WHY FURNACE ?

At Furnace, we aim to improve the quality of workspaces which in turn exponentially boosts the efficiency and bottom line of the company. Our systems help you enhance your workspaces dynamics through:

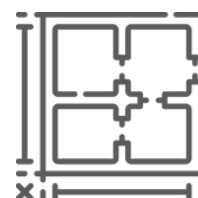

Comprehensive range

Multiple product options for each case

Space Integrated System

Optimise Space with our intregatable products

Custom Play

All products are pre-engineered and modularized for flexibility

Pre - Configured Showcase

Save time and resources to configure Products

Detailed planning

With 2D and 3D visual documentation

Buying ease

Selection guides, Product Comparisons, Case Studies, Reference Work Gallery

Our Value chain

Engineering Design

Value Addition, R&D

Project Management

Individualized attention, time-sensetive

Manufacturing

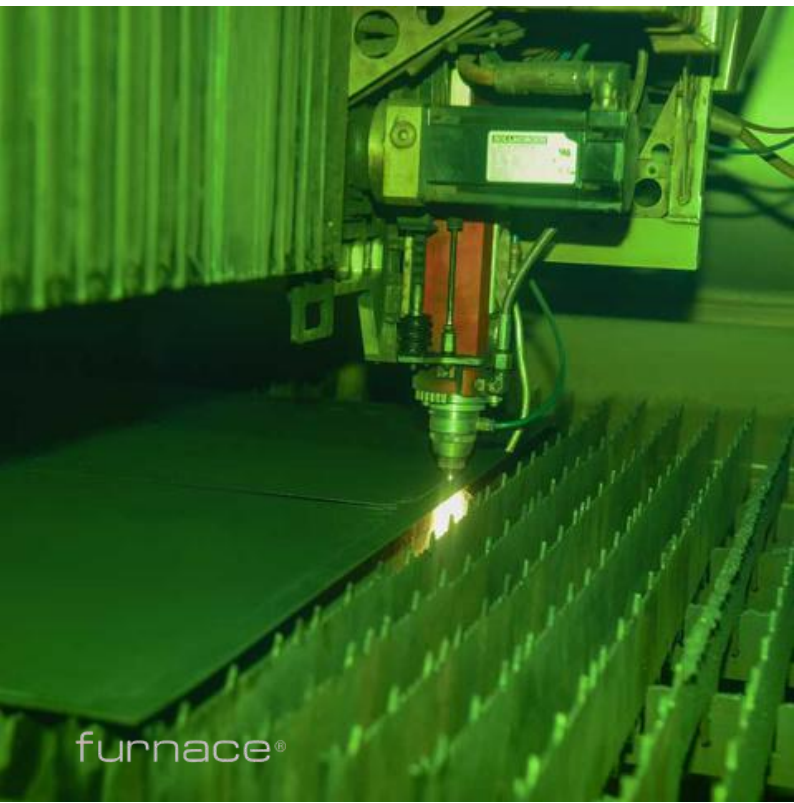

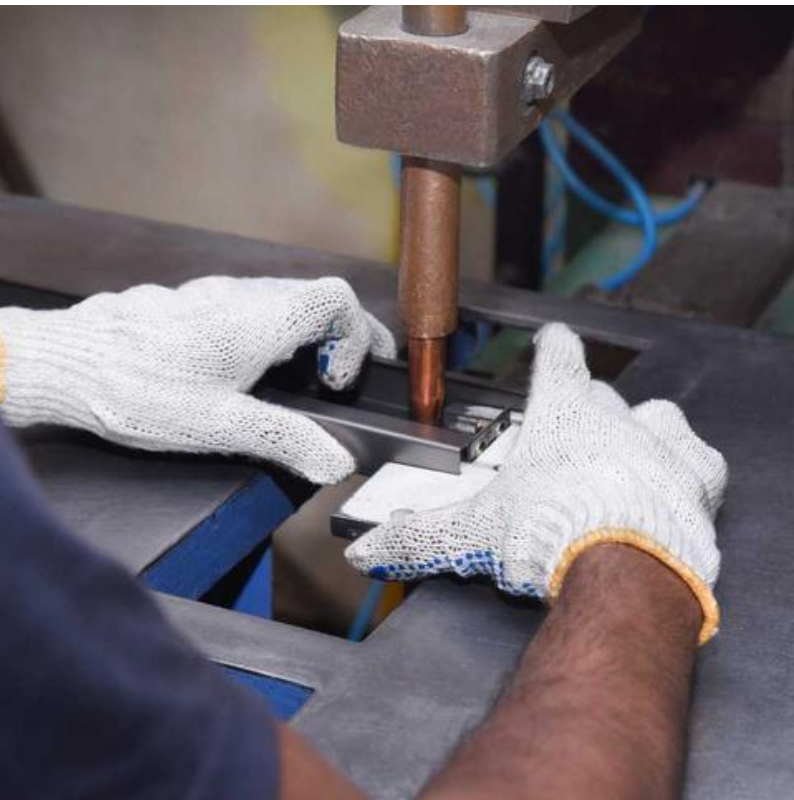

40+ years experience, Agile methodology

Sales & Marketing

Empathetic approach, Authenticity

Infrastructure:

Furnace is supported by multiple self-owned factories located in over 25,000 sq.ft. in Navi Mumbai. Manufacturing all products in-house provides us with the opportunity to control 100% of the product quality and ability to facilitate projects of all sizes while maintaining competitive pricing and outstanding lead times. All of the factories feature the latest machinery and technology available to use.

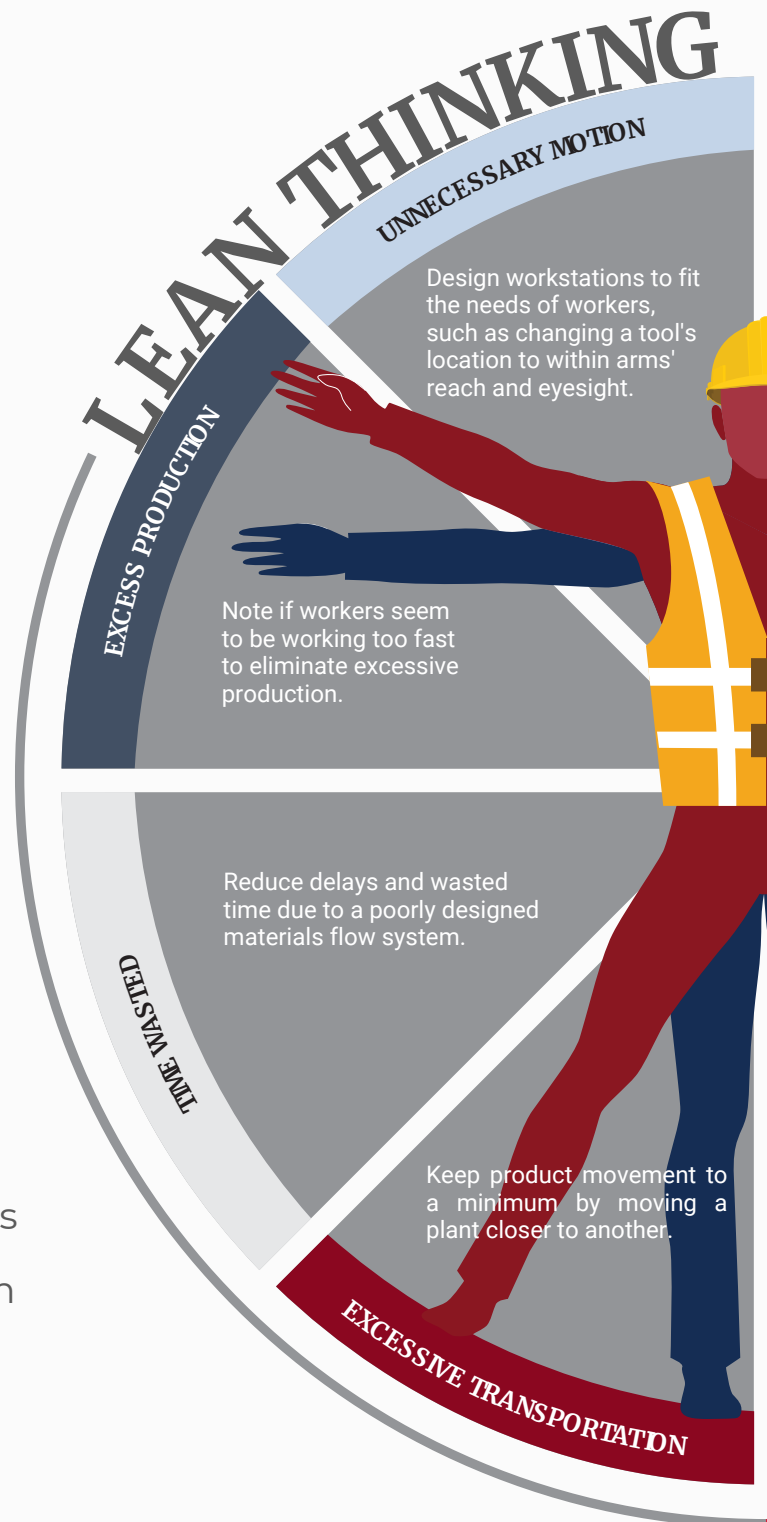

Making Lean More Human

By working together, these two principles can make the workplace more efficient and safe, eliminating waste and reducing risk for your employees.

Lean Thinking

Lean is a way of thinking about creating needed value with fewer resources and less waste. It always starts with the customer. What does the customer value? What problem does the customer need to solve?

Lean-pushing production efficiencies and ergonomics are two seemingly unrelated fields. However, Lean thinking and Ergonomics go hand in hand-each field impacting the other.

Both can combine to make manufacturing more efficient, profitable, and sustainable.

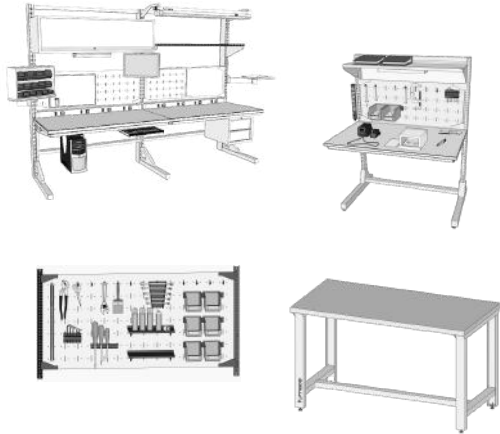

Ergonomics

The word ergonomics comes from the Greek word “ergonomic” which means work and “nomos” which means laws. Good ergonomic design removes incompatibilities between work and worker and creates an optimal work environment.

Application

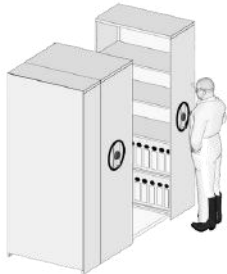

Furnace system can develop a custom fit, integrated solution to the industries, spaces and application scenarios of every project.

Assembly Area

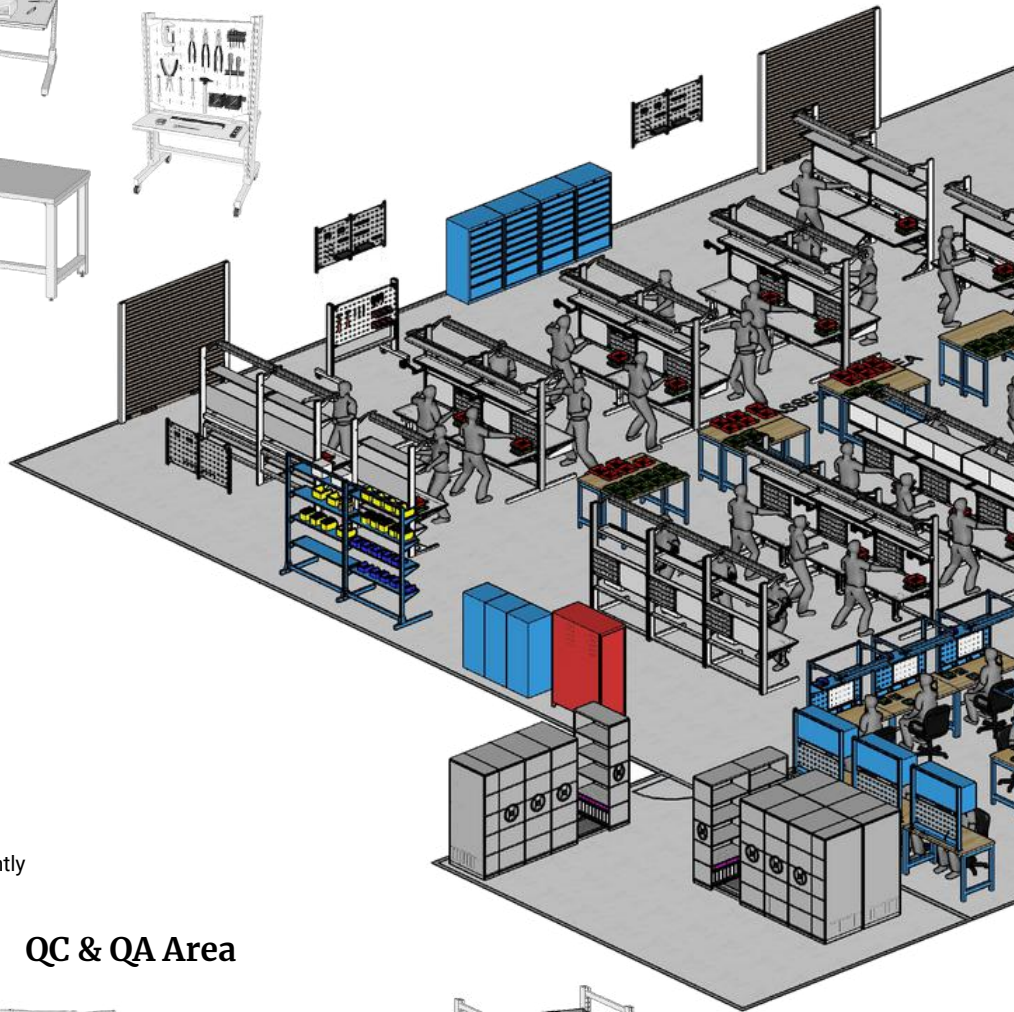

Workstation, heavy duty workbenches, pegboards, carts to adapt to multiple function & changes in workflow with high level of ergonomic comfort

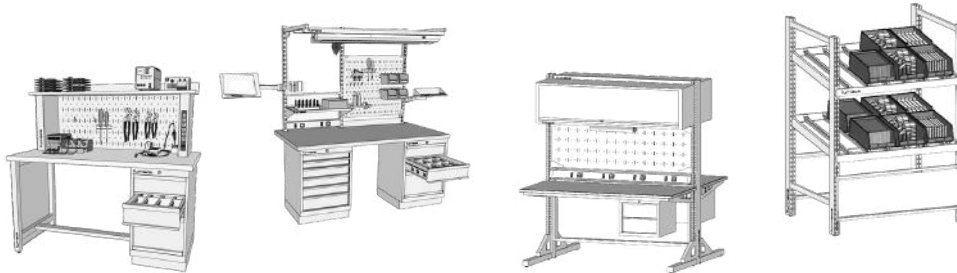

File Storage room

Mobile shelving units which helps in efficiently utilizing floor space to store files

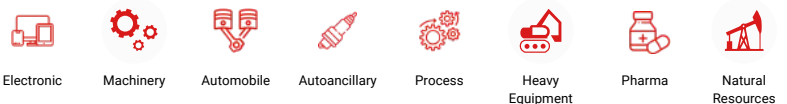

QC & QA Area

Workbenches with practical work surface materials & accessories to increase efficiency & facilitate sustainability

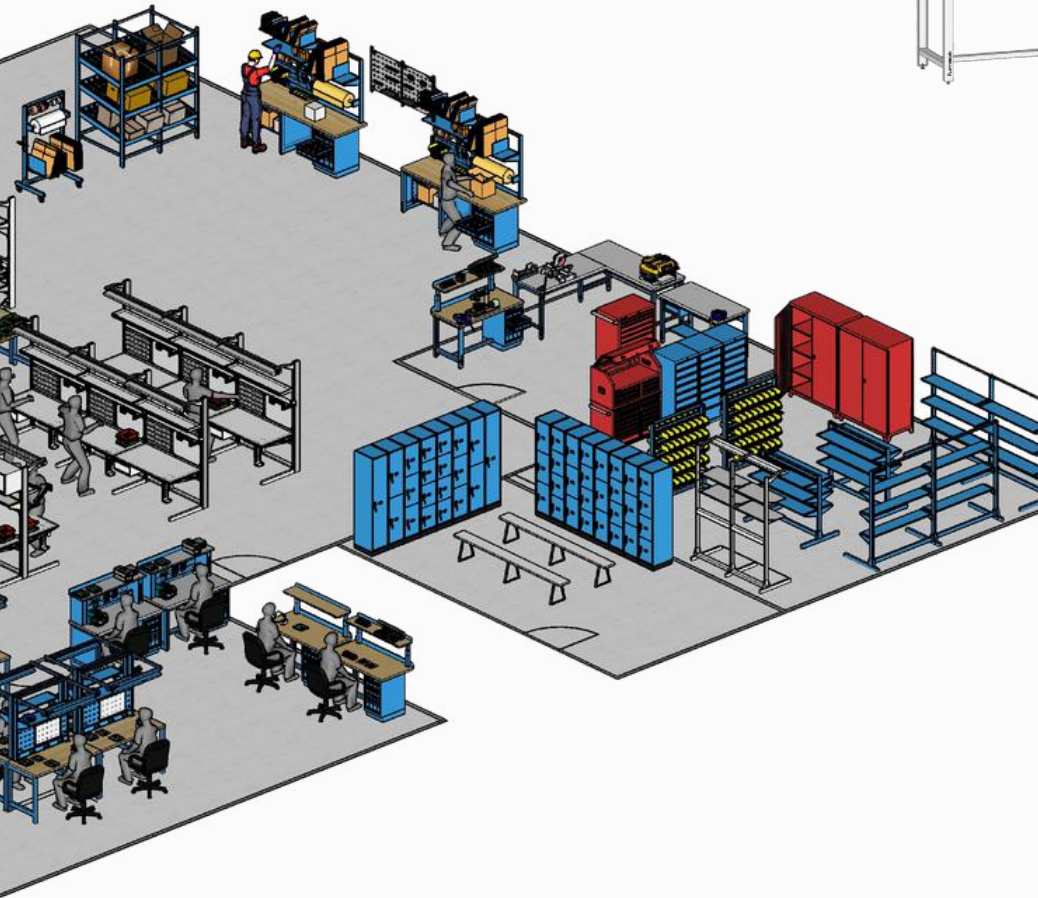

Industries

Packing Area

Packaging workstation, Trolleys & flowracks are flexible to accommodate your need for packaging
