Water stills Puridest

LAUDA

The water stills Puridest produce high-purity, low-gas, germ-free and pyrogen-free distillate, e.g. for diluting reagents and samples. After a direct connection to the raw water and the power supply, ultrapure water can be drawn off directly. The glass water stills deliver water that is almost free of metal ions.

- Distillates with conductance values up to 1.6 μ S/cm, comply with the DAB regulations and the provisions of international pharmacopoeias
- Without the use of consumables
- Maintenance needs are limited to simply cleaning contaminants from the still
- With LED indicators for operating status and cleaning requirements (PD 2 and PD 4 only with LED indicators for operating status)

Digital vacuum gauge THERMOVAC TM 201

The vacuum gauge combines a piezoresistive sensor for high-pressure measurements with a heat conducting Pirani sensor for low-pressure measurements. It can measure both absolute pressure and relative pressure (-1060 to 340 mbar), thus supporting leak detection and pressure monitoring. The integrated data logger records measurements with a time stamp. Stored data can be easily transferred via USB-C or Bluetooth® LE and analysed with the optional VacuGraph™ software.

- LCD graphic display and intuitive menus facilitate operation
- Adjustable gas type correction factor
- Power supply: Li-battery is charged via the USB port
