

Unlock Hidden Claude Limit

Best features to save tokens

Claude limitations make it hard to use

- This guide shows you the opposite
- Inside you will learn:
 - The 6 features that deliver 80% of Claude's real value
 - The 6 bad habits keeping you stuck in manual mode
 - How to set up CLAUDE.md once and never repeat yourself

Read time: 3 minutes

CLAUDE.md

- Set it up once
- Claude reads it before every reply
- Your voice, rules, and context load automatically every single session

```
Claude Code v2.1.70
Opus 4.6 with high effort - Claude Max
~/my_local/code-local/personal-workspace

send me ~/.claude/CLAUDE.md content

---
Global Rules

Code Style

- Comments in English only
- Prefer functional programming over OOP
- Use OOP classes only for connectors and interfaces to external systems
- Write pure functions - only modify return values, never input parameters or global state
- Follow DRY, KISS, and YAGNI principles
- Use strict typing everywhere - function returns, variables, collections
- Check if logic already exists before writing new code
- Avoid untyped variables and generic types
- Never use default parameter values - make all parameters explicit
- Create proper type definitions for complex data structures
- All imports at the top of the file
- Write simple single-purpose functions - no multi-mode behavior, no flag parameters that switch logic. If the user needs multiple modes, they will ask explicitly

Error Handling

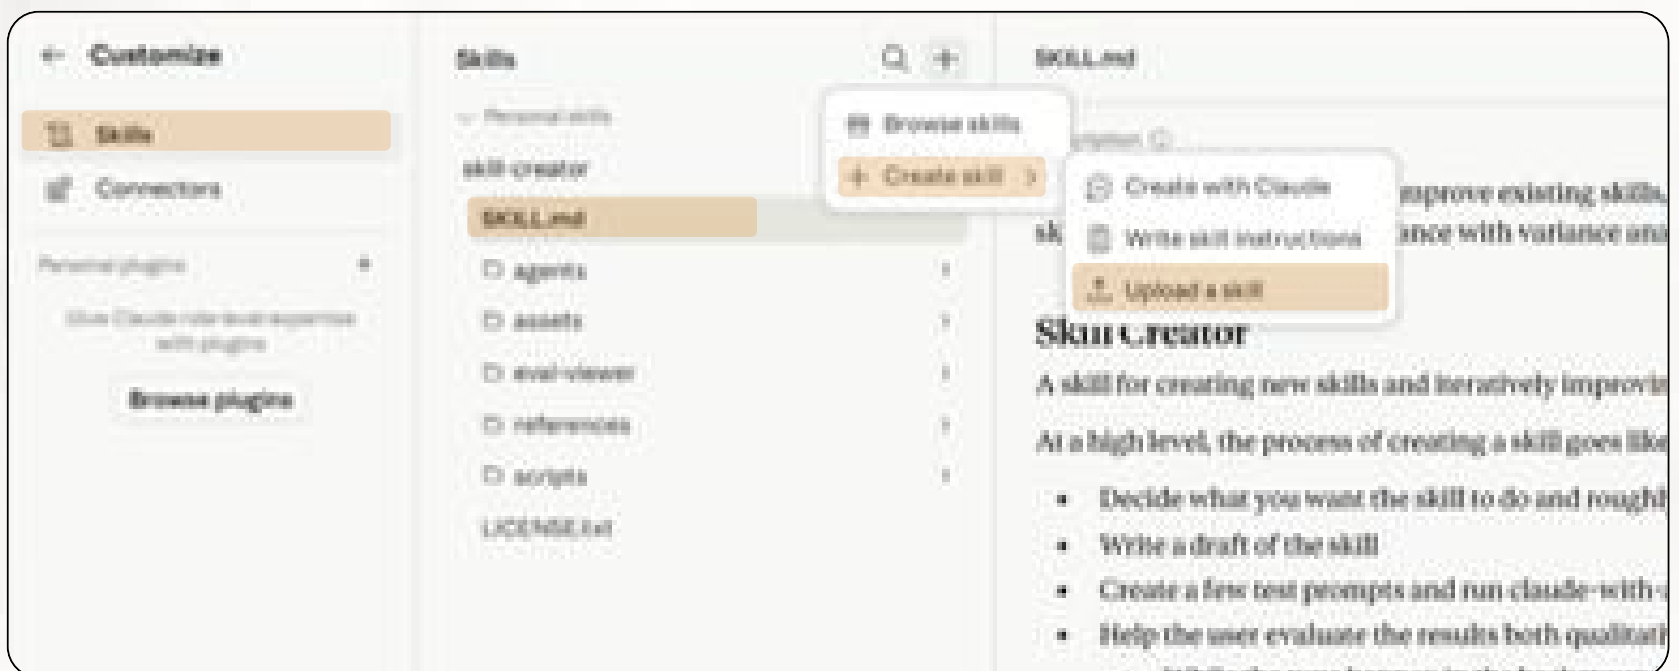

- Always raise errors explicitly, never silently ignore them
- Use specific error types that clearly indicate what went wrong
- Avoid catch-all exception handlers that hide the root cause
```

Skills Setup

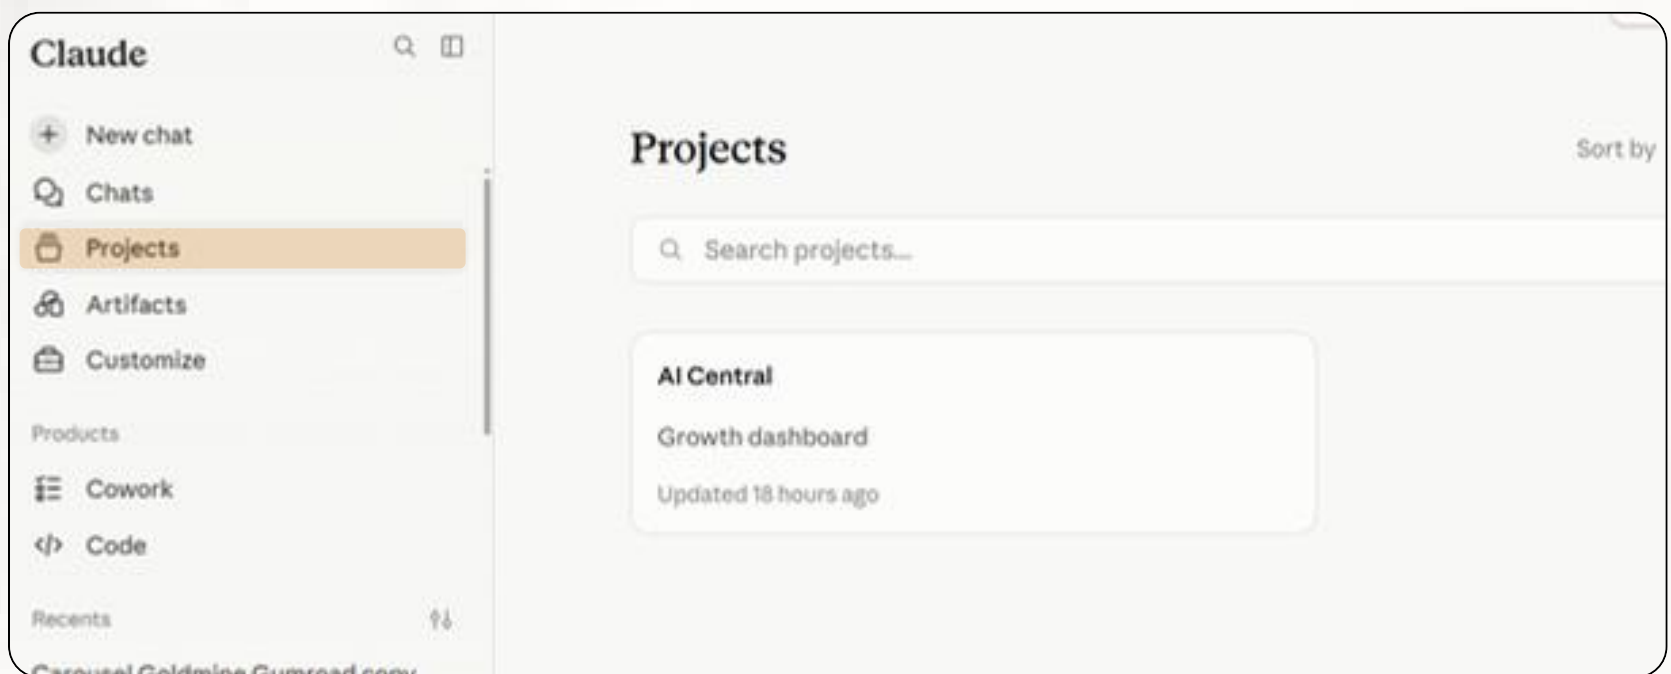

- Turn any repeating task into one keyword
- **Type it once**
- Claude runs the whole workflow without needing fresh instructions every time

Projects

- One workspace per client or project
- Your files, brief, and rules stay pinned
- Claude never starts from scratch again

START LEARNING TODAY

Plan Mode

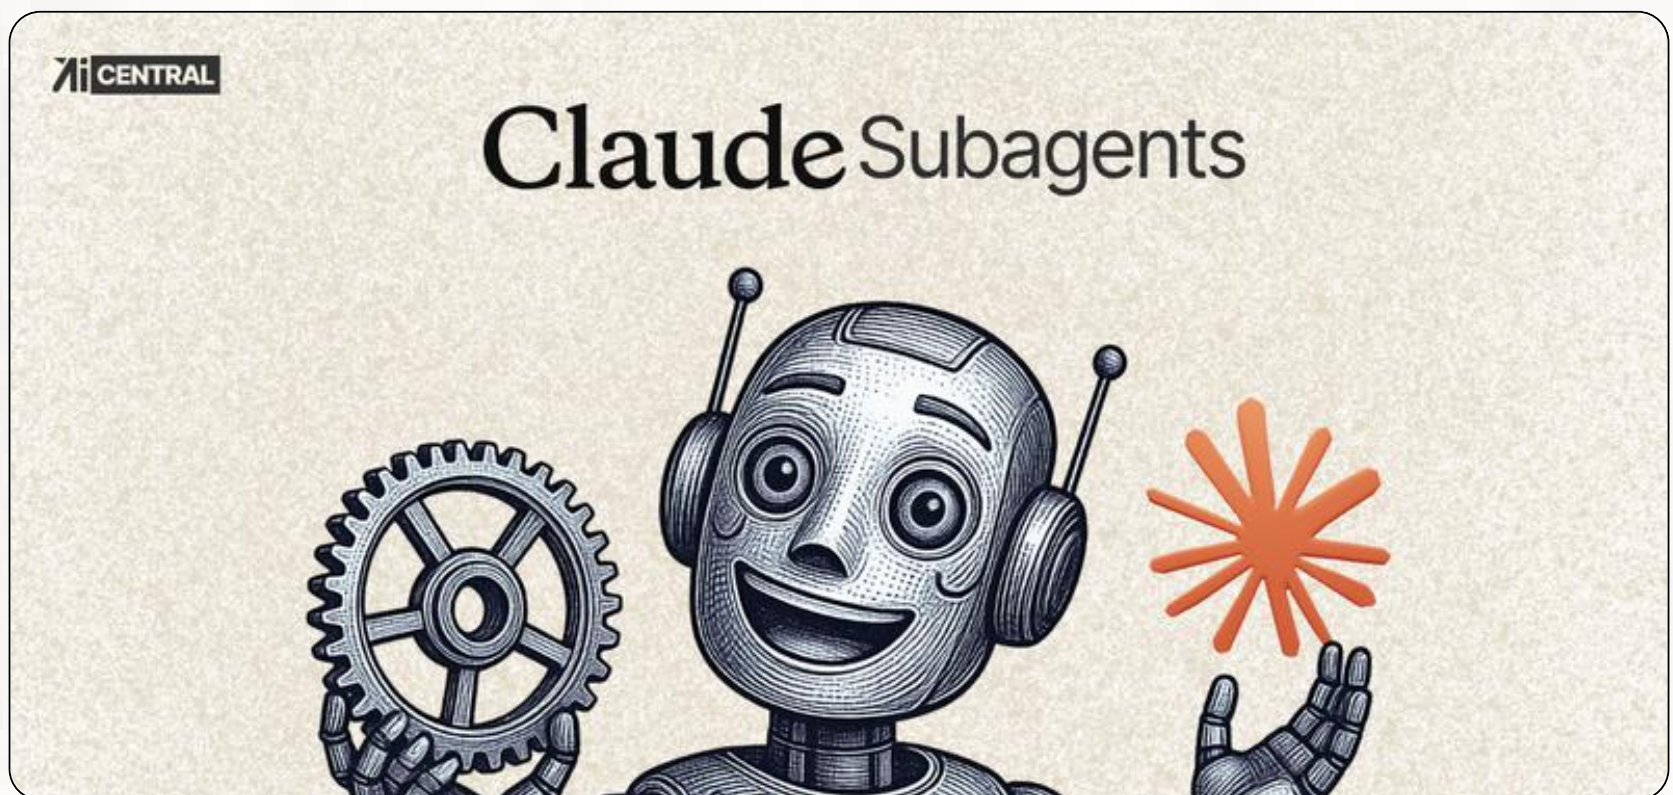

- Claude writes the plan first and waits
- You approve it, then it acts
- Stops wasted runs before they happen

Subagents

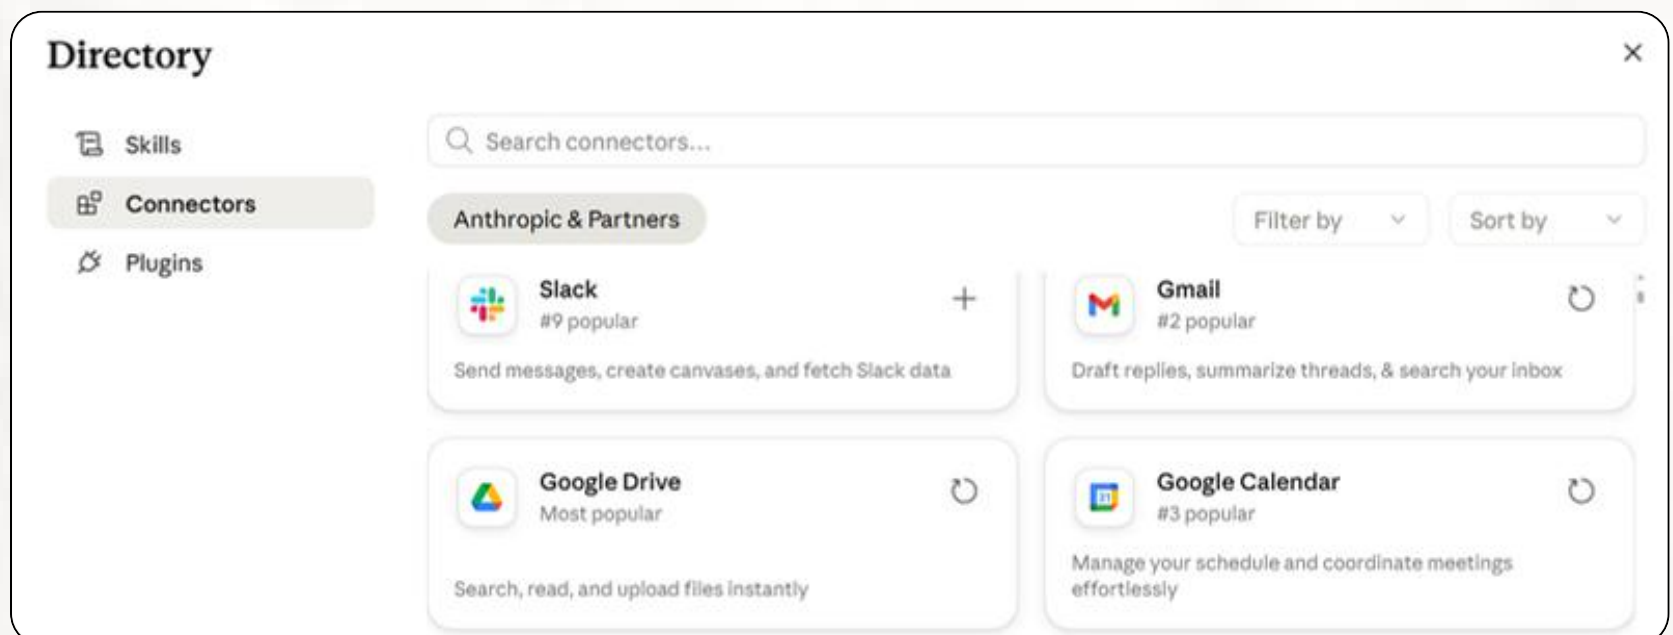

- One agent does one job
- String a few together and you have a full pipeline running while you do something else

MCP Connectors

- Connect Gmail, Notion, Drive, or Slack directly
- Claude pulls live data and writes back without you acting as the middleman

The Gray Zone (Common Mistakes & Bad Habits)

- ✗ Typing the same prompt over and over
- ✗ Keeping one endless chat thread open forever
- ✗ Copying and pasting manually every time
- ✗ Explaining the fix instead of describing the problem
- ✗ Using Claude without a context file
- ✗ Starting from zero in every single session
