## Get More from Your Equipment with May Wes

### "Thank You for Your Business. We Will Continue to Earn It."

At May Wes Manufacturing, we know that every dollar counts—especially in a challenging economy. That's why we remain committed to providing durable, cost-effective solutions that protect your most valuable investments: your equipment.

Our products are engineered to extend the life of your OEM components and minimize costly downtime. A prime example is our best-selling G4 Stalk Stompers, which cost an average of \$481 per row—a smart investment when replacing a single combine tire can exceed \$1,700. With just one season's use, the Stalk Stompers can pay for themselves and continue protecting your tires and tracks for years to come.

We're also proud to offer Skid Shoes and Poly Retractable Fingers at newly reduced prices, giving you greater value while helping preserve your grain platforms and threshing systems. And this year, we're excited to introduce our brand-new Poly Pickup Bands. These are thicker, stronger, and built to last longer than the previous design—yet they're about half the cost of traditional steel bands.

Whether you're maintaining your current equipment or upgrading your harvesting system, May Wes parts are designed to increase your equipment's efficiency and reduce your operating costs. Every product in this catalog is backed by our decades of experience in agricultural wear parts and our commitment to innovation.

We invite you to explore the new and expanded offerings in this year's catalog, and as always, more products and resources are available at [maywes.com](http://maywes.com). You'll also find answers to common questions and installation tips on our YouTube channel at [youtube.com/maywesmn](https://youtube.com/maywesmn).

From all of us at May Wes, thank you for your continued trust. We wish you a safe, productive, and profitable season ahead.

**Jack Daggett**  
 President, May Wes Manufacturing  
 Pride Solutions, LLC

#### MAY WES POLICIES & PROCEDURES

**Scope:** These policies apply to all business units operating under the Pride Solutions LLC company. Namely: May Wes Manufacturing, C&A Pro Skis, Pride Engineered Plastics and Pride Assembly.

**Prices & Terms:** Prices and availability are subject to change without notice. All shipments are billed at the price prevailing at the time of shipment. Payment terms are agreed upon prior to or at time of sales and will be listed on the invoice. In the event of non-payment, the buyer shall pay any and all collection costs, including attorney fees.

**Payment types currently accepted include Visa, Mastercard, Discover, American Express, Cash or Check.**

**Shipment:** All orders will be shipped in the order they are received. Orders can be shipped UPS ground, UPS second day air, UPS next day air or any other available means (including Speedee where suitable). Truck freight will be used when price competitive to UPS or when weight/size dictate otherwise. Pride Solutions is not responsible for goods damaged or lost in transit. We will work with the carrier to resolve the problem.

**Warranty:** Pride Solutions warrants the product to be free of material and workmanship defects which are apparent upon receipt and initial use of the product. Wear items such as liners, skid shoes and bearings are guaranteed for a reasonable run time, not to exceed one year from the date of purchase. Warranty claims must be reported within 15 days of occurrence of defect. Warranty does not cover damage from improper installation or unintended use of the product. Pride Solutions does not accept responsibility for any damages incurred on the equipment to which the product is applied. The warranty value is limited to the purchase price of the merchandise. No incidental, consequential, indirect losses or

120 Eastgate Drive SE  
Hutchinson, MN 55350

**EMAIL:** sales@maywes.com  
**FAX:** 320-587-6112

damages, expressed or implied, are covered. A warranty claim must be processed with either return of the defective product or reasonable proof that the product failed. Items returned for warranty must be accompanied by a Return Material Authorization (RMA) obtained from Pride Solutions customer service at 1-800-788-6483. If the end user purchased from a dealer or authorized distributor, the dealer or authorized distributor must make the warranty claim. Defective product will be replaced with same or better product. Account credit will be given when a reasonable replacement cannot be provided.

**Returns: Merchandise returned for credit must be returned within 90 days of receipt.** If the end user purchased from a dealer or authorized distributor, the dealer or authorized distributor must initiate the return. All returns must be accompanied by a Return Material Authorization (RMA) number issued by a Pride Solutions customer service representative at 1-800-788-6483. **Pride Solutions is not responsible for freight charges and may assess up to a 25% restocking fee for all properly filled orders.** In the event of wrong and/or missing parts on an order, the restocking fee is waived and Pride Solutions will pay freight. Merchandise must be returned complete and unused, including hardware. The customer account will be credited the purchase price of the merchandise less the restocking fee (if applicable).

**Non-Affiliation With Companies Mentioned:** maywes.com is owned and operated by Pride Solutions LLC. Some of our products are compatible with brands listed as an aftermarket vendor. Pride Solutions LLC is not endorsed, sponsored by or affiliated with any other companies mentioned. Kit for 18 Row Folding Head also available. Contact your dealer or May Wes to order.

\*Due to variation of implement configurations, row coverage under the feederhouse may not be applicable.

The 2x2 toolbar is required but can be purchased locally to reduce shipping cost.

This is standard 2x2 square 3/16" - sidewall tubing available from most fabrication shops or metal supply companies.

\*Due to variation of implement configurations, row coverage under the feederhouse may not be applicable.

The 2x2 toolbar is required but can be purchased locally to reduce shipping cost.

This is standard 2x2 square 3/16" - sidewall tubing available from most fabrication shops or metal supply companies.

## POLY CUTTING EDGE

### NON-SPARKING & PREVENTS SCUFFING

 Snow Plows, Snow  
Pushers & Buckets

 Slick & Durable  
UHMW Poly Protects  
Pavement from  
Plow Damage

**Horizontal Application -**  
 Beveled on both sides.  
 Optional counterbored holes.

**Vertical Application -**  
 Unbeveled. Optional drilled holes.

"We decided to make the switch from metal cutting edges to the May Wes Poly Cutting Edge in an effort to prevent scuffing our new sidewalks. May Wes helped us figure out the proper Poly Cutting Edge size requirements to fit our particular snow blowers and plow blades. We like how the poly material flexes when the blade hits uneven sidewalks, preventing the shock on the equipment and chipping the concrete. We are satisfied with the service from May Wes and the quick product shipment."

 Mike Drew, Park Superintendent  
City of Glencoe, MN

# **Tractor Stompers**

## STUBBLE DAMAGE PROTECTION STALK STOMPERS FOR TRACTORS

### WORKS OFF OF EXISTING TRACTOR HYDRAULICS

- Use an existing open remote to control the Stalk Stompers, allowing independent control and float operation.
- Plumb a tee into existing implement lines so that the Stompers raise and lower automatically with your implement.

### KIT IS BUILT AROUND A STANDARD 4" X 4" TOOLBAR

You have the option to supply your own 4" x 4" toolbar or you can purchase through May Wes. (Oversize shipping charges will apply.)

### NO DRILLING OR WELDING REQUIRED!

Designed for quick assembly and doesn't typically require welding or drilling.

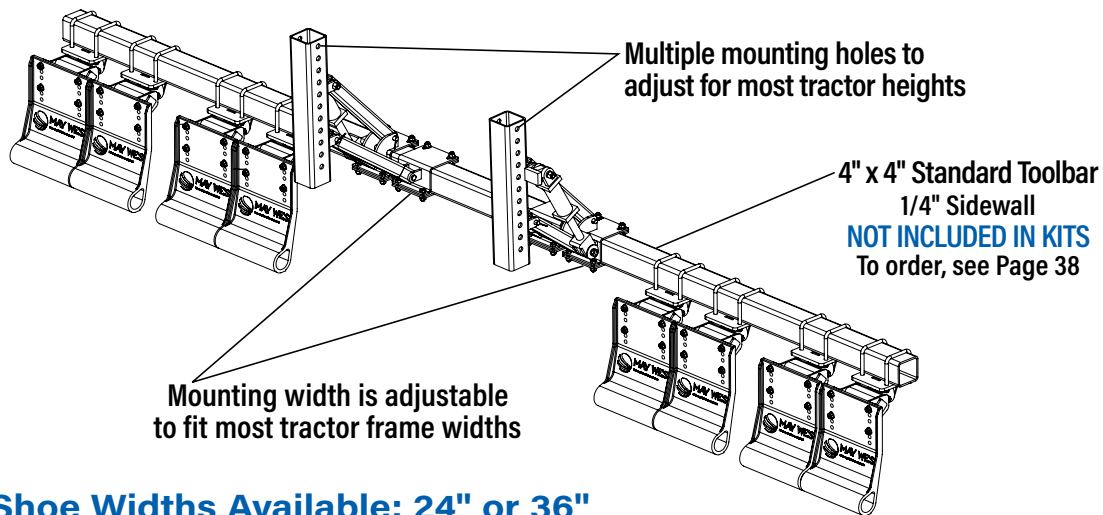

### ROW-CROP CONFIGURATION

Great for knocking down stalks when planting in no-till applications.

## **Stalk Stompers Promote Residue Decomposition!**

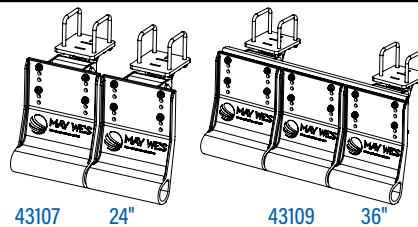

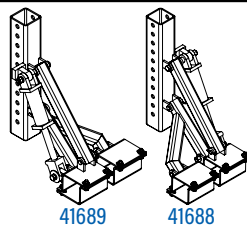

## TRACTOR STALK STOMPER KITS WITH MOUNTS

### Multiple Shoe Widths Available: 24" or 36"

- Toolbar is available for purchase separately.  
(See page 38)

## POLY PICKUP BANDS

### A PRACTICAL REPLACEMENT FOR OEM METAL PICKUP BANDS AT HALF THE PRICE

- ✓ **Color match** to OEM
- ✓ **12% thicker** than previous design
- ✓ Reinforcement rib **tapers** to the edge, increasing strength and preventing debris build-up
- ✓ Designed by **May Wes**, maker of farmer-focused innovations for over 50 years

### WHAT ARE THE BENEFITS OF POLY OVER METAL?

#### Poly Pickup Bands

- ✓ Don't rust, bend or break
- ✓ Feed into machine more smoothly
- ✓ Eliminate metal shavings in feed
- ✓ Spark free, reduce risk of fire
- ✓ Maintain their shape, impact resistant
- ✓ No metal-on-metal clatter, enjoy a quiet ride in the cab

## BALER LINERS

# Now Available from May Wes! BaleSkiis® Baler Liners!

### Small Model Shown Here.

Made for all Square Balers, Large & Small.

One way anti-springback pattern machined full length of liner

Pattern keeps hay compressed even when plunger retracts

Non-Stick properties prevent bale-chamber buildup

Covers all 4 sides of bale chamber

Special self-adjusting material stabilizes friction

Material has 3 time the wear resistance of mild steel

### INSTALLATION VIDEO

## HOW DOES IT WORK?

The BaleSkiis® Baler Liner covers the bale-forming chamber with a specially designed, self-adjusting material and an anti-springback pattern machined into the product uniformly compresses the hay and keeps it compressed when the baler plunger retracts. This ensures a constant uniform movement and compression of hay through the bale chamber. This means that the hay is not moving back and forth in the chamber breaking leaves off stems.

- Puts more high protein leaves in the bale - not on the ground.
- Puts more pounds per acre in the bale - not on the ground.
- Reduces the amount of tension in your bale chamber.
- Stops bale chamber plugging & buildup.
- Eliminates wear on your bale chamber.
- Reduces horsepower and fuel consumption.

\*Heavy material kits are recommended for those baling in rough forage, and/or very abrasive soils and/or extreme temperatures.

Please contact us if your baler has other modifications or if you do not see your baler model listed here. BaleSkiis are available for any make/model of square baler. Unless noted, all kits are available in heavy or regular material.

If you will be baling corn stalks, ask for the "Corn Kit" add-on, at no extra cost at the time of ordering.

Extra costs are incurred if ordered as a separate item later.

## PREMIUM POLY SKID SHOES - HARDWARE INCLUDED

### EXTEND THE LIFE OF YOUR HEAD AND PUT MORE CROP IN THE COMBINE.

#### FORMED TO FIT. PREDRILLED COUNTERBORED HOLES. HARDWARE INCLUDED.

Poly Skid Shoes prevent soil and debris build-up on the underside of your combine head. The smooth, slick surface allows you to run your head and cutterbar down as low as possible, leaving little to no crop in the field. Durable UHMW skid shoes protect your OEM metal skid plates, extending the life of your head.

#### MACHINE CUT FROM SOLID SHEETS OF UHMW POLY OR COMPRESSION MOLDED TO FIT YOUR HEAD.

Predrilled & Counterbored Holes Protect Hardware.  
All Hardware is Included with Skid Shoes.

Hardware included = 86 Small Head Pop Rivets. Extra rivets can be purchased on page 149.

#### Dynaflex Header Field Campaign:

A Field Campaign was announced in November 2011 for the Dynaflex Header Platform affecting the serial numbers listed below. This campaign updates the skid shoe configuration from a low profile to a high profile. **Please verify with an AGCO Dealer** if this change has been incorporated on your Dynaflex Head. If this change has been implemented, please order poly skid shoes for the following serial number break: CHD01101-FHD01100 High Profile (Page 89)

#### Serial Numbers Involved:

|                    |      |                            |

## CHAFF SPREADERS FOR CASE IH 1400-2500 SERIES

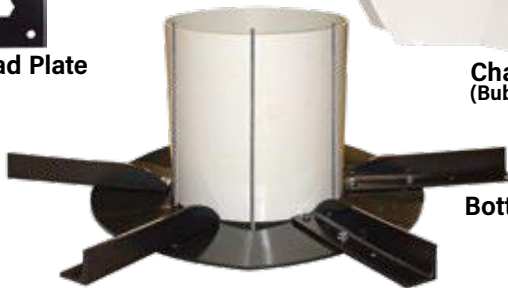

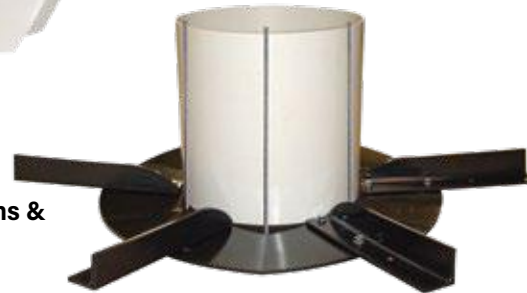

Flat Arm for Chaff Pan

Pre-load Plate

Chaff Pan Cover  
(Bubble Pan shown)

Extended Hex Shafts

Bottom Discs, Drums &  
Spreader Bats

Chaff Spreader Kit example shown above. Kits include Sieve Easy Adjust Kit (page 98).

### HIGH PEAK DIVERTS CHAFF TO EACH SPREADER.

#### Spread chaff over a 16 foot area

Eliminates two rows of chaff bed your plow will have to cut through in the future. Spreading the chaff evenly helps break down compost material quicker. These dual spreaders work well on both corn & bean debris. There are no hydraulic motors to tap into the hydraulic lines that rob your combine of power.

#### CHAFF SPREADER - COMPLETE UNIT

## SEED FLOW SENSOR IMPACT WEAR PLATE FOR JOHN DEERE

COMBINE PARTS

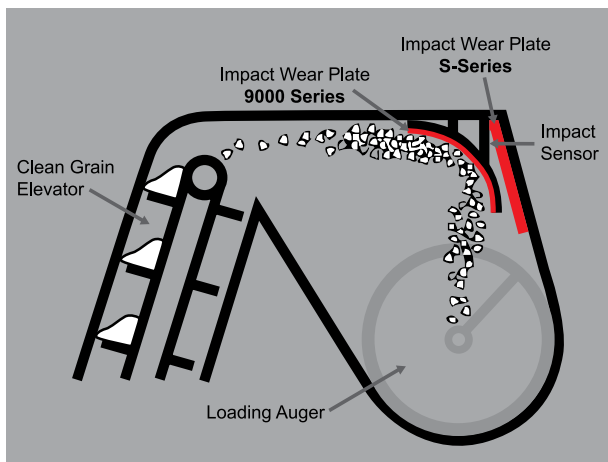

### ECONOMICAL REPLACEMENT COMPARED TO PURCHASING THE ENTIRE OEM ASSEMBLY

May Wes engineering working in conjunction with a valued customer developed a replacement poly plate for the mass seed flow sensor on John Deere combines. These products offer economical replacement parts compared to the alternative option of purchasing the entire OEM assembly.

| PART NO | DESCRIPTION                                                                                                                                                                                                                                                      | RETAIL PRICE |

## FEEDERHOUSE SILENCER KITS FOR CASE IH

### REDUCE THE RATTLE AND CLATTER OF METAL ON METAL, GRAIN ON METAL & CHAIN ON METAL

Kits include: Throat liner, drum guards, rails and top sprocket stripper plates.

#### Throat Lining - 1/4" Poly

#### THROAT LINING

Grain feeds into combine over the slick poly and helps prevent bunching in the throat. The poly does not corrode like metal and provides a smooth surface, even when placed over corroded metal. The echo from the metal on the bottom is absorbed by the poly lining, which is form-fitted to cover the existing metal.

Drum Guards

#### DRUM GUARDS

Soft plastic, rubber-like material is used to cover the metal drum where the chain hits. Saves the chain from excessive wear on the drum and decreases noise.

Rails - 1/4" Poly

#### RAILS

Cover existing metal rails with poly rails. This helps prevent clattering of metal on metal as the bars on the feederhouse chain hit the metal rails. Poly rails cushion the impact of metal for less wear on rails and bars.

Top Sprocket Stripper Plates

#### TOP SPROCKET STRIPPER PLATES

As the chain goes around the metal plate, it wears grooves into the metal and flattens the bottom of the chain. With poly plates, the chain glides across the poly and helps retain the shape of the chain. The chain will not clang against poly as it does the metal. Replace metal stripper plates with poly plates.

## CLEAN GRAIN ELEVATOR POLY PADDLES

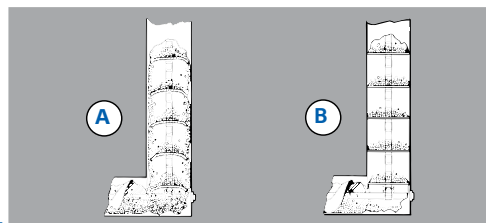

### MAY WES POLY PADDLES OUTPERFORM FACTORY RUBBER & STEEL PADDLES

**Rigid elevator poly paddles do not bend back,**  
which prevents grain from falling back down the elevator.  
(see illustrations on right)

**Extend the life of your elevator tin.**

As the Poly Paddles move through the elevator, they leave a protective coating, reducing friction and wear.

- For Clean Grain Elevators
- Replacement Parts; Paddles & Chains
- Complete Kits of Paddles with Chain
- 1/4" Thick (Unless Specified)

A. Grain flow with factory rubber paddles.

B. Grain flow with May Wes poly paddles installed.

## MINI COMBINE™

NEW

## QUICK & ACCURATE CROP SAMPLING

Save the Time and Expense of Getting Your Combine Out

- Self-contained unit comprised of a picker/threshing drum and an aerator/blower
- Comes with **4 interchangeable concaves** for various crops
- Lightweight, making sample collection easy
- **Accurate samples in minutes**, without the time and expense of running your combine
- **Achieve higher yields** while lowering your equipment and drying costs

## POLY CORN SNOTS

# PROVEN TO OUTPERFORM AND OUTLAST

Replace your existing metal or worn out poly corn gatherers with **GVL Poly Corn Snouts** and reap the benefits!

### DESIGN INNOVATIONS:

- **Pivot Points**
  - Folds Up, In & Down
- **Easy Access for Cleaning & Maintenance**
- **Deeper Shoulders for Better Crop Retention**
- **Complete Poly Construction**
  - Inner & Outer Walls
- **Replace One Snout or Outfit the Whole Head**
- **Interchangeable**
- **Complete with Hardware for Easy Installation**

### ADVANTAGES OF POLY MATERIAL COMPARED TO METAL:

- **More Economical & Weighs Less**
- **Absorbs Impact**
  - Less Bounce & Denting
- **Slick Surface Sheds Debris**
- **Less Ear Bounce & Butt Shelling**
- **Works Well in Down-Corn Situations**

### ADDED FEATURES OF THE JACK-KNIFE DESIGN:

- **Folding Design Allows Snouts to be Popped Up & Latched in Seconds**
- **Easier Transport & Storage Positions**
- **Advanced Prop Rod System with Safety Lock Pin**

## SERIES 1 - RIGID DESIGN

### FOLDS UP FOR EASY ACCESS

Complete OEM Replacement with Rigid Design

**Single pivot point** allows snout to lift for easy access for maintenance.

**Series I Back Poly** has holes in the rear for the rear hold-down pin to go through.

## SERIES 2 - JACK-KNIFE DESIGN

### FOLDS UP, IN & DOWN

Complete OEM Replacement with Jack-Knife Design

**Double pivot points** allow the points to fold up, in and down for easy access for maintenance and uses less storage space.

**Series II Back Poly** is slanted, without holes in the rear.

## POLY CORN SNOOTS

**QUESTIONS?**  
Watch our FAQ video.

Scan the QR code with your smartphone to watch on YouTube.

**Now you can order your snouts with all the parts included and pre-assembled!**

**Complete assembly includes:**

Brackets, Front Poly, Wear Points and Hardware.  
Wear Strips are included on 30" snouts and larger.

### PREVENT DAMAGE TO CORN SNOOTS

The curved design for hollow points is used to lift the point off the ground and create a larger surface area for ground contact. This feature keeps the snout from digging into the dirt and wrinkling the snout, which results in costly repair or replacement.

## AUGER TROUGH LINERS FOR CORN HEADS - 1/8" THICK

### DURABLE POLY WON'T RUST.

#### May Wes Auger Trough Liners

cover the full length of the floor under the auger – not just the feed opening.

Condensation and wet corn will not corrode poly lining when the metal is covered with poly. Even when metal lining is corroded, the poly lining keeps loose grain from falling through rust holes and feeds grain evenly into the throat of the combine.

Poly lining is much easier to replace than factory metal.

Simply drill and rivet into place.

## KERNEL KEEPER™

### CUSHION AND CAPTURE TO REDUCE KERNEL SHATTER AND PUT MORE KERNELS IN YOUR COMBINE.

#### HOW DOES IT WORK?

1. Dampener rails cushion the impact of the ear on the deck plate, absorbing the energy and resulting in fewer kernels dislodging from the ear.
2. Rails also capture any dislodged kernels before they can slide between the deck plates.
3. Brushes sweep the captured kernels into the auger bed and into the combine.

#### SAVE OVER \$500 PER ROW VS THE COMPETITION

At \$195 per row, we offer the most cost effective solution to head loss on the market. **The Kernel Keeper is profitable at just 1/3 bushel savings per acre, while average head loss is 2-3 bushels per acre.**

#### KITS FOR JOHN DEERE

#### REPLACEMENT PARTS

| MODEL                 | THREADED KIT | RETAIL PRICE | THREADED RAILS | RETAIL PRICE | BRUSHES | RETAIL PRICE |

Minnesota Millennial Farmer

## EAR SAVERS

### PREVENT LOOSE EARS FROM SLIDING OVER THE GATHERING CHAINS TO THE GROUND

#### WHAT MAKES OUR EAR SAVERS BETTER?

- **Better Memory Than Factory Rubber**
- **Will Not Fold Back Like Factory Ear Savers**  
Once the corn is in, won't push back through the gate
- **Stays Rigid and Works Like a Gate,**  
yet soft enough to let corn go through without knocking the ears off the corn stalk.

## AUGER TROUGH LINERS FOR GRAIN HEADS - 1/4" THICK

### DURABLE POLY WON'T RUST.

#### May Wes Auger Trough Liners

Cover the full length of the floor under the auger  
- not just the feed opening.

Condensation and wet grain will not corrode poly lining when the metal is covered with poly. Even when the metal lining is corroded, the poly lining keeps loose grain from falling through rust holes and feeds grain evenly into the throat of the combine.

Poly lining is much easier to replace than factory metal.  
Simply drill and rivet into place.

## RETRACTABLE POLY FINGERS FOR GRAIN HEADS

### THE COMMON SENSE AUGER FINGER REPLACEMENT CHOICE

May Wes Poly Retractable Fingers OUTPERFORM metal on multiple levels

#### STRONG & RESILIENT

May Wes Poly Retractable Fingers will not fray with heavy usage. These fingers are flexible and will bend past the breaking point of metal fingers.

#### NO HARM to your combine

Bent metal fingers can gouge and poke through the auger. Broken metal fingers can do costly damage to the drum and thresher system. The advantage poly fingers have over metal is when they eventually break, the poly will disintegrate as it passes through the combine and will not damage the internal working parts like rotors and cylinders.

#### COST EFFECTIVE

Poly fingers are less expensive than metal.

## 5-FINGER QUICK TINES, SNAP-ON TINES & QUICK FINGERS

### Keep More Bushels In Your Machine With 5-Finger Quick Tines and Snap-On Tines

Easily slip over your existing finger attaching directly to the bar. Our unique, aggressive design helps feed short or specialty crops with ease. Great for growers experiencing severe drought.

- Attaches Directly Over Existing Mounted Finger
- No Tools Needed for Installation
- Strong, Heavy Duty Construction

#### INSTALLATION VIDEO

with Fast Ag Montana

Scan the QR code with your phone to watch now.

#### 5-FINGER QUICK TINE QTY RECOMMENDED

|                           |                           |
|---------------------------|---------------------------|
| 30' Heads need Qty of 105 | 40' Heads need Qty of 140 |
| 35' Heads need Qty of 125 | 45' Heads need Qty of 155 |

Based on 6" spacing and recommendation to replace every third tine. Offset placement on each consecutive bar.

## AUGER WEARSHOES

**Bolt-on Poly for New or Worn Steel Auger Flighting**

- Combines
- Grain Carts
- Transport Augers & More

**Complete Upgrade of Combine Grain Tank when paired with GRAIN TANK AUGER TROUGH LINER - See page 93**

**HIGH ABRASION RESISTANCE**

### PROTECT METAL AGAINST WEAR & CORROSION

Typical applications include combines, grain carts, transport augers, grain bin augers and grain handling systems - wherever high volume and wear are issues.

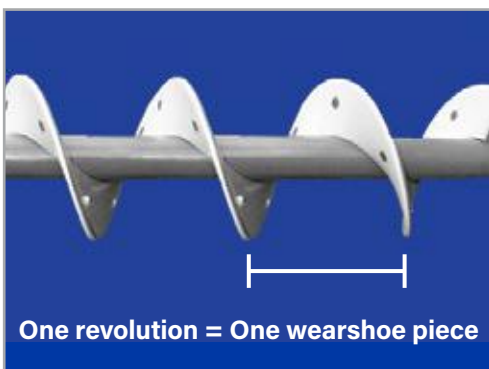

#### A size to fit all

Available in different diameters, pitches and thicknesses to fit most common augers. They are pre-formed and predrilled for easy installation. They join together using a patented bevel lap joint and are bolted to the auger with special UHMW-capped bolts which are counter sunk for a smooth surface.

#### Smooth even flow of grain

Smooth poly provides a slick surface for grain to flow freely, reducing grain cracking, bunching and build up. The result: faster auger speeds and improved harvesting rates.

AUGER WEARSHOES

One revolution = One wearshoe piece

### QUESTIONS?

**Watch our video on how to order and install auger wearshoes.**

## AUGER WEARSHOES - CUSTOM APPLICATION

**SOLD PER  
PITCH**

### NOT FINDING YOUR WEARSHOE SIZE?

#### CUSTOM ORDERS WELCOMED

#### Wearshoe Ordering Information

When ordering for combines or grain carts, we will need to know the following information:

- Model Year
- Brand
- Model Number
- Type of Auger you want to cover

(Example: 1992 John Deere 9600 Tank Fill Auger)

If it is an auger size we don't have listed, we can identify the right parts with the measurements listed below:

#### 1. Flight Height

##### Reference Measurement A

**Note:** Flight Height x 2 + Center Tube Diameter = Flighting Diameter

#### 2. Outside Diameter of Center Shaft/Tube

##### Reference Measurement B

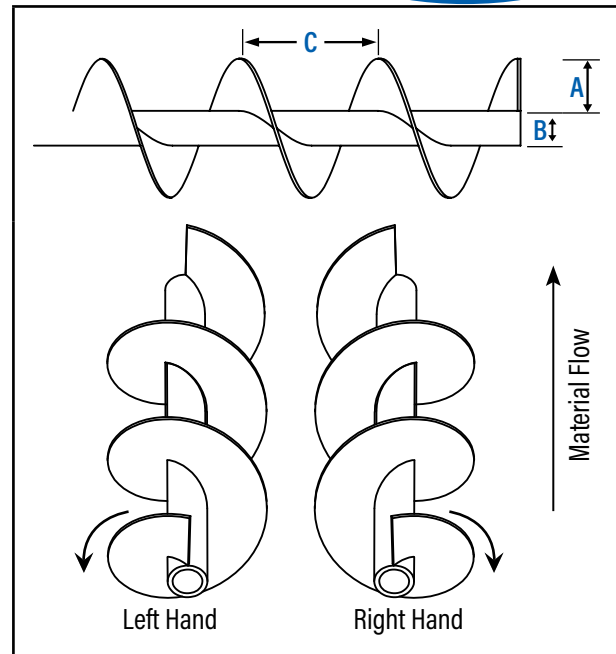

#### 3. Pitch (Space Between Flights)

##### Reference Measurement C

**Note:** When measuring pitch, be sure to keep the tape measure parallel with the center shaft/tube.

#### 4. Left Hand or Right Hand

Reference graphic on right to determine if you have a left hand or right hand auger.

**PLEASE BE ACCURATE WITH YOUR  
WEARSHOE ORDERING INFORMATION**

**A 25% RESTOCKING FEE IS CHARGED  
FOR ALL RETURNS ON OUR STOCK SIZES.**

**NO RETURNS ACCEPTED  
ON CUSTOM-MADE ORDERS**

#### REPLACEMENT HARDWARE

| PART NO | DESCRIPTION               | SIZE          | RETAIL PRICE |
|---------|---------------------------|---------------|--------------|
| 41358   | Poly-Capped Bolts         | 1/4" x 1"     | \$ 2.30 ea   |
| 41237   | Poly-Capped Bolts         | 1/4" x 1 1/2" | \$ 2.30 ea   |
| 00929   | *Stainless Steel Hex Bolt | -             | \$ 0.25 ea   |
| 01093   | Zinc Coated Hex Nut       | 1/4"          | \$ 0.12 ea   |

\*For Lead Edge of Auger

All Auger Wearshoes include Poly Capped Bolts unless otherwise noted.

Auger dimensions will vary between models and years. Always measure for an accurate fit. Call for pricing if you don't see your exact size.

## SHANK SAVERS - 1/4" THICK

### CREATE IDEAL SOIL CONDITIONS

### POLY SHANK SAVERS FOR SWEEP PLOWS

| PART NO | DESCRIPTION        | SIZE         | RETAIL PRICE |
|---------|--------------------|--------------|--------------|
| 80688   | Undercutter V-Plow | 9 1/2" x 22" | \$ 42 ea     |

As the V-plow undercuts the ground, the poly Shank Saver lessens the furrowing of the soil. It helps keep the top soil undisturbed as well as creates a uniform and shallow depth on final operation before planting. Shields are large enough for the anhydrous sprayer tubes to fit between the Shank Saver and the shank.

## PRO CHUTE

Slide Gate  
Controls Flow

Snaps onto Seed Box Quickly, 79" of Clearance

## SHANK PROTECTORS - 1/4" THICK

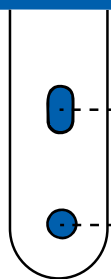

### PROTECT CRITICAL STRESS POINT ON METAL SHANK FROM EXCESSIVE WEAR

As soil conditions vary from field to field, you can protect from abrasion and prevent build-up of mud and residue by covering with May Wes Non-Stick Poly Shank Protectors.

### OPERATE EFFICIENTLY & SAVE FUEL

The non-stick poly surface lets the shank and attached shovel glide through sticky soil. It resists friction that causes dragging when cultivating and digging.

### SIZE SPECIFICATIONS

**DIMENSION "A"**  
(Hole Pattern Range)

### Key Material Features of UHMW:

- UHMW is exceedingly strong and durable.
- UHMW Wheels /Fingers deflect when encountering objects, but will return to their original molded position (shape memory).
- UHMW does not corrode like steel and stays cleaner due to the non-stick poly surface.

## PLANTER BOX TOPPERS & HINGES

### ONE PIECE DESIGN

- Fits 1.6 Bushel Planter Boxes Only
- Adds 1 Bushel Capacity
- Watertight Fit Prevents Seed Loss During Transport
- Use Original Lid - Fits Tight Preventing Lid Loss

### Planter Box Hinges

Attach directly to your existing planter box and lid to secure lid to the box.

## SEED FILL TUBES - TELESCOPING

### DISTRIBUTE SEED FASTER

Telescoping Seed Fill Tubes extend and retract to give you the flexibility you need to distribute seed easier, faster and with less spillage. Take control of the tube direction with the built-in handle and sturdy construction of the seed fill tube.

All telescoping tubes include flex hose, clamp & handle.

### 2 & 3 STAGE TELESCOPING SEED FILL TUBE WITH HANDLE

#### 6" AUGERS (Includes 16" of Flex Hose)

## SEED FILL TUBES - NON-TELESCOPING

Bulk Seed Fill Tubes are perfect for bulk fill applications where extended telescoping lengths are not required. They are compact yet flexible to allow easy positioning of the tube. These one-piece tubes make loading your bulk fill planter easy.

| PART NO | DESCRIPTION                           | SIZE | RETAIL PRICE |
|---------|---------------------------------------|------|--------------|
| 83009   | 6" Auger<br>Includes 16" of Flex Hose | 4' L | \$ 90 ea     |
| 83010   | 7" Auger<br>Includes 18" of Flex Hose | 4' L | \$ 95 ea     |
| 83011   | 8" Auger<br>Includes 20" of Flex Hose | 4' L | \$ 100 ea    |

### NON-TELESCOPING BULK SEED FILL TUBE WITH HANDLE

Available in 4 Ft. Length & Auger Diameters of 6", 7" & 8"

All non-telescoping tubes include flex hose, clamp & handle.

# POLY CUPPED & STRAIGHT AUGER FLIGHTING

All Right Hand  
Flighting Only

## THE PROVEN CHOICE FOR BULK GRAIN SEED HANDLING

### 5" • 6" • 7" • 9" POLY CUPPED AUGERS FOR:

- SEED TENDERS
- GRAVITY BOX AUGERS
- TRUCK MOUNT  
TAILGATE AUGERS
- AIR SEED FILL AUGERS
- TRANSPORT AUGERS
- BIN UNLOAD AUGERS

REDUCE  
BULK SEED  
CRACKING

### Poly Cupped Auger Flighting

Protecting your grain and seed from auger handling and damage is a no-brainer. Testing has proven Poly Cupped Flighting to have **5-times lower soybean seed cracking** compared to factory steel (reference chart below). Poly Cupped Flighting is ideal for gentle handling of bulk grain and seeds, such as soybeans, popcorn, edible peas, lentils and white corn.

### Poly Straight Auger Flighting

Provides an economical way to replace your outdated steel auger and upgrade to the industry best! Perfect for tough jobs of transferring fertilizer and corrosive materials. The High Density Polyethylene (HDPE) material is also safe for food handling.

### ADDITIONAL FLIGHTING SIZES AVAILABLE Call 1-800-788-6483

#### Soybean Crack Test Results

| Flighting Type | Percent Breakage | Average Breakage |
|----------------|------------------|------------------|
| Plastic Cup    | 0.38 %           | 38               |
| Bristle        | 0.35 %           | 35               |
| Steel          | 1.80 %           | 180              |
| Steel Cup      | 2.10 %           | 210              |

Average breakage based on per 10,000 beans. Test ran with hydraulic motor at 12 gal/min (6" x 13' uni-swivel auger at a 45° angle). Average moisture content of the bean seed sample was 12%. Reprinted with permission from J&M Manufacturing Co.

# POLY CUPPED & STRAIGHT AUGER FLIGHTING

All Right Hand  
Flighting Only

## How to Order Poly Cupped & Poly Straight Auger Flighting

### Step 1:

Reference **Chart A** and identify the type of auger you have to determine the measurements and components necessary to complete your order.

### Step 2:

Determine what diameter flighting you need.

- Straight Flighting will be  $\frac{3}{8}$ " to  $\frac{1}{2}$ " shorter diameter than the outside tube diameter.
- Cupped flighting will be 1" shorter than the outside tube diameter.

If you are replacing a worn module and aren't sure of its original diameter, measure the outside diameter of the hex tube and reference Chart B to identify the correct replacement module.

### Step 3:

Identify your motor connector style.

- If your Motor Shaft has a bolt hole, you will need to order a Bushing that accepts the Drive Shaft (a bolt hole can be drilled).
- If your Motor Shaft has a keyway and not a bolted style shaft, you will need a 1" Keyed Bored female coupler (41296) to accept the Keyed Motor Shaft.

### Step 4:

Determine which drive shaft you need. Keyed Shaft or a Through Hole Shaft?

- A Keyed Shaft will have a slot cut at the end of the shaft to accept a pulley or sprocket.
- A Stub Shaft will generally be on the idle or non-drive end of an auger. Please specify the length needed.

All 5" and 6" flighting is standard with 1" shaft. 7-9" flighting, you can order a 1", 1  $\frac{1}{4}$ ", 1  $\frac{1}{2}$ " or 2" drive shaft.

### Step 5:

For every 10' of auger, you will need to order an all-hex connector.

### QUESTIONS?

Watch our How to Order video on YouTube.

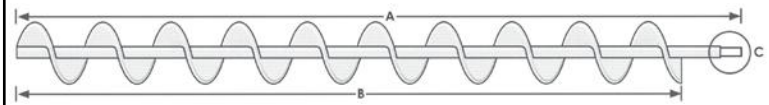

## CHART A

Shown below are some of the common styles of auger flighting assemblies and the dimensions needed to make a replacement assembly from poly cupped flighting.

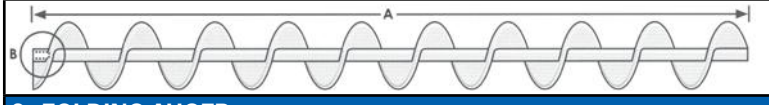

### 1. GRAVITY BOX AUGER - TOP DRIVE

A. Total Overall Length B. Flighting Length C. Motor Connector Style\*

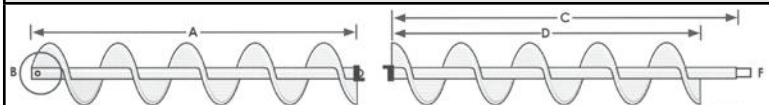

### 2. GRAVITY BOX AUGER - BOTTOM DRIVE

A. Flighting Length B. Motor Connector Style\*  
C. Specify if Motor Connector is Recessed in Flighting or Extended Out from End

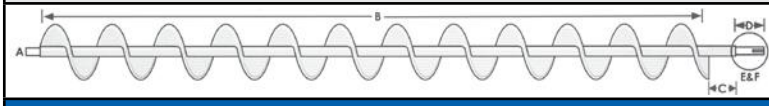

### 3. FOLDING AUGER

A. Bottom Flighting Length B. Motor Connector Style C. Total Length Top Assembly  
D. Upper Flighting Length E. Bare Shaft Length F. Stub Shaft Diameter & Length

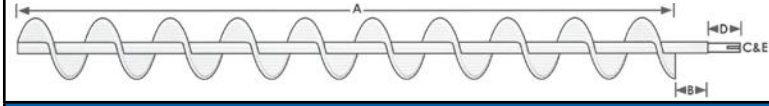

### 4. TRANSPORT AUGER / AIR SEEDER TANK FILL AUGER

A. Diameter & Length of Stub Shaft B. Flighting Length C. Bare Shaft Length  
D. Drive Shaft Diameter & Length (Transport Augers) E. Drive Shaft Style (Transport Augers) F. Motor Connector Style (Air Seeder)

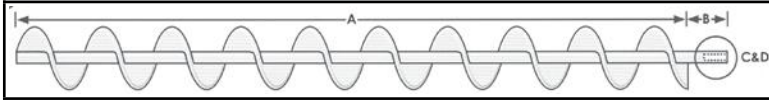

### 5. BIN UNLOAD AUGER WITH DRIVE SHAFT

A. Flighting Length B. Bare Shaft Length C. Drive Shaft Diameter  
D. Drive Shaft Length E. Drive Shaft Style (Keyway or Drilled Hole)

### 6. BIN UNLOAD AUGER FOR POWER HEAD

A. Flighting Length B. Bare Shaft Length  
C. ID of Internal Bushing to accept Power Head Drive Shaft D. Hole Pattern to Match Power Head Drive Shaft

\*Most hydraulic motors have a 1" drive shaft with either a keyway or  $\frac{3}{8}$ " hole; specify which style.

## CHART B

OUTSIDE DIAMETER OF HEX TUBES FOR EACH SIZE OF AUGER  
(FLAT TO FLAT)

|                                          |                                      |
|------------------------------------------|--------------------------------------|
| 2" Auger                                 | $\frac{7}{16}$ " Solid Hex           |
| 3" Auger                                 | $\frac{11}{16}$ " Hex Tube           |
| 4" Auger                                 | 1" Hex Tube                          |
| 5 $\frac{5}{8}$ " Straight / 5" & 6" Cup | 1 $\frac{3}{8}$ " Hex Tube (Approx.) |
| 7" Cup                                   | 1 $\frac{3}{4}$ " Hex (Approx.)      |
| 9" Cup                                   | 2" Hex (Approx.)                     |

ADDITIONAL FLIGHTING SIZES AVAILABLE. CALL 1-800-788-6483.

## HOW TO ORDER

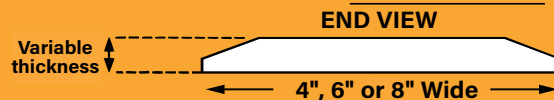

### VERTICAL OR HORIZONTAL CUTTING EDGE

Blades over 94" will be shipped in two pieces unless specified. If you request a seamless blade over 94" it will be shipped freight. Freight shipments are subject to higher rates.

### Information to know before calling

- Cutting Edge Length \_\_\_\_\_
- Quantity of holes \_\_\_\_\_
- Distance from edge to center of each hole \_\_\_\_\_

**No Returns Accepted on Custom Orders**

## SLICK AND DURABLE UHMW POLY PROTECTS PAVEMENT FROM PLOW DAMAGE

### HORIZONTAL POLY CUTTING EDGE FOR BUCKETS AND SKID LOADERS

Beveled on Both Sides · Optional Counterbored Holes

#### PROTECT PAVEMENT FROM EQUIPMENT DAMAGE

- Designed to Protect Smooth, Hard Surfaces such as cobblestone and some pavements that can be damaged by equipment. Not designed for continual use on rough surfaces.
- Non-Sparking & Non-Stick UHMW Poly Surface Reduces Debris Build-Up
- Prevents Scuffing Concrete or Cobblestone Sidewalks
- Less Shock to Equipment in Uneven Concrete Conditions
- Lightweight Compared to Metal Cutting Edges
- Simple Installation & Maintenance-Free Operation

## AIR FILTER BLASTER

### EXTEND THE LIFE OF YOUR FILTERS

- Reduces fuel consumption
- Increases the life of your equipment
- Increases engine performance

#### Safe For Filters

The distribution of air allows a maximum of 48 psi to come out of any one air jacket in the Filter Blaster. Testing has proven the filters can withstand many Air Filter Blaster uses.

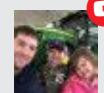

#### Saves You Money

Reduces filter replacement costs and landfill charges, which improves your bottom line.

**NON-STICK, DURABLE POLY  
PERFECT FOR TRUCK BED  
AND TRAILER LINERS**

## POLY CHAIN TIGHTENERS

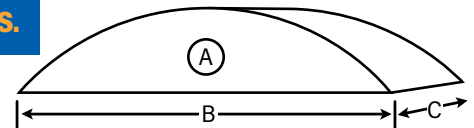

**POLY GIVES LONGER LIFE TO THE CHAIN AND OUTLASTS WOOD BLOCKS.**

These are made of 100% UHMW Poly for added strength - lasting three to five times longer than other plastics. Replace wood with self-lubricating, long wearing poly tighteners.

## MEET OUR SISTER COMPANIES

Pride Solutions is your source for custom plastic parts and contract assembly services. We are experts at compression molding and fabricating UHMW-PE parts. Founded by the Daggett family in 2002, our contract manufacturing divisions include Pride Engineered Plastics and Pride Assembly. We also have 50+ years of experience manufacturing our own poly products for our May Wes Manufacturing and C&A Pro snowmobile ski divisions.
