About Us

**ELEMENT
GREENERY
DESIGNS**

PTY LTD

"A better garden, the easy way."

Element Greenery Designs has helped individuals, cafes, and restaurants, as well as new office fit-outs, achieve a positive ambience in the desired space using high-quality artificial, faux plants and wall panelling. Our uniqueness is that we work individually with the client to achieve the desired aesthetic outcome for the area.

Our high-quality, UV-stabilised range has stood the test of time. However, for peace of mind, we offer a 3-year warranty on selected products. This covers UV damage, fading or cracking.

If you're looking for a better garden, the easy way, Element Greenery Designs can offer you an end-to-end service including design, measurement, and installation. Our work has **3 years guarantee** for installation, detachment, or naturally caused damages.

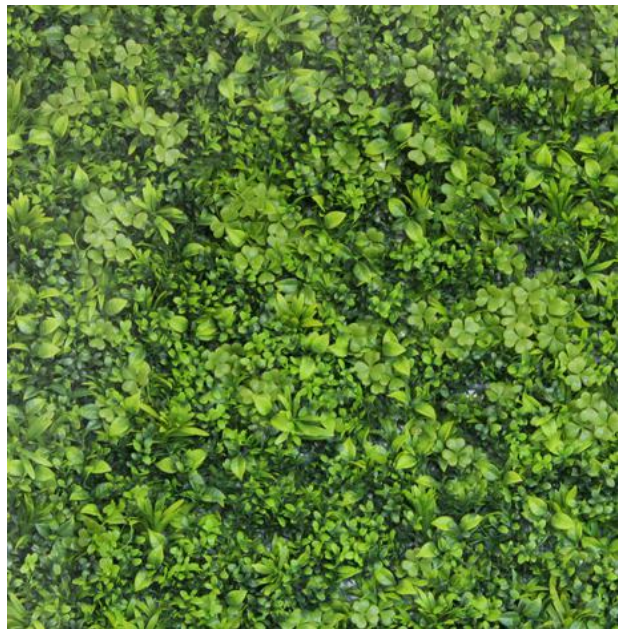

Our specialties include privacy screening, designer gardens, fence extensions, garden transformations, designer plants, and plantscaping.

We pride ourselves on quality product distribution, professional installation, open and transparent engagement, and the most competitive pricing globally.

We are proud to be able to provide bespoke and custom design and we are highly recommended for our competitive pricing, clean work spaces, efficient working time frames, communication, quality of work, engagement with clients, and product knowledge.

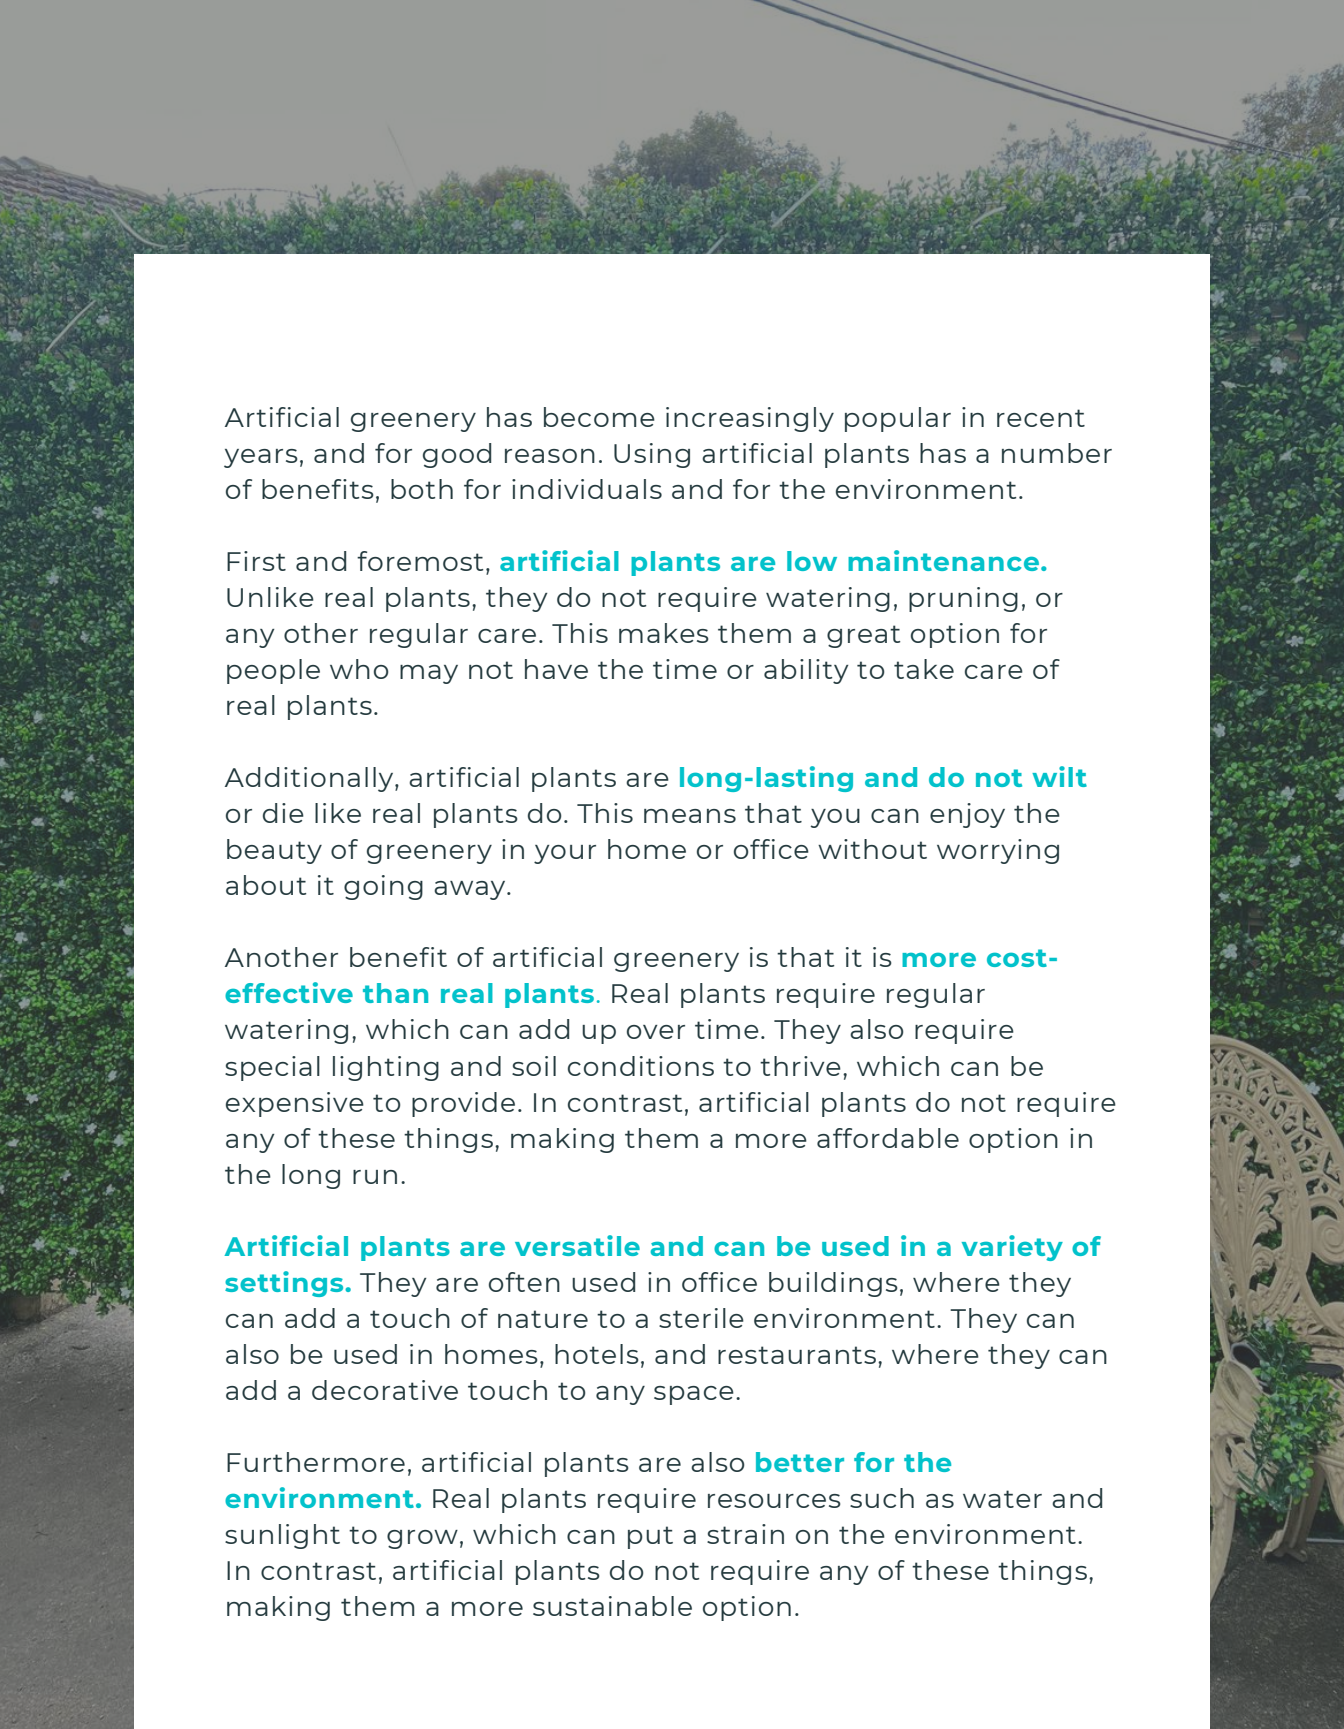

We are most concerned with authenticity and communication so that our clients can make the most informed decision when choosing their artificial greenery.

A wall of artificial greenery, featuring a dense arrangement of green leaves and ferns. A decorative black panel with a leaf pattern is visible on the right side. The wall is situated next to a concrete sidewalk. The background shows a building with a dark roofline under an overcast sky.

*The Benefits of
Artificial Greenery*

Artificial greenery has become increasingly popular in recent years, and for good reason. Using artificial plants has a number of benefits, both for individuals and for the environment.

First and foremost, **artificial plants are low maintenance.** Unlike real plants, they do not require watering, pruning, or any other regular care. This makes them a great option for people who may not have the time or ability to take care of real plants.

Additionally, artificial plants are **long-lasting and do not wilt** or die like real plants do. This means that you can enjoy the beauty of greenery in your home or office without worrying about it going away.

Another benefit of artificial greenery is that it is **more cost-effective than real plants.** Real plants require regular watering, which can add up over time. They also require special lighting and soil conditions to thrive, which can be expensive to provide. In contrast, artificial plants do not require any of these things, making them a more affordable option in the long run.

Artificial plants are versatile and can be used in a variety of settings. They are often used in office buildings, where they can add a touch of nature to a sterile environment. They can also be used in homes, hotels, and restaurants, where they can add a decorative touch to any space.

Furthermore, artificial plants are also **better for the environment.** Real plants require resources such as water and sunlight to grow, which can put a strain on the environment. In contrast, artificial plants do not require any of these things, making them a more sustainable option.

Recent Clients

Burgertory

📍 SURREY HILLS

One of our favourite burger joints gets spruced up with Element Greenery Designs' gorgeous selection of artificial greenery. From eye-catching interior greenwalls, to stunning hanging artificial plants, this joint makes dine-ins a sinfully satisfying experience.

Burgertory

BUNDOORA

Burgertory's new location called for some Element Greenery Designs' flare. We incorporated scenic greenwalls and hanging plants, which makes great accents for a joint serving delicious plant-based burgers!

FULLY
icious

Burgertory

MILL PARK

Mill Park's Burgertory joint gets totally transformed with Element Greenery Designs high-quality artificial hanging plants. Dining has never been a more calming and classy experience.

Chicken & Cocktails

📍 MULGRAVE

Element Greenery Designs' selection of artificial plants added a touch of sophistication to this very relaxing food joint. The pops of green on cream and neutral coloured interior made for a classy dining experience.

PILATEFORM 3095

CAFE BAR EATERY

Platform 3095

ELTHAM

Surrounding this café & bar's walls with lush artificial greenery added to the cosy and calm atmosphere. A perfect location for busy bodies who just want to chill and have a cup of coffee.

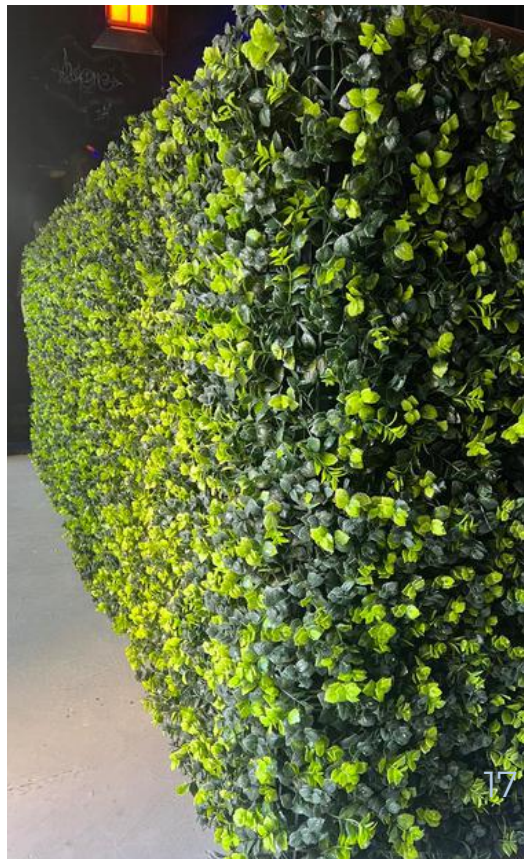

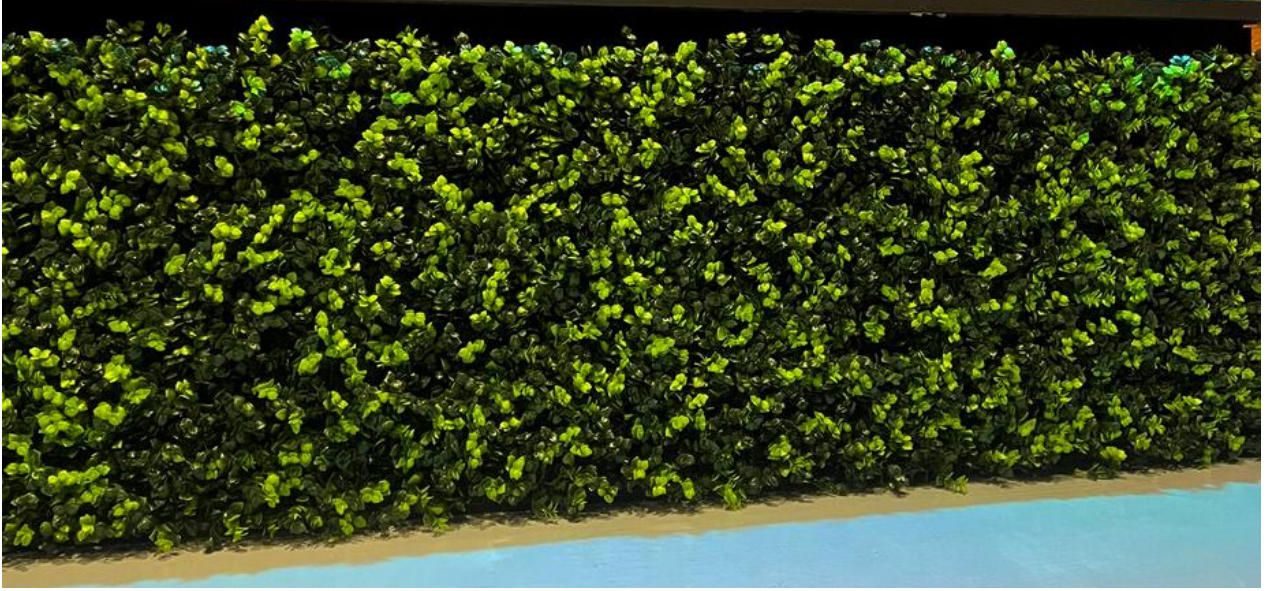

Blue Bar

PRAHRAN

Sprucing up this bar with lush artificial greenery added to the cozy and calm atmosphere. A perfect location for busy bodies who just want to chill and unwind with a refreshing drink.

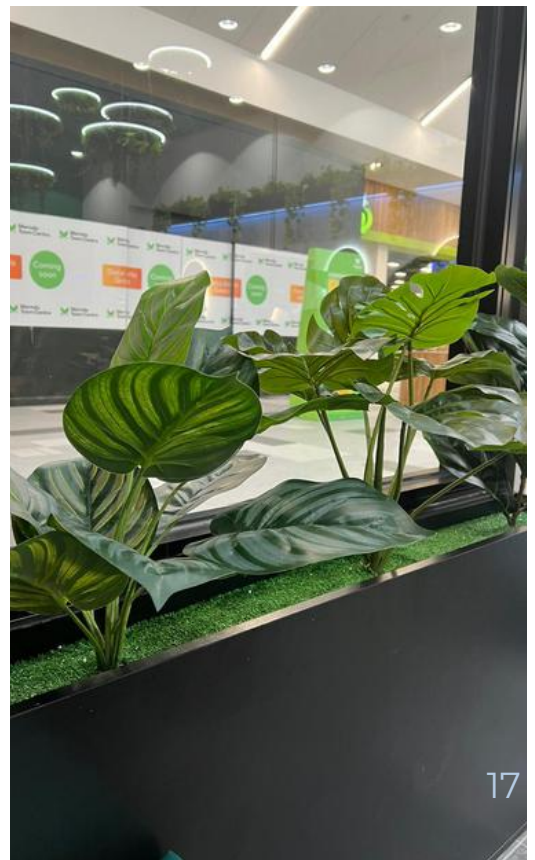

The image shows a modern interior space with a white wall and a teal ceiling. Several circular openings in the ceiling are filled with lush green plants, some of which are hanging down. The wall features three circular openings, each with a different scene inside. A wooden counter is visible on the right side, and a poster of a woman is on the wall behind it. The overall atmosphere is bright and natural.

Style House

MERENDA

We transformed The Style House with our enchanting plantscaping. Lush greenery added a touch of nature's beauty, creating a serene oasis for both the client and their customers ..

Our Bestselling Range

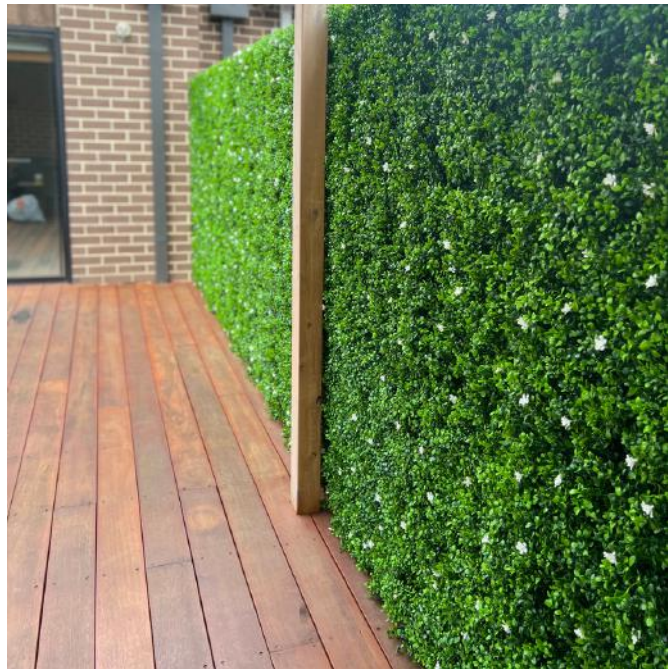

You can never go wrong with Element Greenery Designs' collection of greenwall styles to suit every taste.

White Jasmine Flower

High Quality and UV engineered, this hedge has the most delicate little white flowers - Perfect for fences, walls, patios, balconies and more.

Pittosporum

Pittosporum Hedge is one of our top-selling hedges.

In the real plant world, Pittosporum plants are moderate to slow-growing bushes in the real world however can grow quite big and act as the perfect privacy screen.

We are lucky that we have had the pittosporum hedge manufactured to copy close to perfect replication of this magnificent structure.

Spring Fern & Ivy

This style gives texture and a perfect backdrop to compliment other foliage that surrounds this hedge. It is a great way to fill in gaps in your garden that you may not have foliage grow well. We have had a huge demand of this product as the colours and textures are an all in one solution to a lot of backyard renovations and fence privacy projects.

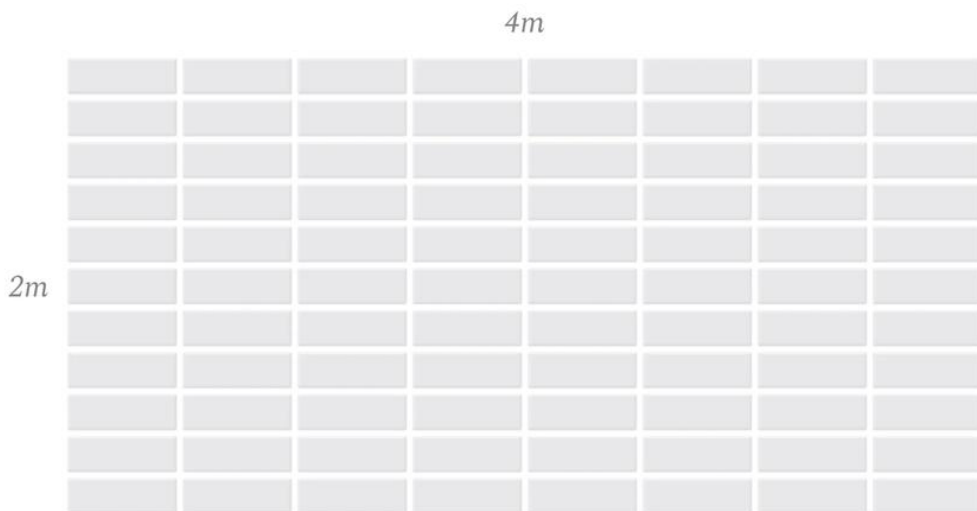

“**Could not be happier** with our newfound privacy and lush green wall. When we first started looking I was a little worried about the look and feel of artificial greenery, so I wanted to ensure we went to **a company with the best product** and that’s what we found. Could not have been more impressed with **Element Greenery.**“

Jamie Vickers

How it Works

Example

Height x Length = Square Metre

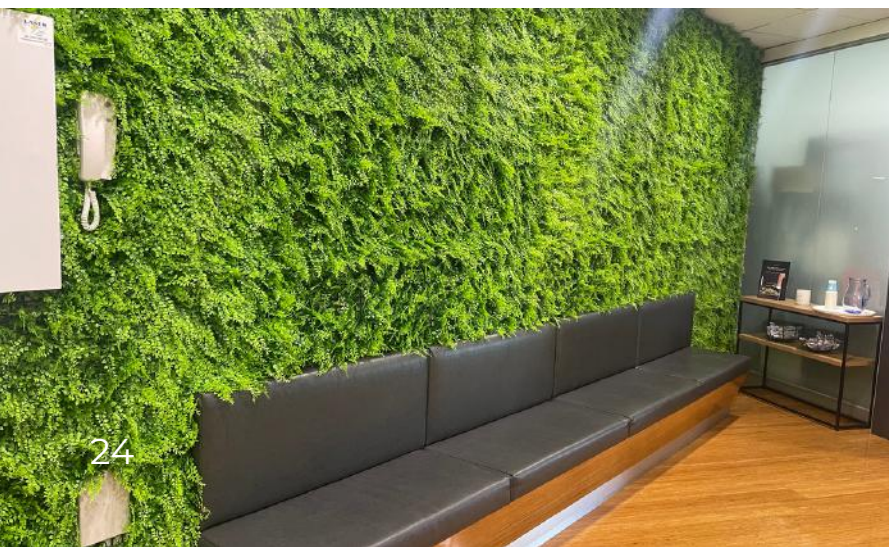

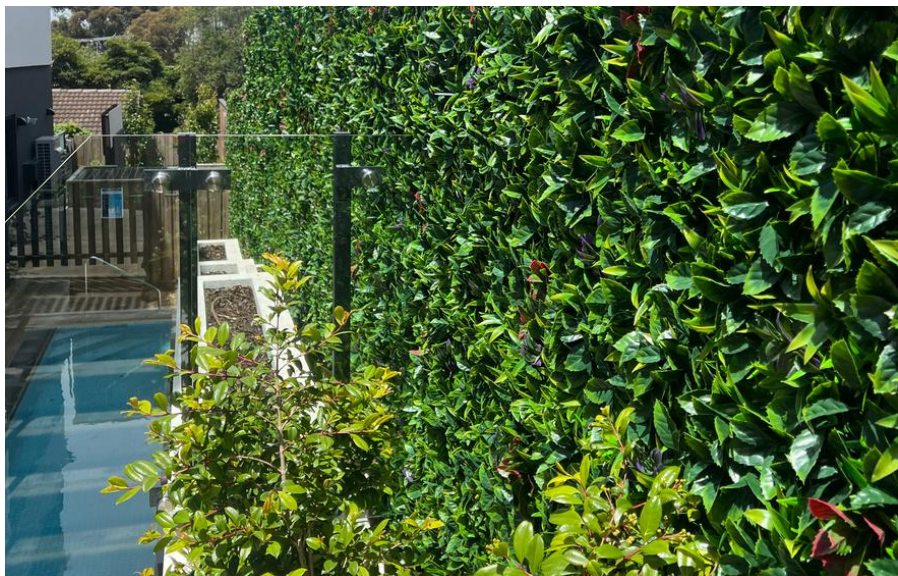

$$2 \times 4 = 8m^2$$

8m² of material will be needed

MEASURING UP FOR A VERTICAL GARDEN WALL

1. What is the height in metres?
2. What is the length in metres?
3. Rounding up to the nearing metre
4. Multiply the height and the length. $H \times L = M2$

This will give you the amount of 1m² panels you will need.
