PROUD SUPPORTER OF

PRINT MEDIA

18

Spicers carry all of your print media essentials as well as a fine collection of specialty products to suit any creative sign and display project. We supply media for aqueous, Eco-Solvent, UV Curable, Latex and LED ink technologies, with innovative brands that include 3M™, Neschen, General Formulations, Yupo® and PhotoTex™.

DYE SUBLIMATION & HEAT TRANSFER

68

Dye Sublimation and Heat Transfer papers offer outstanding lay-flat performance, fast drying, brilliant image quality and exceptional consistency in quality for high speed and large volume applications.

RIGID SUBSTRATES

74

Our Rigids offering provides you with a market leading range of essential sign and display substrates, as well as some unique products that stand out from the crowd. Key brands include Ace, Brett Martin, Yupo® and Skybond™.

FINISHING

92

Our Finishing solutions offers essential laminating products to protect your print and extend its longevity. Our consistently excellent and diverse range includes satin, matt, gloss and specialty anti-graffiti and textured floor graphic products.

WINDOW GRAPHIC SUBSTRATES

110

Transform your windows with special effects or optically clear films. Available in a range of textures, finishes and colours suitable for indoor or outdoor applications.

ON THE COVER

120

Films designed to go the distance.

20

Make your mark with print media.

71

Brilliant results in Dye Sublimation.

44

Lead the way in floor graphics.

79

Make your products stand out.

114

Durable, vibrant, and built to be seen.

Explore our Green Spotlight products.

VEHICLE WRAP

Today's vehicle enthusiast no longer has to settle for the manufacturer's standard range of hues. With Spicers, your favourite vehicle can be pretty much any colour imaginable, or a mixture there-of.

CUT COLOUR VINYL

Our extensive range is one of the best in the business. With stock on hand and sold by the metre*, we have grades to suit a huge variety of applications.

REFLECTIVES

Make the world a brighter place with 3M reflectives. Films suitable for traffic, commercial signage, stickers, labels and anywhere you need high visibility are covered by the range. There's loads of colours, lots of grades, and heaps of features.

INK & CONSUMABLES

Spicers holds a vast portfolio of wide format printing and finishing equipment. We are proud to offer machinery from respected brands such as Mimaki™, Roland, Epson®, RollsRoller and Neolt. Spicers also stock OEM ink and toner for a vast range of digital wide and grand format printers as part of our offering.

ACCESSORIES

From mounting tapes and adhesives to versatile display stands and banner systems, our accessories ensure your creations are securely and beautifully showcased.

EDITION 3

Welcome to the latest edition of the Visual Communications Catalogue.

Spicers Visual Communications portfolio is an invaluable resource to the screen and wide format printing industry and encompasses consumables, hardware, inks, software, accessories, training and support. From point-of-sale and vehicle graphics right through to exhibition stand construction and shop fit out, Spicers has a product to get you noticed, and the hardware to print and finish.

With our team of Visual Communications specialists, Spicers can provide you with information and expert advice. We are your local supplier with stock on the floor and a distribution network ready to deliver to you. Please contact your local Spicers representative for enquiries or to request a sample.

Spicers

Greenfleet partnership

In 2022 Spicer's embarked on our journey towards Carbon Neutrality.

Spicers Australia is offsetting CO2 emissions relating to our Australian operations. This includes emissions from LPG for our gas forklifts, the diesel used in our fleet of trucks, the fuel used in company cars (including those with car allowances) and electricity used in our offices and Distribution centres. Whilst Spicer's have taken action through solar panels on some of our sites, LED lighting upgrades and movement to more electric forklifts, we still have some work to go. We are proud to be partnering with Greenfleet to take climate action and offset our carbon emissions through native reforestation.

Greenfleet is a leading not-for-profit environmental organisation committed to protecting our climate by restoring our forests. Greenfleet plants native biodiverse forests to capture carbon emissions and help fight the impacts of climate change. Since 1997, Greenfleet has planted over 10.8 million trees across 550+ forests in Australia and New Zealand. As they grow, Greenfleet forests absorb carbon emissions, improve soil and water quality and restore habitat for native wildlife, including many endangered species.

Spicers' first offset was allocated to Glendalough, VIC. In the rolling hills of South Gippsland, this previously cleared 240-hectare property will be returned to native ecosystem. The property is adjacent to remnant native forest and will provide an important vegetation link for Strzelecki Koalas and habitat for native birds such as the Yellow-faced Honeyeater and Grey Fantail.

"By partnering with Greenfleet, we are confident that our climate action provides genuine and lasting environmental benefits. We are proud of the impact we have made and that we will continue to make into the future," said David Martin, CEO of Spicer's Limited. "By offsetting our emissions with Greenfleet, we are taking practical action against climate change to help to restore Australia's forests, recreate crucial habitat for native wildlife and transform degraded land back to its natural state."

Through practical climate action, Greenfleet is growing hope for our climate.

For more information visit www.greenfleet.com.au

SUSTAINABLE DELIVERIES

SPICERS' JOURNEY TO CARBON NEUTRALITY

We are proud to highlight that all Spicer's deliveries are now carbon neutral made possible through our partnership with Greenfleet.

Delivering Sustainability

Greenfleet's remarkable efforts include the revegetation of land in Victoria, New South Wales, Queensland and New Zealand. The forests they plant will be protected beyond this century and are projected to remove nearly 513,887 tonnes of carbon as they grow. This initiative not only offsets our emissions but also contributes to the long-term health and sustainability of our environment.

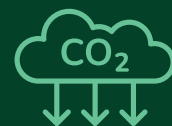

PROUD SUPPORTER OF

Spicers are proud to be partnered with Greenfleet.

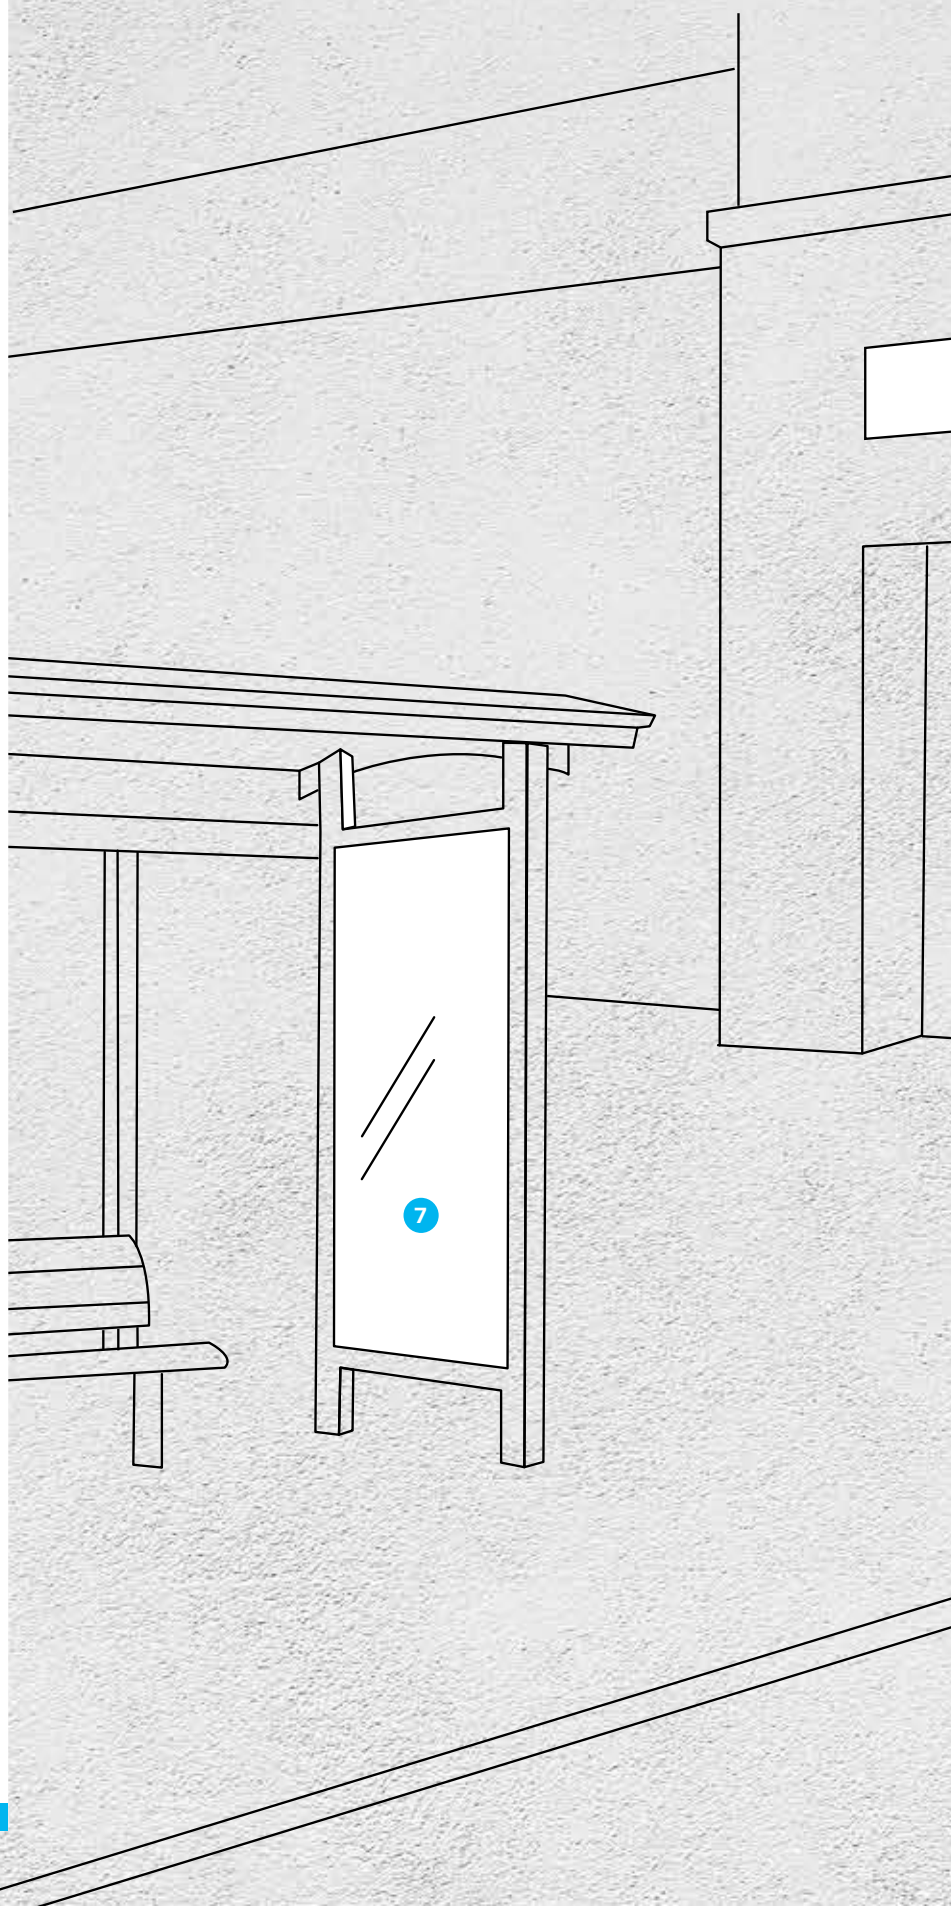

All Spicer's deliveries are now carbon neutral.

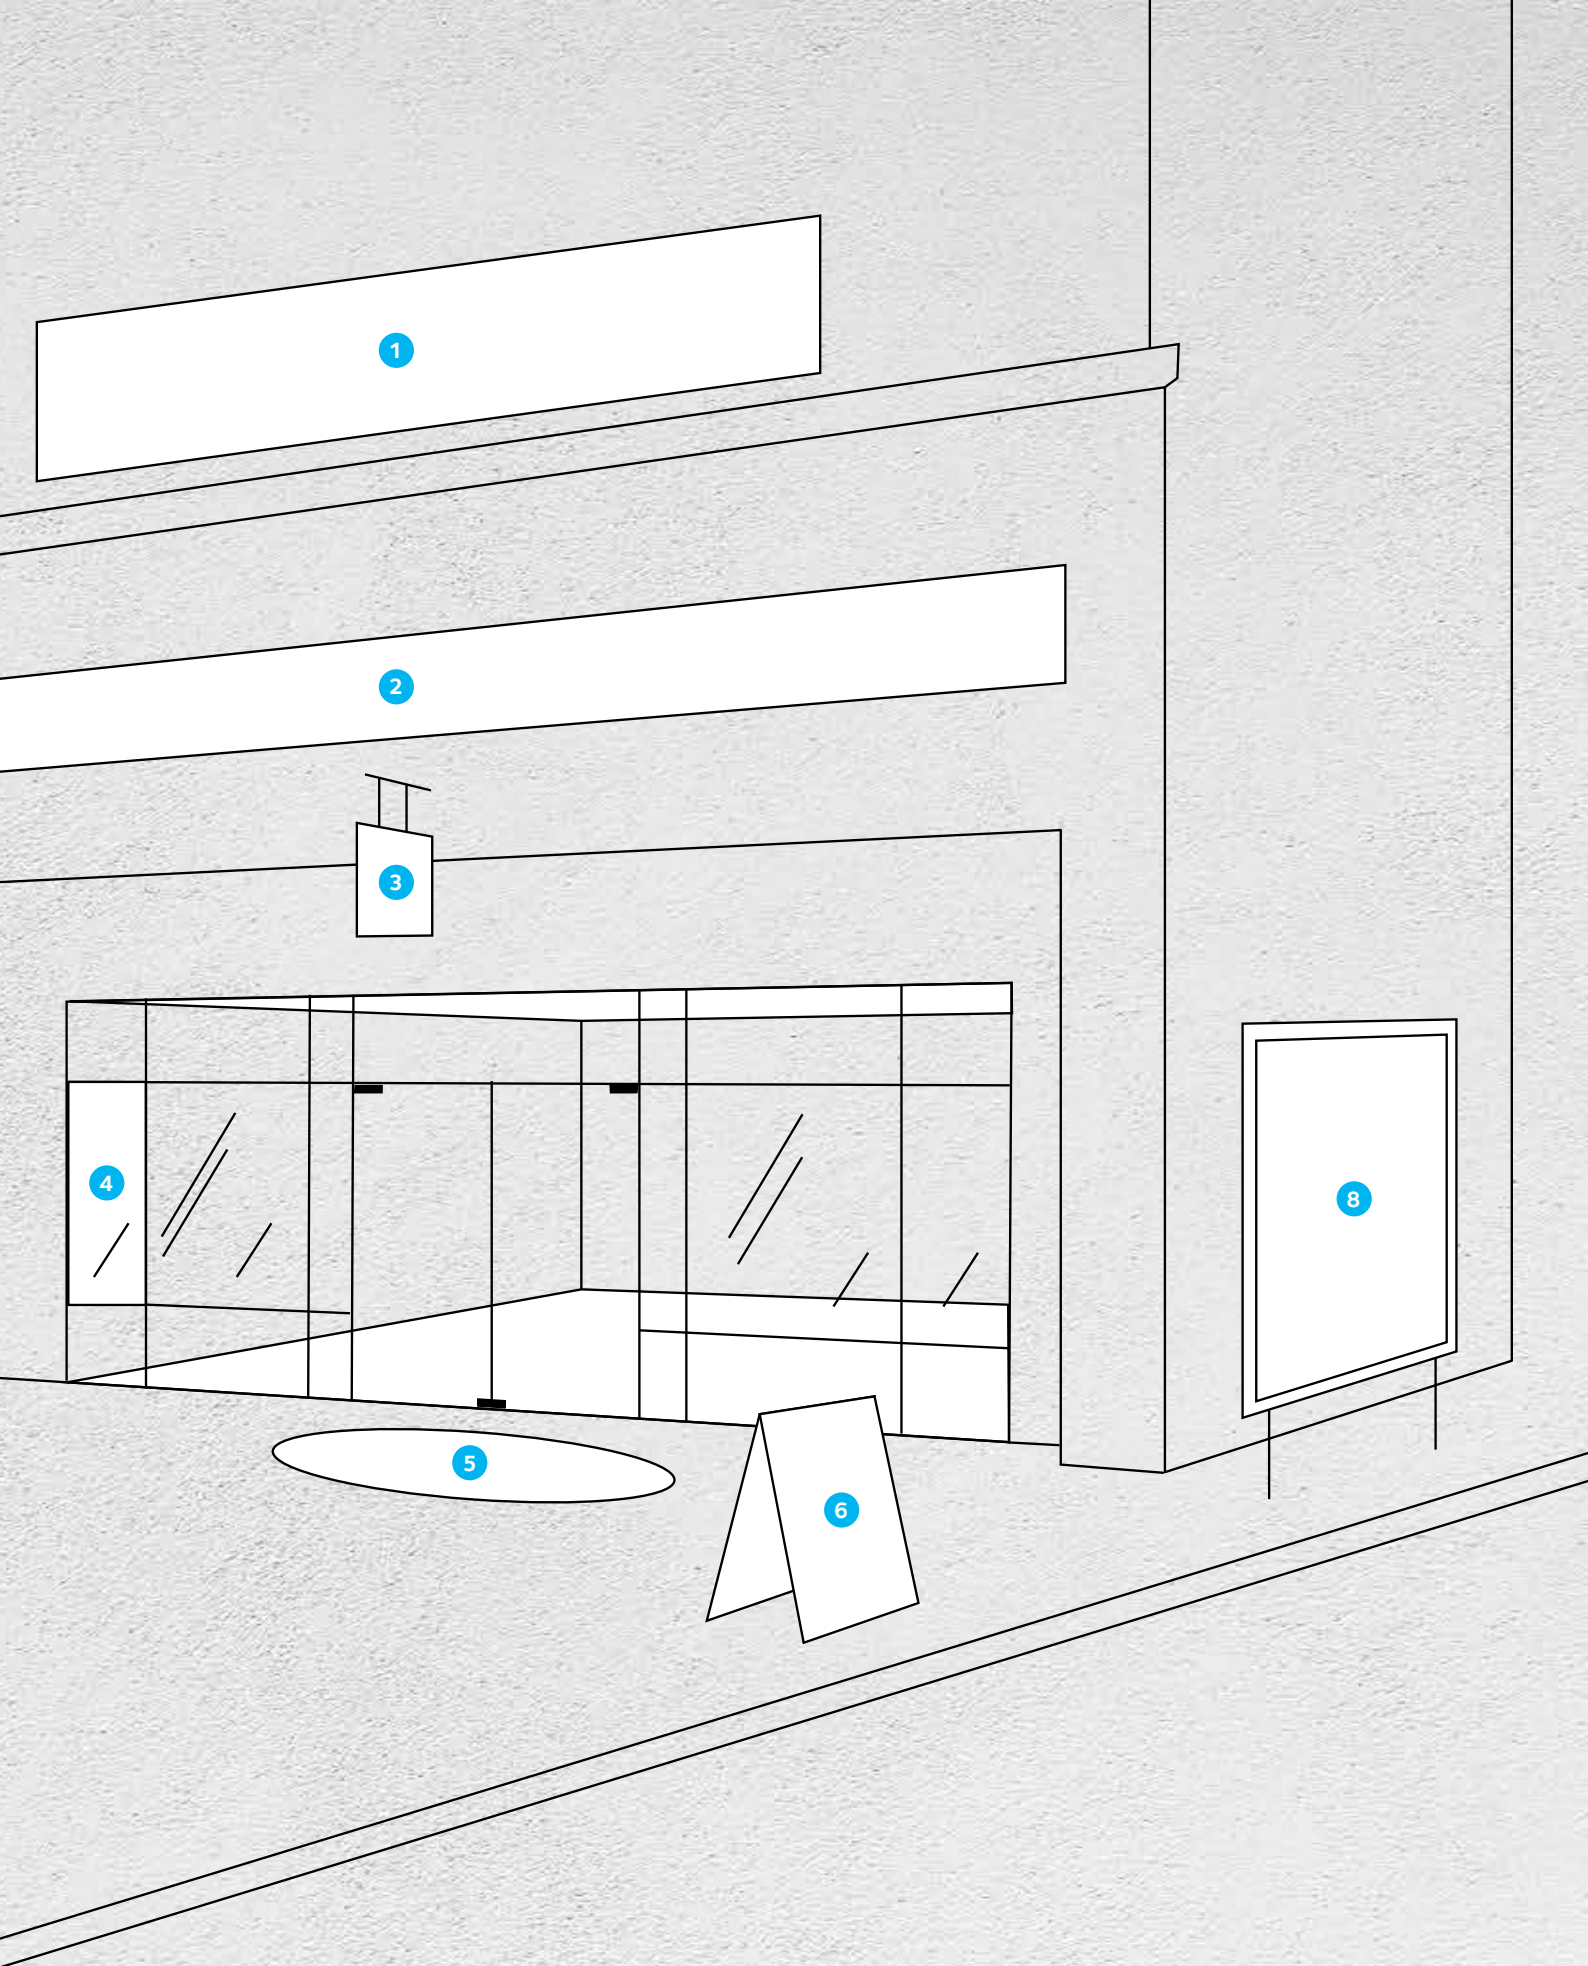

Balancing emissions for a sustainable future.

General Formulations GF 201 & GF 203

INTERMEDIATE

- GF 201 and GF 203 are 80 micron polymeric white calendered vinyls, with a clear permanent acrylic pressure sensitive adhesive
- The clear adhesive creates a permanent bond to a variety of common substrates used in graphics applications
- For use with overlaminate: GF 400 Series or specialty GF laminates, please speak to your Spicers representative
- Features a 90# layflat liner
- The 90# liner provides excellent layflat qualities in a variety of ambient conditions along with ease of application of large format graphics
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

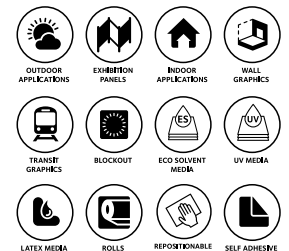

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)

General Formulations GF 246

INTERMEDIATE

- GF 246 is a premium 60 micron polymeric gloss white vinyl film with permanent repositionable grey solvent acrylic pressure sensitive adhesive
- This product is recommended for indoor and outdoor uses where flexibility, durability and resistance to sunlight are required
- Best suited for simple to moderate curves. This product is a polymeric calendered vinyl, and thus is not meant for complex curves
- These films can be used for fleet and vehicle graphics, architectural signage, commercial-retail signage, point-of-purchase graphics, and decals
- For use with overlaminate: GF231 & GF240
- Outdoor durability up to 7 Years
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Rocal POPDOT

LOW-TACK & ULTRA REMOVABLE

- Matt white monomeric vinyl with a dot pattern, clear, removable adhesive
- Easy & clean removal up to 1 Year from installation
- For clean, flat, smooth and lightly textured surfaces (indoors)
- Dot adhesive offers quick & easy, bubble free installation with no need for tools or wet application
- Recommended for short-term indoor applications on windows, walls & other internal flat surfaces
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Face Thickness (ums)	Width (mm)	Length (m)
194769	Rocal POPDOT	White Matt	Clear Dot Removable	100	1372	50

General Formulations Static Cling®

LOW-TACK & ULTRA REMOVABLE

- GF 207 is a 179 micron premium monomeric clear static cling flexible calendered vinyl film on a double PE Liner
- This product may be used for temporary applications to exterior glass, up to 3 months
- GF 208 is a 179 micron premium white static cling flexible calendered vinyl film on a double PE Liner
- You can use either application method for this product, but the best way for a smooth, bubble free application, is to spray the glass and the graphic surface, using a wet edged squeegee to easily apply
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

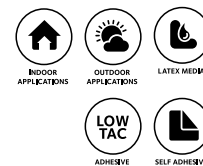

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)

ENDLESS ADVENTURES IN PRINT

Reposition, Refresh, Reimagine
with PhotoTex™ Self-Adhesive Fabric.

Designed for ease and versatility, PhotoTex™ applies seamlessly —just peel and stick for a bubble-free finish. Need a change? Its reusable and repositionable design lets you move it without residue. Ideal for indoor and outdoor use, PhotoTex withstands extreme conditions while delivering vivid print quality. Compatible with walls, glass, metal, wood, and more, it's the perfect solution for high-impact visuals wherever creativity takes you.

Features & Benefits

- 99% block out performance (opaque version)
- Removable, reusable ad repositionable
- Suitable for any non-porous flat surface
- Air bubbles filter out through fabric
- Compatible with aqueous pigment ink, eco-solvent, latex and UV curable ink
- Paint and wallpaper safe
- Tear-resistant
- Wrinkle free
- Perfect for overlapping/panelling and hiding marked or coloured surfaces
- High Tack options for difficult to stick to surfaces
- Australian tested to Group 1 – ASNZ 38

Applications

- Retail Displays & POP Graphics
- Office & Hospitality Décor
- Exhibition & Event Signage
- Window & Vehicle Graphics
- Home & DIY Wall Art

From cityscapes to scenic landscapes, PhotoTex™ transforms any surface into a story. Pack your creativity, and let your ideas take flight with PhotoTex.

General Formulations RoughMark®

WALL GRAPHIC

- GF 285 RoughMark® is a 90 micron matt white opaque polymeric vinyl film with a solvent acrylic High-Tack removable (HTR) pressure sensitive adhesive on a double side PE Liner
- Designed to aggressively grip onto textured substrates such as brick or block, yet cleanly remove without leaving adhesive residue on the contact surface
- This film conforms well with controlled heat and features clean removability from a variety of moderately textured substrates in vertical application only
- GF RoughMark can be used in applications where a conformable removable vinyl is desired
- Removable up to 6 months
- Outdoor Durability up to 5 Years
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Self Adhesive Vinyl

PRINT MEDIA

General Formulations GF 218 WindowMark®

WINDOW GRAPHIC

- GF 218 WindowMark® Blockout is a 203 micron gloss white print media with dual-layer construction making it 100% opaque with a removable adhesive for easy, clean removal
- Reverse print on GF 255 (clear vinyl), print on GF 218 (Right read) and laminate the two films together. Apply the film on the inside of the window for a Push Pull type decal or graphics
- Excellent for window graphics & retail displays where total opacity and zero light transmission is required and front windows and internal windows where total privacy is a must
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

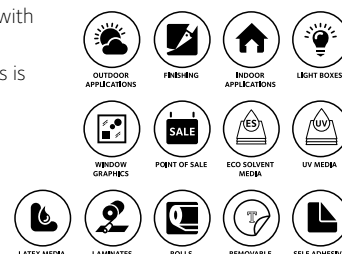

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173599	GF 218 WindowMark	White	Clear Removable	1370	30

General Formulations GF 255 OptiMark®

WINDOW GRAPHIC

- GF 255 OptiMark® is a 76 micron optically clear high gloss flexible calendered PVC film with a clear Solvent acrylic removable pressure sensitive adhesive and a clear polyester liner
- Wet application is the preferred method. Wet application on solvent based clear products is the best way to achieve bubble free and optically clear results
- Clean removal from glass for up to one Year under normal exposure conditions
- Outdoor Durability up to 3 Years
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173607	GF 255 OptiMark	Clear Gloss	Clear Removable	1370	45.7

General Formulations GF 790AE

WINDOW GRAPHIC

- GF 790AE Print-N-Privacy is a decorative polymeric glass etch vinyl
- Can either be applied printed or unprinted for etched glass visual effect or for use as a privacy film
- Solvent based permanent acrylic pressure sensitive adhesive
- Bubble Free Liner
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452232	GF 790AE Print-N-Privacy	Window Etch	Clear Permanent Airflow	1370	45.7

Rocal Dusted Sparkle

WINDOW GRAPHIC

- 100 micron Calendered PVC film used for privacy screening & creative patterns designed for use on glass windows where privacy is required whilst allowing effective light transmission
- Main Applications: Meeting Rooms, Retail, Partitions, Offices, Residential
- Clear solvent based acrylic PSA – permanent (can be wet applied)
- 100 gsm single PE coated release liner
- Ideal for both outdoor and indoor application up to 3 Years

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173535	Rocal Dusted Sparkle	Dusted Sparkle	Clear Solvent Based Acrylic Permanent	1220	50

Rocal Frosted Silver Etch

WINDOW GRAPHIC

- 100 micron Calendered PVC film used for privacy screening & creative patterns designed for use on glass windows where privacy is required whilst allowing effective light transmission
- Main Applications: Meeting Rooms, Retail, Partitions, Offices, Residential
- Clear solvent based acrylic PSA – permanent (can be wet applied)
- 100 gsm single PE coated release liner
- Ideal for both outdoor and indoor application up to 3 Years

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)

General Formulations Chrome

HOLOGRAPHIC & CHROME

- GF 759 is a 50 micron print receptive Chrome Silver metallized polyester film
- GF 760 is a 50 micron print receptive Chrome Gold metallized polyester film
- Permanent Solvent Acrylic pressure sensitive adhesive
- Chrome polyester films are recommended to simulate metallic finishes. These products can be used for architectural signage, commercial-retail signage, point-of-purchase graphics, product identification
- Designed for sign cutting machines
- Indoor Durability up to 2 Years
- Print Compatibility: UV Curable & Latex Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452029	GF 759 Chrome	Chrome Silver	Clear Permanent	1524	45.7
452030	GF 760 Chrome	Chrome Gold	Clear Permanent	1524	45.7

General Formulations Holographic

HOLOGRAPHIC & CHROME

- General Formulations Holographic is a 150 micron holographic film coated with a permanent acrylic pressure sensitive adhesive on a 2 sided PE kraft layflat liner
- As with other holographic films, GF 765 has a shim line running through the middle of the roll, with a less noticeable line running every 30cm approximately. GF 767 only features the faint shim lines
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452234	GF 765 Holographic	Rainbow	Clear Permanent	1524	45.7
452621	GF 767 Holographic	Sparkles	Clear Permanent	1370	45.7

Contravision Performance 40% UL

PERFORATED WINDOW FILMS

- White on Black perforated window films for printing one-way vision graphics
- Removable without residue up to 12 months at 23 - 25 degrees celsius
- Transparency: 40% Transparent (60/40) with Replacement GrayLiner and 1.6mm hole diameter
- On window lifetime of 3+ years, recommended for longer term and demanding applications such as vehicle and building wraps

167502	Rolight Backlit PET	Matt	210	1520	30

Rodure XTC 283gsm

BACKLIT

- 250um/283gsm polypropylene
- Suitable for a large range of durable printed applications requiring resistance to tearing, water, premature breakdown or yellowing due to ultra-violet light exposure
- Rodure XTC283 is a white, semi-opaque, high density polypropylene synthetic paper with a smooth matt surface on two sides with a stiff, card-like formulation
- Allows enough light transmission to be used as posters in bus shelter light boxes as well as front lit posters
- Tear & weather resistant
- Custom sheeting available on request
- Applications: Large format posters, light box & street furniture
- Print Compatibility: UV Curable Inks

Material	Material Description	Finish	Thickness (ums)	Grammage (GSM)	Width (mm)	Length (m)
175892	Rodure XTC 283	Matt	250	283	1320	100

Bond with your printer. Give it something its ink will stick to.

With enhanced gloss white paint for **superior UV ink** adhesion, Skybond™ will stick in your mind...

A direct print and signage grade, its high quality ensures it gets noticed. Which is what you want for signage, or any print project.

Skybond™ has a ton of other benefits too. It's easily cut, bent and folded. It has a fantastic printing surface and an easy-to-remove protective liner on both sides.

With a **10-year warranty*** and coming as standard with 0.21mm and 0.3mm skin, you'll warm to this one.

**Stick with Skybond™ by Spicers.
The ink will.**

Printed on Pacesetter Hi Bulk 300gsm

BEST BITS

- Premium, direct print and signage grade aluminium composite sheet
- Aluminium skins are twice washed during production & have two coats of specially formulated, long-life polyester PE Paint applied to ensure the best possible printing surface & ink adhesion
- Suited to a wide range of flat and 3D interior and exterior print, signage and fabrication applications
- Easy to remove protective liner on both sides
- Easily cut, bent and folded
- Custom colours available ex-manufacture†
- Backed by a 10-year warranty†
- Skybond FR available on request.

**Colours available on indent only.*

† Please contact your local Spicers representative to request a copy of the Skybond warranty statement for full conditions.

Ace EB Flute

DISPLAY PAPER

- Ace Flute is three-layer 5mm fibre-based sheet consisting of 1EB corrugated cardboard sheeting, sandwiched between two solid sheets of Ace High Bulk.
- Ace Flute is a new generation fibre based, corrugated structured, smooth 2-sided surface. Light weight, rigid sheet especially manufactured for sign and display applications.
- High white coated and ultra smooth print surface
- Suitable replacement to foamed PVC, foamed polystyrene, and polypropylene boards
- Lightweight rigid, economical and long lasting
- Suitable for indoor applications, POS, posters and header cards
- Materials used in manufacturing Ace Flute are CoC Certified
- Print Compatibility: Latex & UV Curable Inks.

Material	Material Description	Colour	Core	Width (mm)	Length (mm)	Pallet Quantity
179316	Ace EB Flute	White	Brown	1220	2440	200

Yupo® FPU 250 Sheets

DISPLAY FILM

- Polypropylene film
- oOh!media specified product
- Tear & weather resistant
- Market leading bulk, whiteness, opacity, ink adhesion & colour reproduction
- Applications: Large format posters, light box & street furniture
- Custom sheeting available on request
- Print Compatibility: Screen & UV Curable Inks.

General Formulations Barrier Film PPS2W

PROMOTIONAL

- A 60 micron white metalised print-treated polypropylene film coated with 207-4841 white pigmented acrylic pressure sensitive adhesive on a smooth overlay liner
- Can be used to laminate to static cling and low tack films, as due to its light weight, the graphics are not weighed down and will not fall from the surface
- May also be used with flexographic, offset and letterpress inks but must be tested prior to use
- Opaque film designed to laminate clear window decals to create double sided window graphics
- This film is also printable an designed to accept a variety of UV curable and solvent-based screen inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173891	GF PPS2W	White	Permanent	1370	45.7

Contravision Ultra Clear Overlamine

OPTICALLY CLEAR

- Polyester liner
- 3 year durability
- One sided PE Liner
- 50um cast PVC
- The perfect match for Contra Vision® Perforated Window Films, to help protect the graphics from accidental or deliberate damage and prevent water from getting trapped in the perforations

3M™ 8588G Anti-Graffiti

ANTI-GRAFFITI

- PVDF polymer blended anti graffiti, high gloss 30um overlamine with a clear permanent adhesive and PET liner
- Designed to protect graphic surfaces from stains, abrasion, UV light and graffiti
- Recommended for use flat to compound curves, including rivets and corrugations
- Graphic protection for Envision 480mC series, IJ180mC series
- Up to 8 Years vertical durability

Material	Material Description	Finish	Face Thickness (ums)	Adhesive	Width (mm)	Length (m)
171188	3M 8588G Anti-Graffiti	High Gloss Clear	30	Clear Permanent	1372	50

3M™ 8993 Anti-Graffiti

ANTI-GRAFFITI

- Clear, anti graffiti, high gloss 25um polyester overlamine with a clear permanent adhesive and kraft liner
- Recommended for use flat & simple surfaces only
- Graphic protection for IJ180c, IJ180mC, 680CR, IJ40C, IJ40, IJ35C, IJ35
- Superior resistance against harsh solvents
- It is recommended to give additional time for out gasing solvent ink when laminating with a polyester (PET) film
- Up to 5 Year unprinted vertical durability

Material	Material Description	Finish	Face Thickness (ums)	Adhesive	Width (mm)	Length (m)
450535	3M 8993 Anti-Graffiti	Clear Gloss	25	Clear Permanent	1371	50
450534	3M 8993 Anti-Graffiti	Clear Gloss	25	Clear Permanent	1524	50

General Formulations GF 108 Tedlar®

ANTI-GRAFFITI

- GF 108 Tedlar® DuPont is a satin clear 1.0 mil transparent PVF Film with a solvent permanent pressure sensitive adhesive
- Extended resistance to UV exposure, colour stability or abrasion resistance. GF 108 made with Tedlar® DuPont is graffiti resistant
- Designed to extend the exposure resistance of graphics, decals, and nameplates. This laminate will protect inks and graphics from fading caused by exposure to UV radiation. Tedlar® DuPont film is resistant
- For smooth surface and substrate applications only. The PVF film is not suitable for use as a laminate on textured print materials
- Outdoor Durability up to 10 Years

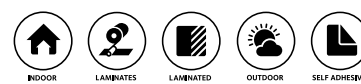

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452354	GF 108 Tedlar	Satin Clear	Permanent	1370	45.7

Rolam 3 Year Anti-Graffiti

ANTI-GRAFFITI

- Gloss Clear Polyester (PET) film specially designed for consistent performance, low shrinkage, optimum clarity, gloss level and graffiti resistance
- Permanent, solvent based acrylic adhesive on a single PE release liner
- Recommended for flat surfaces only
- Up to 3 Years outdoor

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173393	Rolam 3 Year Anti-Graffiti	Gloss Clear	Clear Permanent	1370	50

General Formulations GF 213 Traffic Graphic®

FLOOR GRAPHIC

- GF 213 is a 95um clear embossed polypropylene film designed for use as an economical protective laminate for Traffic Graphic® decals
- The adhesive is formulated to adhere to most common printing inks
- Pair GF 212 Print Film
- This non-glare laminate is also an environmentally friendly alternative to vinyl films
- Slip Rating: AS HB198:2014 (AS/NZS 4586) – Dry PTV: 87, Wet PTV: 24

Material	Material Description	Finish	Face Thickness (ums)	Adhesive	Width (mm)	Length (m)
401013	GF 213 Traffic Graphic	Light Embossed	95	Permanent	1370	45.7

Rolam Floor Laminate R9

FLOOR GRAPHIC

- 199164 Rolam LAM 3 Year FloorLam R9 is a slip approved and rough textured transparent film designed for lamination onto floor graphics vinyls designed with a permanent, solvent based acrylic adhesive
- 199165 Rolam LAM Year FloorLam LITE R9 is a slip approved and rough textured lighter transparent film designed for lamination over printed floor graphic vinyls designed with a permanent, solvent based acrylic adhesive

Material	Material Description	Finish	Face Thickness (ums)	Adhesive	Width (mm)	Length (m)
199164	Rolam Floor Laminate	Textured Matt	140	Clear Permanent	1540	50
199165	Rolam Floor Laminate Lite	Textured Matt	140	Clear Permanent	1350	50

Rolam Floor Laminate P3

FLOOR GRAPHIC

- 115 micron Sandtex, anti-slip, monomeric PVC floor laminate with permanent, clear adhesive
- Perfect for floor graphic applications in locations suited to the P3 non-slip rating
- P3 non-slip rating in accordance with AS 4586:2013 Slip resistance classification

Material	Material Description	Finish	Face Thickness (ums)	Adhesive	Width (mm)	Length (m)
172551	Rolam Floor Laminate	Matt Transparent	115	Clear Permanent	1370	50

General Formulations Dry Erase

WHITE & BLACKBOARD

- GF EraseMark is a 50 micron gloss clear laminate that turns any graphic into a writeable dry erase surface
- GF 110 is High performance hard coated engineered scratch and abrasion resistant polyester film surface with a permanent solvent acrylic pressure sensitive adhesive
- GF 111 is a clear polypropylene film with a permanent emulsion acrylic pressure sensitive adhesive
- EraseMark is formulated for high-use dry erase applications such as hospital boards, conference rooms, menu boards, restaurants, and schools. It works well for applications where the written information
- Single Sided PE Liner
- Indoor Durability GF110 up to 5 Years GF110 up to 6 months

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452024	GF 110	Gloss Clear	Permanent	1370	45.7
452025	GF 111	Gloss Clear	Removable	1370	45.7

R.Tape 4075 (Medium-High)

APPLICATION TAPE

- 4075 Medium-High-Tack repositionable latex adhesive
- Popular choice for every day sign shop applications & removes easily following application
- Standard Paper (101 micron)
- Suitable for most applications particularly transferring small to medium sized graphics & large plotter cut letters

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
165128	R.Tape 4075 (Med-High)	White	Med-High	1220	91

R.Tape 4075RLA (Medium-High)

APPLICATION TAPE

- 4075 Medium-High-Tack repositionable RLA latex adhesive
- Graphics stay neater and cleaner, even when they are rolled
- Popular choice for every day sign shop applications and & removes easily following application
- RLA adhesive sticks and lays flat to the exposed release liner around cut vinyl graphics to protect against wrinkling, tunnelling and edge curling
- Standard Paper (101 micron)
- Suitable for most applications particularly transferring small to medium sized graphics & large plotter cut letters

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
169193	R.Tape 4075RLA (Med-High)	White	Med-High	610	91
169192	R.Tape 4075RLA (Med-High)	White	Med-High	1220	91
199704	R.Tape 4075RLA (Med-High)	White	Med-High	1524	91

R.Tape 4076 (Extra High)

APPLICATION TAPE

- 4076 Extra High, repositionable latex adhesive
- Offers clean pick up and transfer of very small hard-to lift lettering & graphics & removes easily following application
- Standard Paper (101 micron)

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
189388	R.Tape 4076 (Extra High)	White	Extra High	1220	91

R.Tape 4076RLA (Extra High)

APPLICATION TAPE

- 4076 Extra High, repositionable RLA latex adhesive
- Graphics stay neater and cleaner, even when they are rolled
- Offers clean pick up and transfer of very small hard-to lift lettering & graphics & removes easily following application
- RLA adhesive sticks and lays flat to the exposed release liner around cut vinyl graphics to protect against wrinkling, tunnelling and edge curling
- Standard Paper (101 micron)

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
192253	R.Tape 4076RLA (Extra High)	White	Extra High	610	91
192030	R.Tape 4076RLA (Extra High)	White	Extra High	1220	91

General Formulations Sign Mask

APPLICATION TAPE

- Yellow Paint Mask vinyl is an 86 micron matt yellow vinyl with removable acrylic pressure-sensitive adhesive
- The vinyl is formulated for ease of cutting while retaining resistance to common solvents encountered in typical spray paints and automotive finishes
- Bleached kraft liner provides an excellent base for plotter cut graphics and home craft applications
- Can be used as a stencil for applications like creating floor graphics in gymnasiums, decorative painting or etching with craft projects, or branding mesh fencing for tennis courts and construction

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173586	GF 851 Sign Mask	Yellow	Removable	1220	45.7
173587	GF 851 Sign Mask	Yellow	Removable	1524	45.7

Neschen Gudy®

APPLICATION TAPE

- Gudy is a range of double-sided mounting adhesives for cold lamination
- Gudy 808 is a white PP film with a permanent, clear adhesive on both sides and is self-wound with a siliconised paper liner on one side
- Gudy 802 and 808 are P.A.T certified according to ISO 18916
- Gudy 802 is a clear PET film with a permanent, clear adhesive on both sides and is self-wound with a siliconised paper liner on one side
- Gudy Window is a clear PET film with permanent, clear, adhesive on one side, an air-flow, removable, clear adhesive on the other and has liners on both sides

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
163165	Neschen Gudy 802	Clear	Permanent/Permanent	1040	50

Naturally Versatile.

3M™ Envision™ Print Wrap Films

3M™ Envision™ Wrap Overlaminates

The non-PVC films that outperforms the rest.

When a non-PVC film is this conformable and versatile, why use anything else?

3M™ Envision™ Wrap Films include the 3M innovations you know and love: excellent print quality, slideability, repositionability, heated film recovery and now non-visible air-release channels using micro technology for a smooth visual appearance, superior performance and even an easier, faster and better-looking installation.

High-performance technology with a sustainable edge.

Meet the suite that's 100% printer compatible:

Conformable and durable Non-PVC Wrap Films

3M Envision™ Print Wrap Film SV480mC

3M Envision™ Print Wrap Film LX480mC

General Formulations Mounting Film

MOUNTING FILM

- GF106 is an optically clear mounting film with double sided solvent acrylic permanent adhesive and clear polyester liner
- GF116 is a double-coated pressure sensitive 1.0 mil clear polyester film with a high-tack permanent adhesive on one side and a high-tack removable adhesive on the other side
- Designed to mount backlit transparencies to glass, Plexiglas or other clear substrates in light box applications 106 also provides distortion-free face mounting of prints to these same clear substrate
- GF116 is designed for laminating thin flexible plastic films and papers commonly found in graphics for temporary application to glass
- In all cases the substrate must be clean and free of dust, dirt and oil. This product is not recommended for tinted or laminated windows

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173584	GF 106 Mounting Film	Clear	Permanent/Permanent	1370	45.7
173585	GF 116 Mounting Film	Clear	High-Tack/Permanent/Removable	1370	45.7

Sacrificial Underlay Polypropylene

UNDERLAY

- 76mm core
- Polypropylene won't have static issues experienced with polyester
- If liner creased it will not transfer to the surface of the image as it can with paper

Material	Material Description	Width (mm)	Length (m)
187323	Sacrificial Underlay Polypropylene	1430	400
187324	Sacrificial Underlay Polypropylene	1540	400
187781	Sacrificial Underlay Polypropylene	1630	400

Neschen Window Grip Ultra Clear

WINDOW GRAPHIC

- Crystal clear, self-adhesive PVC-free PET film with a glossy surface
- Easy and residue-free removal
- Can be repositioned multiple times without loss of adhesive strength
- Very dimensionally stable
- Wet application is recommended, refer install guidelines
- A reverse print allows this optically clear film to be applied to the inside of shop windows so that the advertising can be read outside
- For indoor advertising and short-term outdoor use on flat and smooth substrates, such as glass, mirrors or monitors
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
163217	Neschen Window Grip Ultra Clear	Gloss Ultra Clear	Clear Repositionable	1370	50

General Formulations GF 218 WindowMark®

WINDOW GRAPHIC

- GF 218 WindowMark® Blockout is a 203 micron gloss white print media with dual-layer construction making it 100% opaque with a removable adhesive for easy, clean removal
- Reverse print on GF 255 (clear vinyl), print on GF 218 (Right read) and laminate the two films together. Apply the film on the inside of the window for a Push Pull type decal or graphics
- Excellent for window graphics & retail displays where total opacity and zero light transmission is required and front windows and internal windows where total privacy is a must
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173599	GF 218 WindowMark®	White	Removable	1370	30

General Formulations GF 255 OptiMark®

WINDOW GRAPHIC

- GF 255 OptiMark® is a 76 micron optically clear high gloss flexible calendered PVC film with a clear Solvent acrylic removable pressure sensitive adhesive and a clear polyester liner
- Wet application is the preferred method. Wet application on solvent based clear products is the best way to achieve bubble free and optically clear results
- Clean removal from glass for up to one Year under normal exposure conditions
- Outdoor Durability up to 3 Years
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
173607	GF 255 OptiMark®	Gloss Clear	Removable	1370	45.7

General Formulations GF 790AE

WINDOW GRAPHIC

- GF 790AE Print-N-Privacy is a decorative polymeric glass etch vinyl
- Can either be applied printed or unprinted for etched glass visual effect or for use as a privacy film
- Solvent based permanent acrylic pressure sensitive adhesive
- Bubble Free Liner
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks

Material	Material Description	Finish	Adhesive	Width (mm)	Length (m)
452232	GF 790AE Print-N-Privacy	Window Etch	Clear Permanent	1370	45.7

Rocal Dusted Sparkle

WINDOW GRAPHIC

- 100 micron Calendered PVC film used for privacy screening & creative patterns designed for use on glass windows where privacy is required whilst allowing effective light transmission and an attractive visual appearance
- Main Applications: Meeting Rooms, Retail, Partitions, Offices, Residential
- Clear solvent based acrylic PSA – permanent
- Ideal for both outdoor and indoor application up to 3 years
- 100 gsm single PE coated release liner
- Can be wet applied

Material	Material Description	Finish	Adhesive	Face Film (um)	Width (mm)	Length (m)

From the spectacular to the everyday...

For short-term applications like seasonal point-of-purchase campaigns and retail promotions, our **Campaign White on Black** film is a great value option, offering market-leading qualities with an on-window lifetime of up to 2 years.

For longer-term, demanding applications such as transit graphics, building wraps, and outdoor advertising, our premium **Performance White on Black** film offers robust durability and a 3+ year on-window lifetime, manufactured to the highest standards.

Since 2008, Contra Vision has delivered perforated window film solutions across Australia transforming windows into powerful advertising spaces while maintaining a clear view from the inside.

Whether you're enhancing windows for a large-scale sporting event or advertising on transit windows, **Contra Vision® has it covered.**

Engineered for durability, weather resistance, and unmatched print quality, our perforated films ensure your advertising has a lasting impact, even in Australia's toughest climates.

3M™ Crystalline

AUTOMOTIVE SERIES

- 3M Automotive Window Film Crystalline Series rejects more heat than many dark films without changing the appearance of your vehicle, making it the superior choice for comfort
- Available in several VLT's (20%, 40%, 50%, 60%, 70% & 90%*)
- The Crystalline Series is designed to enhance your view by allowing visible light into your vehicle while keeping heat out, so you can see clearly and safely
- The Crystalline Series reduces up to 77% of the glare from blinding sunlight, allowing you to see better and concentrate more on driving
- Rejection of up to 62% of the total solar energy and up to 97% of the heat-producing infrared rays gives you the ultimate in comfort
- The Crystalline Series features a proprietary, multilayer optical film nano-technology that combines over 200 layers in a film that is thinner than a Post-it Note
- The Crystalline Series is a non-metallized window film that won't interfere with mobile devices, GPS or satellite radio reception
- Blocking up to 99% of ultraviolet (UV) light

Material	Material Description	Width (mm)	Length (lm)
400732	3M Crystalline 20	914	30.4

400741	3M Crystalline 70	1524	30.4
400742	3M Crystalline 90	914	30.4
400743	3M Crystalline 90	1524	30.4

3M™ Ceramic IR

AUTOMOTIVE SERIES

- The Ceramic IR Series provides great infrared heat rejection due to the absorptive nano-ceramic technology. Rejecting up to 63% of total solar energy and up to 95% of infrared rejection for optimal thermal comfort and reducing the feel of sun on your skin
- The Ceramic IR Series is developed with a metal-free design that won't interfere with electronics, GPS, satellite radio or mobile devices, including 5G
- The Ceramic IR series reduces up to 93% of the glare from blinding sunlight with low visible light reflectivity and no mirror-like appearance to disrupt your view out
- Modifying a vehicle with illegally dark windows renders that vehicle unroadworthy. Please contact your local state government regarding tinting laws

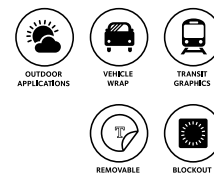

Material	Material Description	Width (mm)	Length (lm)
451788	3M Ceramic IR 05	1524	30.4
451785	3M Ceramic IR 15	1524	30.4

451790	3M Ceramic IR 70	1524	30.4

3M™ Colour Stable

AUTOMOTIVE SERIES

- 3M Automotive Window Film Colour Stable series film appearance rivals tinted factory glass, never turns purple, and provides high heat rejection with no signal interference
- Available in 4 VLT's (5%, 20%, 35% & 50%)
- The Colour Stable Auto film Series is a non-metallized window film that won't interfere with mobile devices, GPS or satellite radio reception
- Comprehensive Auto Warranty from 3M (Limited Lifetime for original owner)
- 3M's revolutionary nano-carbon polyester provides an incredible look and amazing colour stability Rejects up to 57% of the heat coming through your windows
- The Colour Stable Auto film series can be used for Glare reduction in Flat Glass installation
- Blocking up to 99% of ultraviolet (UV) light
- Modifying a vehicle with illegally dark windows renders that vehicle unroadworthy. Please contact your local state government regarding tinting laws

3M™ Obsidian

AUTOMOTIVE SERIES

- 3M Automotive and Flat Glass Black Chrome series incorporates an all metal technology with a classic reflective appearance to keep you cool and protected from the sun's heat and ultraviolet rays
- The Black Chrome BC40 rejects up to 47% of the total solar energy coming through your windows, providing a 'cool effect' in more ways than one
- Blocking up to 99% of ultraviolet (UV) light
- While an Auto Film series only the BC40 (40% VLT) is Legal for Auto in Australia. All Black Chrome Film VLT's (10%, 20%, 35% & 40%) can be used for Flat glass installations
- Because Black Chrome utilizes an all metal film construction, these films retain their integrity and never fade to purple. 3M guarantee it!
- Comprehensive warranty from 3M (10 years Commercial & Limited Lifetime for original owner)
- Modifying a vehicle with illegally dark windows renders that vehicle unroadworthy. Please contact your local state government regarding tinting laws

3M™ PPF 100 Series

- Self-healing technology to remove minor scratches or marks with heat applied to the film surface
- High Gloss with Optimised adhesive for easier installation allowing repositioning, minimizing lift lines and adhesive marks
- 7-year warranty backed by 3M

Material	Material Description	Colour	Width (mm)	Length (lm)
452376	3M PPF 100 Series	Gloss Clear	1524	15
452377	3M PPF 100 Series	Gloss Clear	610	30

3M™ PPF 150 Series

- 150 Series – Designed to protect automotive paint and other vulnerable surfaces of the vehicle from stone chips, scratches, bug damage, road tar, stains, automotive fluid stains, and punishing outdoor
- Exceptional clarity with lower orange peel to help maintain the brilliance of the vehicle paint
- Optimized adhesive for repositioning, minimizing lift lines and adhesive marks
- Virtually invisible protection
- High stain resistance for a low maintenance finish to repel against water and dirt
- Highly flexible construction easily stretches over difficult contours and conforms into deep recesses
- Self-healing technology allows minor scratches to disappear with heat applied to the film surface
- 10-year consumer warranty backed by 3M

Material	Material Description	Colour	Width (mm)	Length (lm)
401035	3M PPF 150 Series	Gloss Clear	1524	15

3M™ PPF 200 Series

- Self-healing technology to remove minor scratches or marks with heat applied to the film surface
- High Gloss with excellent clarity and smooth top surface with optimized adhesive for repositioning and to minimize lift lines and adhesive marks
- 10-year warranty backed by 3M

THE BEST

APP

FOR YOUR BUSINESS

Spicers

Need an app that puts you on the right tack? RTape from Spicers has got you covered.

With RLA® (Release Liner Adhesion), RTape's Conform® series is guaranteed not to stick together. RTape tears off clean and clear, so graphics lay flawlessly flat, with no sticky build-up. Available in a variety of tack levels, these products are ideal for all standard sign applications, and are also widely used for surface protection on printed graphics during transportation.

So for the perfect peel-off, pick up a pack of RTape today.

BEST BITS

Conform® Series with RLA

- Graphics stay neater and cleaner, even when rolled
- RLA adhesive protects against wrinkling, tunneling and edge curling
- Heavyweight standard paper
- Available in a variety of tack levels
- Removes easily following application
- No adhesion build on stored graphics
- Works in either wet or dry applications
- 4075RLA & 4076RLA

ApliTape™

- Excellent premask for fleet graphic installations
- Ideal for large fleet graphics and applying graphics to vinyl banners
- Suitable for transferring small to medium sized graphics and large plotter cut letters
- Heavyweight standard paper
- Removes easily following application
- Available in a variety of tack levels
- Works in either wet or dry applications
- 4075 & 4076

3M™ 3635-20B/22B Blockout Film

LIGHT MANAGEMENT FILMS

- Cast, matt, 100% opaque, white and black blockout self adhesive films
- 3635-22B (400481) is a black blockout film with white backing and a clear permanent adhesive
- May be printed with 3M Screen Printing Ink Series 1900
- 3635-20B (400480) is a white blockout film with black backing and a clear permanent adhesive
- Used to control light flow in internally illuminated signs
- Up to 5 years unprinted vertical durability

Material	3M Colour Number	3M Colour Name	Width (mm)	Length (m)
400481	SAV 3635-22B MBBP	Matt Black	1220	45.7
400480	SAV 3635-20B MWBP	Matt White	1220	45.7

3M™ 3635-91 Day/Night Film

LIGHT MANAGEMENT FILMS

- A matt, translucent, grey, cast film with a clear permanent adhesive
- Used in internally-illuminated signs to produce special effects
- Up to 4 years unprinted vertical durability
- Appears grey by day, and white by night when illuminated from behind
- Not suitable for printing

Material	3M Colour Number	3M Colour Name	Width (mm)	Length (m)
400482	SAV 3635-91	Smoke Grey	1220	45.7

3M™ 3635-30/70 Diffuser Film

LIGHT MANAGEMENT FILMS

- A cast, matt, white translucent film with clear permanent adhesive
- Suitable for Internally-illuminated signs with fluorescent lights
- Create custom lighting effects for backlit applications
- Up to 5 years unprinted vertical durability
- 2 transmission levels - 3635-30 (400485) allows for 30% light transmission & 3635-70 (400483) allows for 60% light transmission
- Control brightness and light distribution within light boxes without hotspots
- Not suitable for printing

Material	3M Colour Number	3M Colour Name	Width (mm)	Length (m)
400485	SAV 3635-30	Diffuser White	1220	45.7
400483	SAV 3635-70	Diffuser White	1220	45.7

3M™ 3635-210/222 Dual Colour Films

LIGHT MANAGEMENT FILMS

- Perforated cast film
- 3635-222 (400487) black matt perforated cast film with a clear permanent adhesive
- Dual-color perforation pattern lets background color/image display when backlit
- Suitable for Screen Printing and Solvent Inkjet Printing
- 3635-210 (400486) white matt perforated cast film with a white permanent adhesive
- Create the special effect of a color/image by day (non lighted) and a different color by night (backlit) – use with 3M Translucent films
- Perfect for backlit vertical displays, lettering and signage
- Up to 5 years unprinted vertical durability

Material	3M Colour Number	3M Colour Name	Width (mm)	Length (m)
400487	SAV 3635-222	Matt Black	1220	45.7

3M™ 780mC Series Reflective

3M SIGNAGE REFLECTIVE

- 6.6-mil, flexible, enclosed lens, retroreflective available in white only
- Excellent retroreflectivity at wider viewing angles
- Pressure-activated adhesive for easy sliding and tacking, snap-up and repositioning
- Flexible, conforms to compound curves, corrugations, and rivets
- Includes Comply Adhesive for fast, easy bubble-free installations
- Expected Performance Life of 9 years (unwarranted period for unprinted film with no graphic protection, applied to a flat, vertical, outdoor surface)
- For use with 3M overlaminates 8548G, 8550M & 8549L
- Print Compatibility: Eco-Solvent, Latex & UV Curable Inks.

Material	3M Colour Number	3M Colour Name	Class	Width (mm)	Length (m)
451265	780mC-10R	White	Retro-reflective	1220	45.7

3M™ 3310 Series Reflective

3M SIGNAGE REFLECTIVE

- 3M High Intensity Flexible Prismatic Reflective Sheeting Series 3310 is intended for reflectorizing rigid or reboundable traffic control devices such as barricades, delineators, drums or channelizers.
- 3M Flexible Prismatic Reflective Sheeting Series 3310 is an impact resistant prismatic lens reflective sheeting precoated with pressure sensitive adhesive and exceeds the reflectivity values of EN 12899-1:2007 for Class RA2 materials.
- High intensity grade performance with attention-getting brightness that is easily applied conforms to virtually any curved surface for a flexible solution.

Material	3M Colour Number	3M Colour Name	Class	Width (mm)	Length (m)
451574	3310	White	Class 400T	1220	45.7
451817	3311	Yellow	Class 400T	1220	45.7

3M™ 3340 Series Reflective

3M SIGNAGE REFLECTIVE

- 3M Flexible Prismatic Cone Sheeting Series 3340 is highly conformable and come with pre-coated, pressure sensitive adhesive designed for polyvinyl (PVC) traffic cone applications
- Attention-getting brightness with wide-angle reflectivity which gives cones full-width appearance at night
- Thin, durable and flexible, specially designed shapes with pressure sensitive adhesive apply quickly and easily, delivering superior performance and brightness throughout its life.

Material	3M Colour Number	3M Colour Name	Class	Width (mm)	Length (m)
199028	3340	White	Class 400T	1220	45.7

3M™ 3800 Series Reflective

3M SIGNAGE REFLECTIVE

- 3M Class 400T high intensity prismatic reflective with a clear permanent adhesive
- Specifically designed for reflective road work zone traffic signs & delineators
- Medium to high performance and visibility to alert drivers of upcoming road work zones
- For best performance use 3M Diamond Grade DG Fluorescent colours for extra visibility in daylight and twilight hours giving 24/7 visibility.

Material	3M Colour Number	3M Colour Name	Class	Width (mm)	Length (m)
450945	3830	White	Class 400T	1220	45.7

3M™ 7600 Series Reflective

3M SIGNAGE REFLECTIVE

- Low level reflective sheeting used where sign information is of low importance
- Best usage: Parking signs and commercial applications
- Print Compatibility: Screen & UV Curable Inks.

Material	3M Colour Number	3M Colour Name	Class	Width(mm)	Length (m)
451876	7610	White	Class 100	1220	45.7

3M™ 7300 Series Reflective

3M SIGNAGE REFLECTIVE

- 3M Advanced Flexible Engineer Grade Reflective Sheeting Series 7300
- 3M Micro-seal technology employs micro-scale targeted sealing, creating a sheeting with a more uniform, white appearance and superior handling attributes
- Prismatic optics provide greater retroreflective efficiency
- Durability: up to 7 years
- Print Compatibility: Eco-Solvent, Latex, Screen & UV Curable Inks.

Material	3M Colour Number	3M Colour Name	Class	Width (mm)	Length (m)
451875	7310	White	Flexible Engineer Grade	1220	45.7
452527	7311	Yellow	Flexible Engineer Grade	1220	45.7

3M™ 610 Series Reflective

3M SIGNAGE REFLECTIVE

- 3M™ Reflective Sheeting Series 610 is an enclosed lens sheeting with a clear pressure sensitive adhesive and easy release liner
- Series 610 sheeting has a standard liner and is commonly used for screen printed graphics
- Series 610 meets the Class 100 requirements
- 3M 610 Series is a pressure sensitive sheeting which should be applied at room temperature (15 oC or higher) using a mechanical squeeze roll applicator at moderate pressure.

For all your Epson P-Series and T-Series Hardware and Consumables

Spicers are proud distributors of Epson Large Format Aqueous Printers and Consumables. Epson's Photo and Fine Art printers have long set the standard for colour and B&W image reproduction.

Epson inks are renowned for their superior Color Gamut and intense Blacks. Epson inks ensure that your image is always reproduced to the highest quality and with the archival rating you expect for your fine art prints. Epson's revolutionary ink technologies create consistent brilliance every time.
