TECHNICAL DESCRIPTION

BOIA

BALLPENS

THE BOIA PEN IS CHARACTERIZED BY A MINIMALIST DESIGN OF THE TRADITIONAL OVAL BODY, COMPLEMENTED BY THE DYNAMIC SHAPE OF A ROBUST CLIP. ITS UNDERSTATED ELEGANCE IS ENHANCED BY THE FINELY SANDBLASTED SURFACE OF THE BODY.

MATERIAL:

The basic collection is made of ABS plastic, which offers a premium feel while ensuring uncompromising quality. The result is stylish and representative BOIA pens.

ECOLOGY:

In the future, the collection will expand with eco-friendly materials, emphasizing recycled plastic.

REFILL:

The pens feature blue, high-capacity refills that write up to 1,000 meters.

The refills contain German Documental Ink, which ensures smooth writing, extended refill lifespan, and excellent light-resistant colorfastness.

The refill ball is made of tungsten steel with a low coefficient of friction, enabling smooth ball movement. This combination guarantees premium writing quality and durability of the written text.

PACKAGING:

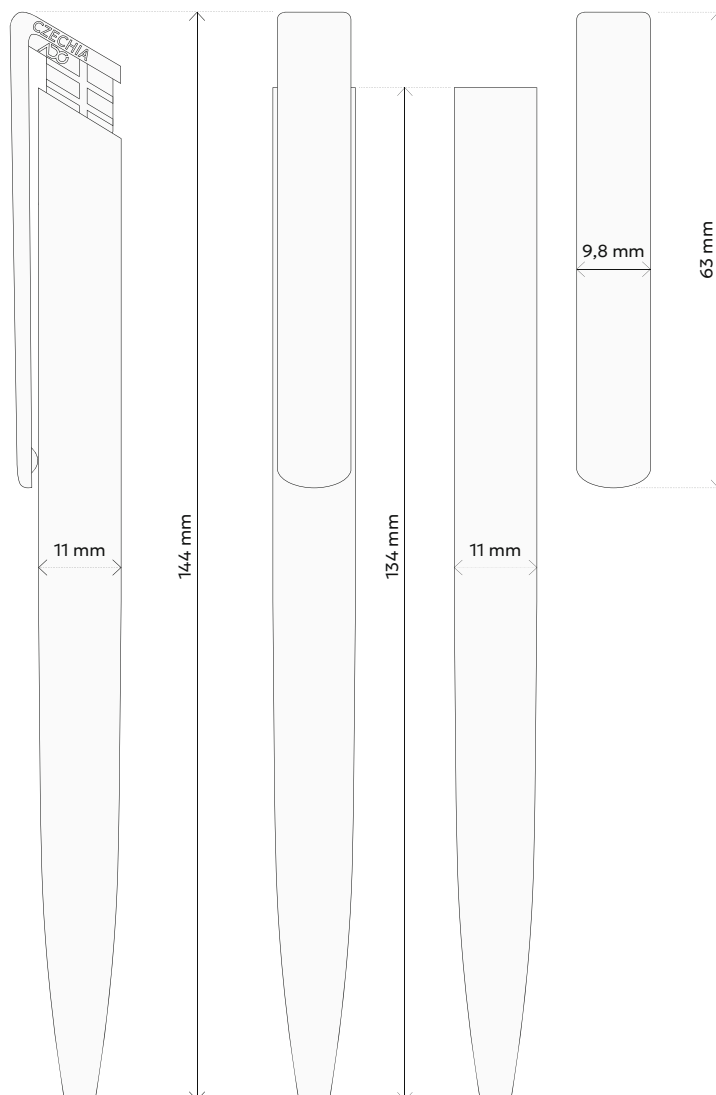

50 pcs: White paper box
with inserted BOIA tissue paper
dimensions: 148 x 100 x 75 mm

1 000 pcs: Cardboard with BOIA print
dimensions: 530 x 310 x 162 mm
weight: net 8,5 kg / gross 10 kg

PRODUCTION:

The complete production of all parts (except for the refills) and subsequent assembly take place in the Czech Republic in cooperation with smaller family businesses.

REAMS COME TRUE

The name of the pen, BOIA, refers to the earliest mentions
of the territory in the heart of Europe, today's Bohemia.
Over 2,000 years ago, ancient Romans wrote about this place
as Boiohaemum, the land inhabited by the Celtic tribe of the Boii.

BASIC NAVIGATION

OUR TIPS FOR YOU

1

ALPHABETICAL INDEX

On the following page, you will now find a clear and organized alphabetical index. This practical tool is designed for quick navigation by product name and page number.

2

PRINTING TECHNOLOGY ICONS

We have created a new system of pictograms for printing technologies to help you quickly identify the available marking options.

3

ECONOMICAL PAD PRINTING – TO

For some pens, we now offer the option of cost-effective pad printing on an automated machine. Need a thousand or more pens with a single-color logo? We can now print them for you at a more favorable price.

4

SPECIAL LASER TECHNOLOGY – LC

We are introducing a two-color laser engraving option for selected metal pens. Get inspired on pages 84, 86, and 87 and try it with your logo.

5

REFILL MARKING

Refill symbols now include new indicators for navigating ink and tip quality. You can find more detailed information on page 131.

NEW

R-ABS

ABS plastic is recycled by grinding and melting the original ABS material. It is then used to manufacture new products.

RECYCLED PAPER

In the production of recycled paper, already used paper and part of the new pulp from waste wood are processed.

RECYCLED COTTON

Producing 1 ton of recycled cotton can save up to 750 m³ of water. As an example, recycled cotton is used to create notebook covers.

RECYCLED ALUMINIUM

Aluminium can be recycled without losing its unique characteristics. Recycling helps save up to 95% of the energy used to extract new metal.

RECYCLED MATERIALS

ARE CREATED BY PROCESSING ALREADY USED MATERIALS

RPET

PET is the most common material for the production of disposable beverage bottles. Its reprocessing creates recycled RPET.

RECYCLED MILK CARTONS

Used cardboard is divided into individual layers. The separated paper part is crushed into fibers which is used to make new paper.

RECYCLED LEATHER

Recycled leather is produced by grinding up residues from leather production and scraps from the production of leather products.

RECYCLED STAINLESS STEEL

Steel is a unique material that can be recycled repeatedly without losing its characteristics. It is the world's most recycled material.

RENEWABLE MATERIALS

BIODEGRADABLE AND NATURAL MATERIALS

BAMBOO

It is an evergreen material and the fastest growing plant with little water requirements. Although it looks like wood, it is a type of grass.

WOOD

Wood is one of the oldest used natural raw materials. No waste is produced when processing wood.

CORK

The bark of a long-lived cork oak is peeled from the tree. Thanks to that the tree is then able to produce a new one by itself.

CORN PLA

Natural plastic substitute made from the starch of a fermented plant. It is a biodegradable alternative to petroleum products.

COMPOSITE MATERIALS

REDUCE THE USE OF PLASTIC BY ADDING NATURAL INGREDIENTS

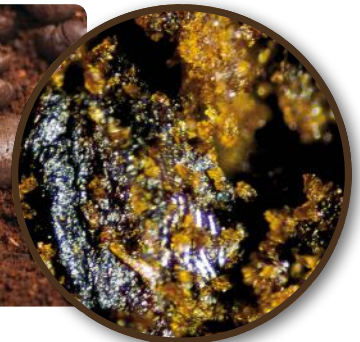

WHEAT STRAW

The combination of plastic and up to 60% of crushed straw fibers creates a lightweight mixture that uses waste material for production.

BAMBOO FIBER

It is used similarly to straw, the waste from the production of bamboo products is crushed and added to the mixture with PP or ABS plastic.

COFFEE GROUNDS

Coffee grounds and waste created during coffee production is added to the mixture with plastic in a ratio of 40:60.

GROUND LIMESTONE

The unique durable composite material is made from a mixture of 45% ground limestone and 55% ABS.

ALUMI

69

**YOU ARE MORE LIKELY
TO LOSE IT, BEFORE IT
STOPS WRITING!**

DO YOU KNOW THAT:

The aluminium tip writes like a graphite pencil but ALUMI pen lasts much longer than a graphite pencil. Also, it is easily erasable.

WE RECOMMEND:

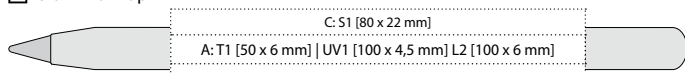

When drawing on glossy charcoal paper you can achieve pleasantly soft, almost artistic quality of the endless line.

ERASE

Erasable Ballpen

**DO YOU KNOW
THAT WITH "ERASE PEN"
YOU CAN CREATE WONDERS?**

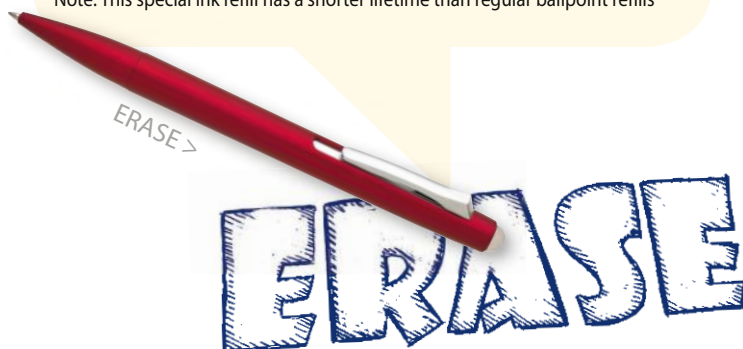

OUR TIP:

Excellent gift for fun people – invisible messages!
Write a message, erase it and send the empty paper to your friend. After keeping the paper in the freezer for a while your friend can finally read your message!

DO YOU KNOW HOW IT WORKS?

The ink disappears as it warms up. It can be done easily with mechanical friction or an iron (approx. 60 °C).
After cooling the erased ink appears again (approx. -15 °C).

Note: This special ink refill has a shorter lifetime than regular ballpoint refills

PRINT TECHNOLOGIES

PAD PRINT

Pad printing is one of the most frequently used labeling methods.

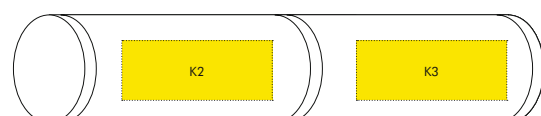

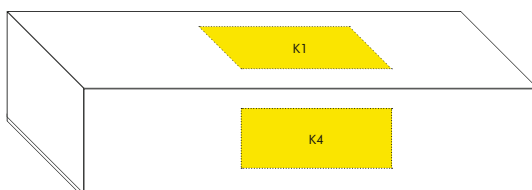

The logo is burned onto a polymer plate, called the “cliché”, which is then developed. The paint is transferred from the “cliché” to a silicon based pad, which is then used to print the object. Due to the flexibility of the silicon pad, slightly curved, cylindrical surfaces can be printed on as well. The symbols next to the items indicate what color fit the best for that particular item.

LABEL	SUITABLE FOR	MATERIAL	COLORS	MOQ	LOGO	COLOR
T0	basic printing of larger quantities selected plastic pens	plastic, bamboo	1	1000	vector: cdr, pdf, eps, ai	Pantone
T0+	multiple printing of larger quantities selected plastic pens	plastic, paper, bamboo	1	1000		
T1	basic printing on plastic pens	plastic, bamboo	1–4	100		
T1+	multiple printing on plastic pens	plastic, paper	1			
T2+	printing on metal pens with hardener and pre-surface treatment	metal	1–2			
T3	printing on boxes, notebooks, coloured pencils	plastic, paper, bamboo	1–2			
T4	printing on crayons, notepads	plastic, paper, bamboo	1–2			

RECOMMENDED TECHNOLOGIES FOR SELECTED SURFACES

PRINT TECHNOLOGIES

UV PRINT

UV print is perfect for a full color print of promotional products.

It is possible to print both raster and vector motifs and logos. The advantage of this technology is the possibility of printing in white color. Flat surface is ideal for using this kind of labelling. Ballpoint pens and boxes suitable for UV print are marked accordingly with a symbol.

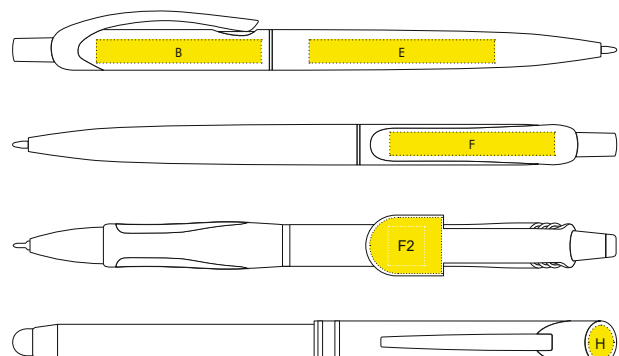

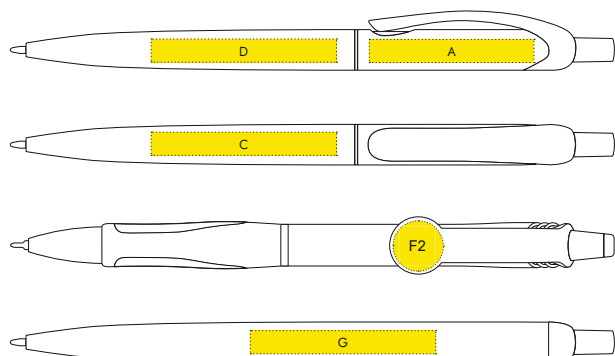

LABEL	SUITABLE FOR	MATERIAL	COLORS	MOQ	LOGO	COLOR
UV1	printing on plastic pens	plastic, wood	CMYK	1	vector: cdr, pdf, eps, ai image: min. 300 dpi	CMYK
UV1+	printing on plastic pens with underprint	plastic, wood				
UV2	printing on metal pens or a clip	metal, clip (plastic / metal)				
UVS / UVS+ (6-200 cm ²)	printing on boxes, notebooks, coloured pencils	plastic, rubber surface, paper, cork, bamboo				

RECOMMENDED TECHNOLOGIES FOR SELECTED SURFACES

CHOOSE A PLACE FOR YOUR LOGO
according to the structure of the product that you have chosen

PRINT TECHNOLOGIES

LASER ENGRAVING

Laser engraving is a procedure ideal to burn a pattern onto a metallic material.

The laser beam is precise even in the smallest details of a logo. The color of engraving depends on the material of the background surface. In the catalogue the final colors are listed in text next to every ballpoint pen.

LABEL	SUITABLE FOR	MATERIAL	COLORS	MOQ	LOGO	COLOR
L0	laser engraving on the ALBA/ORIN pens, positions A, B	metal – aluminium (anodizing)	1	1	vector: cdr, pdf, eps, ai	According to the colour of the base
L1	laser engraving on aluminium pens	metal – aluminium (anodizing)	1			
L2	laser engraving on pens with rubber surface, glossy laser engraving, wood, bamboo, laser engraving on the clip	wood, bamboo, rubber surface, glossy laser	1			
L3	laser engraving on other objects	various materials	1			
LC	two-colour pen laser with coloured backing	metal – two-layer anodised	2			

THE FINAL COLOR OF THE LASER ON INDIVIDUAL MATERIALS.

MATERIAL	ALUMINIUM (anodizing)	STAINLESS STEEL	BRASS	BAMBOO
Label	L1	L1	L1	L2

MATERIAL	ALUMINIUM			
Surface	polish	rubber surface	two-layer anodised	two-layer anodised
Label	L2	L2	L2	LC

EPOXY LOGO

The logo is printed in color (CMYK) on a sticker, which is then covered by a see-through synthetic resin that creates a 3D effect on the surface. Templates are available for a range of our pens that can be labeled with this technology, to ensure the best visibility of your logo. The models suitable for doming are marked with a symbol.

LABEL	SUITABLE FOR	MATERIAL	COLORS	MOQ	LOGO	COLOR
EPOXY	labelling on pens	any, condition: flat surface	CMYK	100	vector: cdr, pdf, eps, ai img: 300 dpi	CMYK

ROTARY SCREEN PRINTING

Rotary screen printing enables selected plastic pens to be printed before the clip and up to half of the body of the pen. The result is a double-sized logo than what is offered by pad printing. The technology allows printing up to two colours, without exact overlap. Pens to which this technology is possible are marked in the catalogue with the symbol S1.

LABEL	SUITABLE FOR	MATERIAL	COLORS	MOQ	LOGO	COLOR
S1	Printing on pens	plastic, paper, wood, bamboo	1-2	1000	vector: cdr, pdf, eps, ai	Pantone

★ GDI

The refills contain German Documental Ink, ensuring smooth writing, extended refill life, and high colorfastness with excellent light resistance. The ball is made of tungsten steel with a low friction coefficient, allowing for smooth ball movement. This combination guarantees premium writing quality and long-lasting written text.

★

Refills with Shanghai Documental Ink offer high-quality, smooth writing with durable colorfastness. The shade of color may vary slightly between batches. Combined with a tungsten steel ball, these refills provide superior quality for use in promotional pens.

STANDARD

Standard refills contain regular ink, ideal for everyday writing. They offer sufficient viscosity for smooth writing and quick drying. Paired with a stainless steel ball, these refills are perfect for general use in standard promotional pens.

NOTES

WE HONOUR CORPORATE SOCIAL RESPONSIBILITY

The Gabrielis Foundation has been supporting a diverse range of nonprofit activities in the Czech Republic since 2015. Since its inception, it has contributed to numerous projects, including those of the Paraple Center, the Alzheimer Foundation, the preservation of the ruins of Zlenice Castle in the Posázaví region, the piano competition *Young Pianists Play Steinway & Sons*, a Czech scientific team working to protect endangered species in Sumatra, and various smaller initiatives.

One of the foundation's most significant activities is organizing the literary competition for children and youth, the *Ivona Březinová Award*. In 2024, the winners of its sixth edition were announced.

The foundation's support is financed through the sale of pens from the PenMaster collection. For every pen sold, 0,03 CZK are donated to the Gabrielis Foundation and subsequently used for nonprofit and charitable purposes.

LITERARY COMPETITION FOR CHILDREN IVONA BŘEZINOVÁ AWARD

The awards ceremony for the sixth annual youth literary competition, organized by the Gabrielis Foundation, took place on September 18, 2024, at the Klementinum of the National Library in Prague. The prizes for the winners, selected from over 200 participants, were presented by the competition's patron, author Ivona Březinová.

In the afternoon, a traditional discussion session was held with the winners, Ivona Březinová, and her guest, Petr Eliáš, editor-in-chief at Albatros Publishing. The winning stories have been published in a collection available for download on the competition's website.

The main partners of the competition are the National Library of the Czech Republic, the College of Journalism, and Albatros Media.

MUSIC COMPETITION FOR CHILDREN YOUNG PIANISTS PLAY ON A STEINWAY & SONS PIANO

Seven dozen children across six categories, ranging from the youngest participants to twelve-year-old pianists, took part in the nationwide competition Young Pianists Play on a Steinway & Sons Piano on May 25 and 26. The competition, designed for children under twelve, was hosted for the thirteenth time by the Gymnasium and Music School of the Capital City of Prague. All first-prize winners earned the opportunity to perform at the Winners' Matinee and participate in a masterclass with Ivan Klánský, held on November 9 this year. The Gabrielis Foundation has been supporting this competition since 2018.

ALZHEIMER POINT FREE ADVISORY SERVICES

Last year, NF Gabrielis supported the Alzheimer Point counseling center, operated by its long-term partner, the Alzheimer NF. The center provides free counseling and support services to families caring for a loved one with dementia as well as to individuals living with cognitive impairment.

Consultation Topics Include:

- What is dementia, and how does it impact our lives?
- How to communicate with a person living with dementia?
- What social care benefits can I apply for?
- How to choose suitable health and social services?
- Where to seek help?
- What aids and tools are available to support caregiving?
- Have you been caregiving for a long time and feel exhausted?

Consultation Center Address: Prague 6, Czech republic

SAVE THE PANGOLINS...

BUY & HELP

THE KUKANG RESCUE...

Since 2019, the Gabrielis Foundation has been supporting the Kukang Rescue Program, dedicated to combating the illegal trade in slow lorises, pangolins, and other wildlife, primarily on the Indonesian island of Sumatra. In 2024, this project celebrated its 10th anniversary.

During this time, the program has established a rescue and rehabilitation center for confiscated slow lorises and pangolins, built two Kukang Schools where local children receive free lessons in English and environmental awareness, and launched several international awareness campaigns. The program employs former wildlife poachers as field assistants and has created a community

of dozens of coffee farmers. These farmers participate in the initiative by selling their "conservation" Kukang Coffee under favorable conditions, provided they refrain from hunting or harming protected wildlife.

The activities of the Kukang Rescue Program, with all its successes and challenges, are compellingly depicted in the documentary Kukang Movie: A Story of Slow Lorises and People, filmed between 2019 and 2021. The main protagonists are conservationists and co-founders of the Kukang Program: Lucie Čiznářová (Zoo Olomouc) and František Příbrský (Zoo Ostrava).

This film will be available in 2025 on Czech Television,

For more information, visit WWW.KUKANG.ORG

DO YOU WANT TO SUPPORT THE CONSERVATION OF PANGOLINS?

By purchasing a Fibre and Minera pen (pg 20), you will support the rescue of pangolins by 0,02 € of each bought pen.

DO YOU WANT TO SUPPORT THE CONSERVATION OF SLOW LORISES?

By purchasing a Bottli and Coffi pen (pg 21), you will support the conservation of slow lorises by 0,02 € of each bought pen.

WOULD YOU LIKE TO SUPPORT THE KUKANG COFFEE?

Purchase Sumatran coffee for your company and contribute to nature conservation.
