

# Secure, reliable and continuous coverage for mission-critical networks

## Military outdoor antennas

HUBER+SUHNER offers a large portfolio of robust antennas for campus solutions or country wide networks, ranging from small omnis to high-gain directional antennas. Available frequency ranges include 380 - 3800 MHz.

## Military indoor antennas

Separate indoor DAS systems need wideband antenna technologies. HUBER+SUHNER offers a broad range of 380 - 6000 MHz antennas which provide stable voice and data connection in areas such as airports and army sites.

## Antennas for tactical solutions

HUBER+SUHNER designs Man-Pac antennas, antennas for tactical acquisition radar, and vehicle radar antennas that are ideally suited for applications with unique requirements. We also offer complementary components to ensure the integrity of data transmission.

## Jamming vehicle antennas

Extra round omni diagram, low VSWR and high-power handling make the HUBER+SUHNER antenna portfolio perfect for jamming applications on vehicles. These antennas cover a broad frequency range from 380 MHz up to 6 GHz, and provide exceptional performance in harsh environments.

## Military vehicle antennas

Based on a huge portfolio of existing vehicle antennas, HUBER+SUHNER also offers extra robust solutions featuring discreet, unobtrusive designs that will surely withstand challenging field conditions.

## Customized solutions

Are you looking for a customized antenna configuration for a specific project? Our HUBER+SUHNER development team is ready to work with you to quickly deliver a test sample based on your specifications.
