Slab Fabrication Facility Jebel Ali

SLAB FABRICATION FACILITY

The new Slab Fabrication Facility is based in Jebel Ali Free Zone, located just opposite the group's main Jebel Ali warehouse and office.

This production facility contains state of the art equipment including three, 5 Axis water jet cutting machines, a skirting and profiling machine and several multi-blade cutting devices. Additionally, it houses a full-service technical laboratory, installation workshop, research and development centre for bathrooms and a dedicated customer showroom for manufactured slab products. The showroom displays a range of bespoke slab products to inspire, from various Alpine basins and countertops to planters, tabletops, firepits, fitted kitchen with slab walls, islands and worktops. Without a doubt, it is a unique facility in the market and takes the company's capabilities and potential future opportunities to an exciting new level.

The facility will allow SANIPEX GROUP to accelerate the development of its slab product portfolio, offering new finishes, product types, categories and styles along with the ability to design and engineer customized solutions. In addition, SANIPEX will be able to offer a variety of value-added cutting services for tiles such as skirting, custom mosaic cutting, grooving, profiling and resizing.

KITCHEN COUNTERTOPS

Your Foundation: Porcelain Effect and Surface Finish

Our generously sized porcelain countertop slabs offer a diverse range of effects—including marble, stone, cement, solid surface, and metal looks—each available in various surface finishes such as polished and matte. Primarily offered in a robust 1.2 cm thickness, we also have a curated selection available in a substantial 2 cm thickness, suitable for premium countertop applications. We specialize in these exceptional Italian porcelain slabs, renowned for their outstanding durability, heat resistance, and stunning aesthetics, making them an ideal choice for kitchens.

Endless Design Possibilities: Customization

With over 100 in-stock finishes, you're sure to find your ideal surface. Benefit from extensive customization options with our vast range of colors, textures, and patterns, from sleek modern looks to rich, luxurious textures and natural stone imitations. Our experts provide professional fabrication, including precise cuts for sinks and appliances, ensuring your countertop perfectly meets your design vision.

Seamless Countertop Installation

We specialize in the installation of premium Italian porcelain slab countertops. Our meticulous installation process includes precise measurements, ensuring a perfect fit for your unique layout. We then carry out a seamless and free installation, delivering a resilient and elegant countertop ready for use.

ALPINE BASINS & COUNTERTOPS

Sleek. Seamless. Supremely Stylish.

Accentuate the idyllic vogue effect with Alpine. The statement collection features stunning, glamorous alternatives to everyday tabletops, with options to suit any space.

The complete collection of unique slab options allows you to create your signature basin style, with the added benefit of using the same slabs for your walls for the ultimate standout effect. Immerse yourself in numerous bespoke options and discover all styling possibilities with various high-quality finishes and textures. Choose from custom designed freestanding to wall hung options, double basins, and extended countertops to create a distinctive look that works across any aesthetic, from hotel-chic luxe to understated modern minimalism.

Crafted by skilled, detail-oriented artisans, each piece of manufactured slab is unique to the eyes and touch. Additionally, our in-house production allows us to cut and skirt each slab to match each client's specifications without compromising on the high quality of materials and impressive lifespan. The Alpine collection is also easy to install and includes brackets tested to hold 75kg.

TABLES

For a unique al fresco dining experience, our bespoke service enables you to curate your outdoor space to suit your individual style. For an ultra-stylish dining, coffee and side table, simply choose from a range of durable porcelain slab tops in different colour tones, textures and sizes, then opt for a matching frame in a teak, white or black aluminium finish: team timeless terrazzo to teak for an on-trend biophilic feel, white marble works with white aluminium for a sleek, monochrome look or, for an urban industrial edge, style grey concrete with black aluminium.

SLAB FABRICATION FACILITY

Gymkhana Fire Pits

Fire pits serve as the perfect focal element in a cozy outdoor setting, creating an inviting ambiance to enjoy during the pleasant winter climate. Our collection of linear and round fire pit tables come in 3 organic finishes of Statuario Matt, Cement Light Grey, and Fossil Ivory Matt. The durable, practical and aesthetic designs effortlessly elevate patio spaces to exude traditional campfire vibes in a more contemporary style. Fueled by Bioethanol, our fireplaces are not only all-round appealing, but are also conveniently efficient and environment-friendly!

Gymkhana Planters

Accessorising helps personalise outdoor spaces and blend indoor comfort with the organic open air. GYMKHANA brings multiple highly durable and weather resistant options in planter size, shape, and finish, so you can select the perfect fit that exudes the ultra-chic feel in any setting. Feature Cement Light Grey, Matt Black, or Statuario Matt finished planters in 5 different sizes to add the finishing touch to your statement layout.

Technical Information

TECHNICAL INFORMATION

SLABS

The new Industry standard for residential or commercial projects where dimension makes a difference. Large format Porcelain tiles up to 320x160cm size offers flexibility and freedom to design for superior aesthetics. For seamless surfaces, floor to ceiling walls and floors, to kitchen counter tops, tables and bathroom furniture. Innovation and design to achieve the natural beauty of Marble, Stone, Concrete or wood look with lesser environmental impact, longer lasting, and easy to maintain material.

TECHNICAL INFORMATION

An explanation on assessing surface flatness: Slabs are of significant size, low thickness and are fairly flexible. Checking flatness cannot be done with the slabs in vertical, inclined or cantilevered positions, but only as indicated by Standard EN 14411:2016: place a slab on a horizontal, stable surface, then place a straight-edge over the surface of the slab. If the maximum flatness deviation is equal to or less than 2 mm, the material is compliant with the standard.

V SHADE

Nuances / Shade & Aspect Variation of tiles in the same collection

APPLICATION BY FINISHES

	Matt (Soft, Natural, Unglazed) Wall: Indoor / Outdoor Floor: Indoor / Outdoor (Dry Area)
	Polished (Shiny, Glossy, Brillante, Levigato, Lux) Wall: Indoor / Outdoor Floor: Indoor (Dry Area)
	Semi-Polished (Satin, Silk, Levigato-Matt) Wall: Indoor / Outdoor Floor: Indoor (Dry Area)
	Grip (Structured, Bush-Hammered, Out) Wall: Indoor / Outdoor Floor: Indoor / Outdoor

BOOKMATCH

Imitating the effects of natural marble slabs traditionally cut from the same block, two identical pieces are placed side-by-side to create a mirror effect. Extracting the vein movements of natural marble, these slabs replicate the same with accurately symmetrical patterns for a deeply satisfying ambiance. The adjoining surfaces give the impression of an open book, a work of art suitable for feature walls. Reimagining the epitome of luxury, these slabs effortlessly bring character and sophistication to spaces from bathrooms to bedrooms and living areas.

TECHNICAL FEATURES AND TEST METHODS

Technical Characteristics	Test Method	EN 14411:2016 Annex G Required for Ba - GL

TECHNICAL INFORMATION

LAYING THE SLABS

The natural intended use of slabs is cladding, but they can also be used for flooring, keeping in mind that floors are subject to greater stresses.

Below are few simple precautions that are essential for laying the slabs and achieve optimal results in terms of aesthetics and functionality.

Checking the substrate

The substrate must be intact (no cracks), stable (cured, not subject to shrinkage), resistant to expected loads, dry and perfectly flat.

Plan for grout lines and joints

Plan the installation with grout lines at least 2 mm wide. Grout lines and joints help absorb any small movements in the structure. In the case of outdoor installations, joints will need to be more frequent to absorb thermal expansion.

Cleaning the rear of the slab

To ensure optimal adhesion of the glue, the rear of the slabs must be cleaned with a sponge moistened with water.

DOUBLE BUTTERING

Always plan to do “double buttering”, i.e. applying the glue on both the substrate and the back of the slab, to ensure complete “wetting”, or preventing any gaps remaining on the back of the slab itself.

CHOOSING THE ADHESIVE

To install large format slabs, high performance cementitious (class C2) and highly deformable (class S2) adhesives are required. Using extended open time adhesives (class E) is also recommended, which enable finishing the double buttering before the adhesive forms a “skin”, even on hotter days. In most cases, we recommend adhesives such as ULTRALITE S2 (class C2ES2) by Mapei.

HANDLING

Large format slabs with 3-6mm thickness must be handled by two people, whilst four people for 12mm and 20mm thickness using special tools. Slabs could deform or break if incorrectly lifted. We recommend using suction cups, even better if mounted on metal frames that limit bending and twisting the slab during handling.

CUTTING AND DRILLING

Place the slab on a stable, flat and sturdy workbench. An unstable support could increase vibration and the possibility of breakage during cutting operations. Given the size of the slabs, it is not possible to use a typical tile cutter; instead, a guide is required, secured to the slab itself with suction cups.

Double buttering

Complete wetting of the slab

Extracting from the crate with suction cups on frame

1. Example of a construction workbench

2. Positioning of the guide

3. Cutting the slab

4. Creation of the fracture with tile nippers

5. Snapping the slab

6. Finishing the cut edge

7. Cutting with angle grinder along the guide

MAKING ROUND HOLES

To make round holes, it is necessary to use diamond cutters (hole saws) for porcelain stoneware, available for both wet and dry cutting, to be mounted on a drill or angle grinder.

In the case of a wet cut drill bit, the surface needs to be sprayed with water; if dry drilling, the dust must be suctioned during the operation so it doesn't disperse into the air.

MAKING SQUARE HOLES

After marking out the area to remove, make a hole in each corner using a diamond cutter, then make straight cuts using the angle grinder with diamond blade.

TOOLS FOR LAYING THE SLABS

To successfully install slabs, it is important to pick the right tools. To apply the adhesive onto the substrate, use a 10 mm / 2/5 in slant-notched spreader; for back-buttering the slab, use a 3-4 mm / 1/8-1/6 in square-notched spreader.

OK Correct application

NO Incorrect application

APPLYING THE ADHESIVE

The adhesive needs to be spread in straight lines, parallel to the short side of the slab to make it easier to push the air out. The direction in which the adhesive is spread onto the substrate must be the same as the direction of the spreading on the back of the slab.

POSITIONING THE SLABS IN PLACE

Position the slabs in place using the suction cups; then tap using a suitable rubber float, starting from the centre of the tile and working towards the edges: this step is extremely important, especially for floor installations, to avoid the presence of air bubbles that could reduce resistance to concentrated loads. To make sure adjacent slabs are flush, we recommend using levelling spacers, to be placed about every 50 cm / 20 in, to ensure grout lines at least 2 mm wide as provided by the standard.

TECHNICAL INFORMATION

Grouting and subsequent cleaning

GROUTING THE SLABS

In most cases, using cementitious grout, such as Ultracolor Plus by Mapei, is recommended. It is important to clean the surface thoroughly within the timeframe specified by the grout manufacturer. In case of epoxy grouts, such as the Kerapoxy series by Mapei, cleaning must be done “wet” to completely remove epoxy resin residue.

AFTER INSTALLATION CLEANING GUIDE DETAILS

For washing after laying and for end-of-work cleaning: wet the surface well with water before washing. Then use Fila Deterdek Pro diluted at a ratio of 1:5 or 1:10 (1 litre of product in 5 or 10 litres of water). Apply the solution a few square metres at a time, then add, allow contact time of 5 minutes, then work with a single disc cleaner or large brush. Remove any residues using a cloth or liquid vacuum cleaner and rinse with abundant water. Should any stubborn dirt residues remain, repeat the wash with more concentrated solutions, and use the Fila Deterdek without any additional water.

Caution: Do not use Fila Deterdek Pro on polished marble or on any materials that are sensitive to acids. Before using on this material, carry out a test on a small surface area to check that it is actually resistant to the product. For items in aluminium, follow the instructions and use a soft sponge.

BEFORE

AFTER

BEFORE

AFTER

Residue Remover

MAINTENANCE AND CLEANING

Routine maintenance and cleaning

Simply clean slabs using a non-abrasive cloth, water and a neutral detergent; avoid acid or alkaline additives. All slabs are resistant to the dirt that can occur in a home or hospitality environment and pass the stainability test provided by the Standard for First Choice.

PACKAGING

Horizontal by wooden crate

Vertical - by A-frame

OUTDOOR WALL CLADDING

Why Porcelain Slabs for Facades?

- Weight Reduction
- Easy Installation & Reduced Cost
- Weather Protection for the Building Structure
- Durability – No Deterioration suffered Overtime from weather conditions
- Less Maintenance
- Aesthetic Potential

TECHNICAL INFORMATION

INSTALLATION SYSTEM

1. Conventional Gluing

- For maximum Height of 3.0 M Façade
- Recommended Adhesive – MAPEI ULTRALITE S2
(Ensure to follow adhesive application procedure set by manufacturer)
- Apply on Cementitious Screed living no Air-pockets in between
- Keep Minimum Joint of 5mm between Slabs.

2. Glue & Safety Clip

- For Façade Heights more than 3.0 M Heights
- Recommended Adhesive – MAPEI ULTRALITE S2
(Ensure to follow adhesive application procedure set by manufacturer)
- Use Hooks or Safety Clip matching the Slab thickness and ensure no movement after installation
- Keep Minimum Joint of 5mm between Slabs.

3. Ventilated Façade

CAN BE INSTALLED WITH DIFFERENT ANCHORING SYSTEMS

A ventilated facade is a dry-installed exterior building envelope system. It can be installed on new construction sites or on buildings undergoing renovation. This element provides the building with a gap between its perimeter wall and the exterior cladding. Its primary purpose is to moderate the exchange of heat, air, and light that circulates between the interior and exterior of the building.

Using a ventilated facade system helps creating a healthy indoor climate. It reduces the direct solar impact on the building and the walls do not heat up as much as other constructions during Summer, thanks to the constant air flow in the cavity which is constantly cooling the construction. With a well-designed and well-constructed facade, negative effects of condensation can be prevented, because water will dry out or leak out. Algae and moisture problems do not occur, and mold cannot grow because the facade is 'self-breathing'.

Sub-frame system by Fisher

Exposed system

Concealed system

Note:

Above mentioned systems are just a few examples available in the market.
