NATURE-INSPIRED ELEMENTS

There is a growing desire to transform bathroom spaces into tranquil and peaceful places to practice self-care and escape the frenetic pace of life, increasing the popularity of nature-inspired products and calming textures.

Many of our collections feature design elements like stone effects, organic fluted elements and nature-derived colour palettes that allow for mixing and matching. These seamlessly connect the indoors and the outdoors to promote a sense of wellbeing.

Our latest Beach House range defines the very essence of tropical luxury island living with a full portfolio of products that answers the call for bringing the indoors out. From taking a blissful shower in the open air to organic teak and travertine surfaces, the collection is designed to awaken the senses and harmonise with nature.

JAPANDI STYLE

A fusion of Japanese and Scandinavian minimalist and functional design, Japandi is an interior design style that has stood the test of time.

The fundamental design elements include clean lines, emphasising the beauty of simplicity and the removal of excess. Natural textures, such as wood, bamboo and stone are at the heart of the style, adding warmth and richness to any bathroom. Look to the newly-launched Nara collection for a full solution that encompasses the look for a clean, modern and timeless zen bathroom retreat you will love.

JEWELLERY INSPIRED LUXURY

Make a statement and add a touch of luxury to the bathroom with jewellery-inspired brassware textures and intricate details. We have incorporated this trend across both mixers and furniture handles for several of our ranges, including Orology, Nara, Revolution, Stereo FM, and Chiasso.

The full Orology range was inspired by watch bezels and designed to reflect a timeless aesthetic.

WARM BRASSWARE TONES

A design trend that is here to stay for 2025 is warm brassware tones that welcome a sumptuous shimmer of texture.

Our new PVD Oyster, PVD Soft Burgundy and Soft Bronze finishes work seamlessly with earthy, neutral tones and textures such as natural wood-effect furniture found in the Orology, Corsair and M-Line collections, as well as stone and marble-effect basins and countertops featured in the Alpine and Bristol ranges.

MALDIVIAN STYLE

Envision yourself in the Maldives, immersing in crystal-clear turquoise waters and strolling along breathtaking beaches. The subtle beach huts and villas offer a serene and idyllic escape, there is no wonder this is a prominent interior trend for 2024. The all-new Beach House range draws inspiration from this paradise to bring a captivating lifestyle look to your home or project. With a neutral colour palette that includes the warmth of Teak wood, the elegance of Terrazzo Stone, and the sophistication of Matt White finishes applied to luxurious bathrooms, exquisite outdoor furniture, and stunning tile solutions, you can pamper yourself with an indulgent slice of paradise right in your own space.

SUSTAINABILITY

As we all strive to make conscious decisions to reduce negative impacts on the environment, designers are increasingly seeking sustainable design choices, and the bathroom is no exception.

While we offer a variety of eco-friendly bathroom products, the Eco Touchless Mixer is the latest addition to the collection which focusses on the significant reduction of water usage with its built-in lithium battery that allows for up to 100,000 cycles of usage with no wires or plugs, ensuring hassle-free installation. A smart energy-saving sensor helps keep water usage low. Choose from seven contemporary finishes to suit: Chrome, Matt Grey, Brushed Nickel, Brushed Brass, Matt Black, PVD Oyster and the on-trend Soft Bronze.

BRASSWARE FINISHES

The appeal of coloured brassware is widespread. Designers look for new and innovative finishes in order to create distinctive looks in their designs. At BAGNODESIGN, finishes are the essence that make our products stand out. We create finishes that stay true to the overall sense of style.

We offer refreshing alternatives that help define the look of a bathroom and, in turn, the entire home. Our on-trend Soft Bronze and PVD Santiago finishes are popular for their subtle elegance.

Responding to this year's trend for warm metallic brassware, we have added the new **PVD Oyster** and **PVD Soft Burgundy** finishes that promise to add a dash of drama and opulence to the bathroom. Mix and match products and finishes to create a look that expresses a sense of style and personality.

* Soft Bronze is a semi-living finish and may change overtime with a slight finish variation.

TRENDING BRASSWARE

SOFT BURGUNDY

A modern and distinctive finish with a rich colour depth and soft brushed metallic texture, **PVD Soft Burgundy** caters to the increasing demand for warm-toned brassware, a current popular trend in the bathroom sector.

We introduce this finish in two of our most contemporary mixer ranges, Vitesse and Mezzanine, offering our customers more options to create their ideal bathrooms and washrooms.

OYSTER

A soft and luxurious finish that perfectly complements smoothly shaped mixer designs, **PVD Oyster** is highly sought after by bathroom designers and has become a growing trend in the luxury segment.

The **PVD Oyster** finish will be available across a comprehensive range of products, including ten mixer ranges, five accessory ranges, and complementary showering and plumbing options.

In addition, our 10-year guarantee ensures the lasting quality of this finish.

THERMOSTATIC MIXERS

THERMOSTATIC SHOWER MIXERS

An enjoyable, reliable and safe showering experience

BAGNODESIGN's thermostatic mixer valves regulate water temperatures to provide you and your family a safe and enjoyable showering experience. With predetermined settings, these mixers combine hot and cold water to maintain a consistent temperature and avoid scalding.

TYPES OF THERMOSTATIC SHOWER VALVE

Concealed valve

For a more sleek and discreet style, you can choose a concealed shower valve. All the workings sit behind a plate that is fitted flush to the wall, leaving just the control mechanisms exposed.

Bar valve

For use with a single outlet, the valve sits external to the wall. It is easy to fit and manufactured in ABS plastic and brass for durability. You can choose your own exposed column to go with it.

Exposed valve

If you're looking for something a little more stylised, the exposed thermostatic shower valve is great for single outlet showers. This is known as an exposed shower valve, as the workings sit external to the wall.

KEY FUNCTIONS OF THERMOSTATIC SHOWER MIXER

Default Flow Rate

Thermostatic shower systems allow you to adjust the flow rate to your liking. The flow rate is set by default and therefore eliminates the need to make any additional adjustments. This flexibility ensures a customized and enjoyable shower experience for every member of your household.

Temperature Control

The most prominent feature of a thermostatic shower system is its ability to maintain a constant water temperature. The thermostat regulates the temperature, ensuring it remains at the level you desire throughout your shower, regardless of external factors.

Anti-Scalding Protection

Safety is a primary concern in the bathroom, and thermostatic shower systems prioritize it. If for any reason your cold-water supply stops, the thermostatic mixer automatically shuts down, thus ensuring a reliable, convenient, and safe showering experience.

KEY FEATURES THAT MAKE THERMOSTATIC SHOWER MIXERS STAND OUT

1. Built-in Diverter

Many thermostatic shower systems come with a built-in diverter that allows you to switch between different shower functions, such as a handheld shower, rain shower, or body jets. This feature adds versatility and convenience to your shower experience.

2. Push-Button Activated

Operating our thermostatic mixers is simple and intuitive - On and Off! With a push of a button or twist of a knob, you can instantly adjust your water temperature to suit your comfort.

3. Luxury Finishes

These shower systems come in various finishes and designs, ranging from sleek and modern to classic and elegant. You can choose the finish that complements your bathroom's aesthetic and enhances its overall look.

4. Durability

Thermostatic shower systems are built to last. They are made with high-quality materials that resist corrosion and wear, ensuring they maintain their functionality and appearance over time.

5. Eco-Friendly

Many thermostatic shower systems are designed with water-saving features, like low-flow showerheads and the ability to set water temperature limits. This not only reduces water wastage but also helps save on your energy bills.

6. Easy Installation and Maintenance

Our thermostatic mixers are all supplied with the new 'Easy Install' installation box which offers:

- Solid wall or dry wall installations.
- Sealed installation box.
- Easy cleaning and maintenance without having to remove valve, which is pre-installed into box.
- Colour coded water entry points.
- Min-Max installation depth markings.

OPERATING SPECIFICATIONS

Controlled Cold water supply temperature:

Maximum: 25°C - Minimum: 5°C

Hot water supply temperature:

Maximum: 85°C - Minimum: 65°C

Minimum difference between Hot and Cold temperature is 10°C.

Operating Pressure:

Maximum: 5 Bar - Minimum: 0.5 Bar

Hot and Cold operating pressure should be kept as balanced as possible in order to maintain maximum efficiency.

When the supply pressure is higher than a 5 Bar, a pressure reducing valve should be fitted before the shower valve.

SHOWERING

For a revitalising routine every time, BAGNODESIGN offers design-led shower solutions in 18 stunning finishes – including the Armour finishes – to suit any style and budget.

Stylish staple components include shower columns, hand showers with multiple spray patterns and pressure settings, slide rail kits, and accessories. A more tailored, spa-worthy experience comes in the form of spa shower heads with soothing flow functions and mood-enhancing lighting, body jets that target specific muscles, and thermostatic shower columns for perfect temperatures.

For a closer connection to nature, outdoor showers are an invigoratingly practical choice. Constructed from Grade 316 stainless steel they guarantee lasting durability in weather-resistant Brushed Stainless Steel and PVD Oyster finishes.

All products are compatible with standard shower enclosures and bathtubs, while all thermostatic valves are WRAS-approved.

100% internally waterproof, wedi® boards are the ideal base for plastering and tiling works. As they can be applied to practically any substrate, wedi® offers a quick, simple method of construction for new build or renovations in commercial or residential sectors.

The boards replace the need to build timely stud walls and substitute plasterboard needs for shower areas, concealing cisterns or preparing walls. They are waterproof, insulating, versatile, light and robust. Despite their size and durability, the lightweight boards can easily be cut on-site, for easy assembly and a near silent renovation – being directly tileable also speeds up installation time for projects.

Modular forms such as shower trays, seats & benches and recess niches can also be tiled directly and provide built in comfort and functionality – whilst adding sleek design aesthetics. Functional and safe, a wedi® system efficiently builds a waterproof, bespoke bathroom.

The revolutionary MILK treatment system, made to pamper your skin, leaving it feeling fresh, clean, and moisturised.

Consisting of 100 percent pure water and zero additives, the MILK system is designed to deliver an unparalleled wellness treatment. Miniscule oxygen-rich microbubbles cover your skin like a silk blanket for a truly rejuvenating experience, boosting the skin's absorption of oxygen, while an infusion of negative charged ions, which research indicates can increase serotonin levels in the brain, provides a crucial boost to overall wellbeing.

WETROOMS, ENCLOSURES & DRAINS

Designing the perfect walk-in shower is achieved through modern and sleek glass walk-in panels that define the area while shower and floor drains keep the look harmonious in a variety of styles, shapes and sizes.

Contributing to an open, light-filled space, shower panels offer flexibility in design, allowing for fully open enclosures or the option to install a door for added privacy. Complementing this design are shower and floor drains in various styles, shapes and sizes, ensuring a coordinating look with matching brassware. Alternatively, for a seamless pattern across the floor, we have options that maintain continuity.

Crafted from durable Grade 316 or Grade 304 stainless steel using advanced laser welding technology, our shower channels and floor drains are quick and easy to install, resistant to bacteria, easy to clean and anti-corrosive.

FURNITURE & SANITARYWARE

Stylish furniture and sanitaryware combines traditional craftsmanship and directional design with the latest in technological innovation to create a coordinating solution.

Designed in line with the latest global trends, our collections are created to complement a wide range of aesthetics, from the understated sleek Japandi styles as seen in the new Nara collection to Maldivian-inspired organic-luxe like the new Beach House range.

To suit any scheme from the master bathroom to the powder room, basins come in custom-made stone-effect styles to decorative, metallic and ceramic choices; WCs and bidets are available in traditional to wall mounted; and a stunning range of design-led furniture options in multiple sizes, finishes and materials. Furniture textures like richly-veined marble, terrazzo and natural wood feature to give a visual interest beyond function.

BASINS & COUNTERTOPS

Installed in many of the world's most prestigious hotels, restaurants, bars and residential developments, BAGNODESIGN basins are specified for their aesthetic, distinctive and highly durable qualities.

Feature washbasins are crafted from unique materials such as BAGNOQUARTZ, Murano glass, resin, solid marble and stainless steel. In addition, stylish ceramic basins, which range from countertop vessels to semi-recessed, wall-mounted undercounter versions in a choice of shapes and sizes.

A custom, one-of-a-kind addition is the modular Alpine basin and countertop collection, crafted on-site in our Slab Fabrication facility from a choice of 19 porcelain slab tiles and industrial-grade Wedi board, ensuring a durable design for even high-traffic washrooms.

Balance the look with countertops destined to host a double basin, as a shelving option, or as a stunning dressing room table.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Basins on this page do not have tap holes.

ANTI-SCALD DEVICE

The anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

After reaching a safe temperature the device will re-activate and water flow will continue.

APPLICATIONS:

For Showers, Kitchen Mixers, Hospitals etc.

- Thermostatic temperature detector.
- Electroplated brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

HONEYCOMB Clinic Aerators

- The integrated flow limiter (Flow Class Z) ensures a constant water flow: 7.5-9 l/min @ 3 bar. This type of flow restriction makes a significant contribution to preventing unnecessary contamination as a result of water spray
- laminar stream
- only drinking water compliant materials used, as certified according to KTW (UBA), DVGW 270, etc.
- improved safety and hygiene thanks to an effective four-colour concept – each colour symbolises a replacement cycle. This means it is easy to recognise and monitor whether replacement is taking place regularly and correctly
- minimal spray and aerosol formation, therefore minimised risk of infection with waterborne legionella or pseudomonas bacteria

FOUR COLORS, MORE SAFETY

- More safety and hygiene thanks to an effective four colour- concept; every colour represents an exchange cycle which makes it easy to recognise and monitor whether the replacement has taken place as scheduled.
- The exchange cycle needs to be set by the facility itself since the water and operating conditions have a huge effect on the microbiological potential contamination of the aerator.

FLUSHING SOLUTIONS

- **More Space:** Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art technology and durability:** The range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation.
- **Design freedom:** Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to clean and hygienic:** Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution – no obstacles to clean around or cisterns to clean under.
- **Good for the environment:** All cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water – using as little as two litres of water for a half flush.
- **Noise reduction:** Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength:** All cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty:** All cisterns come with an impressive 10 year warranty.

SPACE SAVER BOTTLE TRAP WITH FILTER

The new space-saving bottle trap enables easy installation in tight spaces, especially where the furniture base is near the siphon. Its front-facing siphon cup, removable via two side clips, allows quick inspection and thorough cleaning. Direct access to the wall drainpipe also simplifies maintenance.

The siphon's body is equipped with two practical closing clips, allowing an intuitive and quick inspection, accessible to any user.

The main feature of this item consists in the possibility of extracting the siphon cup from the frontal side by simply opening the 2 clips.

Under-the-sink filters are normally favoured by home users, where the filters are mounted under the sink and connected directly to the Kitchen Mixer with additional drinking water outlet (AQM-ECO-364-) giving access to fresh filtered water that is ideal for drinking, cooking, washing fruit and vegetables.

Filters work by removing any contaminants that might be present in the water such as sediment particles, trihalomethanes (THM's) and also focuses on removing any metals, bacteria, chemical residues and other volatile organic compounds.

Water filters can help to reduce the risk of certain cancers by removing chlorine and chlorine byproducts from the drinking water. A solid block carbon water filter will also selectively remove contaminants from drinking water while retaining healthy mineral deposits that balance the pH of the drinking water.

FILTERS ARE TESTED AND ACCREDITED BY NSF (NATIONAL SANITATION FOUNDATION) AND ANSI (AMERICAN NATIONAL STANDARDS INSTITUTE) AND TESTED AGAINST WORLD HEALTH ORGANISATION AND MUNICIPALITY STANDARDS.

Filters suitable for Dubai, Abu Dhabi and Al Ain. For all other Emirates please contact your local sales team for information.
Filters must be changed on an Annual Basis.
