Magic Remote Control | Magic Explorer

Easiest way to get your answer

Get customized information related to content with single push of a button, without the hassle of searching

While watching drama

Things you can find out:

Content title

Genre

Cast

Review and Ratings

What are you wondering about on the screen?

Press and hold down the OK key on Settings menu, program list, TV guide, sports, alarm apps etc. Your television is ready to give you more detailed informations. Thanks to Magic Explorer, you can search for things you are curious about in the video you watch. Moreover, the search window opened on the right allows you to search while the broadcast is ongoing.

powered by
webOS Hub

Let your television be your music system

Use your television as your music system. You can put your TV into sleep mode and listen to the music you want.

powered by
webOS Hub

Clear sound pro

Emphasizes dialogue for clearer speech

To help viewers hear incoming sounds more clearly while watching news, movies or TV series, the Clear Voice algorithm with deep learning detects the background and sound separately. The algorithm then expands the extracted audio components and eliminates background noise to achieve clear audio.
