SWAP

THE SIMPLE PERFECTION

How to choose the type of downlights for most modern houses

Fixed downlights focus on the light directly downward. Adjustable downlights allow to the light to be turned in the required direction (**Fuoco Adjustable downlight with an angular adjustment of 25° and a rotational adjustment of 355°**)

Designers like to use different shape of downlights for project aesthetic, this will depend on types of the design style of room or other spaces, and even interior designer will consider how good to a perfect balance between the fixture and ceiling. (**Fuoco family comes in round and square shape with fixed and adjustable version**)
