- The cryptocurrency stock exchange I use to buy and sell smaller altcoins...
- How to profitably use the main informational cryptocurrencies sites...
- How to store Bitcoin and other cryptocurrencies safe and secure...
- And much more!

The exclusive insider information you will find inside the Crypto Ultimatum PDF Book will allow you to start making money within 24 hours, with easy methods that require minimal time and work.

Do not worry if you are a complete beginner in the world of cryptocurrencies. The training you are going to receive is clear, detailed and, most importantly, actionable.

Just like in any other business, it's very important to minimize the risks. That's why, I invested my money into the 3 main cryptocurrency fields, significantly lowering the risks. The total amount spent on the crypto business is the 30% of my savings. I never invest my complete cash or use bank loans, this is my principle.

Here is an example...

Let me explain you a very-well working, safe strategy that I use to make extra high profit consistently.

The brief point of this sample strategy described inside The Crypto Ultimatum PDF Book is that if 1 coin drops 7% or more within 24 hours,

then a correction is expected with high probability, thus its exchange rate will rise.

Preconditions of the strategy...

Use this strategy only and exclusively for the following coins:

- BTC (Bitcoin)
- ETH (Ethereum)
- BNB (Binance Coin)

Important: Use this strategy only on these coins, since these coins have the highest market capitalization.

These coins always achieved ATH (All Time High) again after big drops, so they always achieved the previously highest currency rate by time.

Use this strategy only on a safe amount of money:

This is a very important criteria, because if you have already purchased a certain coin, and its exchange rate might drop further, and you instantly need the amount, then you can withdraw it only with loss.

But if, at the moment, you don't need the amount that you trade with, then you can wait until the exchange rate achieves the target price.

Simply saying, you might lose using this strategy presented in The Crypto Ultimatum PDF Book only when you are impatient and withdraw your

money before the achievement of the target price. You will win in every other case.

Use of the strategy step-by-step...

As the first step, you have to open an account at Binance. Binance is the world's biggest crypto stock exchange.

In order to get notified anywhere and anytime that a coin dropped 7% within 24 hours, you have to download and install the Binance App on your smartphone.

After installing the Binance App, click on the 'Markets' button.

Then click on the 'Search Coin Pairs' field.

Then type in the 3-digit ID of the cryptocurrency (for example: 'BTC' for Bitcoins). If You do not know the ID, visit the CoinMarketCap website, for the full list of available cryptocurrencies and their ID's.

Then select the 'BTC/USDT' pair. Then click on the 'Alert' button. Then select the '24H change is down' option.

Then type to the 'Value' that '7%', and select 'Always' at the 'Frequency', then click on the 'Create Alert' button.

You are ready with setting up the notification. Now your smartphone will notify you if the BTC's exchange rate drops 7% (or more) within 24 hours. Now set up the notification for the other two coins (ETH, BNB).

If your smartphone notifies that a particular coin dropped 7% within 24 hours, then buy more from that coin. If such an event occurs that let's say two drops from the 3 monitored coins within 24 hours, then use the 50% of your money to buy from the first one, and 50% to buy from the second one.

After buying the particular coin, immediately set up at 'Binance' to make the system automatically sell it at +7% of the purchase price. Therefore, You will have 7% profit.
