ELSA JEANDEDIEU

French artist Elsa Jeandedieu explores the dialogue between architectural permanence and the fluidity of emotion.

Based in Hong Kong, Jeandedieu has established a distinctive tactile language focused on the sensory experience of space through meticulously crafted textures and immersive murals. Inspired by the raw vitality of the city and the structural elegance of design and haute couture, her work harmonizes high-end luxury with organic warmth.

Elsa encourages the viewer to slow down and reconnect with their physical senses; her work is about cymatics, introspection, and reflection, rendering the invisible hum of the universe into a physical, tactile form. Her patterns and colour palettes vibrate at a frequency of peace and stability, exploring frequencies that can physically calm the human nervous system: the viewer's own internal frequency begins to harmonize with the steady, grounded rhythm of the art.

Born and raised in southern France, her practice is anchored in classical French foundation in the decorative arts, where she mastered the manipulation of plaster, pigment, and gold leaf. Her technical rigor, forged during her formative years at Atelier Lucien Tourtoulou in Paris, allows her to approach surfaces with an unparalleled balance of precision and delicacy.

With a career spanning two decades across global metropolises from Paris to Shanghai, Elsa has built a robust portfolio of site-specific commissions for luxury icons including CHANEL, Louis Vuitton, Patek Philippe, Van Cleef, The Aubrey, Four Seasons, Mandarin Oriental and Capella. Her versatility has made her a premier collaborator for world-renowned designers such as Alexis Dupont, André Fu and Joyce Wang, and has been featured in VOGUE HK, The New York Times Style Magazine, Wallpaper*, ELLE, Home Journal and The Sunday Times, cementing her position as a leading voice in Asia's contemporary tactile arts.

SIGNATURE TECHNIQUE

TWEED

Embracing the interconnectedness of all natural elements, Elsa Jeandedieu developed the “Tweed” texture. This design features intertwined wavy patterns that symbolize the energetic flow and unity of all things. diverse colour palettes and materials,

SIGNATURE TECHNIQUE

OSCILLATION

Technique refined over two decades of experience working with natural materials and lime mineral plaster.

Elsa crafts textures that capture the rhythm of elemental forces and the resonating energy in nature.

THE ESSENCE OF EARTH

Working with limestone and earth is a conversation with time. Materials that have held their breath for millennia, compressed history and the weight of the world.

High-quality lime-based mineral plaster produces fine textures with rich nuances and warm colors. This medium, has played a significant role in human art since Roman architecture and Renaissance art. Now, transcends to represent the restless energy that forms and binds all of nature under Elsa's vision.

TEXTURE ARTWORKS

Texture artworks that capture the essence of abstract natural elements, celebrating simplicity through elegant forms and subtle textures. As for her polychrome creations, they elevate the atmosphere of any interior with vivid hues and intricate compositions, some even with gilded surfaces of imitation gold leaves.

COLLECTION

REMINISCENCE

E Elsa's childhood memories of the South of France resurface in her first solo exhibition: 'Reminiscence.' This collection marks the beginning of her journey in creating signature tactile textures that reveal her inner voice and translate the invisible hum of the universe into physical form. The collection reveals an intuitive grasp of human emotion, freezing the frequencies of nostalgia, love, and joy into matter to remind us that we are all ripples of the same collective reality.

ECHOES OF MEMORIES

L'ÉCHO DES SOUVENIRS

There are recounted memories, legends, and those remembered by the body. Blurry, sometimes oxidised, they are nevertheless indelible and sparkling in the depths of my childhood memory.

Here I am in the herb square of Uzès market. I sneak among the crowd to admire the colourful and enticing stalls of the producers who bring this land to life.

MATRAISSANCE

At the request of Being Neighbourly to create an artwork about their inaugural exhibition 'Transitions' in 2024, Elsa chose to explore the profound shifts that occur in body and mind during motherhood.

Reflecting on her memories of nurturing her son, she utilized abstract shapes and oscillating textures to depict the connection between mother and baby, evoking the myriad transformations—from physical changes to emotional awakenings.
