### FACTORY IMPROVEMENTS

The new year brought a focus on small, practical improvements to keep the day running smoothly. These ideas came from the team members on the shop floor; the kind of ownership that builds a truly resilient operation.

### WORK EXPERIENCE

In February we were joined by Oliver, who chose us for his **work experience**.

He spent a few days shadowing both our factory and office teams - getting stuck in, asking great questions and seeing first-hand what day-to-day working life really looks like and a peek behind the scenes and a taste of how everything comes together.

### CAMIRA LUNCH & LEARN

We loved having Camira on site to show us their **leading fabric collections**, shared the sustainability stories behind them and gave some really useful technical background along the way.
