

water resistant

tear resistant

grease resistant

PaperTyger® is a durable printing paper engineered to bridge the gap between traditional paper and full synthetic substrates. Its unique paper/film/paper construction delivers excellent tear and water resistance while maintaining the vivid print quality, sharp text, and press compatibility printers expect. FSC® certified and responsibly sourced, PaperTyger® offers the performance of a synthetic with the printability and value of paper making it a smart, versatile choice for a wide range of applications.

End-Use Applications

Labels & Tags

Durable enough for handling, tearing, and moisture while delivering sharp print and reliable performance.

Maps, Manuals & Reference Materials

Ideal for documents that need to withstand frequent use and exposure without sacrificing readability.

Event & Field-Use Applications

Ideal for race bibs, maps, tickets, and rugged tags that must withstand handling, moisture, and tough environments.

Posters & Promotional Graphics

Produces vivid color and crisp graphics for high-impact visuals that last beyond standard paper.

Industrial & Operational Documents

A smart choice when applications demand durability beyond paper but don't require full synthetics.
