# DOOR COMPONENTS

## Door Frame Solutions

### Primed Dura

A solid jamb made with Alaskan Yellow Cypress and sustainably harvested pine. Naturally rot- and insect-resistant, this option provides a strong, reliable frame at a great value.

### Dura-Tech

Prefinished White and built on the Dura-Frame foundation, this jamb features a durable PVC film for a clean, low-maintenance finish that can also be painted. It resists fading and provides long-lasting protection.

### Black FX50

This premium jamb comes prefinished in black and features the strength of Dura-Frame construction. It is laminated with the highest-performance exterior films on the market, offering dent resistance and a sleek, long-lasting finish.

### PVC Composite

This top-tier prefinished white composite frame combines the strength and stability of wood without rotting, warping, or splitting. Designed to resist mold and mildew, this jamb is completely maintenance-free.

## Aluminum Cladding

Aluminum-clad entry door systems eliminate the need for painting and repainting while delivering exceptional curb appeal. These durable, powder-coated frames require virtually no maintenance, giving homeowners long-lasting beauty with minimal upkeep.

Maintenance free: No chipping, cracking, peeling, or repainting needed

### HINGES
