ABOUT OUR BACKUP POWER SOLUTIONS

At RAPIER, we deliver fully integrated backup power solutions engineered for reliability, safety, and long-term performance in commercial and industrial settings.

Our expertise includes the installation of generators, Automatic Transfer Switches (ATS), and Uninterruptible Power Supply (UPS) systems. Each is designed to ensure seamless operation during outages, planned shutdowns, and emergency scenarios. Whether supporting critical infrastructure, cold storage, or sensitive control systems, we approach every project with a commitment to code compliance, operational integrity, and system resilience. From equipment procurement to turnkey installation and ongoing maintenance, we ensure your facility is never left in the dark.

Connect with us today to learn how our power solutions can safeguard your operations.
