## *WHO WE ARE?*

The balanced harmony of different disciplines and techniques forms the basis of Designmixer, founded by Tijen Samuray in 2011.

We design **walls and surfaces** with extraordinary dimensions and bold color combinations, where avant-garde visuality is highlighted, with a design scenario that can transform an ordinary space into an unexpectedly **iconic atmosphere**.

The wide range of products such as **leather, fabric, metal, wood, ceramics** and an increasingly international market are underpinned by a **sartorial vocation for unique products** readapted to each specific project to provide bespoke wall decoration solutions.

We offer a design service with various levels of customization, ranging from the adaptation of colors and sizes of numerous graphics in our collections to the creation of entirely new subjects created specifically for the customer, satisfying even the most complex project requirements.

Our products are suitable for both residential and contract use and can be developed according to intended use. We are accessible from all around the world and our team quickly responds to demands and puts them into practice.

Our work is timeless, never too influenced by trends. We take **inspiration from the endless sources of nature and history** and blend them with our customers' dreams. **Just as in the name 'design-mixer'...**

Our signature is the harmony of flexibility and quality in all aspects of our work.

# PROJECTS

designmi.er

We are excited to have participated in **Maison&Objet Paris 18-22 January 2024** and had a great experience showcasing our products and connecting with designers from all over the world. The event provided us with valuable insights and opportunities to expand our business. We look forward to future collaborations and continued growth in the industry.
