## What makes a Global Citizen

The things that make a global citizen are to try to understand what other people are feeling, the fact that everyone else is equal to me, but different from me. If I grow up to be a global citizen, I want to become an actress so I can act on plays that talk about helping poor people, or everyone being equal.

I would like to have a house to let people stay.

By Stella Triantafyllidou & Eirini Nota - Cs1 Class

By Stavros Apsis

### What makes a Global Citizen:

- Understand other people's feelings and life.
- Is equal to everyone.
- Looks after the environment and doesn't waste things.
- Helps others and is Friendly with them.
- Wants to learn about the world.
- Thinks he can change the world and make it the best.

### What would you do as a Global Citizen:

- Be polite to make it the best.
- Travel all the world and discover about other countries and cultures.
- I would want people to stop using money, so everyone has a good life.
- Help homeless kids and donate to charity.

**Inventions in the service of human needs.**

Now days, lack of clean water causes many problems around the world. If only there was a simple and effective solution to provide clean water for those who don't have access to this basic right. Luckily, there is! It is called "The Drinkable Book!!". Each page of the drinkable book is coated with silver nanoparticles and when water is passed through it, 99.9% of the bacteria are killed, resulting in clean and safe drinking water. One page of the book can be used up to 30 times as a filter, providing

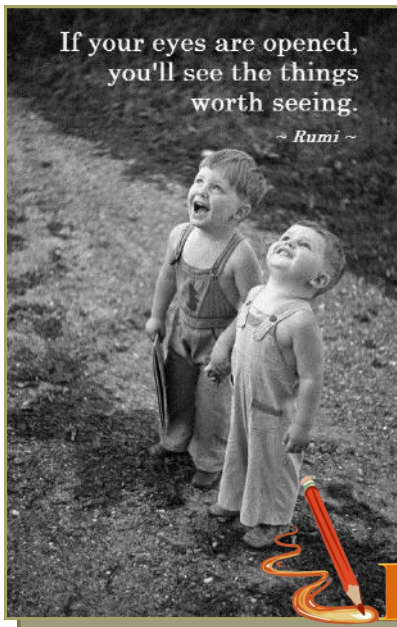

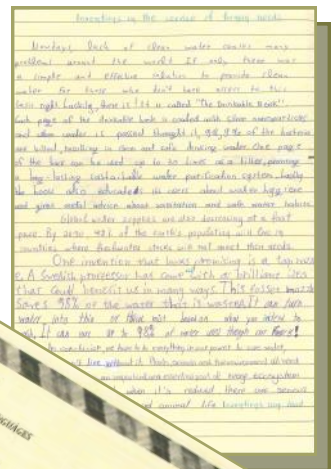

a long-lasting sustainable water purification system. Lastly the book also educates its users about water hygiene and gives useful advice about sanitation and safe water habits.

Global water supplies are also decreasing at a fast pace. By 2050, 42% of the earth's population will live in countries where freshwater stocks will not meet their needs.

One invention that looks promising is a tap nozzle. A Swedish professor has come up with a brilliant idea that could benefit us in many ways. This faucet muzzle saves 98% of the water that is wasted.

It can turn water into thin or thick mist based on what you intend to wash. It can save up to 98% of water used through our faucets!

In conclusion, we have to do everything in our power to save water, because we can't live without it. Plants, animals and the environment, all need water to survive. Water is an important essential part of every ecosystem on the planet and when it's reduced, there are serious repercussions for human and animal life. Inventions can lead the way!

If your eyes are opened, you'll see the things worth seeing. ~ Rumi ~

4TH EDITION

**Innovation in the service of human health.**

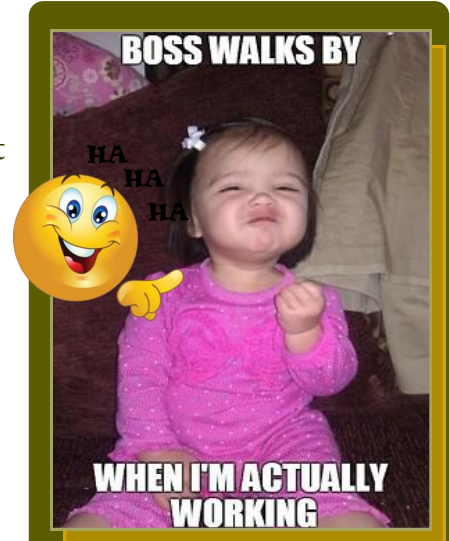

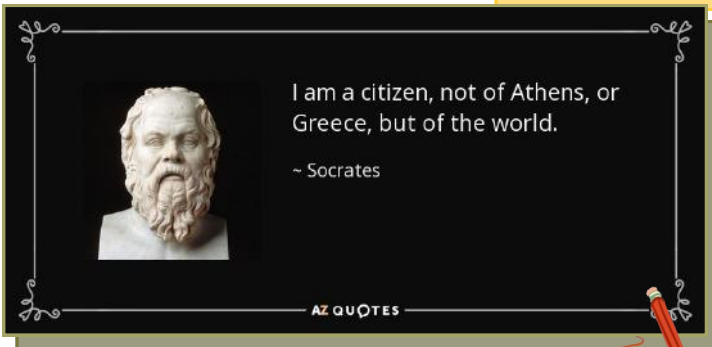

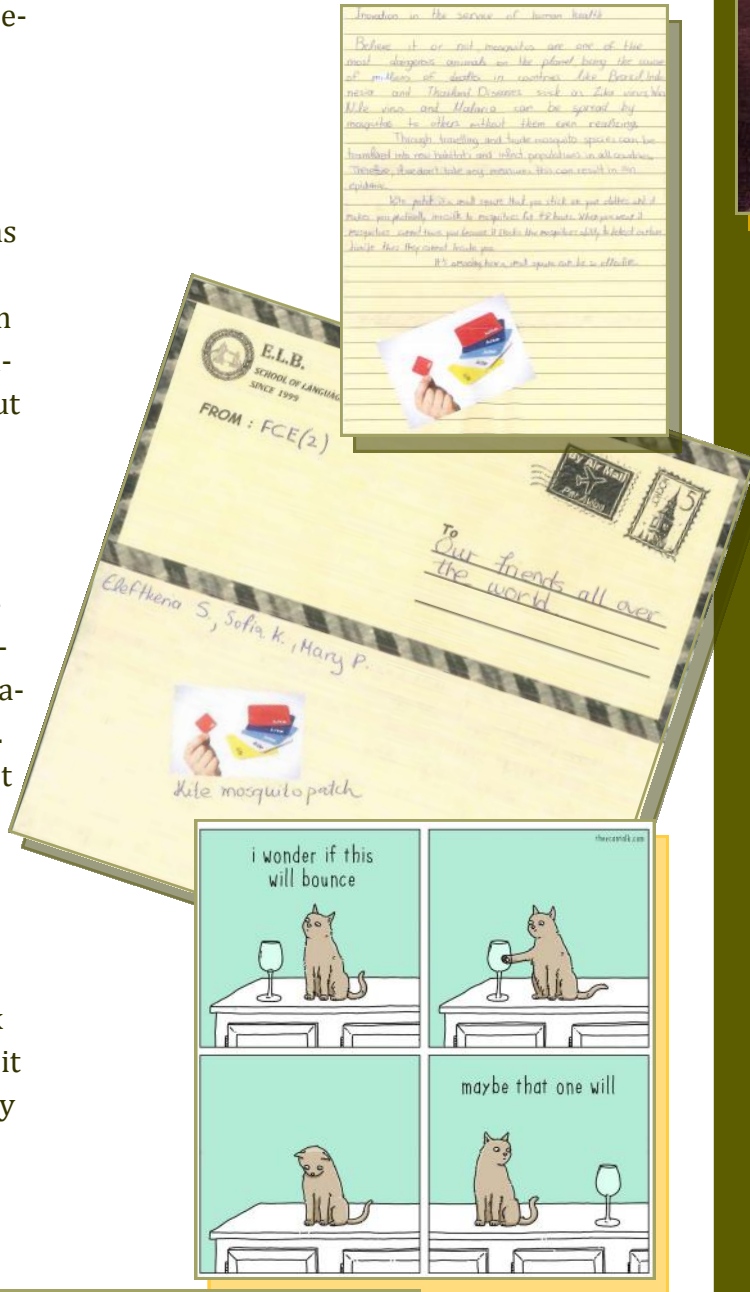

Believe it or not, mosquitoes are one of the most dangerous animals on the planet, being the cause of millions of deaths in countries like Brazil, Indonesia and Thailand. Diseases such as Zika virus, West Nile virus and Malaria can be spread by mosquitoes to others without them even realizing!

Through travelling and trade, mosquito species can be transferred into new habitats and infect populations in all countries. Therefore, if we don't take any measures, this can result in an epidemic.

Kite patch is a small square that you stick on your clothes and it makes you practically

invisible to mosquitoes for 48 hours. When you wear it, mosquitoes cannot trace you, because it blocks the mosquitoes ability to detect carbon dioxide thus they cannot locate you.

It's amazing how a small square can be so effective!

**Innovation combating plas-  
tic pollution.**

Nowadays the majority of people make an excessive use of plastic which has an adverse effect on the environ- ment, people and animals, as it biodegrades after 450-1000 years. Consequently, we have to find effective solutions to this issue.

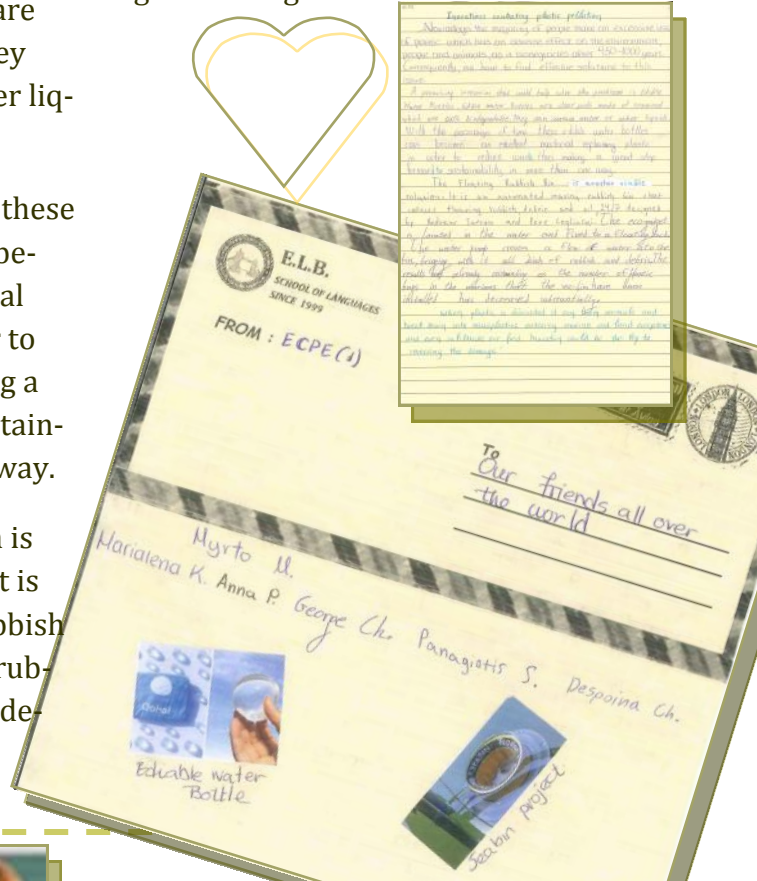

A promising invention that could help solve the problem is Edible Water Bottles. Edible Water Bottles are clear pods made of seaweed which are 100% biodegradable. They can contain water or other liq- uids.

With the passage of time these edible water bottles can be- come an excellent material replacing plastic in order to reduce waste thus making a great step forward to sustain- ability in more than one way.

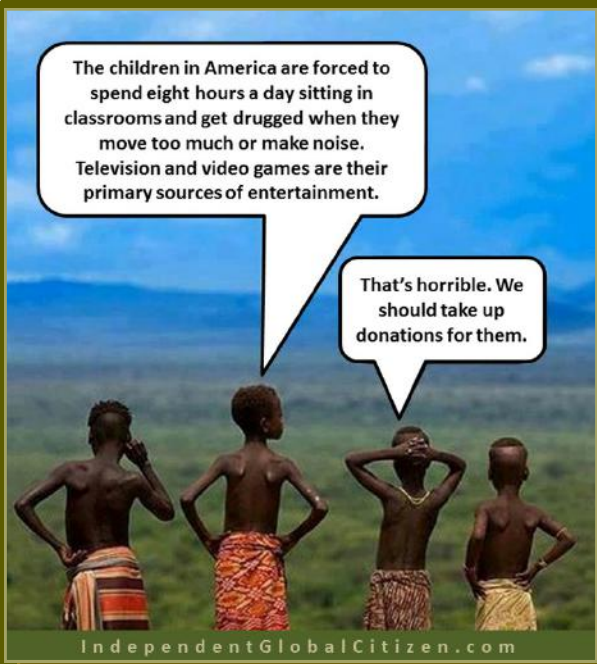

The Floating Rubbish Bin is another viable solution. It is an automated marina rubbish bin that collects floating rub- bish, debris and oil 24/7 de-

signed by Andrew Turton and Pete Ceglinshi. The Eco gadget is located in the water and fixed to a bloating dock. The Water pump creates a flow of wa- ter into the bin, bringing with it all kinds of rubbish and debris. The results are already astounding as the number of plastic bags in the marinas that the sea-bin have been installed has de- creased substantially.

When plastic is discarded it can harm animals and break down into micro plastics entering marine and land eco- systems and even infiltrate our food. Innovation could be the key to revers- ing the damage!

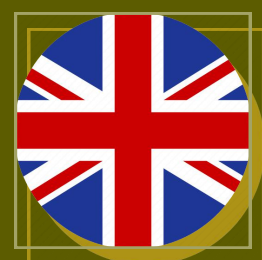

*The world would be a paradise of peace and justice if global citizens shared a common definition of love which would guide our thoughts and action.*

Ich wünsche mir eine Welt ohne Fluchthilge!  
Ich wünsche mir Frieden auf der ganzen Welt!

**Flüchtlinge und Schutzsuchende in Deutschland**

Immer mehr Menschen werden weltweit vertrieben und fliehen vor Gewalt, staatlicher Verfolgung, Kriegen oder Diskriminierung.

Weitere Fluchtursachen sind Armut, Hunger

oder Naturkatastrophen. Nach

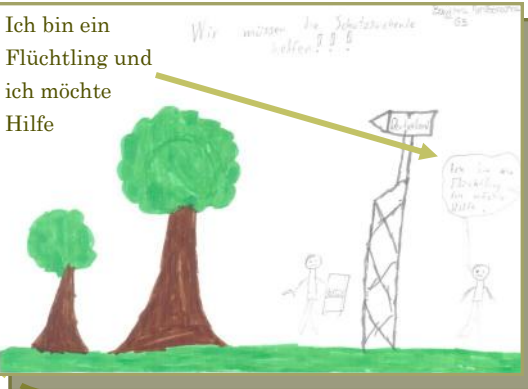

Angaben der internationalen Organisation für den Flüchtlingsschutz UNHCR waren im Mai 2022 weltweit über 100 Millionen Menschen auf der Flucht.

In Deutschland lebten Ende 2020 rund 1,86 Millionen Schutzsuchende. Dazu zählen laut Statistischem Bundesamt alle Ausländerinnen und Ausländer, die sich unter Berufung auf völkerrechtliche, humanitäre oder politische Gründe in Deutschland aufhalten.

**Was können wir für Flüchtlinge tun?**

Weltweit gibt es zahlreiche Flüchtlinge und das würden wir als das größte Problem der Menschheit bezeichnen. Wir alle sollten um jeden Preis diesen Menschen helfen: Geld spenden, Lebensmittel, Medikamente und Klamotten bieten. Nicht zu vergessen, dass Freundschaft und Liebe die höchsten Güter sind. Die Einheimischen sollten sie mit offenen Armen empfangen. Eine gute Idee wäre auch, Abendessen für die Schutzsuchende zu den Häusern der Einheimischen zu organisieren.

# Citoyens du Monde

## Citoyen du monde

Etant citoyen du monde, cela signifie qu'on a une identité qui dépasse les frontières locales! Un citoyen du monde n'arrête pas à s'intéresser aux problèmes et aux sujets de son pays ou de sa ville mais il s'occupe des problèmes que beaucoup de pays affrontent à des lieux différents de la planète.

« Je ne suis un athénien ni un citoyen grec mais un citoyen du monde. »

Socrate

Socrate : créé par notre étudiante Eleni Bakirtzakis

## Citoyen du monde

Une valeur inestimable dans le passage du temps!

## Le bébé le mieux protégé au monde

## Colonne française. Énigmes:

1. Je suis dans l'étang et au fond du jardin, je commence la nuit et finis le matin et j'apparais 2 fois dans l'année, qui suis-je ?

2. C'est comme une pierre blanche tombant dans une mer noire. L'amer devient doux et la pierre disparaît à jamais.

3. Grâce à moi on peut se nourrir. Beau quand on me fait fleurir, je suis toujours ouvert au public.

English Proverbs:

**Faint heart never won fair lady.**

To succeed in life one must have the courage to pursue what he wants.

**As you sow, so you shall reap.**

One will either enjoy or suffer the consequences of his earlier actions or inactions.

**Better late than never.**

To do something that is right, profitable, or good a little late is still better than not doing it at all.

**Every dog has its day.**

Everyone will get a period of success or satisfaction during his lifetime.
