The SAFE

dour Collection: Classic Meets Innovation in Shower Enclosures

The SAFE

dour collection represents the classic, redefined for modern bathrooms.

This versatile line features elegant shower enclosures with your choice of circular sliding, hinged, or folding acrylic doors—all expertly designed for smooth operation and timeless appeal.

Each SAFE

dour shower enclosure is made entirely from advanced plastic materials, ensuring a perfect blend of safety and durability. The star feature: a 2.2 mm thick ACRYLIC PANEL with a stylish bubble effect, offering both visual appeal and privacy.

The solid, rigid PVC structure seamlessly combines with the acrylic panels, resulting in certified resistance and safety across all models in the series.

This robust construction ensures long-lasting performance and peace of mind for daily use.

Made for Every Bathroom

Thanks to its thoughtful structural design, premium production materials, and special product features, the SAFE

dour collection adapts effortlessly to any space or requirement.

Custom-Fit Flexibility:

The REDUCIBILITY of profiles and REVERSIBILITY of panels mean every SAFE

dour shower enclosure can be perfectly tailored to your bathroom's layout—no matter the size or shape.

Seamless Versatility:

From easy assembly to straight forward cleaning, SAFE

dour enclosures are designed to simplify your life.

Their adaptable solutions and user-friendly engineering offer the perfect balance between practicality and style.

Why Choose SAFE

dour?

Flexible profiles and reversible panels for a custom fit

Top-quality materials for lasting reliability

Effortless installation and easy cleaning

Versatile options for any environment

SAFE

dour is the ultimate compromise between everyday needs and superior functionality delivering reliable performance and family safety, ready to meet any challenge your space presents.

	REDUCIBILITY	<i>The reducibility of the profiles allows you to mount the SAFEdour shower enclosure, adapting them to the needs identified during assembly phase and simply by cutting the sliding tracks.</i>
	STAINLESS STEEL	<i>Is the alloy used for the realization of the ball bearing sliding system. This guarantees a high resistance to wear and makes the movement of the screen door silent and lasting. The sliding system offers the possibility to adjust the closing of the movable screen door.</i>
	MAGNETIC CLOSURE	<i>Guaranteed on central solutions, corner and circulars shower enclosure.</i>
	EASY TO INSTALL	<i>A basic feature of the design studio of the shower enclosures from THEdour.</i>
	ADJUSTABLE SHOWER ENCLOSURE	<i>Able to compensate the wall off-square, exploiting the possibility to managing independently the screen from the wall side frame; moreover, it is possible to align and facilitate the adherence of the shower enclosure closure, by adjusting the bearings of the sliding system and acting on the extensibility of the sliding track.</i>

SAFE DOÛR

ZERO GLASS

REDUCIBLE Lower sliding track, 55 mm high for a structured aesthetic result and effective watertightness.

(1) Check the right sizing of the sliding profiles.

(2) Using a hacksaw with blade pitch not exceeding 2 mm it will be possible to REDUCE the length of the sliding profiles.

(3) Dimensioned the sliding profiles you will be able to complete the installation of the shower enclosure.

AESTHETICS

Meticulous attention to construction and aesthetic details makes the SAFEdour series complete and fully functional for any bathroom setting.
