BA200X CORDLESS

Break free of power cords with the ALLSAW BA200X Cordless. Powered by the DEWALT® FLEXVOLT® system, the BA200X operates on 54V battery power delivering maximum performance, superior efficiency and excellent runtimes. Leave behind power outlets and extension cords with the convenience and safety of industry-leading battery technology. Featuring enhanced ergonomics, Quick Switch Blade system, and a brushless motor, the BA200X is ready to renovate. The advanced dust control and non-kickback cutting action offer industry professionals a safe and precise option in challenging restoration environments.

POWER AND PERFORMANCE

The BA200X is designed for use exclusively with DEWALT® FLEXVOLT® 54V battery packs and charger. The FLEXVOLT® system operates faster and longer while consuming less energy, allowing users to accomplish more.

CUT SQUARE, CUT DEEP

The unique patented orbital cutting action of the two reciprocating blades allows cutting of brick, mortar, and masonry faster than traditional reciprocating saws.

This cutting action also produces minimal airborne dust, offering a safe and controllable operation, with the ability to cut to a depth of 4 3/4" (120mm), cut square corners, and make variable-width cuts without overcutting.

CONVENIENCE

The convenience of cordless proves invaluable, particularly on larger work sites where power points or cable lengths may be inaccessible. Its cordless design eliminates the need to manoeuvre cords, thereby reducing the risk of tripping hazards.

MINIMISE DUST

Achieve superior dust reduction and collection when fitted with the flexible, heavy duty dust boot uniquely engineered for the BA200X.

The unique patented cutting technology produces minimal airborne particles, reducing the risk of silicosis and creating a safer working environment with less mess.

Any residual dust is captured with the Heavy-Duty Dust Boot, while still providing optimum visibility to complete the job.

QUICK-SWITCH BLADE

The Quick Switch Blade System makes switching up blades easy for improved on-site productivity.

Improved Flex Grip Handle with adjustable rubber grip provides better handling and flexibility when cutting brick and mortar.

BLADE RANGE

General Purpose Blades

Used for general cutting
of bricks and mortar.

Plunge Blades

Designed for cutting
a single brick.

XL General Purpose Blades

Cut up to 170mm deep.

Heritage Blades

Mortar removal on
thin joints and
heritage restoration.

Headjoint Blades

Mortar removal
on vertical joints.

Switch Box Blades

Suited to cut small
square holes for
electrical switches.

Tuckpointing Blades

Used for removing the mortar
between the bricks in
restoration work.

ALLSAW™

BA200X CORDLESS

KIT

INCLUDED

- ALLSAW BA200X
- 200X General Purpose Blades
- 200X Plunge Blades
- DEWALT 54V Flexvolt 9.0Ah Battery
- DEWALT 18V-54V Battery Fast Charger
- Heavy Duty Dust Boot
- Arbortech Hard Case
- Blade Pouch
