

Flo:One Telecom Brochure

Discover why Flotek is the
smarter cloud partner for
your business

Who is Flotek

As a growing technology company based in Cardiff, Flotek strives to ensure customers are embracing the opportunities and efficiencies brought by the latest and greatest technology.

With regional sales and support locations across the UK, our ambitious growth is focused around our crucial values and fundamental rules, with every product and service delivered with expertise, passion and heart.

Discover why Flotek is the smarter Cloud partner for your business.

Our reason why...

Ensuring our customers stay continuously connected through secure and cutting-edge technology solutions.

Dedicated Team

With regional offices in the South West UK - our team are on hand to help you stay connected & secure across all our technologies.

Employee Led

Every employee shares ownership across our entire group, fostering a culture of collective investment and shared success.

Tech Partners

Working and collaborating with the worlds market leading manufacturers to keep ahead of our competition.

Internet

An Internet Service Provider offering reliable connectivity with the option of an on-net 5G backup for uninterrupted service.

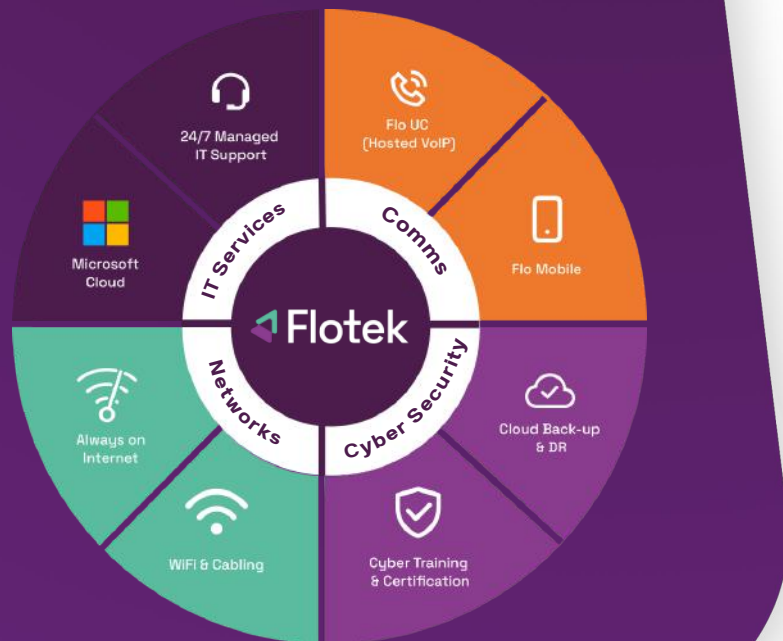

Microsoft Cloud Partner

Driving customers towards cloud solutions using Azure, focusing on modern work practices and robust security measures.

What We Do

Bringing Technology Together.

At last, an IT & Comms service provider taking SMEs to the Cloud with confidence, clarity and clout.

Thanks to our range of innovative, cost-effective, tried & tested solutions that ensure your tech, team and data are always on, always secure and always together, wherever they are.

Our Promise

Always On.

Wherever your team is at, wherever you do business; staying connected with unfaltering internet back-up to boot is mission-critical for businesses whatever their size.

Always By Your Side.

Innovative, cost-effective, tried & tested solutions, not to mention our friendly and experienced team always on-hand to ensure you're right where you need to be.

Always Secure.

Flotek's got cyber sussed, with the highest security baked-in to all our products and best practice strategies putting the right defences in place for when it happens.

Always Giving Back.

From rewarding our loyal customers, to promoting well-being and supporting charitable causes, every product and service we offer is delivered with expertise, passion and heart.

Introducing Flo:One

Our industry leading unified communications platform is underpinned by a powerful VoIP telephony system, including a range of advanced call handling and management features, alongside video meetings, CRM Integrations, chat, presence, document sharing and more.

All of this can be managed centrally through our secure administration dashboard, and deployed through proprietary mobile, desktop, and web applications.

Our software is also completely Open API to allow you to integrate further.

Mobile & desktop applications

Directory services

Intelligent call routing

Call conferencing

Integrated video meetings

Instant messaging & presence

Voicemail & voice email transcription

SMS with bulk-send availability

Screen & document sharing

Customisable IVR menus

Call queuing & parking

Call recording

Advanced Call Management

Our solution offers a comprehensive suite of cloud-PBX tools to enable your business to provide a professional appearance while giving customers the best possible experience.

Our drag and drop call routing module offers an intuitive method to build call flows in minutes, leveraging features including IVR menus, on-hold music, call queues, hunt groups, call-forwarding, voicemail, time diaries, and more.

The image displays a user interface for managing call routes. It is divided into several sections:

- Call Route Options:** Includes a text input for 'Route Nickname' (containing 'Test Route') and a 'Show advanced Settings' link. An 'Add Route' button is located in the top right.
- Assign Call Route To Number(s):** Shows 'Assigned to' as '+44 7123 456789'.
- Routing Modules:** A list of modules to be added to the call route, including 'Send to Users / Forward Call', 'Press 1, Press 2 Option', 'Dial User by Extension', 'Caller ID Routing', 'Call Queueing', 'Play a Sound', 'Send to Voicemail', 'Hang Up', 'Repeat Routing Option', 'Conference Bridge', 'Send to another Call Route', 'Send to Trunk', and 'Receive Fax'.
- Call Route Configuration:** A central area showing a flow diagram. The first step is 'INCOMING CALL RECEIVED'. The second step is a menu titled '"PRESS 1, PRESS 2" OPTION' with an audio player for 'Routing-Audio_Press1.mp3'. Below this are buttons for '1', '2', '3', '4', '5', and 'MORE', along with 'INVALID' and 'TIME OUT' buttons and a 'TIME OUT (SEC)' field set to '10'. A callout box labeled 'PLAY A SOUND' with a hand icon points to this step. The third step is 'SEND TO USERS / FORWARD CALL' with a text input for 'Ext 1002 - 1002'. The fourth step is 'PLACE THE CALL INTO A QUEUE' with a table of settings: Queue Time Out (Off), Ring Time Out (Off), and Short Code (Send to Voicemail). The final step is a dashed box asking 'Where should the incoming call go next?'.

SMS Messaging

We offer a comprehensive business SMS feature that enables you to send SMS messages to either **individuals** or **bulk** across entire phone books of up to 20,000 numbers, either sending them immediately or using a scheduling tool to build entire campaigns.

Compose messages and view real-time updates of how your message will appear to recipients all from within the Desktop Application or via the Web Interface.

Give Microsoft Teams a voice

Provide an enhanced voice solution for your Microsoft Teams users. For businesses who use Microsoft 365 for productivity and collaboration, our solution enables your employees to use Teams desktop and mobile applications to make and receive voice calls without clicking

Make External Calls From Teams

Make and receive external calls from with the Teams application without the need to switch screens.

Intelligent Call Routing

Enhance experience for inbound callers, with IVRs, call queues, time of day routing, on-hold music, and more.

Cut Telephony Costs

Benefit from our pricing, with no upfront costs, generous call bundles, and unlimited free calling between extensions.

Resilient Infrastructure

Call traffic is managed on advanced cloud infrastructure with global high-availability, horizontal scalability, and industry-leading resilience.

out to other consoles, while making use of our full range of features. Best of all, Teams users sit within your solution seamlessly alongside users who prefer to make use of our proprietary applications or desk phones – meaning genuine endpoint flexibility.

CRM Integration

Key to any unified communications solution is integration with other critical services. Our solution offers contact integration and call logging with the leading CRM platforms, delivering plug-and-play compatibility across Salesforce, Hubspot, Pipedrive, Zoho, Vtiger, Capsule and Copper CRM.

Less common, web-based CRMs are also catered for, offering both 'click-to-dial' and 'screen pop' functionality, while our Open-API library enables bespoke integrations.

Automated CRM Screen Pop

Enjoy on-the-fly CRM record retrieval whenever a customer calls you - putting all the data you need at your fingertips.

Flo:One Contact Sync

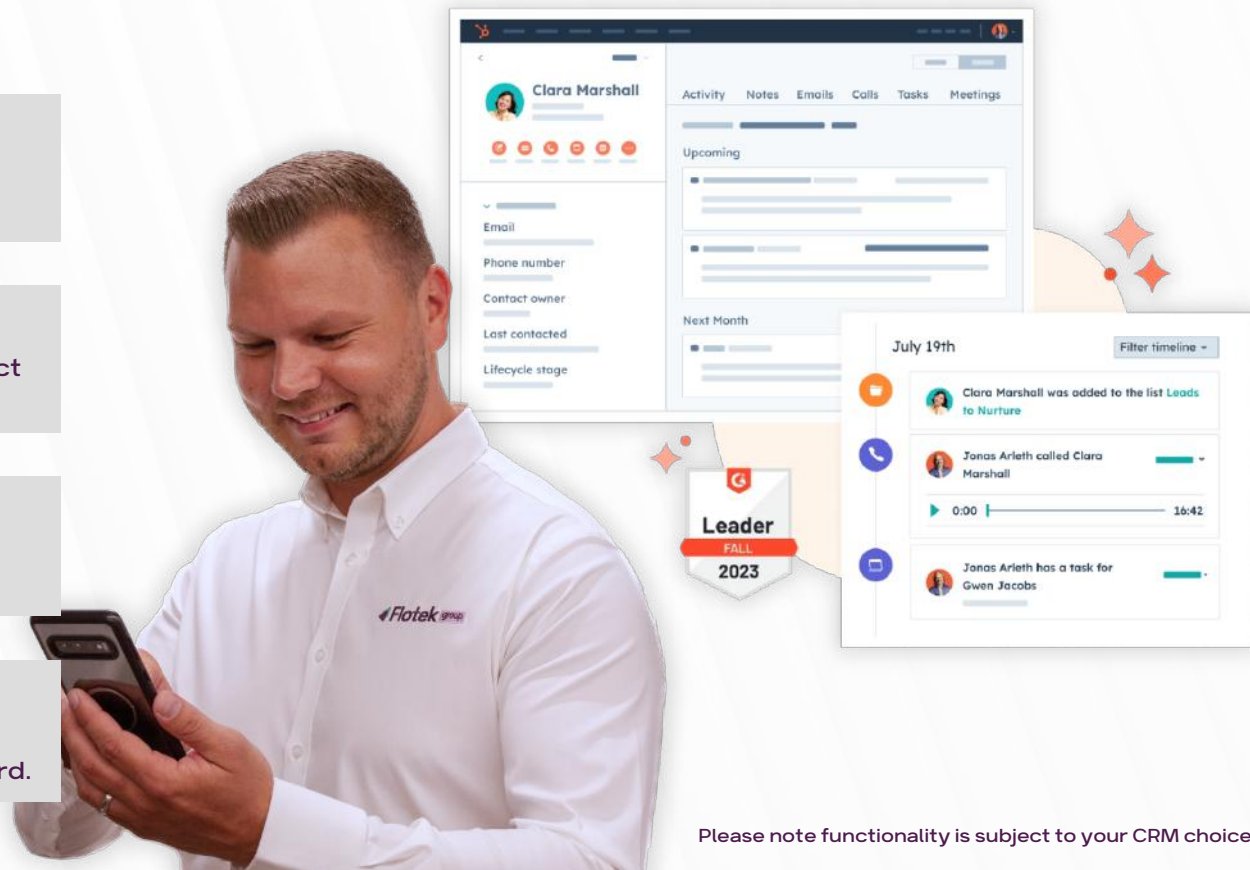

Flo:One can automatically synchronise with your CRM contact records, always ensuring a single, accurate source of truth.

Click-To-Dial Browser Extension

Turn all the customer phone numbers in your CRM into links you can click on to automatically dial in Flo:One.

Advanced Logging Features

Log every call, duration, timestamp and more with Flo:One advanced call logging directly into your CRM customer record.

Please note functionality is subject to your CRM choice.

Flotek Backup & Archive

Backup & archive your call recordings, video recordings, and CDR data through seamless integration with leading cloud storage solutions, Azure, Amazon S3, Dropbox, Google Drive & our own **Flotek Backup Solution**.

This means that should you require storage of recorded calls longer than our rolling 90-day inclusive storage, you have a broad choice of options without the need to store anything locally, with automatic cloud-sync that ensures your files are securely backed-up without added administrative tasks.

Compliance based Call Recording

We offer native **cloud-based** call recording, offering a 90-day rolling archive of your calls, complete with secure data centre storage, as well as integration to leading cloud storage providers should you need to retain copies of your recordings.

If you're operating in a **regulated industry** and subject to compliance requirements, such as **MiFID II** or **PCI**, we can also offer our cloud-based compliance call recording and analytics platform from CallCabinet.

CallCabinet includes advanced search and retrieval, 256-bit encryption, long-term immutable storage, and payment platform integration, delivering the ultimate telephony compliance suite.

The screenshot displays the CallCabinet interface. At the top, the "CALL DETAILS" header is visible. Below it, the "CALL PLAYBACK" section includes a progress bar with a play button, a "x2" speed control, a refresh icon, and a timestamp "03:10 / 04:27". A red vertical line indicates the current playback position. Below the progress bar, there are sections for "SPEAKER (This denotes change in user)", "SINGLE NOTES (Click to add a note)", "NOTES OVER TIME (Click to add a note)", and "SCREENSHOTS". A list of agents is shown with checkboxes and icons: Lucio Roberto, Peter Winterton, Anastassia Tatianopolous, and Martha Willoubey. Below the agent list, there are three video thumbnails: a screenshot of a web application, and two live video feeds of call center agents wearing headsets. At the bottom, the "SPEECH TO TEXT" section features a search bar and a list of categories (Sales, Marketing, CTA, Suggest Demo, Logistics) and keywords (delay, purchase, product, delivered, delivery, package, parcel, problem, arrival). The transcript shows a conversation between an Agent and a Caller, with the word "delivered" highlighted in blue in the original image.

KEYWORDS: delay purchase product **delivered** delivery package parcel problem arrival

Agent 00:00:00.890 I understand there was a delay in getting your product delivered.

Caller 00:00:05.480 Yes, I made the purchase on the 22nd and it has still not been delivered. I want a refund as my product has not been delivered.

Agent 00:00:12.840 Let me check my system and find out what is happening with the delivery as you should have received your package by now. Please confirm your credit card details.

Caller 00:00:17.500 Thank you. My credit card details are #### #### #### ##.

Agent 00:00:27.215 Ok, I can see that the product was dispatched from our warehouse on the 20th and it should have arrived already. There was a delay with the courier service and it should be delivered this afternoon at 4pm. Will you be at home at that time to receive the parcel?

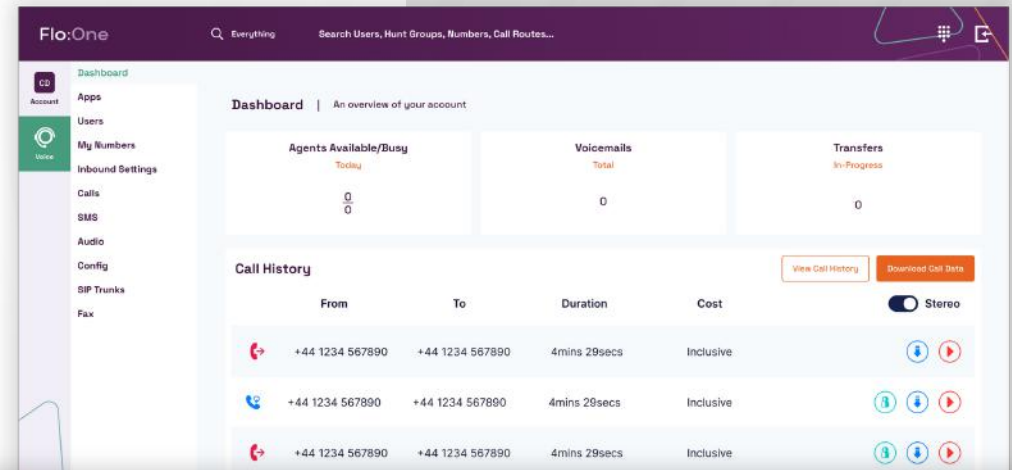

Caller 00:00:29.861 Yes, I will be home after 3pm.

Agent 00:00:37.295 Let me check my system and find out what is happening with the delivery as you should have received your package by now.

Reporting & Wallboards

Keep your finger on the pulse of your team's productivity with our incredible self-management tools! Easily create visually **engaging wallboards** and **generate reports** at the touch of a button, then display them on an office TV wallboard. Whether you need instant updates or scheduled reports, our system has you covered.

With a comprehensive array of stats at your disposal, including **average wait times** and **call volumes**, you'll have all the key performance indicators right at your fingertips. This means you can identify **missed call opportunities** across different departments and ensure your business is delivering top-notch service consistently.

Daily, Weekly or monthly Automated Reports are available via email
