Saddle Stitched Books

Multiple folded sheets are secured together with wire staples, creating a neat, professional presentation in a lightweight format. A cost-effective solution for brochures, catalogues and programmes.

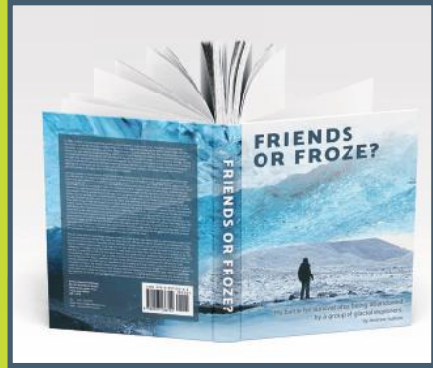

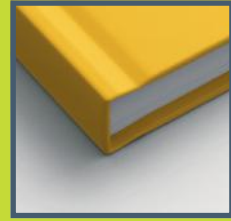

Perfect Bound Books (Paperback)

Inner pages are glued with a wraparound cover, creating a flat, printable spine. As well as accommodating a larger number of pages this format can enhance the professional presentation, look and feel of your publication.

Case Bound Books (Hardback)

A protective cover is created by wrapping your cover design around a rigid board. The inner pages are then attached to the hard cover for a premium look and feel, keeping the book in pristine condition for repeated handling or archival use.

Wire-O Books

Bound with a wire through punched holes in the pages, allowing for the books to be opened flat or folded back on themselves – particularly useful for manuals, notebooks, planners or reports. Coloured wires available on request.
