GORN CERAMICS

"CERAMICS WITH ATTITUDE"

*Discover the Makyvky
Collection and more
inside

Visit them here:

Collaboration of ceramics' masters and workshops from Ukraine.

GORN Ceramics specializes in creating unique elements of decor, design and art objects from clay. Through ceramics, they endeavor to convey a sense of essence and spontaneous perfection. Every product aims to impart the true nature and capabilities of the materials, organically allowing processes to influence the final outcome.

Two ceramic vessels, likely corn cobs, are shown on a light-colored, textured surface. The larger vessel is positioned in the upper center, and the smaller one is in the lower right. Both have a bulbous body with vertical ridges and a flared, petal-like top. The surface of the ceramic is a light beige color with dark, irregular vertical streaks.

ORGANIC. ESSENCE. SPONTANEOUS

ABOUT US

Gorn Ceramics was founded in Kyiv, Ukraine in 2018 by art director Bogdan Kryvosheya and ceramic artist Yuriy Myrko. What started out as a group producing ceramic tableware quickly developed to a broader mission of fostering creativity and cultural growth as an expressive outlet. In 2024, Kryvosheya and Myrko opened a school for it's community, offering workshops to locals looking for an escape from their daily life in wartime.

DESIGNER PICK: Souls Collection

Every living creature, especially an animal, is an incarnation of the soul in a material body. Understanding this fact evokes respect and love for all living beings. The sculptures convey and emphasize a certain character that is inherent only to a particular kind of animal.

“SIMPLE AND
LOOSE FORMS.
UNIQUE NATURAL
PERFECTION.”
