Healthcare Solutions

creating impact for good

Insourcing | Modular units | Training

Innovative insourcing to improve lives and cut your diagnostic waiting lists

We're confident about the ways our insourced services, modular buildings and training will transform your diagnostic wait times. We're confident because we've sat where you're sitting now. We speak your language and we share the things that are important to you.

We're a team of clinicians and other ex-NHS staff, united by our determination to make a difference to your trust – and, more importantly, to your patients.

Our job is to support you, within your hospital estates, with NHS framework-approved and CQC-registered services that are cost-effective without ever compromising on quality.

Our goal? To help you care for more patients, more efficiently.

We achieve this by staying open to fresh thinking and bringing the best new healthcare ideas to your hospitals. We do it by delivering both ethics and excellence at every step.

So, how can we help you?

Both of the clinicians were very caring, explained everything to me and answered all my questions. It could not have gone better. Thanks to the nurse who gave me such a detailed account of how to look after the wound, I have had no issues and am healing very well. Thank you.

Patient testimonial

We're here when you need us, ready to boost your capacity and support your 18-week referral to treatment targets

There's a buzz around insourcing right now ...

Increasing numbers of trusts are embracing insourcing. Politicians and NHS leaders alike are seeing it as an effective way of tackling the greatest workforce crisis in our healthcare sector's history.

Why insourcing? Because tough times call for innovative solutions.

Insourcing is a full, end-to-end managed service commissioned by NHS trusts. You can either use our expert staff in your existing space or let us provide our popular modular units, to increase space as well as staff resource.

We offer fully managed and governed teams with the appropriate skill and expertise for these clinical services:

- **Gastroenterology**
- **Endoscopy, including transnasal endoscopy and bowel cancer screening**
- **Ophthalmology**
- **Gynaecology**
- **Dermatology**
- **Vascular surgery**
- **Oral and maxillofacial**
- **Neurology**
- **Radiology**
- **Rheumatology**
- **Trauma and orthopedics**
- **ENT**
- **General surgery**

Full 360 service

Our full 360 approach to insourcing is designed to make life easier for you.

We know the NHS inside out and can lend our expertise to many areas, all at sub-tariff prices.

Ask us about:

- Optimising lists
- Reviewing your patient case mix
- Identifying ASA grades
- Full clinical coding for all procedures (ICD-10 & OPCS)
- Providing invoice backing for total charge transparency
- Reviewing weekend activity to identify possible efficiency improvements

Relocatable community diagnostic centres and surgical hubs

The government has confirmed its commitment to surgical hubs – modular units that streamline the delivery of elective procedures. These hubs will play a key role in ‘levelling up’ healthcare.

And the Royal College of Surgeons of England, jointly with the NHS Strategy Unit, has set out the role that independent healthcare providers will play in supporting plans to ramp up the roll-out of surgical hubs.

Our modular units put you at the forefront of this initiative. Fully equipped with the latest equipment and technology for each relevant clinical speciality, they’re a joy to work in.

And the exceptional patient feedback speaks for itself.

And we can do it in a fraction of the time (and cost) of traditional construction methods.

We build them off-site, under strictly controlled conditions, but they’ll feel like a seamless extension of your existing buildings. All the same high quality you’d expect, while also being more environmentally friendly than most construction projects.

We know that ongoing NHS staff shortages are hitting trusts hard. That’s why we can deliver not just the units, but also the NHS-trained personnel to deliver the care.

A turnkey solution

- 80% of construction is off-site, causing less disruption to patients
- Up to 70% faster than traditional builds
- 2-3 months lead time

Boosting your teams' skills

We've shown you how we can get excellent staff scrubbed up and working for you in no time.

And we've given you a glimpse of our modular units; the greener, speedier way to increase your space for your patients.

But swooping in and lending a hand isn't enough for us. We want to leave your trust a lasting legacy.

That's why we sacrifice a little list efficiency to train your staff.

Through our partnership with North Cumbria Integrated Care Trust, we've trained two nurses

towards full accreditation.

And at Kings College Hospital NHS Foundation Trust, our clinical development director shares his passion for trans nasal endoscopy. Having trained in Japan, he's dedicated to sharing this less-invasive technique with NHS colleagues.

Clinical team standards you can trust

Patients. That's why every person on our clinical team has to meet these exacting standards before we'll send them to you.

GMC specialist registered

All consultants hold GMC specialist registration and are interviewed, appraised and revalidated annually.

NMC registered

All nurses hold an NMC PIN, practiced in the relevant clinical setting.

Nurse experience

All nurses are Band 5+, have more than two years' experience and are positively referenced.

Employment checks

All clinical staff are vetted in line with NHS Employers standards, including references, DBS, mandatory training and fitness to work.

Staffing models

We've hand-picked our remarkable people to work seamlessly with your teams, while always sharing your commitment to keep the patient at the heart of everything you do.

External teams

We'll fully staff theatre & recovery from our vast nurse bank

Hybrid model

We'll work with you to plug any staffing gaps

Internal model

If requested, we can onboard your staff and assign them to our lists

Governance you can rely on

At Remedy, we believe that good governance is fundamental. It underpins everything we do.

We're proud of our strong governance structure, which focuses on high quality service with the patient at the heart.

It includes

- **Patient and staff experience**
- **Clinical governance**
- **Corporate governance**
- **Information governance**
- **Procedural document management**
- **Assurance and compliance**
- **Recruitment and retention**
