

ABI
MDF Doors & Mouldings
Catalogue

A modern interior scene featuring a grey armchair with light wood legs on the left. In the center, a small side table with black hairpin legs holds a stack of books and a pair of glasses. The background consists of a green wall with vertical slats and a white baseboard. The floor is made of light-colored wood. A semi-transparent grey box contains white text.

ABI manufactures high quality primed MDF products including interior doors, baseboards, casings, interior door framing and cosmetic paneling for construction finishing. MDF has no knots, grain or warping and its smooth surface gives way easily to the saw, leaving no splinters, burns, or tear-outs. We proudly produce in Alberta with shipping capability throughout the world.

BASEBOARD

Baseboards play a vital role in making your home look complete. Baseboard is a trim that covers the lowest part of an interior wall. It serves a purpose in hiding the joint where the walls meet the floor, which might otherwise not be very appealing. A stylish baseboard can have a dramatic impact on the look of your room.

There are no limits to creativity.

At ABI Mouldings, we take pride in offering a wide range of custom MDF mouldings to meet the unique needs and preferences of our customers. Our custom mouldings are crafted with precision and attention to detail to provide you with a product that exceeds your expectations.

We are committed to providing our customers with the highest quality product and exceptional customer service. Our team is here to help!

CUSTOM

CASING

Casing is the finishing touch to door or window installations. Adding decorative door and window casing is an easy way to compliment any room in your home. They are generally thicker than base mouldings adding a dramatic affect to any room. There are countless styles to choose from, giving customers many options.

HEADER

A header is a type of decorative trim or moulding that is typically installed at the top of a door or window frame, or as a decorative element above cabinetry or built-in shelves. Its purpose is to provide a finished look to the opening and to add architectural interest to the space.

They come in a wide range of styles and designs, from simple and understated to ornate and highly detailed.

Header mouldings are a stylish way to add interest and architectural detail to a room, while also providing a finished look to doors, windows, and cabinetry.

*Drawings shown are not to scale, if you have any specific questions about the dimensions or proportions of our mouldings, please do not hesitate to contact us.

URBAN SERIES

Our NEW Urban Series adds visual interest and texture to walls and ceilings, creating a more dynamic and layered look in a room. It's versatility allows it to be used in a variety of settings, from living rooms and bedrooms to bathrooms and kitchens. It is easy to install and can be done by a skilled DIYer or a professional carpenter. This makes it an accessible option for homeowners who want to upgrade their interiors. Overall, Urban Series mouldings are a great way to add character and charm to any interior space.

URBAN SERIES

DOOR JAMB

A door jamb is the vertical portion of a door frame that surrounds and supports the door. It consists of two upright pieces, one on each side of the door, and a horizontal piece, called the header, that connects the two uprights at the top.

CORNICE & CROWN

Cornice and crown moulding are two types of decorative trim used to enhance the appearance of a room or building.

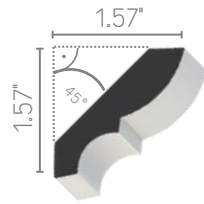

They can be used to conceal the joint between the wall and ceiling, add visual interest to a room, and create a sense of height and grandeur.

While cornice and crown moulding are similar in purpose and design, they are typically used in different areas of a room. Both types of moulding can add elegance and sophistication to a space, and the choice between the two will depend on the specific design goals and aesthetic preferences of the homeowner or designer.
