Use of this price list

This price list combines all the products marketed under the Threads brand (G P & J Baker Ltd).

The extent of our current product range is shown in the 'Contents' column above. Each product section within the price list incorporates its own specifications and details relative to that particular product sector.

General ordering instructions are given at the back of this price list.

Terms and Conditions can be found in our current Terms & Conditions Supplement.

This price list is a Trade Price List.

G P & J Baker products are marketed world-wide through a network of distributors and agents. Please contact our Export Sales team.

Product listing by code

Ordering instructions

When ordering please quote your Account Number and give both the name, number and colour number of the fabric.

To avoid errors, when telephoning orders, please allow us time to read the details back to you.

Old and non repeating designs

Although a cloth is not listed we may still hold stock. Our Sales Office will be pleased to check for you and provide details of special offers.

For immediate despatch of orders, please telephone our Sales Office on 01202 266700.

Wallpaper Adhesive

5 Kg Tub	WPP005/1	Light Grade Ready Mixed Wallcovering Adhesive							33.00
10 Kg Tub	WPP010/1	Light Grade Ready Mixed Wallcovering Adhesive							49.00

Wallcovering specification

Although we take every care when producing our wallcovering to ensure shade continuity, variations may occur in the same production batch. Please take care to check all rolls before hanging. We regret that claims cannot be considered once more than one roll has been hung. The Batch Number of each roll is clearly printed in the appropriate box on the product label. Please ensure all rolls are from the same batch. Please take care to follow the hanging instructions which are provided on the labels supplied with every roll of wallcovering. In addition, the following should be noted:-

For best results always cross line walls (hang horizontally) with a lining paper and allow the lining paper to dry thoroughly before hanging the wallcovering on top.

Dark coloured wallcoverings should have their ends coloured with a toning water based felt tip pen prior to unrolling to avoid seams showing.

Fabric specifications and care

Width

Appropriate product widths are expressed in centimetres

Pattern repeat and direction

Approximate vertical repeats are expressed in centimetres

HD Half drop repeat
RR Horizontal or weft patterns (Railroaded)

Application of retrospective finishes

We go to great lengths to ensure that our fabrics and furniture are manufactured in accordance with the current legislative measures for flame retardancy. We cannot be held responsible for defects in performance, or compliance with flame retardancy regulations, if any finish is applied by our customers, or their contractors, subsequent to the supply of the product by us.

Use

	Curtains
	Loose covers
	Upholstery, cushions and headboards
	Bedspreads

Upholstery fabric use grade

Grades Description of intended duty

OD	Occasional domestic use, i.e. fabrics which are traditionally used for their aesthetic appeal but will not meet all the standards required for careful domestic use
LD	Light domestic use, i.e. occasional or light wear, use for simple styles of furniture. Unsuitable for furniture with upholstered arms, self piping or buttoning
GD	General domestic
SD	Severe domestic or general contract
GC	General contract
SC	Severe contract

The Furniture and Furnishing (Fire) (Safety) Regulations 1988

The following are the codes relevant to G P & J Baker fabrics that are used in the list and will appear on our advice notes and invoices:

B	Resistant to smouldering cigarette tested over standard foam plus 2.0 oz polyester wrap
H	Match resistant (FR1)
K	Must not be used for domestic upholstery on furniture made after 31st December, 1949
M	Exempt fabric must be used with a schedule 3 interliner (EXEMPT)
Z	Not to be used for domestic upholstery
5	Resistant to ignition source 5 = wooden crib tested over CHMR foam
Z*	Fabric meets furniture and furnishings regulations when backcoated.

Domestic

Tested according to BS 5852 Part 1 as modified in the Regulations.

BH	Resistant to smouldering cigarette tested over standard foam plus 2.0 oz polyester wrap. B.I.T.A. Flamcode B. Match resistant. B.I.T.A. Flamcode H this symbol appears on pattern books, samples and cuttings
BM	Indicates an upholstery or multi purpose fabric which is Exempt under the Fire Regulations and must be used for upholstery only with a schedule 3 barrier.

Contract

Tested according to BS 5852 Parts 1 and 2.

BH5	Resistant to Ignition source 0 = smouldering cigarette Resistant to Ignition source 1 = butane flame (match) Resistant to Ignition source 5 = wooden crib tested over CMHR foam this symbol appears on pattern books, samples and cuttings

Cleaning instructions

The international textile care labelling code

-  Hand wash
-  Warm. Cold rinse. Minimum wash. Short spin - Do not wring.
-  Cool. Cold rinse. Minimum wash. Short spin - Do not wring.
-  Do not wash

N.B. Most detergent powders contain whitening agents which can drastically alter colours of fine furnishing fabrics in general and laces in particular. We therefore recommend the use of Stergene.

Drying

-  Drip dry : for best results hang whilst wet
-  Line dry : for best results hang damp
-  Do not tumble dry

Bleaching

-  Do not use bleach on our fabrics. When this symbol appears on a label, household bleach must not be used.

Ironing

The number of dots in the ironing symbol indicates the correct temperature setting - the fewer the dots, the cooler the iron setting.

-  cool
-  warm
-  hot
-  do not iron

Dry cleaning

-  Must be dry cleaned professionally. Do not 'coin-op' clean
-  Do not dry clean
-  This is not a recognised International Symbol, but where this is shown against a fabric we recommend the use of a Dry Foam Shampoo.

Fabric care

1 Fabrics must be protected from the sun

Curtains should be lined, and also interlined, when fragile fabrics are used. Window glass magnifies the destructive elements in the rays of the sun. The winter sun and reflection from the snow are even more harmful than the summer sun. Trees and shrubbery help protect windows.

Colours can fade by oxidation, 'gas fading', if fabrics are kept in storage for too long a period without airing. Some colours are more affected than others. Impurities in the air may cause as much fading as direct rays of the sun.

2 Use a reputable dry cleaner who specialises in home furnishings

Dust has impurities which affect fabrics. Vacuum fabrics often. Dry cleaning should be done at regular intervals before excessive soiling has accumulated. Very few fabrics are washable. Machine washing of made-up articles is not recommended.

3 Shrinkage and movement

Always make allowance for possible shrinkage when making up curtains or loose covers. Be tolerant of normal fluctuations in lengths of curtains. Few fabrics are completely stable. Fabrics breathe and absorb moisture, resulting in stretching or shrinking. It is reasonable to expect as much as a 3% change in any curtain length. In a 2.5 metre length (98 inches) this would amount to 8 cm (3 inches) up or down under various conditions. Heavier fabrics, especially those with thicker wefts of cellulosic yarns do react to changing humidity and it should be made clear to the ultimate customer. We strongly recommend hanging such curtains for at least 4 weeks, longer if possible, before finishing the hems. Many top quality curtain makers avoid 'exact' length curtains, i.e. sill or floor-touching and thus overcome the possibility of problems arising.

4 Fabrics wear out - they are not indestructible

Wear will vary with the amount of use. Some weaves are stronger than others. A favourite chair will not last as long as a seldom used show piece. It is advisable to use arm caps on upholstered furniture. These help to protect furniture at the points that heavy wear is common, equally turning cushions will extend their life by spreading the wear more evenly.

5 Applied finishes may help fabrics resist soil and stain

Finishes help fabrics resist spotting, but they are not necessarily the end-all to every problem. Light colours are likely to benefit most. Dining room chairs will soil no matter what is used. A finish does not eliminate the necessity of properly caring for fabrics. Spots should still be given immediate attention.

6 Multiple-width curtains, wallcovering and bedspreads

Because fabric is not a completely stable 'substance', it cannot be taken for granted that the pattern will be completely 'square' upon the cloth. In printing, every effort is made to avoid distortion, but occasionally it will occur. Therefore, when planning multiple-width fabrications, please make certain, BEFORE CUTTING, that pattern alignment is adequate to produce a satisfactory result. This applies equally to woven as well as printed fabrics.

7 Pile fabrics

Velours, especially those made of cotton tend to mark and crease in packing, transit and making up. These marks sometimes show as bars or bands which at first sight can be taken for dye bars. They will drop as the pile settles over a period of time. We recommend that for best results curtains should be lightly steamed and gently brushed in the direction of the pile at the time of hanging.
