedure Packs**

We tailor procedure packs to fit your needs, so that you can control costs and drive clinical and operational efficiencies. Our packs reduce set up time, promote protocol adherence, and provide inventory efficiencies.

[Request custom pack](#)

Please contact your local representative to learn more about procedure packs.

Breakthrough

solutions that **Optimize** and **Grow** your **surgical practice**.

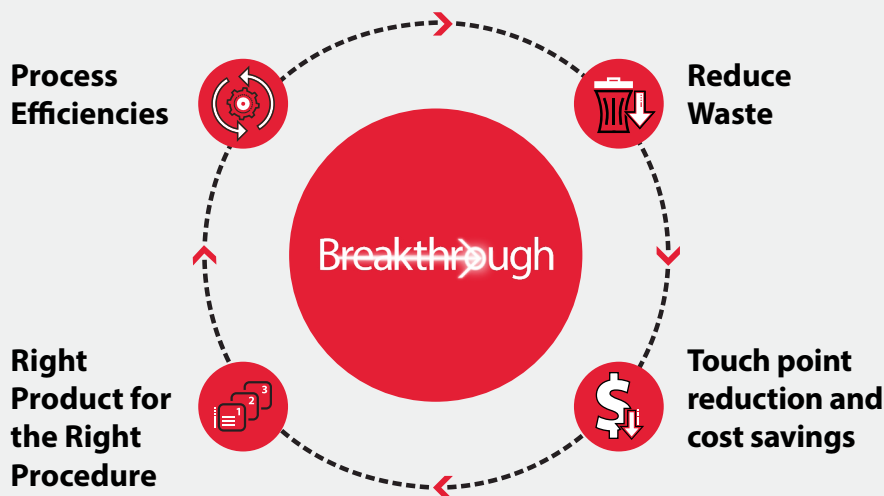

We know how critical it is for your facility to maximize OR throughput and efficiency as we work together to overcome the surgical backlog in Canada.

Our Breakthrough program will identify both time- and money-saving opportunities and optimize your clinical effectiveness at your facility through both product rationalization and process improvement. The program is led by a team of experienced surgical specialists with extensive OR and supply chain management expertise to ensure that your results are maximized.

How it works

By understanding your goals and objectives, observing case set-up, reviewing pick lists and analyzing supply chain data, our Breakthrough program will identify opportunities for improvement so you can grow your business while focusing more on patient care.

Benefits and outcomes

Save Time

Save Costs

Simplify Process
