# Setting Global Security Standards in Pharmaceutical Supply Chain

## Board of Director Message by Dr. Amarpreet Singh

### Dear Valued Members and Partners,

This month marks an important milestone for TAPA APAC with the launch of the Pharmaceutical Facility Security Requirements (PFSR) – a standard that defines the minimum-security measures for handling, storing, and transporting pharmaceutical products across the supply chain.

The timing could not be more critical. In recent years, the Asia Pacific pharmaceutical supply chain has been tested like never before. The COVID-19 pandemic exposed its fragility, as shutdowns in China and India disrupted the availability of Active Pharmaceutical Ingredients (APIs) and finished medicines, while unprecedented surges in demand strained logistics networks. Regulatory challenges, such as the 2016 CFDA scandal, further undermined confidence, while trade tensions, the Russia–Ukraine conflict, and natural disasters highlighted the risks of overreliance on concentrated manufacturing hubs and the lack of real-time visibility. These events reinforced the urgent need for greater resilience, transparency, and accountability across the sector.

The PFSR directly addresses these vulnerabilities. Developed in collaboration with global experts and industry stakeholders, the standard reflects a shared commitment to safeguarding pharmaceutical supply chains against theft, diversion, counterfeiting, and falsification, while aligning operations with global best practices and regulatory expectations.

As APAC continues to grow as a global hub for pharmaceutical manufacturing and distribution, I strongly encourage our members and partners to embed the PFSR into their operations. Doing so will not only strengthen our collective defense against evolving risks but also protect the integrity of medicines that millions of patients worldwide depend on.

This achievement underscores the value of collaboration within the TAPA APAC community and sets a new benchmark for security and resilience in the pharmaceutical sector. I look forward to seeing how PFSR Standard empowers organizations to build safer, stronger, and more resilient supply chains.

Best Regards,

*Dr. Amarpreet Singh*

Board of Director  
TAPA APAC

A photograph of a clean, modern pharmaceutical laboratory hallway. The hallway is lined with glass doors on both sides, leading to various laboratory rooms. The floor is light-colored and has red-and-white diagonal caution tape markings. The ceiling is white with recessed lighting fixtures. The overall atmosphere is sterile and professional.

# Combating Pharmaceutical Risks: Advancing Pharmaceutical Security Across APAC

# Biggest Risks and Security Threats to Pharmaceutical Companies

The healthcare sector in the Asia-Pacific is expanding rapidly, driven by rising demand, scientific innovation, and increased investment. Yet this growth comes with serious risks. Mishandling pharmaceutical operations, whether through weak regulation, fragmented supply chains, or lack of security standards, can have devastating consequences for society, from counterfeit medicines to life-threatening drug shortages.

Securing medical supply chains is therefore a cornerstone of resilient health systems. These supply chains are highly complex and internationalized, often involving multiple suppliers, manufacturers, and logistics partners across borders. Without robust safeguards, every link becomes a potential vulnerability, threatening patient safety, eroding public trust, and disrupting access to life-saving treatments.

## Contaminated or Counterfeit Medicines: A Life-or-Death Risk

Weak regulatory oversight in pharmaceutical supply chains has had catastrophic consequences. A recent WHO and UN report highlights that more than 300 deaths across Africa, Asia, and the Pacific since 2022 have been linked to children's syrups contaminated with industrial-grade chemicals, such as diethylene glycol.

Moreover, counterfeit drugs often with wrong or absent active ingredients, or even harmful substances pose a massive public health threat. Globally, counterfeit pharmaceuticals cost the industry hundreds of billions annually and are responsible for untold morbidity and mortality.

In India, as reported by Medical Dialogues, 5,300 bottles of fake cough syrup were seized. The syrup was found to be mixed with banned sedatives and falsely labelled to look like a genuine product from reputed pharmaceutical companies.

## Increasing Cybersecurity Threats Across the Supply Chain

As digitalization accelerates, so do vulnerabilities across the healthcare supply chain. HealthTechAsia reported that 96% of healthcare organizations have experienced negative impacts from cyber incidents linked to third-party suppliers in APAC. Alarmingly, 31% admit they lack visibility and are unaware of when such incidents occur.

As digitalization accelerates, so do vulnerabilities across the healthcare supply chain. HealthTechAsia reported that 96% of healthcare organizations have experienced negative impacts from cyber incidents linked to third-party suppliers in APAC. Alarming, 31% admit they lack visibility and are unaware of when such incidents occur.

These cyberattacks can trigger data breaches, operational shutdowns, patient safety risks, and lasting reputational damage. The risks are not only digital, but also a recent report by Thaiger that a total amount of USD370 millions of counterfeit cough syrup in Thailand were discovered at a retail market. This highlights how weak supply chain controls open the door to both cyber and physical threats.

### Hijacking of Pharmaceutical Shipment

The hijacking of pharmaceutical shipments poses a severe threat across Asia-Pacific, where high-value medicines and vaccines are prime targets for organized crime groups.

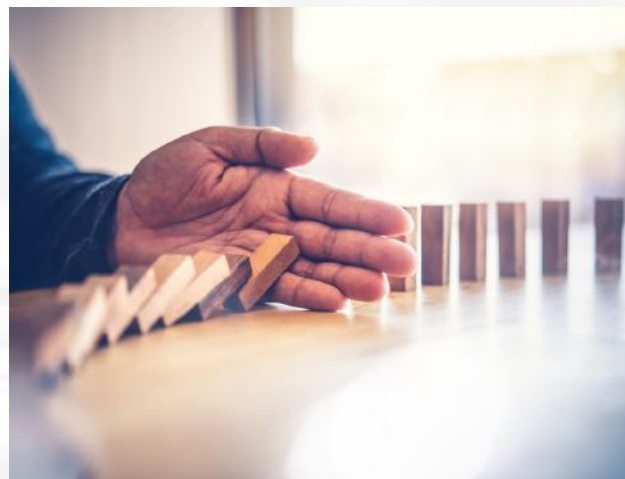

Beyond the immediate financial losses, hijacked cargo often enters illicit markets, where drugs may be tampered with, stored improperly, or resold as counterfeits. This not only endangers patients who unknowingly consume compromised medicines but also undermines public confidence in the healthcare system.

In India, anti-diabetic drugs worth over USD 228,000 were stolen from a company's warehouse and diverted to the black market. In another case in Pakistan, a truck transporting medicines valued at more than USD 116,000 was hijacked at gunpoint in the Jamshoro district, as reported by Nation.com.pk. Such events underscore the urgent need for robust security standards, covering secure facilities, vetted logistics partners, and controlled transport routes to safeguard pharmaceutical supply chains.

### TAPA Standards: Strengthening Regulatory and Supply Chain Resilience

Regulatory delays can hinder market access. Security breaches during transit or storage can jeopardize product quality and patient safety. Meeting regulatory expectations while aligning with international best practices is not just good business, it's essential. Implementing TAPA Standards provides a competitive edge and reassurance to regulators, partners, and patients that security and compliance are taken seriously.

The Transported Asset Protection Association Asia Pacific (TAPA APAC), is designed to protect high-value and theft-sensitive goods, including pharmaceuticals.

### Pharmaceutical Facility Security Requirements (PFSR)

Represents minimum standards for secure handling, storage, and transportation of pharmaceutical products at facilities and storage locations involved in the pharmaceutical supply chain

[LEARN MORE >](#)

### Facility Security Requirements (FSR)

Specifies minimum security standards for storage facilities, updated every three years, with the latest revision effective 2023 and the next due in 2026

[LEARN MORE >](#)

### Trucking Security Requirements (TSR)

Sets standards for secure transport operations; also updated every three years alongside FSR.

## Why Implement TAPA Standards in your Operations?

Demand for secure, compliant supply chains is rising, TAPA provides frameworks and audit tools to meet that demand.

TAPA Standards complement quality and regulatory systems and help integrate logistics and regulatory compliance, reinforcing processes and supply chain integrity.

Zuellig Pharma Hong Kong earned FSR (2019) and TSR (2020) certifications, driving operational excellence and trust. CEO Andi Umbricht emphasized that “TAPA TSR outlines a set of fixed standards and specifications not only for Zuellig Pharma Hong Kong to follow, but also as a reference tool for clients. By following the requirements stipulated in TAPA FSR, TAPA TSR and ISO 28000 Supply Chain Security Management System, Zuellig Pharma Hong Kong and its working partners and clients can benefit from improved processes along the supply chain.”

# Celebrate 25 years of TAPA APAC Journey

## Bringing you Beyond Resilience: Building Anti-Fragile Supply Chains

As global trade contends with tariff volatility, geopolitical tensions, intensifying ESG (Environmental, Social, and Governance) expectations, and natural disaster disruptions, the supply chain industry faces mounting and complex pressures. These evolving challenges demand that companies go beyond resilience to build anti-fragile supply chains in order to be capable of adapting, strengthening, and thriving under stress.

This two-day conference will bring together over 350 international industry leaders and experts to explore the latest trends, risks, and transformative strategies shaping the future of supply chain management. Through keynote speeches, expert panel discussions, curated exhibitions, and dynamic networking opportunities, participants will gain practical insights into developing resilient, secure, and future-ready supply chains.

**Engage, learn and benefit from our industry renowned speakers and professionals covering major supply chain topics on:**

- Global & APAC Supply Chain Outlook
- Brand Protection
- Supply Chain Anti-Fragility Framework
- Cyber Security and Artificial Intelligence
- Risk and Resilience
- Business Continuity Planning
- Facility, Trucking, and Guarding Security
- Data Analytics & Cargo Crime Reduction
- Environmental, Sustainability and Governance
- Tariff Compliance and Geopolitical

# AWARDS 2025

## Celebrating Excellence in Supply Chain Organizations & Professionals

The Supply Chain Resilience & Sustainability (SCRS) Awards celebrate and honor the outstanding achievements of global supply chain organizations and professionals who demonstrate exceptional leadership in building resilient and sustainable supply chains.

These awards spotlight those making a meaningful impact, driving innovation, fostering collaboration, and setting benchmarks for excellence across the global supply chain ecosystem. We now call for nominations for these achievements, let's aim to inspire the community with a showcase of the best practices, and contribute to a more secure, agile and sustainable supply chain.

### Nominations for the SCRS Awards are Closing Soon!

#### Nomination & Eligibility

All nominees must fulfill the following criteria to be eligible for the following awards.

For Organizations:

- Company must be registered as a TAPA APAC Member and has an active, ongoing membership.
- Company must have a valid TAPA APAC certification.

For Professionals:

- Individuals must have relevant experience as a TAPA APAC Member.

All submissions to include entry write-up around 500 words and supporting documents.

# Strengthening Pharma Supply Chains: TAPA APAC Launches the Pharmaceutical Facility Security Requirements (PFSR)

On 29 August 2025, TAPA APAC marked one of the major milestones in advancing supply chain resilience with the official launch of the Pharmaceutical Facility Security Requirements (PFSR). The launch webinar brought together security leaders, auditors, and professionals from across the Asia-Pacific region, including both TAPA APAC members and non-members, to learn about the new standard, its relevance to industry challenges, and the benefits it delivers.

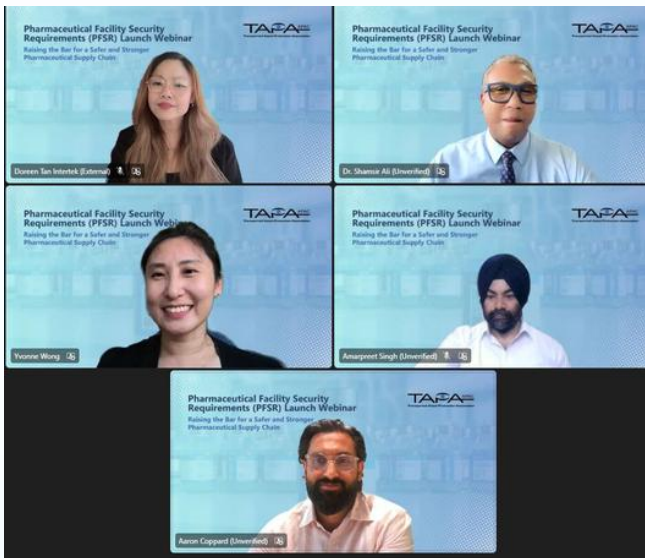

The webinar featured insights from an esteemed panel of experts:

**Dr. Shamsir Bin Ali**  
Managing Director,  
Omnispheres

**Aaron Coppard**  
Global Director, Risk Intelligence  
and Supply Chain Security, GSK

**Dr. Amarpreet Singh**  
TAPA APAC Board of  
Directors & Standards  
Committee Lead; Country  
Security Manager, Johnson  
Matthey

**Doreen Tan**  
Government & Trade Services  
Manager, Intertek

This event came at a timely moment. Pharmaceutical supply chains are not only complex but also uniquely high stakes. As Dr. Amarpreet Singh, TAPA APAC Board of Directors & Standards Committee Lead, put it:

**“The health and safety of patients directly depends on the integrity of our operations. Weaknesses in the chain don’t just disrupt business, they risk lives, erode trust, and increase costs across the healthcare ecosystem.”**

The PFSR provides a practical, globally recognized framework to help the industry address these risks with greater confidence and resilience.

### **Understanding the Risks: A Growing Threat Landscape in Pharmaceutical Industry**

The first session set the stage by exploring the evolving threat landscape. Aaron Coppard, Global Director of Risk Intelligence and Supply Chain Security at GSK, shared insights into the risks facing pharmaceutical cargo across the Asia Pacific.

He described how organized criminal groups are deploying sophisticated tactics, from repackaging genuine medicines with counterfeits to blending fake drugs with authentic products.

**“Counterfeit medicines remain one of the biggest risks,” Aaron explained. “They threaten lives and damage brand reputation. We continue to see persistent cargo thefts and pilferage in transit, particularly in markets such as India, Indonesia, China, and Bangladesh.”**

Aaron also pointed to emerging risks, cyber threats as supply chains become digitized, the criminal use of AI to create deepfake identities, and climate disruptions affecting storage and transport of temperature-sensitive medicines.

By these, he also underscored the value of TAPA’s Intelligence System (TIS) urging participants to contribute data that strengthens the collective fight against crime. “Every piece of information matters,” he stressed. “Your input helps us see the bigger picture.”

[LEARN MORE >](#)

### **From Framework to Reality: Implementing the PFSR**

While risks are clear, the second session demonstrated how the PFSR is already making a difference. Dr. Shamsir Bin Ali, Managing Director of Omnispheres, shared his organization’s experience piloting the standard.

Pursuing Level A certification, the highest tier, was no small task, but it was a deliberate choice.

**“We wanted to demonstrate leadership and resilience,” Dr. Shamsir said. “It was important to go beyond simply having a system in place. Independent validation ensures that our security practices are effective and sustainable.”**

Supporting this view, Doreen Tan, Government & Trade Services Manager at Intertek, offered an auditor’s perspective. As an Independent Audit Body (IAB), Intertek examined critical elements such as access control, secure storage, incident management, and employee training.

**“Achieving Level A certification is not a walk in the park,” she noted. “Organizations must provide clear evidence of consistent and sustainable practices. But in doing so, they gain more than compliance, they build stronger security, resilience, and customer trust.”**

Through this dialogue, participants saw that the PFSR is not just a standard on paper. It is a living framework that organizations can adopt to enhance their security posture, protect sensitive products, and align with global best practices.

### **Bridging Gaps, Building Resilience**

The launch also emphasized the collaborative foundation of the PFSR. Developed with input from manufacturers, logistics providers, insurers, regulators, and security experts, the framework reflects the real pain points of the pharmaceutical sector.

Dr. Amarpreet highlighted one example: the need for strict environmental controls. “One of the unique aspects of the pharma supply chain is temperature sensitivity,” he explained. “The PFSR acknowledges this with requirements for temperature-controlled trucks, ensuring both security and product integrity.”

This balance, practicality combined with rigor, is what makes the PFSR adaptable and impactful. It offers international recognition, strengthens facility security, fosters resilience, and builds customer trust, all while remaining implementable in diverse markets.

### **Looking Forward: 25 Years of TAPA APAC’s Leadership to Resilient Supply Chain**

The PFSR launch also coincides with a milestone year for TAPA, as the association celebrates its 25th anniversary of leadership in supply chain security. Across Asia Pacific, TAPA’s footprint already includes more than 2,200 TSR-certified trucks keeping cargo safe on the roads, and over 850 FSR-certified sites securing critical facilities.

The introduction of the PFSR now extends this commitment to the pharmaceutical sector, one of the most vulnerable and critical industries.

As the webinar concluded, the message was clear: resilience is a shared responsibility. The risks are real, but through collaboration, standards, and commitment to best practices, TAPA APAC and its members are building safer, stronger, and more resilient pharmaceutical supply chains.

**“For the industry, the PFSR is practical, relevant, and implementable,” said Dr. Amarpreet. “It is strong enough to address critical risks, yet flexible enough for broad adoption. Most importantly, it safeguards what truly matters, patients’ lives.”**

To know more about TAPA Standards and PFSR, email [info@tapa-apac.org](mailto:info@tapa-apac.org).

## INCIDENT HIGHLIGHT

India

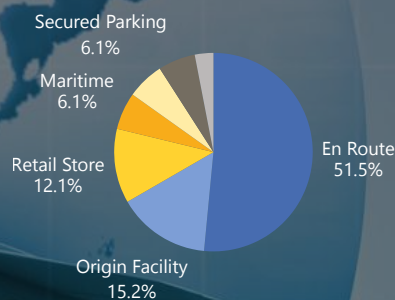

USD 30,000

Police resolved a case in which a truck carrying cattle feed worth over USD 30,000 was stolen near Mhasla junction, Dhanaj. Four individuals in a white car intercepted the truck, threatened the driver with a knife, and fled with the vehicle. Acting under the Superintendent of Police's supervision, and using intelligence along with technical tracking, police identified the suspect and coordinated with nearby stations to trace the truck about 100 km away. Officers recovered the truck, its cargo, and the getaway car, arresting all four suspects within just six hours of the crime.

### DECREASE IN CARGO THEFT

**19.5%** As compared to cases captured in June 2025
