

# Your Intelligent Document Assistant

## Meet Marvees

The AI-powered document extraction service that understands your bank transaction advices, bank statements, passports and much more! Optimize your workflows and fully automate document data extraction!

## Accelerate your business

Accelerate your business processes by automating information extraction either from electronic or scanned printed document. Marvees applies advanced machine learning to accurately extract text and various amounts from your documents.

## AI Computer Vision Technologie

With just a several samples, five or more, of each advice type you can tailor Marvees to understand your documents. Turn documents into usable data at a fraction of the time and cost, so you can focus more time acting on the information rather than compiling it. Marvees extracts text using computer vision read, high-definition optical character recognition (OCR) enhanced by the latest technology artificial intelligence and machine learning tailored for documents. It also extracts the structures of tables with row and columns.

It supports printed and handwritten forms, PDFs, and images. Marvees supports multiple languages including English, French, German, Italian, Spanish, Portuguese, Dutch, Chinese, Japanese and others.

## Marvees in Action

Fully automatically transform this:

into this:

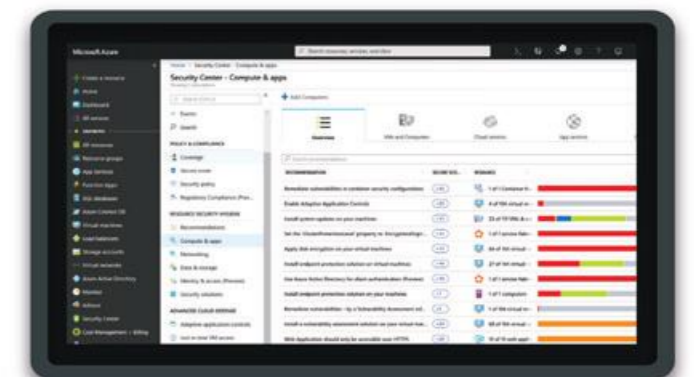

Output of the Marvees is a standardized format JSON file which can be used by Insa to import bank/broker transactions electronically or any other software systems.

## Seamless Integration

Marvees integrates seamlessly with Korto Record Management System so it can automatically detect important keywords/tags and assigns them to the documents stored in the Korto system.

## Enterprise-grade Security

Marvees is based on Microsoft Azure Form Recognizer which is part of Azure Applied AI Services backed by Azure infrastructure and enterprise-grade security, availability, compliance and manageability.

## Extract Data Cost Effectively

Marvees comes without standard yearly license price but with a very affordable, pay-as-you-go pricing based on the number of documents transformed, which is a fraction of the price compared with the cost of the manual data extraction!
