Micro LED Displays

Micro LED is an emerging flat-panel display technology. Micro LED displays consist of arrays of microscopic LEDs forming the individual pixel elements. When compared with widespread LCD technology, Micro LED displays offer better contrast, response times, and energy efficiency.

AOTO Micro LED can reach 800 nits brightness, and it is 2 times PPI higher than LCD. With the only 0.4mm pixel pitch, it highly restores the image color and quality, bringing the true-to-life visual experience.

Digital Transformation

ACS QATAR helps organizations make the promise of digital transformation a reality. We work collaboratively with you to create a deep understanding of the risks and opportunities presented by new emerging technologies and think creatively about how you can use these technologies to improve business performance.

Drawing on experts in data and analytic, technology, internal audit, business process, risk and compliance, we tailor teams of professionals to fit the specific requirements of your transformation program. These professionals work side-by-side with you at any or all stages of a transformation program, delivering confidence that the people, processes and technologies involved converge to create value in the future.

Cloud Solutions

Futuristic Hybrid Multi Cloud

The drive to change and the urgent nature to do so are being driven from both IT and the C-suite. Hybrid multi-cloud solutions help organizations deploy applications where they make the most sense for their organization, move more quickly to change and be flexible to the ever-changing needs of the business.

85% **of present companies use a Multi-cloud environment.**

Many parts of the enterprise benefit from hybrid multi-clouds' capability to move applications and data between clouds, including finance, human resources, supply chain management, marketing, sales and customer service.

95% **of Enterprises, are expected to use Multi-cloud environment going forward**

Software & Digital Solutions

We Help you in

- Managing your Existing cloud of Private , Public and On-premise
- Migration to Newer environment
- Provide single dashboard to manage multiple silos
- Optimize the usage of cloud in Private, Multiple Public and On-premise environments
- Professional services

Cloud flexibility allows these enterprises to migrate existing applications to the cloud, modernize applications to run on the cloud, innovate with new cloud applications, and use processes, tools and skills to deliver new features and apps.

Cyber Security

Almoayyed Services offers effective consulting and expert security services that help organization to characterize security methodologies and actualize solutions to mitigate security risk, data breach, ensure compliance and accelerate business objectives.

Almoayyed's ability to meet the IT infrastructure security needs crosswise over industry verticals, with commitment of quality security services, on time delivery and customer satisfaction. Almoayyed has a wide range of information security portfolio includes Information Security consulting, Managed Security Service, which cut crosswise over differentiated security products, technology, compliance and services necessities of any industry.

Cyber Security Facts

- Virtual Reality [VR]
- Internet of Things [IoT]
- Artificial Intelligence [AI]
- Machine Learning [ML]

Robotic Process Automation [RPA]

Business tools and applications are growing at a fast rate, and it is becoming more and more difficult to capture and interpret all the disparate data streams. While a digital system may not be hard to manage on an individual basis, technological growth has forced organisations to confront the issue of how to manage and direct multiple systems toward a unified business objective. Organisations are now turning to robotic process automation (RPA) as the preferred work-flow automation tool.

According to Deloitte's third annual RPA survey,

53%

of survey respondents are moving towards RPA Journey"

RPA is Changing the Way We Work

Successfully implementing RPA requires a deep understanding of existing business processes and their suitability for automation. While building a sustainable foundation for RPA is critical when planning for long-term success, understanding an organisation's long-term goals should dictate which RPA solution or platform is best suited. In addition, involving IT and functional leadership in the planning stages will ensure that governance and infrastructure issues are addressed and help determine if development and maintenance capabilities will be in-house, outsourced, or a combination of both.

Storage Solutions

HANEL STORAGE SOLUTIONS

For more than 60 years the name Hänel has stood for high quality products and innovative solutions for efficient intralogistics.
