

# ORIGO

THE POWER OF SIMPLICITY

SWISS  MADE

# YOUR CHALLENGE

Operating rooms today contain more and more technologies and devices that are **complex** and require **extensive training** and **time-consuming installation procedures**.

As a result, it has become increasingly difficult to prevent delays for patients undergoing surgeries causing **tension** within the OR.

# OUR SOLUTION

## ORİGO THE POWER OF SIMPLICITY

### EASY TO USE

Straightforward and brief installation procedure, with automatic motor recognition, ORİGO comes complete with a convenient-sized touchscreen and an **intuitive, easy to follow interface.**

### MULTIFUNCTION

Powering our most advanced tools: NANO, RAPİDO, PM PERFO, **OSSEOSTAP** and S120.

### INCREASING PRODUCTIVITY

The absence of complicated functions enables you to increase your productivity through **fast intraoperative changes.** Experience a more efficient OR by having a **surgical team that is comfortable with the technology.**

### ENABLING INDEPENDENCE

The **enhanced foot pedal** enables surgeon independence, with full control of irrigation flow as well as **the most useful functionalities** for each surgical need.

### IMPROVED MOTOR PERFORMANCE

**Improved motor performance** enabling higher power output<sup>1</sup> and better cutting performance<sup>2</sup>.

<sup>1</sup> Compared to OSSE0DU0 NANO and RAPİDO

<sup>2</sup> Compared to OSSE0DU0 S120

# OUR SOLUTION

## CUSTOMIZABLE PROFILES

**Customization of personal settings** to suit each surgeon's preference is readily accessible and allows surgery commencement with just one click.

## TAILORED MOTOR SETTINGS

Tailoring motor settings according to your preference adjusting default speed, acceleration and deceleration **to have your best surgical experience.**

## MULTIPLE IRRIGATION SETTINGS

ORiGO offers **three different irrigation settings**: continuous irrigation, intermittent irrigation and on-demand, allowing irrigation flow control when required.
