PYRAMID KIT ROOMS - 9.5M BASE

Pyramid Kits Rooms / Mummy flats or art studios

Pyramids are probably the most recognisable man made structures on the planet. Their shape and orientation is based on

mathematics and "magic" beyond most people's comprehension. Natureworks now rebuilds these monuments of stone as a prefabricated easily erected bolt-together panels, of stone look

alike fibreglass.

They are easily erected structures for use as granny flats, meditation and massage rooms, cabins, extra rooms or garden structures in paintball fields in Australia

This 9.5m Base Pyramid requires shipping in a 40ft container due to panel lengths of over 6 metres but at least 3 pyramids maybe 4 will fit in a 40ft container with approx 21.37cbm.

Structural Details

The entire buildings comes without any steel reinforcement whatsoever, rather 80 and 100 mm fibreglass flanges of heavy fibreglass are used to provide the backbone to the cast stone block panelling.

Hemispheres of convex 100 mm PVC are further laminated into the wall panels to provide dimensional stability and to prevent deflection of the outer wall panelling.

Windows or fixed glass panels are able to be cut anywhere to suit the on-site requirements. Almost any windows can be made to fit by any practical tradesman.

The structure is fully certified to stand once bolted to a concrete footing or slab, but the engineering of any structural internal works to provide internal walls or mezzanine structures only serves to further stabilise the external cladding.

The panels are sika-flexed during assembly and the structure become fully waterproof. An isothollic U.V stable waterproof polyester resin is used to provide a long-term weather resistant structure.

The panelling once erected, requires, electrical plumbing and insulation as part of the site works. We are offering a sturdy aesthetically beautiful building with Hieroglyphic imprinted portal entrances on 2, 3 or 4 sides as required.

EGYPTIAN

PYRAMID KIT ROOMS - 7M BASE

Wall Detail of
inside of pyramid

This 7m base pyramid is surprisingly big and entirely adequate for a self-contained cabin. It can easily accommodate a mezzanine floor.

Can be shipped in a 20ft container anywhere in the world. Using 11.96cbm. Approx 4 can fit in a 20ft standard container

Our local paintball fields have used our 7m base to theme one of their paintball fields - see our full size black hawk helicopter

These pyramids come flat packed in a kit form with full slot together instructions.

Ideal stand alone building that can be used as extra holiday accommodation, art studio, physiotherapy room, etc

Sphinxes and bases are available separately
