National Artificial Intelligence (AI) Action Plan 2030

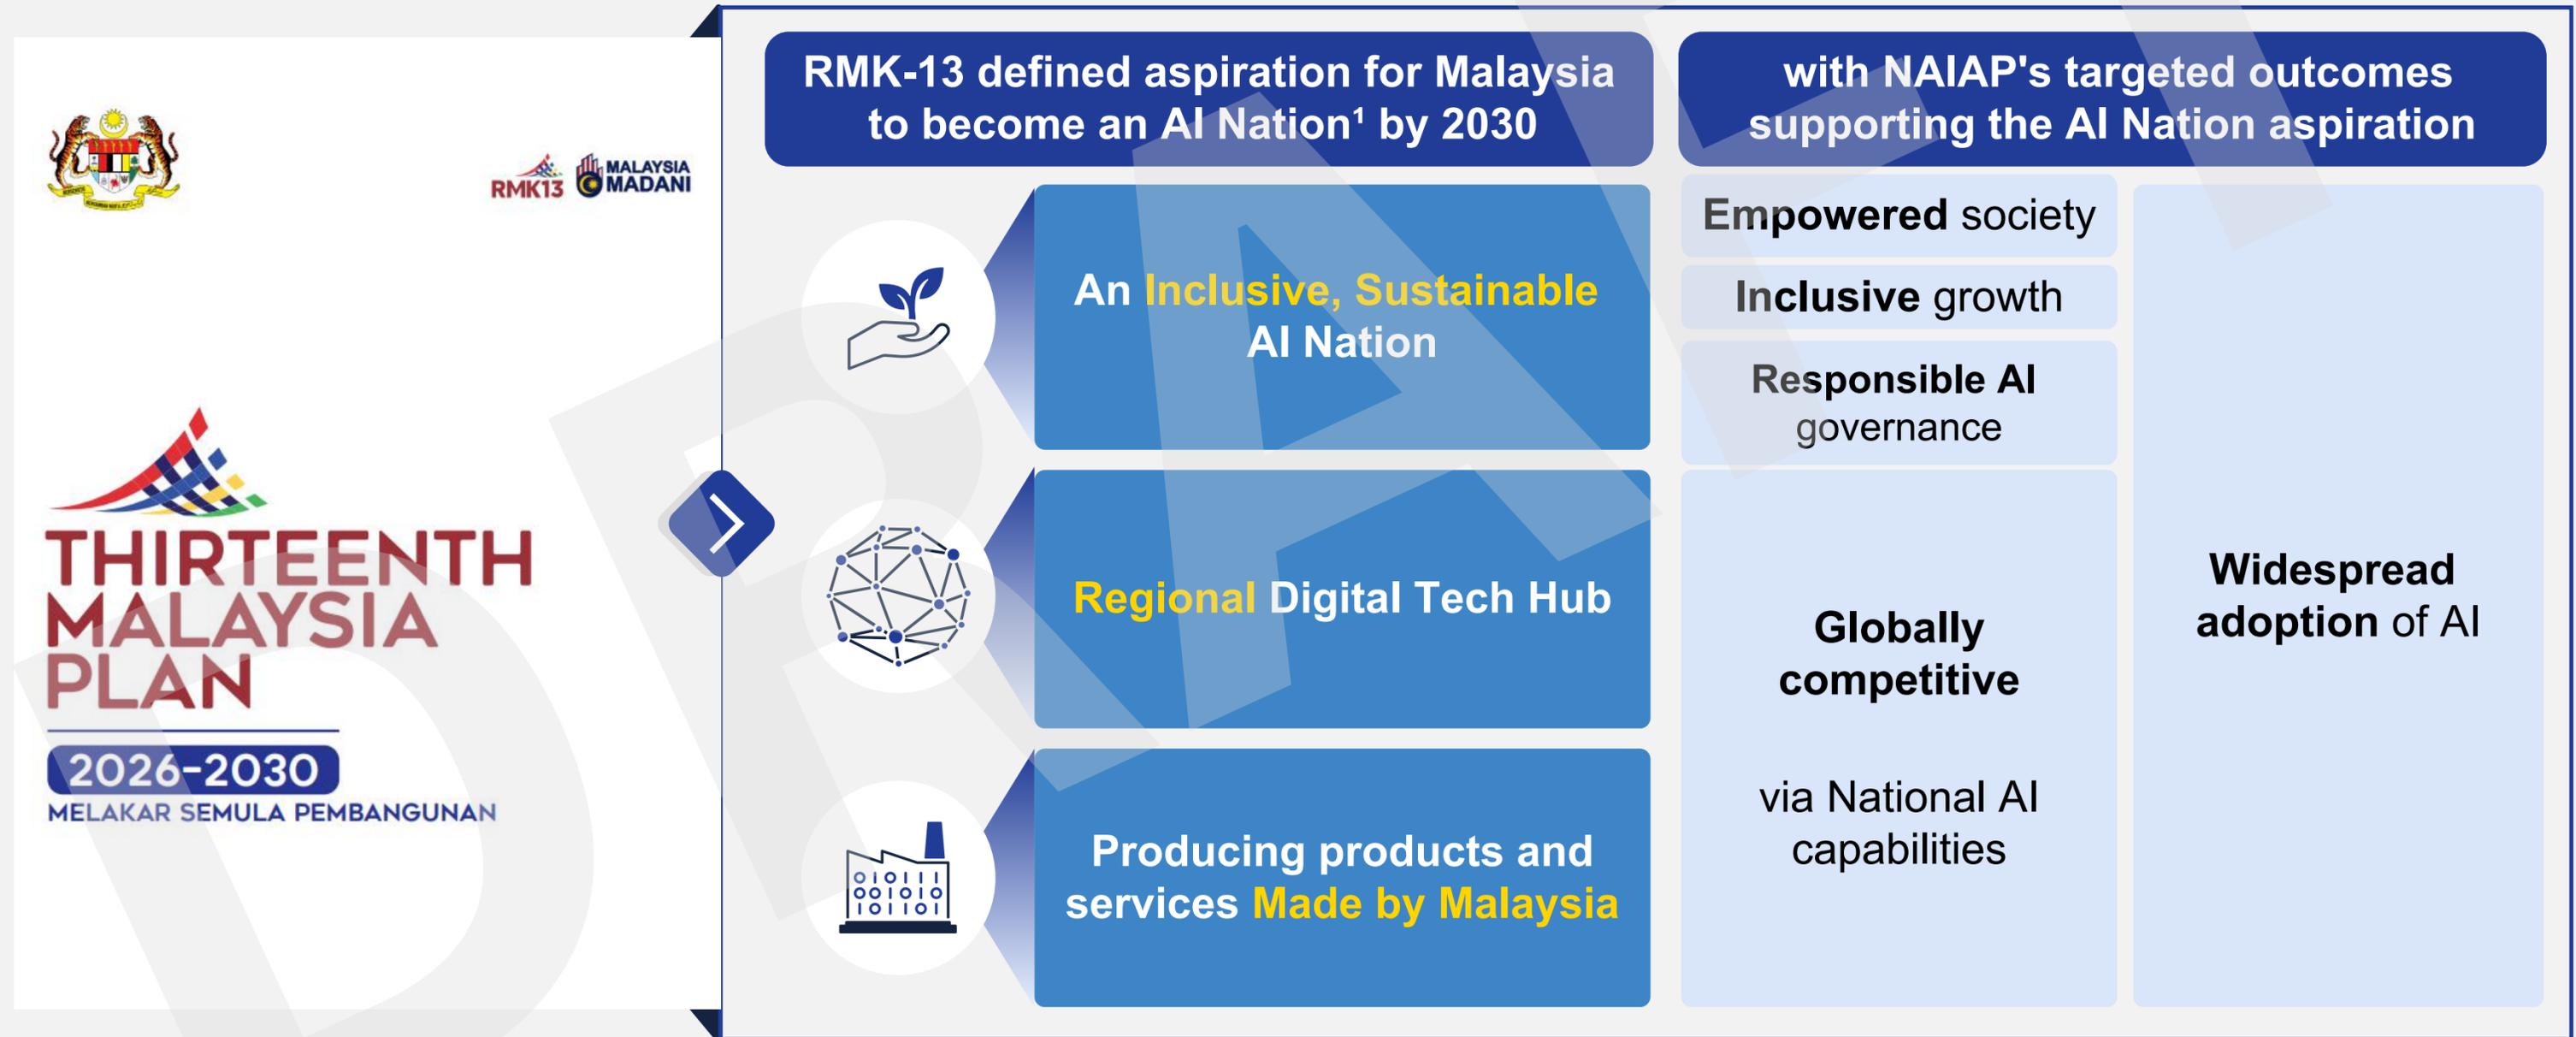

Towards AI Nation aspiration

Disclaimer

This draft of Malaysia's National AI Action Plan 2030 is circulated for consultation and feedback purposes only. It represents a preliminary framework developed through extensive engagements with multiple stakeholders. Please note that certain sections and contents within this Action Plan are subject to further review, refinement, and validation.

No part of this publication may be reproduced, distributed, or transmitted in any form or by any means without prior written permission from the Head, National AI Office.

The National AI Action Plan 2030 (NAIAP) supports the achievement of the AI Nation aspiration

1. An AI nation refers to a country with AI-technology integrated holistically as the main thrust in socioeconomic development, national administration and daily lives of the rakyat. Source: RMK-13 Main document <#>

The National AI Action Plan 2030 recognises shifts that are shaping Malaysia's position in an increasingly AI-centric world

Rapid rise of GenAI, with newer forms of AI on the horizon

- The rise of large, general-purpose models is driving AI adoption across sectors, but also introducing complex societal impacts (e.g., job disruption).
- Agentic AI is emerging, with the development of AGI¹ expected to enable disruptive autonomy in decision-making and complex tasks.

Risk of falling behind, as countries accelerate AI efforts

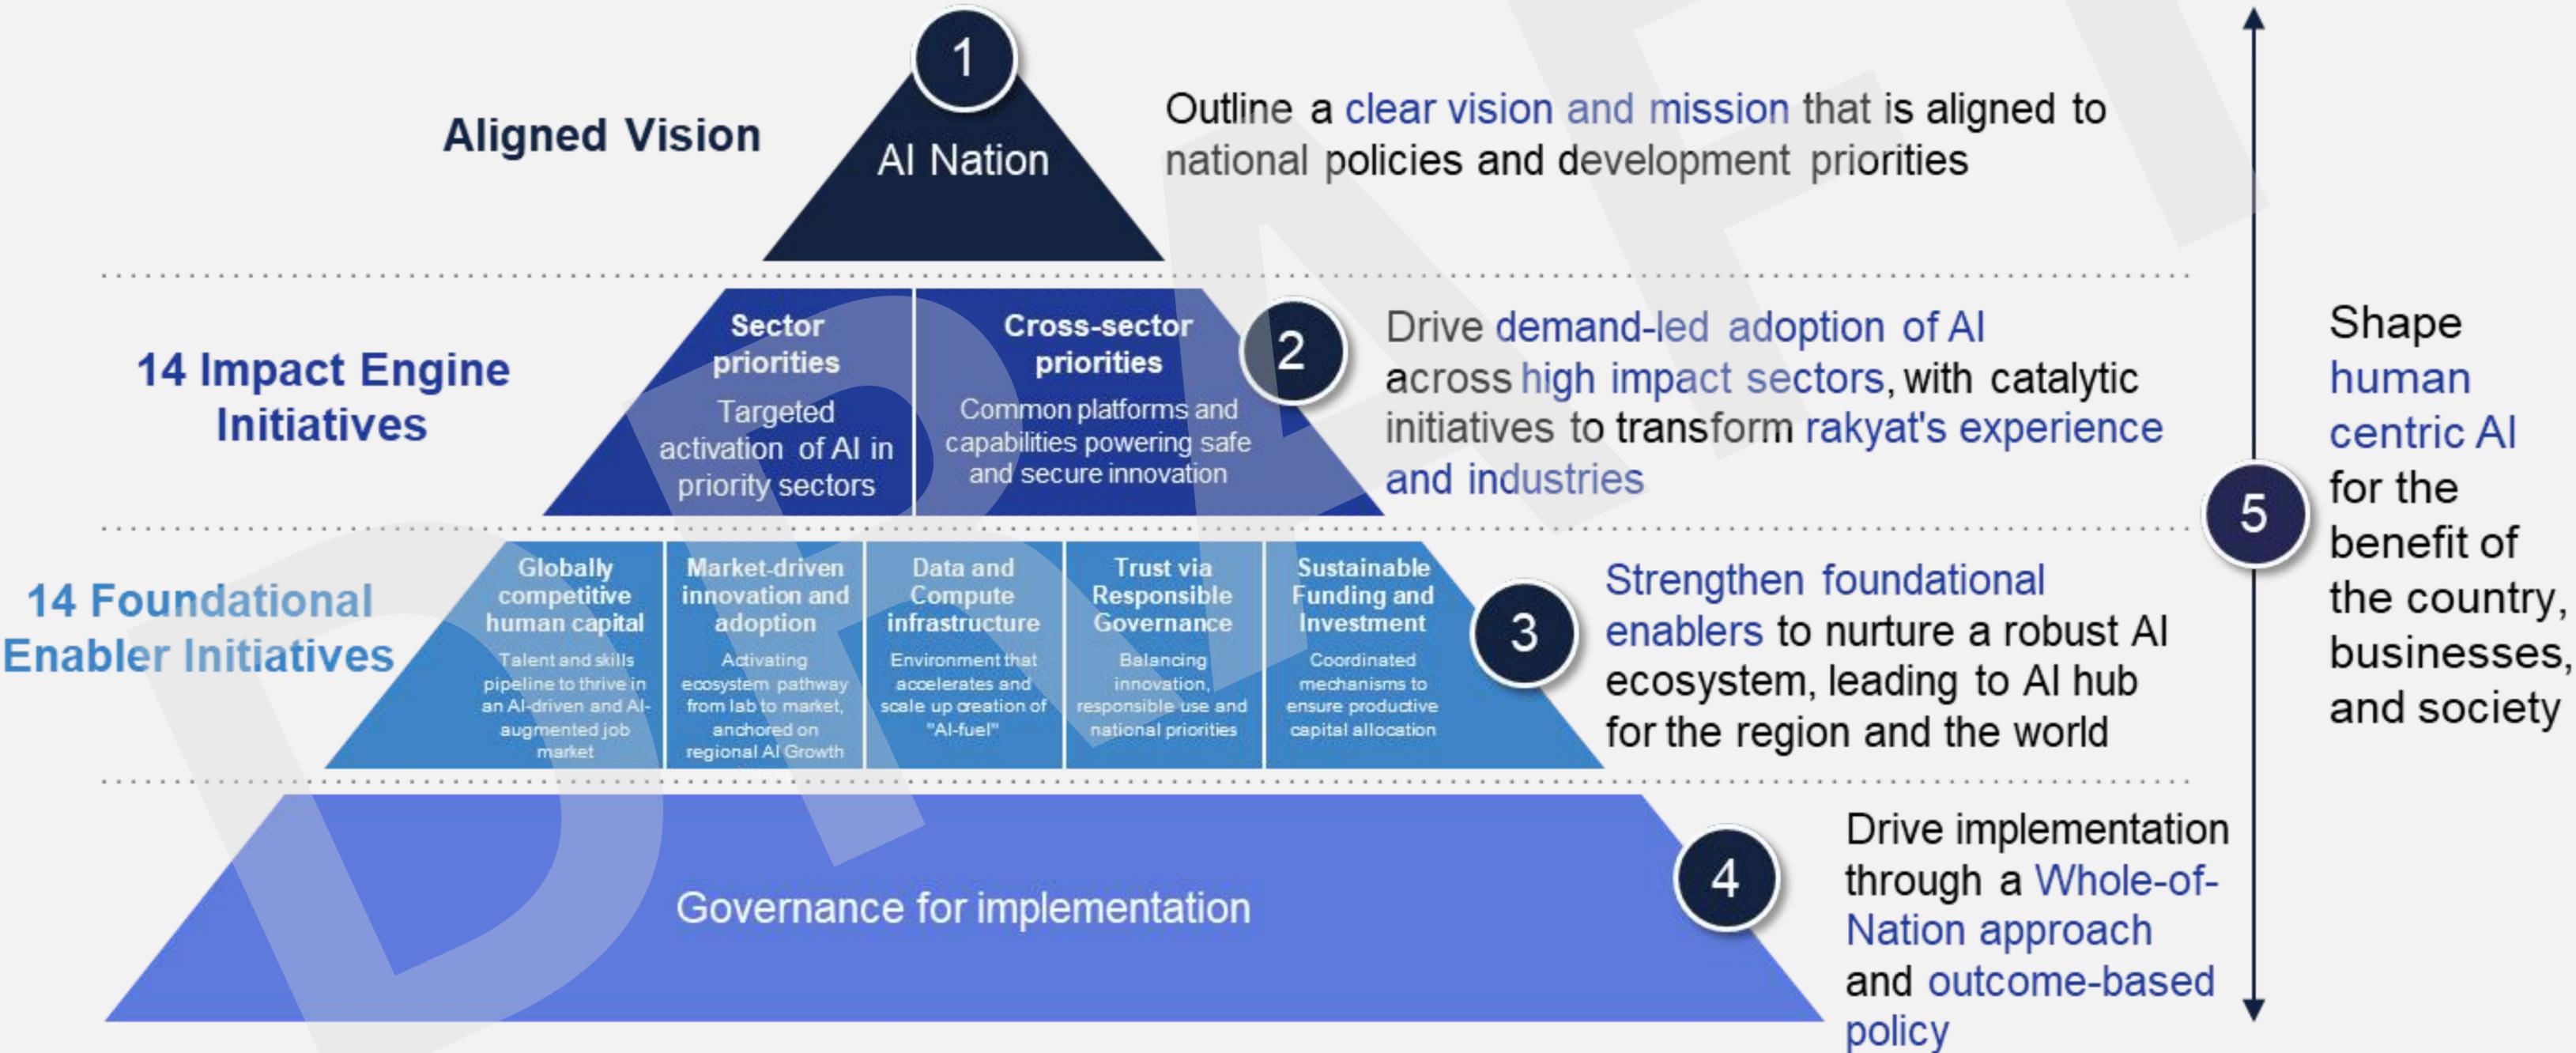

- ASEAN peers are ramping up investment, talent programs, and compute capacity.
- Without an updated roadmap, Malaysia risks talent leakage and declining share of AI-driven foreign direct investment.

Geopolitical shifts redefining the AI landscape

- The AI race is now intertwined with global shifts in semiconductors, data centres, and AI sovereignty.
- Malaysia must position itself strategically amid emerging tensions and new AI-industrial alliances.

The National AI Action Plan 2030 is guided by five key principles to ensure at-pace and holistic interventions

Impact Engines were identified based on economic and societal impact from AI

A Economic Impact Sectors

Sectors expected to create the **greater AI-driven economic returns**, given their scale and strategic importance

- A1 **Established Sectors** - Large GDP contribution and strong industry coherence, enabling rapid scale-up of AI use cases
- A2 **Emerging Sectors** - Government strategic-priority sectors (NIMP 2030) with high potential for AI-driven innovation

B Societal Impact Sectors

Sectors where AI adoption can deliver broad-based **public value and societal benefit**

Sectors highlighted in major government strategies aimed at serving a wide citizen base (e.g., food security, quality education, sustainable environment)

- I1 : AI to prevent, diagnose and advance clinical discovery
- I2 : Scalable AI City Solutions
- I3 : Hyper-personalised Government Service
- I4 : AI Companion for Civil Servants
- I5 : Personalised learning for tertiary education
- I6 : Scalable Agristack
- I7 : Secure and Independent AI Ecosystem for Malaysia
- I8 : AI Hub for the Manufacturing Ecosystem
- I9 : Solutions and public-facing platform for palm oil smallholders
- I10 : AI for MSMEs Modular AI Resources for MSMEs
- I11 : AI to power Malaysia's green future, while driving efficiency
- I12 : AI to modernise the local O&G Services Equipment ecosystem
- I13 : AI to support growth, inclusion and security in financial services
- I14 : Empower Malaysia's AI ecosystem through AI infrastructure

Foundational enablers covers five development categories, aligned to RMK-13's AI Nation framework

6 catalytic initiatives to spark AI revolution in Malaysia, delivering tangible impact within 18 months

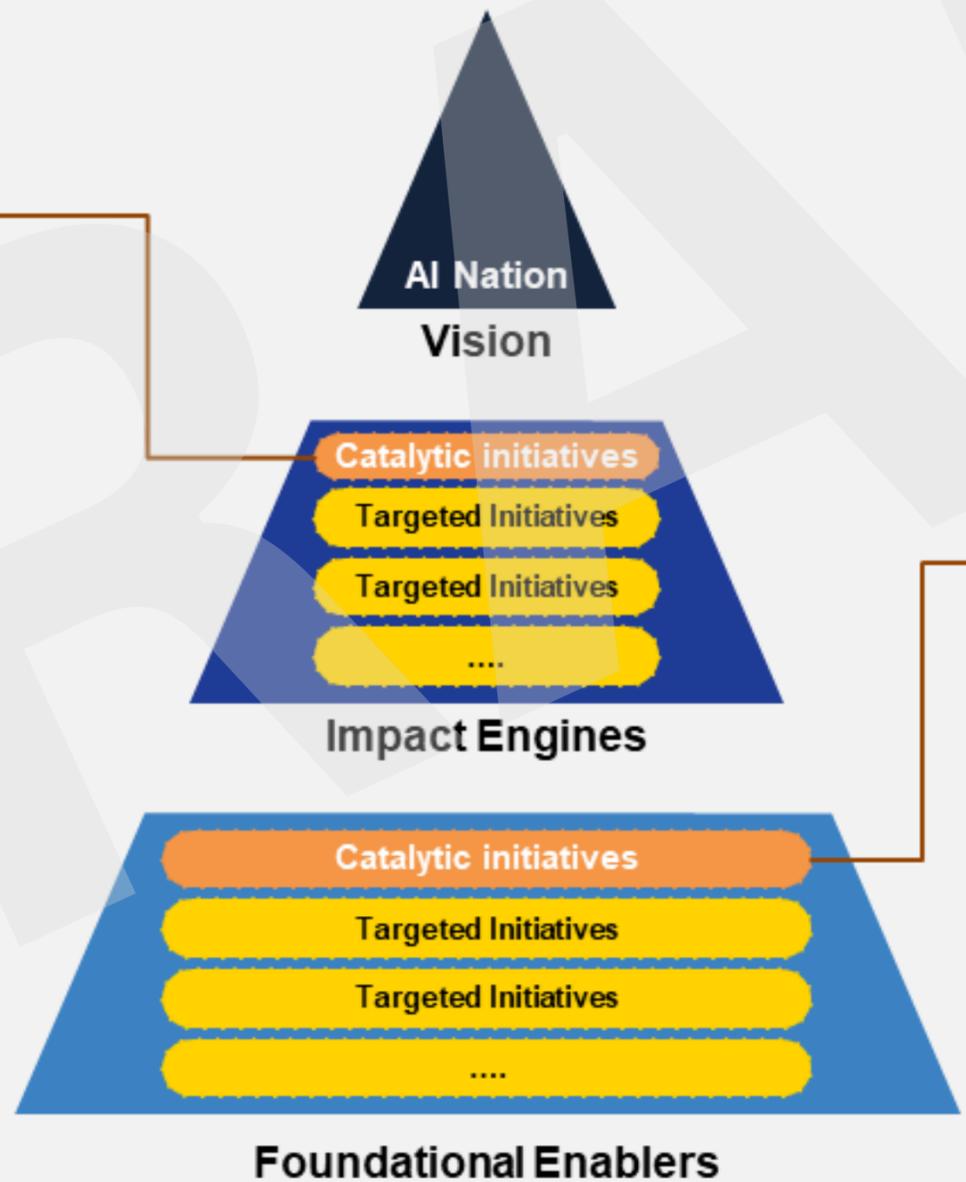

Impact Engine Catalytic Initiative

Transform society's experience by advancing citizen services & building an AI-augmented government

Healthcare: Medical dataset for clinical care and research, to serve as foundation for AI-powered diagnostics and growth of clinical research hub

Public Services: AI-powered personalised government services, built on MyDigital ID towards establishing a unified digital ID

AI Cities: AI stack connected to National Command for 2 cities established, serving as lighthouse for expansion to other cities

Foundational Enabler Catalytic Initiative

Position Malaysia as an innovation springboard, by attracting right talent and providing the right environment for AI players to flourish

Global Talent Network: Global AI talent hunt established, where top AI professionals meets immediate needs of the AI ecosystem while enabling growth of local AI talents

AI Growth Zones: 3 AI Growth Zones identified, transforming regional economies into AI-driven innovation hubs

AI Act and Governance Model: AI governance framework published for public syndication, establishing business and public trust of Malaysia as an AI Nation

Catalytic initiatives will serve as lighthouse models and kick-start delivery of the broader National AI Action Plan 2030

By end 2025

1 Establish Foundations

National AI Action Plan 2030 **signed-off and approved**

National AI Action Plan Secretariat empowered with **authority & reporting structure**, and **KPI dashboard** in place

Initiative owners and implementation teams of Impact Engines and Foundational Enablers **onboarded**

By mid 2026
(~6 months)

2 Mobilise Initiatives

Catalytic impact engines mobilised with funding secured, serving as lighthouse:

- **AI use-cases** in diagnostics addressed, providing **foundational medical dataset** for clinical care & research
- **AI stack roadmap** for selected cities defined
- Seamless and multi-modal **AI citizen interface deployed for select services** in MyGov's digitalised services

First-wave foundational enabler pilots active in supporting AI ecosystem

- **Global AI talent hunt** established
- **AI Growth Zones** identified
- **AI governance framework** published for public syndication, including AI Act

Impact engines and foundational enabler initiatives implementation kick-started

By end 2027
(~18 months)

3 Build Momentum

Successful **pilots scaled, transforming society's everyday services**

- National-level **clinical health dataset** across domains (radiology, pathology, etc.)
- **AI Stack built for cities**, connected to National Command, serving as foundation to expand to other cities
- **Personalised government services and solutions** powered by AI, building on MyDigital ID

Foundational enabler initiatives scale & refined, delivering systemic support for AI innovation

- Location agnostic **talent network**, with access to best Malaysian & global talent
- **AI Growth Zone** launched
- **AI Governance Act** launched

Impact engines and foundational enabler pilots launched

In line with the AI Nation aspiration, the Action Plan will drive significant benefits across government, economy and society

Government

- Reimagined public services where Rakyat have seamless and multi-modal interface with government
- Transformed public sector to become more efficient and citizen-focused, while strengthening trust and governance effectiveness

Economy

- Malaysia as an AI producer - "Made by Malaysia" products and services for global markets
- Pervasive AI adoption to create future ready, globally competitive, and sustainable sectors

Society

- New job opportunities and improved job satisfaction from AI
- Inclusive access to ethically developed and culturally aligned AI-powered services
- Clean, safe, and sustainable living environment

Circulation for Feedback

Participate in the consultation and share your views:

In the spirit of inclusivity and shared ownership, we invite your feedback on the National AI Action Plan 2030. Scan the QR code or click on the questionnaire link below. Survey closes on 30 November 2025.
