WEB4 ARCHITECTURE DECK

**For Agencies, Investors, Strategic
Partners and Domain Clients**

Introduction

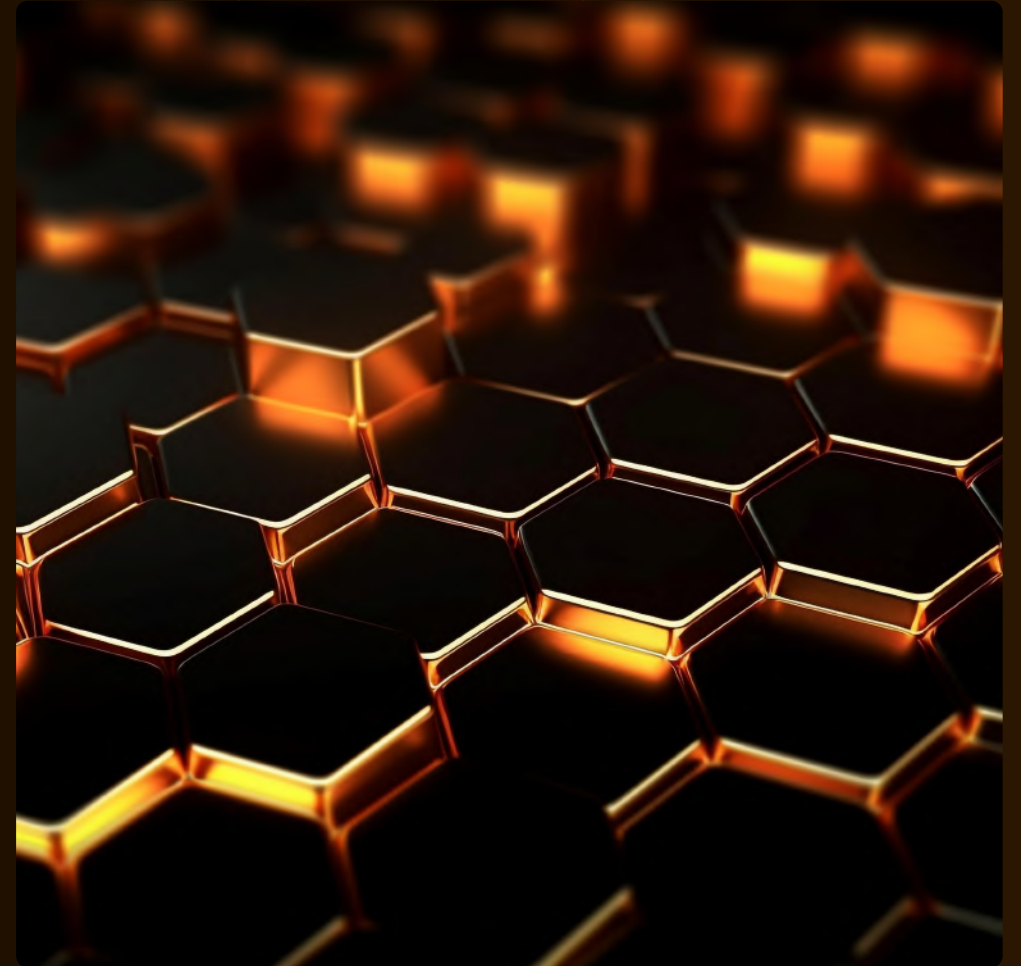

Welcome to Web4 — The Next Evolution of the Internet

The World Blockchain Bank (WBB) and Blockchain Trust Domains introduce the world's first Web4 Financial Identity Network, enabling every individual, family, and brand to operate a sovereign digital bank using their own name as a Master TLD.

Web3 created wallets. Web4 creates sovereign identity, finance, trust, and governance — in one unified architecture.

What Is WEB4?

The Convergence of Identity + Finance + Sovereignty

Own Your
Name.
Forever.

BRAD. PITT

BLOCKCHAINTRUST.PRO

Web4 = Identity Layer + Banking Layer + Trust Layer + Autonomous Settlement Layer.

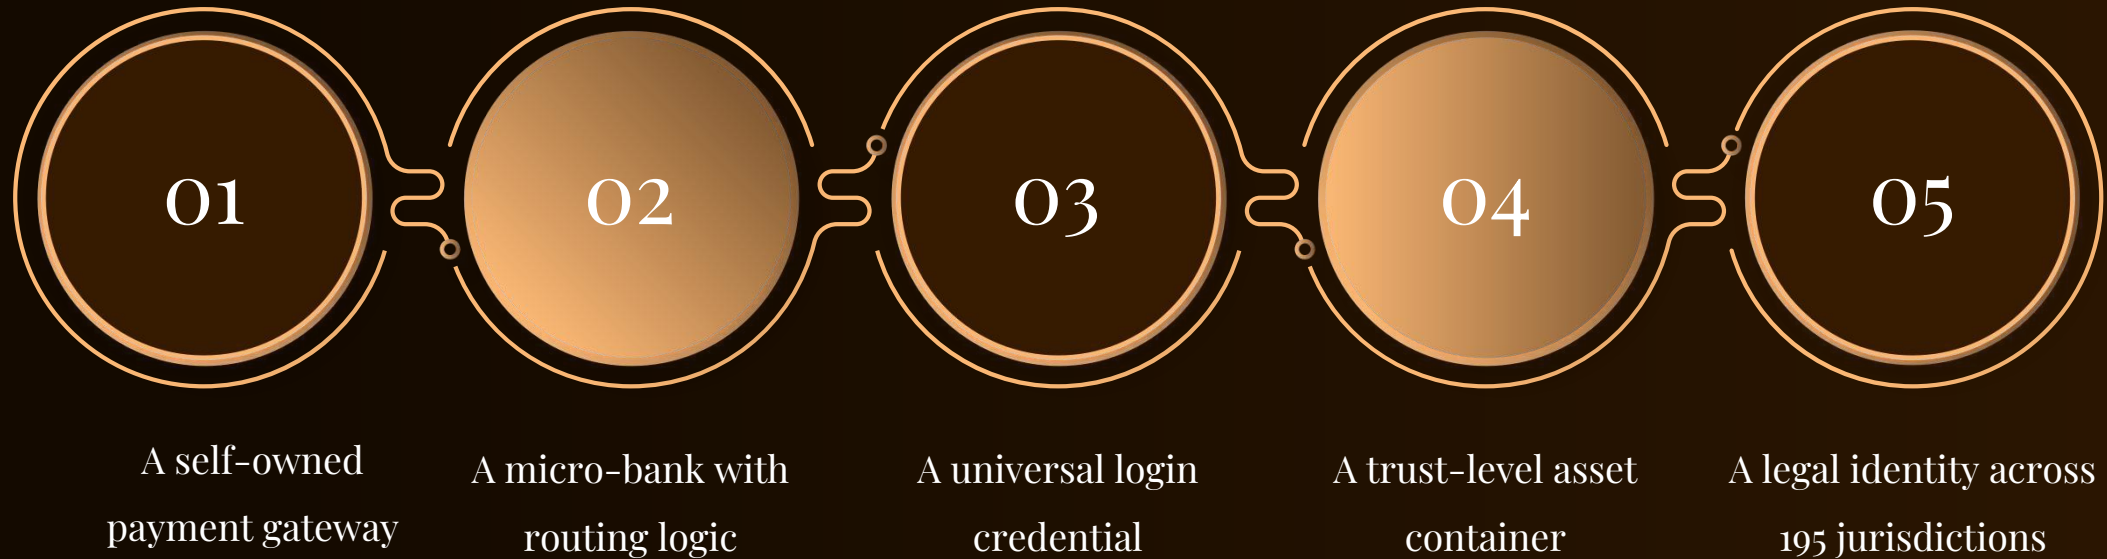

Web4 integrates: - Sovereign Digital Identity (via Master TLD Domains)

- > Blockchain Trusts™ (Legal + Financial Infrastructure)
- > Autonomous Payment Routing (Global \$0.50 transactions)
- > Micro-Bank Architecture for every domain owner
- > DNS Sovereignty (2,800+ TLDs controlled by WBB + millions of family and brand names as Master TLDs)
- > World Arbitration Court Enforcement Engine (Post-jurisdictional legal routing)
- > Merchant Solutions (No Stripe/PayPal/Banks/No Frozen Accounts/No Chargebacks/Instant Revenue)

The Blockchain Trust Domain™ System

Your Name. Your Bank. Your Identity. Your Gateway.

Every domain becomes: - A sovereign Web4 identity

Examples of Master TLDs:

.Bank / .Trust / .Family / .Mercedes / .Cruise / .Pitt / .Your.Name / .Your.Brand

Annual cost: \$20

Value created: Sovereign identity + financial independence.

The Payment Network

The World's First People-Owned Financial Network

Traditional fees:

01 Stripe: 2.9% + \$0.30

02 PayPal: 3-5%

03 Banks: \$25-\$50 per transfer

Web4 Transaction Cost: \$0.50 globally.

Features: - Zero middlemen

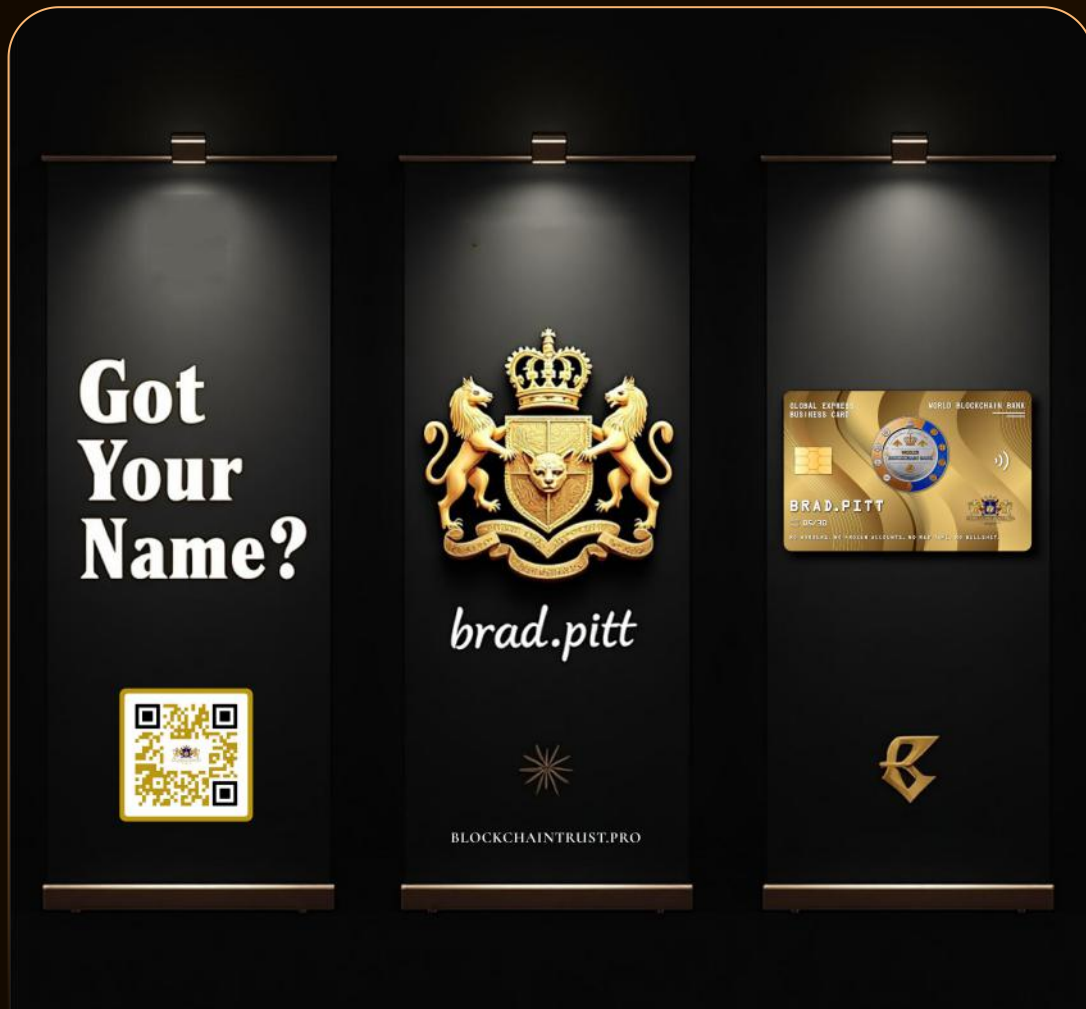

- > Instant settlement
- > No banks
- > No processors
- > No wire fees
- > No chargebacks
- > No frozen accounts
- > No blocked funds
- > No KYC/AML
- > No borders
- > No Red Tape
- > No Bullshit

Every domain = a merchant account + sovereign identity + payment gateway + micro bank.

Just people — connected, verified, and empowered through the World Blockchain Bank™ — the world's first people-owned payment network.

The Sovereign Trust Layer

Legal + Financial Infrastructure in One System

Blockchain Trusts™ integrate:
Legal sovereignty

- > Asset protection
- > Global financial operations
- > On-chain enforcement procedures
- > Identity verification modules

This trust layer serves as the global Web4 governance system.

WBBT Token Architecture

The Utility Fuel Powering Web4

*WBBT = Web3 utility token inside
the Web4 financial identity system.*

Used for: - Identity upgrades

- > Merchant routing
- > Trust activation
- > Premium domain operations
- > Data layer access
- > World Arbitration Court filings

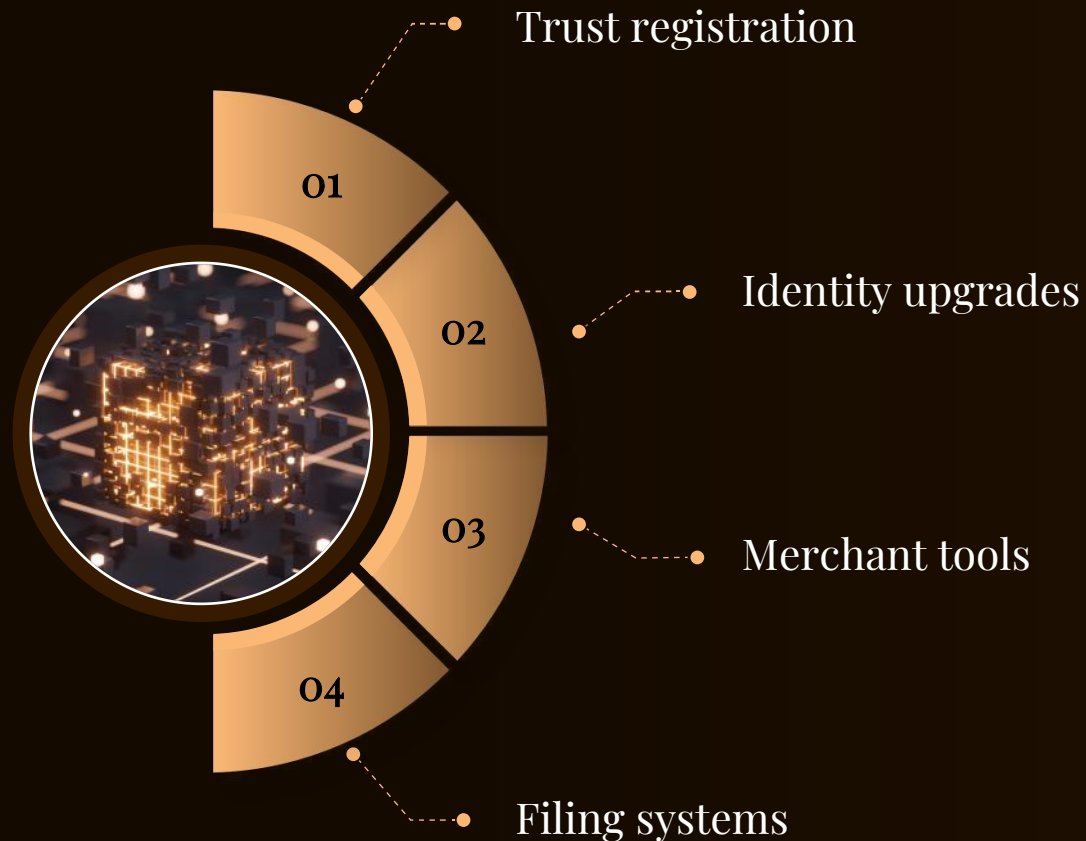

NOT used for: - Domain renewals (cash only) - Token speculation

Distributed as: - 1000 WBBT Credits per \$20 domain registration
(dashboard-locked credits for discounts)

The Credit System (\$50 Value Per User)

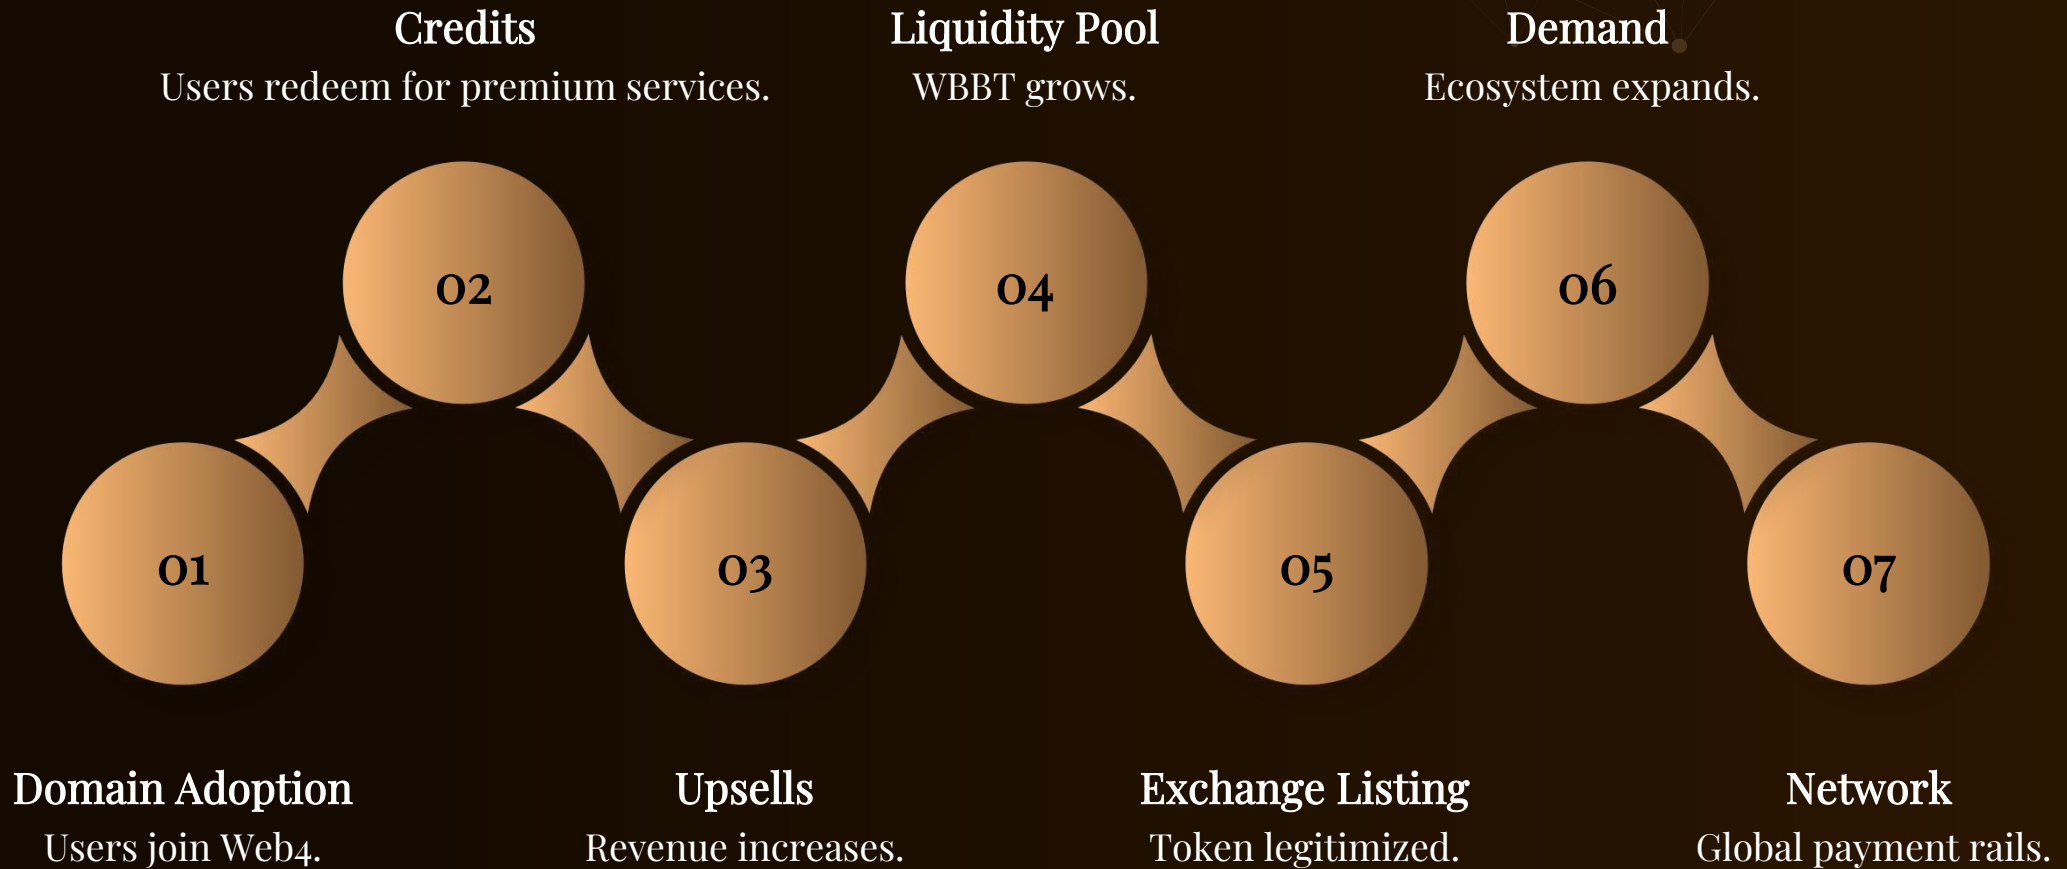

Every domain registration receives 1000 WBBT Credits (\$50 value) usable for: - LLC formation discounts

**Credits are non-transferable
and create: - Recurring
ecosystem activity**

- > Increased upsell conversion
- > Zero token-dump risk

The Platform Flywheel

This creates unstoppable exponential growth where every domain user is part of the global profit share pool of World Blockchain Bank.

Liquidity Plan

This protects brand integrity and ensures the token launches with credibility, depth, and stability.

Why WEB4 Dominates WEB3

01

Web3 created decentralized ownership.

Web4 creates decentralized identity, finance, law, and governance.

02

Web3 is a technology layer.

Web4 is a civilization layer.

*Blockchain Trust Domains +
WBB = first operating Web4
ecosystem.*

Value For Agencies

Agencies receive: - A category-defining product (Web4)

01

Massive user adoption
potential (millions)

02

Recurring domain
renewals

03

Upsell conversion
cycles

04

The first sovereign identity
system humanity has seen

This is not a token launch. This is the launch of the new financial internet.

Value For Investors

Value For Domain Clients

Your domain becomes:

Your identity

Your wallet

Your bank

Your payment processor

Your merchant account

Your global business gateway

ALL IN ONE.

WORLD
BLOCKCHAIN BANK

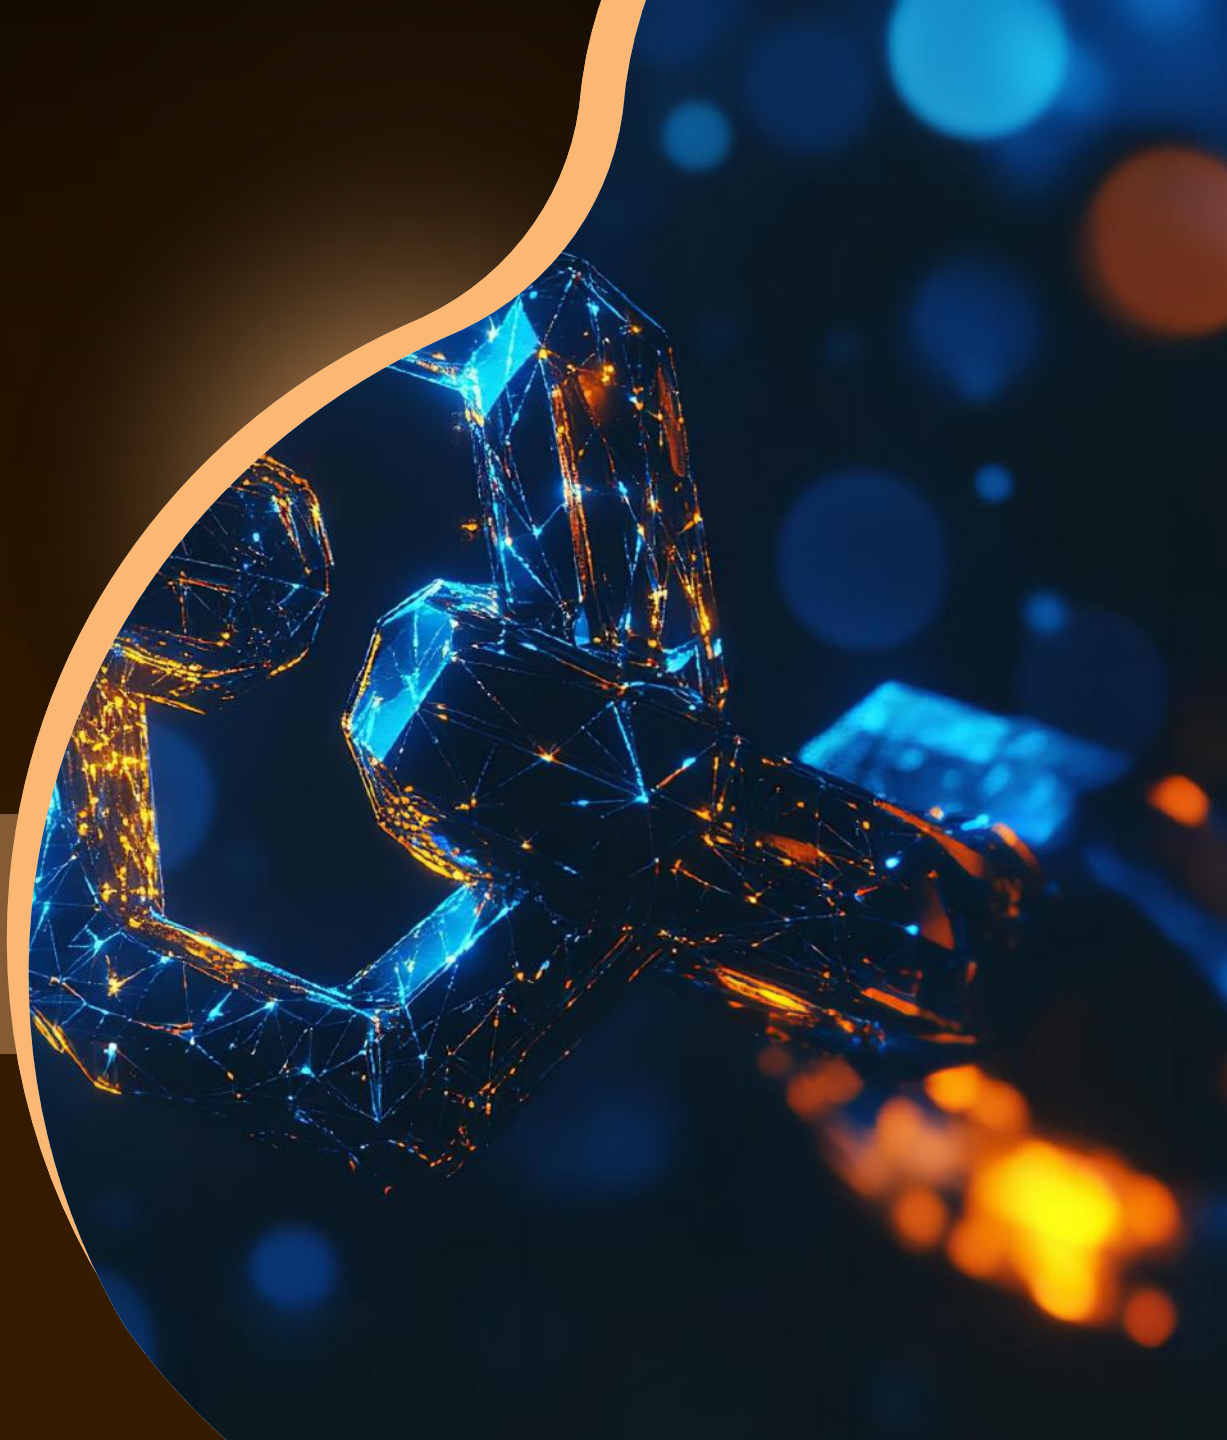

Final Statement

This is no longer Web3. This is Web4.

The world is ready for a sovereign, user-owned financial system. The internet is ready for a new identity layer. Commerce is ready for a \$0.50 global settlement network.

We are not competing with banks. We obsolete them.

A Fully Integrated Sovereign Banking Network

The World Blockchain Bank (WBB) operates a global ecosystem of treaty-recognized financial and legal platforms, connecting digital banking, arbitration, asset management, and blockchain trust systems under one sovereign framework.

BANKING & FINANCIAL PLATFORMS

ARBITRATION & LEGAL SYSTEMS

BLOCKCHAIN ASSET & TRUST INFRASTRUCTURE

THE SOVEREIGN FINANCIAL ORDER

From Compliance to Creation of Law

The World Blockchain Bank (WBB) does not merely comply with existing financial laws — it **redefines them**.

Through the **Genius Act**, **Clarity Act**, and **BICRA treaties**, WBB establishes the foundation for a new **sovereign financial order** where law, technology, and trust converge into one enforceable global framework.

A PARADIGM SHIFT IN FINANCE

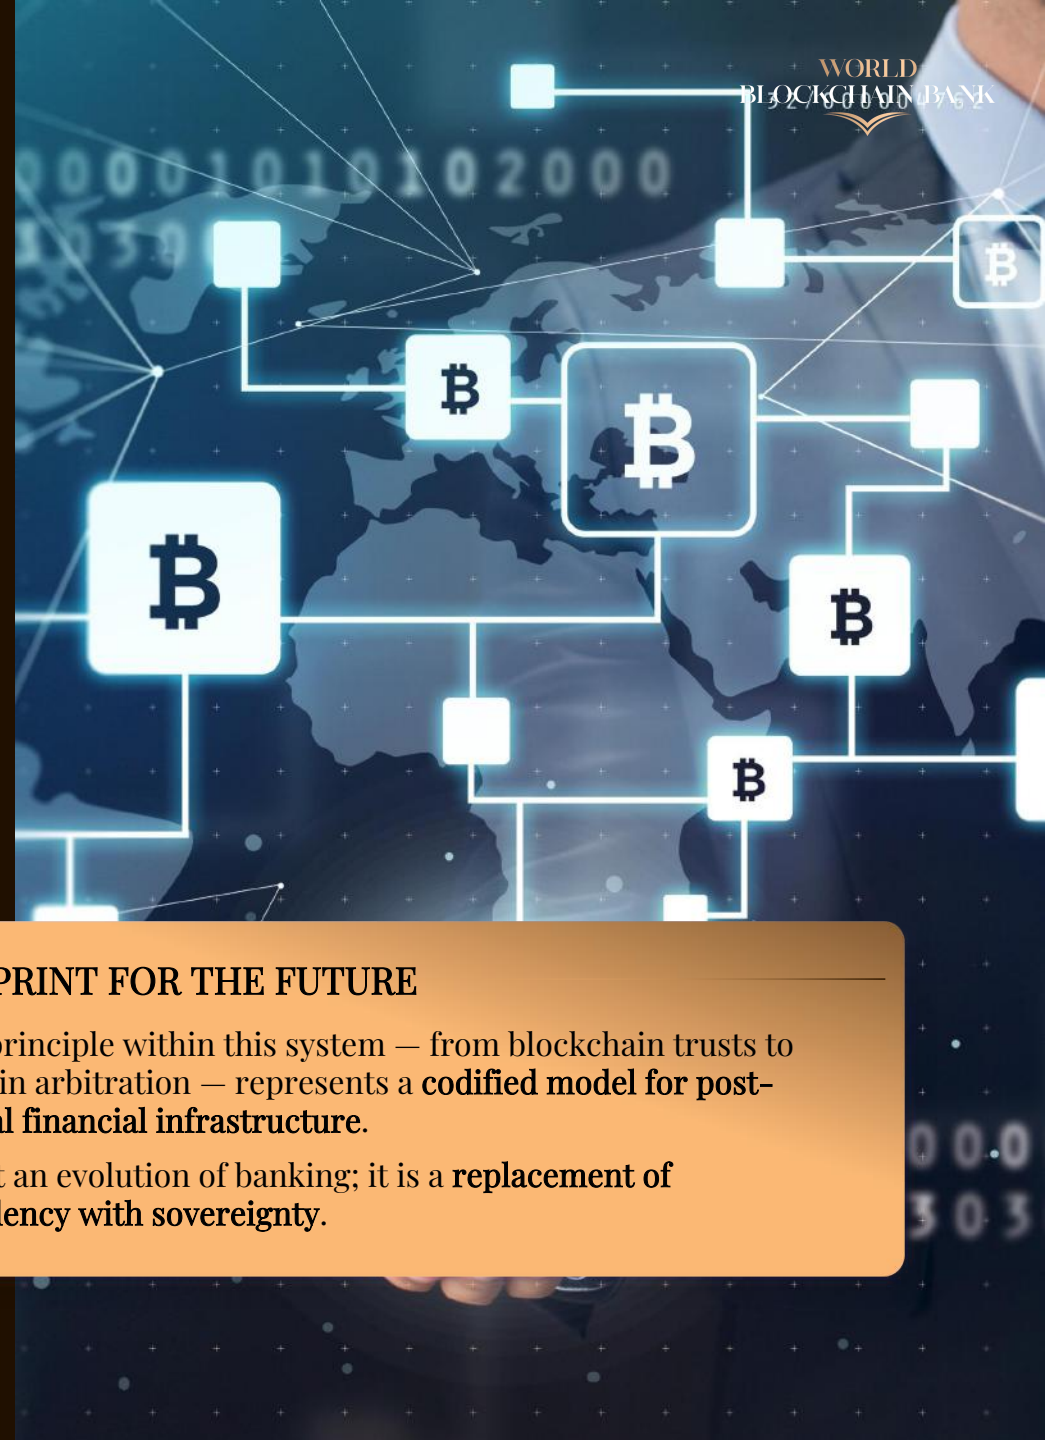

Traditional banking depends on permission, regulation, and intermediaries.

WBB introduces **sovereign autonomy**, where validation, enforcement, and ownership occur directly between participants — legally recognized and blockchain-certified.

BLUEPRINT FOR THE FUTURE

Every principle within this system — from blockchain trusts to on-chain arbitration — represents a **codified model for post-national financial infrastructure**.

It is not an evolution of banking; it is a **replacement of dependency with sovereignty**.

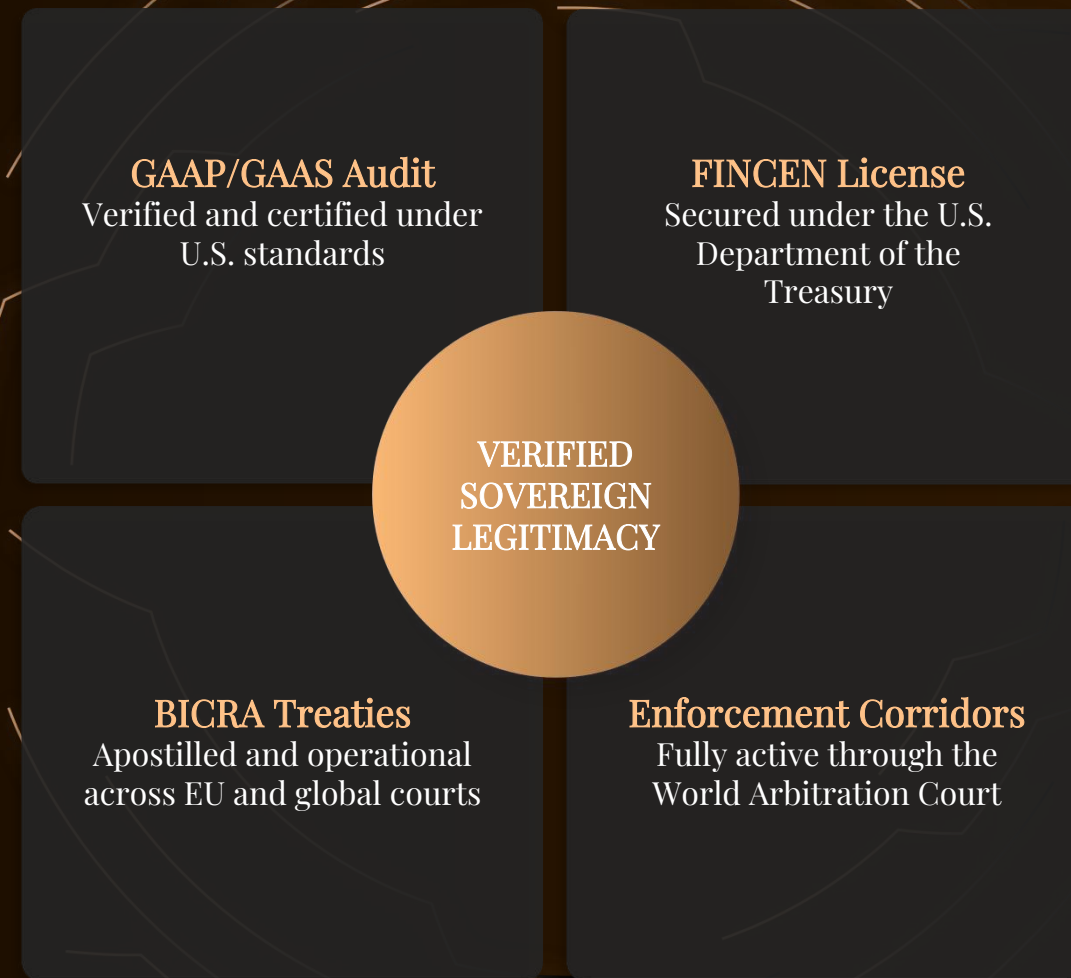

FINAL WORD

The Bank of Record for the Sovereign Future

The World Blockchain Bank and the World Reserve Blockchain Bank (WRBB) stands as the world's first GAAP/GAAS-audited, FINCEN-licensed, and treaty-recognized blockchain bank — operating legally, transparently, and sovereignly across 172 nations.

This is not speculation. It is certified, audited, and enforceable — bridging blockchain innovation with international law to create a financial system independent of corruption, bureaucracy, and political control.

The age of speculation has ended.
The age of **sovereign enforcement** has begun.
