biomaterials

cerabone® plus

NATURAL BOVINE BONE SUBSTITUTE MATERIAL
WITH HYALURONATE

cerabone® plus combines the established **bovine bone grafting** material cerabone® with the well-known properties of hyaluronic acid.

Thanks to the pronounced liquid binding capacities of hyaluronate, cerabone® plus forms a sticky bone material upon hydration that **provides unique application comfort** by allowing both easy uptake and delivery to the site of application.

THE SURGICAL ROOM

Surgical Specialist Team | Canada

Our Surgical Team is a national network of expert specialists spanning coast-to-coast across Canada, united by advanced experience in implant dentistry and regenerative therapies. With diverse clinical backgrounds and deep surgical expertise, our team delivers practical, evidence-based insight across the latest biomaterials, cutting-edge regenerative solutions and host of clinical armamentarium. This breadth of knowledge ensures strong clinical relevance and credible perspective across both emerging innovations and established treatment protocols.

Beyond clinical leadership, our specialists serve as trusted partners for industry collaboration. We support promotional initiatives, educational programs, and new product launches by providing knowledgeable representation, clinical validation, and meaningful engagement with the surgical community. Please connect with our specialist team and discover how our experts can help elevate your clinical outcomes and advance the future of regenerative implant dentistry.

Wishing you all predictable surgical outcomes.
