- Self contained in standard 20ft shipping containers.
- High speed bagging with 10-110kg bag size options
- Single or double bagging lines, running independently
- NMi – Dutch weights and measures certified
- Fully customizable with additional options

Discharging flexibility for busy terminals:

- Quayside – direct discharging from vessels
- Port warehouse operations
- Inland storage and distribution depots
- Blending plant facilities
- Commodity storage silos

MOBILE BAGGING MACHINES

COMPAC 140

KEY FEATURES

Nectar's mobile bagging machines are designed specifically to be housed within two ISO containers, revolutionising the bulk commodity handling industry, and allowing for increased efficiency with destination bagging. We offer a full range of bulk handling equipment including hoppers, grabs, and bagging machines.

Nectar's build quality is designed with the highest grade materials to withstand all dynamic loads - as well as the wear and tear of busy bulk terminals. Constructed in an ISO 9001 and ISO 14001 approved factory, each build is inspected to ensure dimensional control and performance to agreed standards and CE marked.

Our clients are guaranteed durability, performance and reliability with affordable installations and quick commissioning performed by Nectar technicians.

MOBILE BAGGING MACHINES

COMPAC M140 MOBILE SOLUTIONS

FROM BULK TO BAG IN RAPID TIME

In the fast-paced world of port logistics, efficiency is paramount.

Nectar Group is leading the charge in optimizing fertilizer handling with the COMPAC M140, a versatile and mobile bagging solution designed for demanding warehouse environments. This system empowers you to discharge drybulk product quickly and bag it on-site, minimizing delays and maximizing throughput.

Nectar Group delivers destination bagging services with a fleet of mobile bagging units delivering exceptional discharge speeds, accurate weighting, unparalleled service and manoeuvrability.

Mobile bagging equipment is ideal for fast deployment, quick setup, and high-speed quayside or warehouse discharging.
