LET'S TALK - Hair "Ratios"

Not All Double Drawn Hair is Created Equal

When it comes to extensions, most salons hear the terms single drawn or double drawn — but what really matters is the ratio of long strands in the bundle.

💡 What is a Ratio?

A ratio tells you how much of the hair in the bundle is the full advertised length.

For example, in a 100g bundle of 20" hair, not every strand will be exactly 20".

A 30% ratio means only 30g of that bundle is a true 20" — the rest may include shorter strands (like 10", 14", or 18").

The higher the ratio, the thicker and fuller the hair will look all the way down to the ends.

Common Ratio Levels:

- **Single Drawn (Low Ratio):** Fuller at the top, tapers toward the ends
- **Medium Ratio (18–25%):** Marketed as "Double Drawn" by many suppliers
- **Premium Ratio (30–40%):** Fuller lengths, minimal tapering — Get The Hair standard.
- **Luxury Ratio (45%+):** Maximum fullness from root to tip — custom request

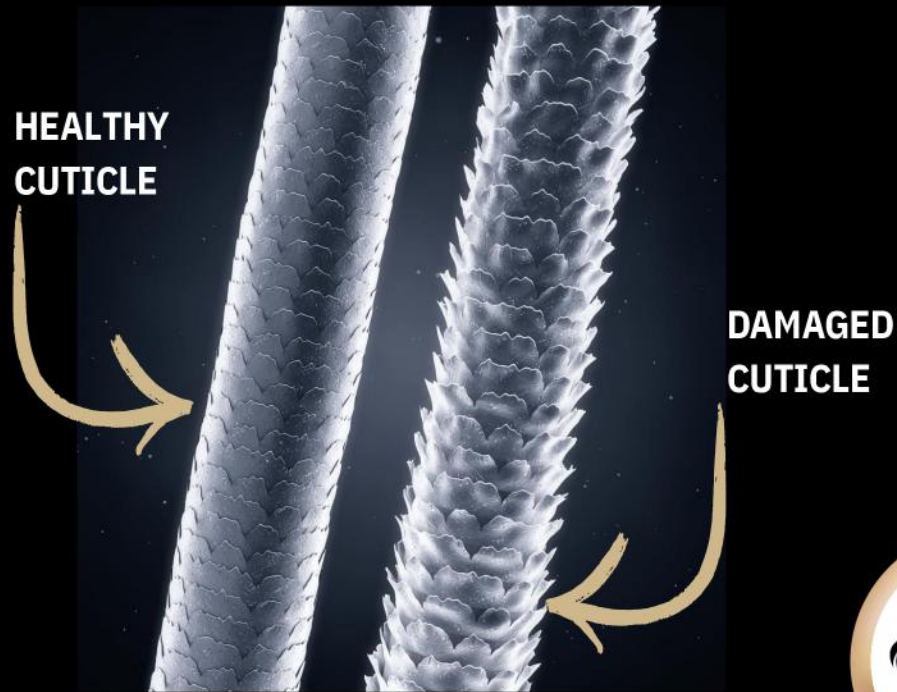

Why does **price vary** between bundles with the **same length**?

Because the ratio of full-length strands inside matters more than the label.

At **Get The Hair**, our standard bundles are **Premium Double Drawn** — offering from **30% - 40%** full-length strands for luxurious, full-bodied **results that last**.

This is a microscopic picture of hair, Hair tangles are due to cuticle damage.

Why Cuticle Care Matters

What?

Makes **Get The Hair** Different?

Every bundle we offer is made from cuticle-intact, cuticle-aligned hair.

This means:

- The outer layer hasn't been stripped by chemicals
- All strands face the same direction, like real hair naturally grows
- You get smoother, tangle-free hair that lasts

Why?

Does This **Matter to You?**

- Cheaper "Remy" hair on the market often has damaged or reversed cuticles
- These bundles may look shiny at first, but they tangle quickly and don't last
- Our hair avoids harsh acid processing — instead, we preserve the cuticle through every step of colouring and treatment

Damaged Cuticle:

- ✗ Rough texture
- ✗ Prone to knotting
- ✗ Breakage and shedding
- ✗ Short lifespan

Healthy vs Damaged Cuticle

Healthy Cuticle:

- ✓ Smooth
- ✓ Moisture-locking
- ✓ Tangle-free
- ✓ Long lifespan (12–24 months)

This is why Get The Hair extensions don't just feel amazing — they stay amazing.

AFTERCARE REALLY MATTERS

This is why Get The Hair extensions don't just feel amazing — they stay amazing.

♥ Aftercare at a Glance:

- Brush daily with an extension-safe brush from ends to roots
- Use sulphate-free shampoo & conditioner to protect softness

♥ Aftercare at a Glance:

- Avoid sleeping with wet hair — braid it loosely overnight

♥ Aftercare at a Glance:

💡 Quick Reminders:

Summer & Holiday Hair Advice

Protect Your Extensions in the Sun

Suncream, chlorine, and salt water can affect your extensions if not handled correctly. Here's how to keep your hair looking fresh on holiday

- **Tie hair up when applying suncream** — some UV filters (especially avobenzone) can cause light blonde or ash tones to turn peach or greenish
- **Use a towel** over your shoulders during application
- **Avoid direct contact** between SPF and extensions
- Rinse hair with fresh water after swimming (even with a cap)

♥ What if hair **discolours**?

Don't panic — it happens! A **chelating shampoo** like Malibu C Hard Water or Malibu C Swimmers can help lift mineral and **chemical buildup safely**.

Always follow with a **deep conditioner** to restore moisture.
When in doubt, **ask your stylist** for post-holiday care advice.
