Create the *Ombre* Look Above

Our stylists' trick is to create a beautiful ombre effect on your fireplace, start by adding an abundance of floristry or tree trim to one corner of your display, and gradually decrease the amount as you move towards the ends. This technique can also be applied to enhance the look of your staircase or console table.

Why a Real Tree?

Picking a real tree is a family favourite tradition, and our knowledgeable staff are on hand to help you choose the perfect one.

Choose from the most popular Nordmann Fir or the majestic Noble Fir for great needle retention.

Fraser Fir is slimmer and ideal for smaller spaces.

Christmas trees absorb carbon from the atmosphere during their growing period and are a sustainable crop replanted year after year.

Potted trees kept cool and in bright light have the best chance of growing-on after Christmas.

Save the date!
