A photograph of a modern building with a brick facade and a blue sky. The building has a large window and a sign that reads "FAB TECH INDIA". The image is overlaid with a semi-transparent white banner containing the text "WHY FURNISYS?".

FAB TECH INDIA

# WHY FURNISYS ?

At Furnisys, we aim to improve the quality of workspaces which in turn exponentially boosts the efficiency and bottom line of the company. Our systems help you enhance your workspaces dynamics through:

### Lean Thinking

Improve productivity by combining lean initiatives with value stream mapping and 5S with our solution

### The System Concept

All products can be freely integrated & combined

### Custom Play

For customers with specific needs

### Maximum Flexibility

With choice of colours, configuration options & more

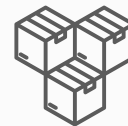

### Buying Guide

Selection guides, Product Comparisons, Case Studies, Reference Work Gallery

### Ergonomics

Product designs helps to minimize injuries & help maximize productivity

### Comprehensive Range

Multiple product options for your operational needs

### Expert Planning

with 3D modeling visualization software

### Wide Range of Service

Such as Installation, After-sales support etc.

### Made in INDIA

Committed to manufacturing highest quality of metal based industrial furniture in INDIA

# Our Value chain

## Engineering Design

Value Addition, R&D

---

## Project Management

Individualized attention, Time-Sensitive

---

## Product Management

Value Delivery, Consistency

## Manufacturing Infrastructure:

Furnisys is supported by multiple self-owned factories located in over 25,000 sq.ft. in Navi Mumbai. Manufacturing all products in-house provides us with the opportunity to control 100% of the product quality and ability to facilitate projects of all sizes while maintaining competitive pricing and outstanding lead times. All of the factories feature the latest machinery and technology available to use.

# WORKBENCHES

## Base Series

All purpose workbench series designed to functionally serve your basic workspace needs.

## Scitec Series

An adaptable workbench series designed for diverse technical environment.

Furnisys offers a diverse range of workbenches designed to bring a perfect balance amongst environmental, operational and load bearing needs within a manufacturing workspace. Each of these workbenches can be expanded and converted into a Work Station using the Link Uprighter System.

## Pro Series

An industrial grade workbench series designed to withstand rough work environments.

## Pack Series

A flexible workbench series designed specially for packing operations.

# LINK SYSTEM

## Uprighter

Enhance the efficiency of any of our workbenches by integrating the link uprighter system with it. Link Uprighter can also be used independently by fixing it to a wall.

## Work Stand

Seamlessly integrate it into your production, assembly, or repair workspace. It's the ideal solution for securely holding or transporting all your Work-in-Progress (WIP) inventory, including parts, tools, and equipment.

A functional system consisting of uprighter, Workstands, Trolleys and Flow racks. Its uprighter is designed to integrate with Base, Pro, Scitec, Pack Workbench Series as well as any existing workbench at the buyer's end. The stands, trolleys and Flow racks can be used independently or integrated with each other.

## Trolley

A space-saving, cost-effective solution for efficient material transport. Its self-sufficient frame accommodates various accessories and a functional worksurface, maximizing utility while minimizing footprint.

## Flow Rack

Link Flow Racks is a functional material handling solution to feed parts for picking, kitting and assembly operations. Having a gravity based part feeding mechanism helps reduce the need for helpers.

# FLEXI SYSTEM

The most flexible independent work system, designed to seamlessly transition into various product ranges from Workbench, Carts to Flow Racks. Its unique micro and macro slot system enables maximum configurations and eases cross-product integration within its ecosystem.

## Work Station

Flexi Workstations is our most flexible workstation series which can not only easily adapt to a user's present needs but also reconfigure to cater the user's future needs. The flexibility behind these workstations can help achieve the maximum productivity per square foot.

## Universal Cart

Flexi Universal Cart flexible can be used for organizing, storing and moving part, tools and equipment around various departments. All of the accessories on the flexi workstations can be interchangeable with Flexi Universal Cart.

## Flow Rack

Flow racks can be used to stage and deliver parts utilizing gravity, reducing material handling time and costs. Bins or totes are loaded on flow rack frames from the rear, and as operators remove one from the front, a new bin glides forward on rollers.

# STORAGE SYSTEM

Furnisys cabinet range is designed to achieve complete organization of parts, tools and equipment. Our extensive range enables maximised use of the cubic capacity of the space.

## Base Cabinet

Furnisys offers an extensive range of cabinets with multiple size and drawer options. Its heavy duty construction enables them to withstand heavy storage needs.

## Tall Cabinet

Furnisys Tall Cabinet's robust welded construction and its versatile design are built to withstand rugged workspace demands.

## Mobile Cabinet

Furnisys mobile cabinets can be used in cases when a workflow would require storage plus mobility.

# INDUSTRY APPLICATION

## Utility

In the utilities sector, Furnisys offers robust and reliable furniture systems designed to withstand challenging conditions. Our integrated solutions support efficient equipment storage, organization, and accessibility, facilitating smoother operations. Whether you need to manage tools, streamline processes, or optimize space, our customizable furniture meets the specific demands of utility environments.

Fossil Fuel

Hydro Power

Solar Power

Nuclear Power

Wind Power

# Manufacturing

Furnisys provides durable and adaptable furniture systems tailored to the unique needs of the manufacturing sector. Our modular solutions optimize space utilization, streamline workflows, and enhance productivity. With customizable designs, our furniture seamlessly integrates into your industrial environment, addressing challenges like space constraints and efficient tool management.

Electronic & Circuit Board Assembly

Labs

Medical Manufacturing

Maintenance & Repair

Warehouses

Machining & Fabrication

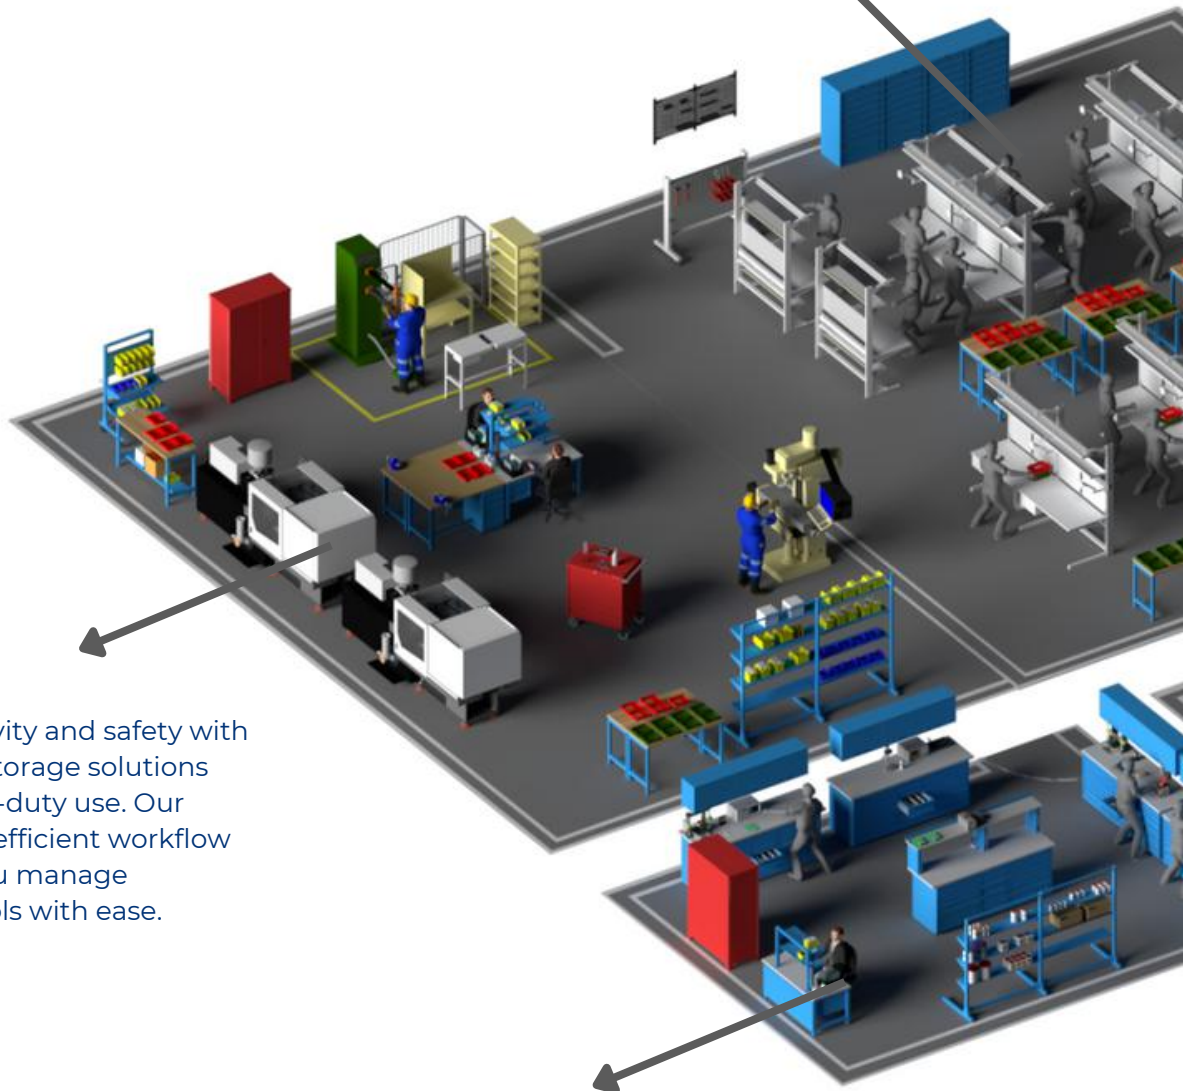

Aerospace & Aviation

# SPACE APPLICATION

Furnisys offers specialized furniture for production, assembly, QC, repair & maintenance, R&D, storage, and packaging & shipping. Our ergonomic, durable solutions optimize workflow, enhance efficiency, and support a safe, organized work environment, tailored to meet diverse operational needs.

## Assembly Area

Streamline your assembly line with ergonomic workbenches and mobile carts that facilitate easy access to tools and components. Our modular systems can be reconfigured to accommodate changes in product lines and assembly processes.

## Production Area

Maximize productivity and safety with workstations and storage solutions designed for heavy-duty use. Our furniture supports efficient workflow layouts, helping you manage equipment and tools with ease.

## R&D Area

Foster innovation with flexible, high-quality workstations that support varied R&D activities. Our furniture systems can be customized to accommodate specialized equipment and setups, promoting a productive and efficient research environment.

## Packing Area

Enhance your packaging and shipping processes with specialized workbenches and mobile solutions that streamline workflow. Our ergonomic designs reduce strain and improve efficiency, ensuring smooth operations.

## Store room

Optimize space and organization in common storage areas with versatile shelving, cabinets, and flow racks. Our solutions ensure that materials and tools are easily accessible, enhancing overall operational efficiency.

## Maintenance Area

Equip your repair and maintenance areas with durable, adaptable workstations and storage units. Our systems are designed to withstand frequent use and provide ample space for tools and parts, enhancing efficiency and organization.

## QC & QA Area

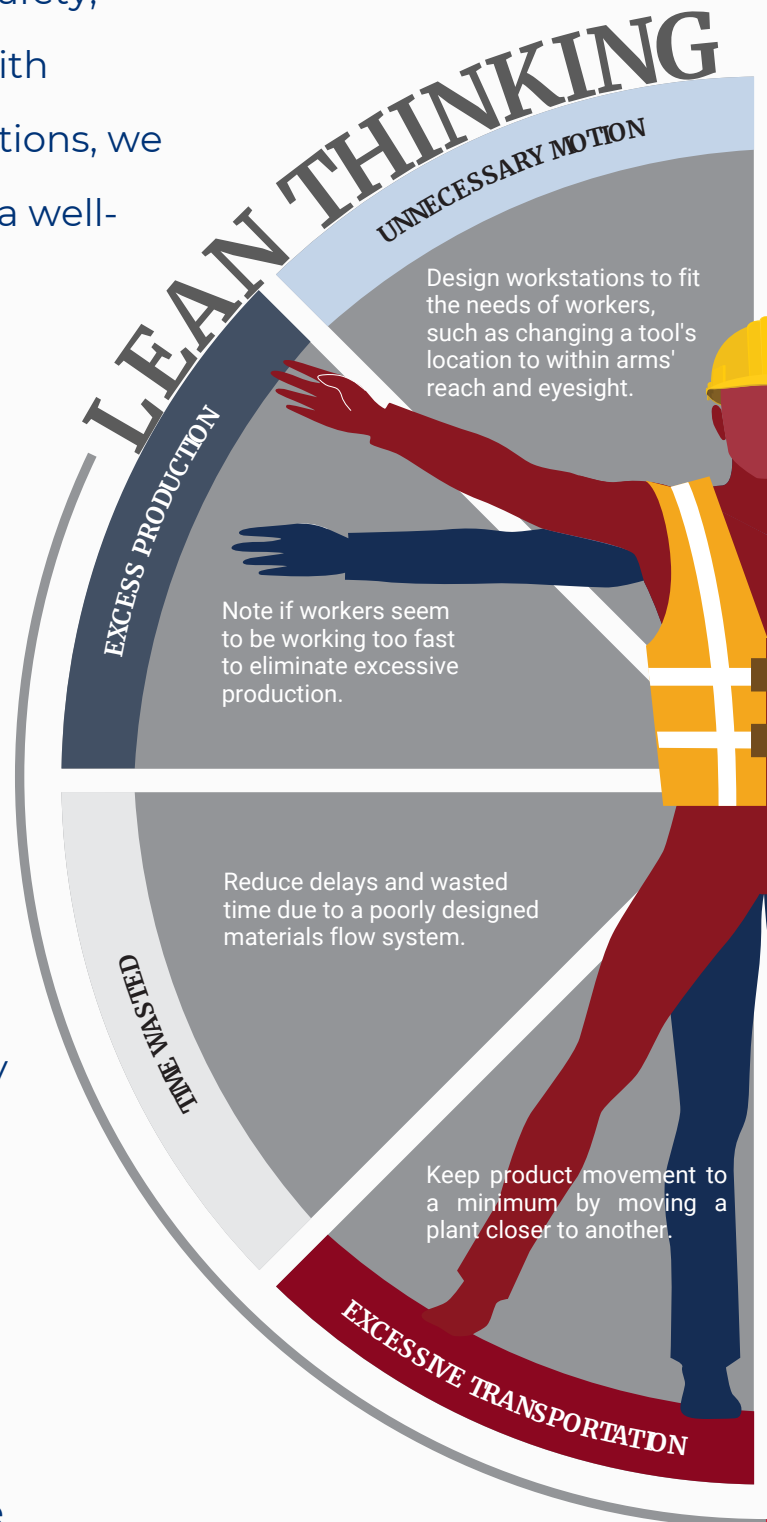

Ensure accuracy and consistency with specialized furniture systems that support quality assurance processes. Our workstations are designed to minimize contamination risks and support precision tasks.

# CONCEPT APPLICATION

Furnisys incorporates lean thinking and ergonomic principles into our furniture systems, minimizing waste and optimizing space. Our designs enhance worker comfort and safety, boosting productivity and efficiency. With customizable, aesthetically pleasing options, we support continuous improvement and a well-organized, positive work environment.

## Lean Thinking

Businesses often resort to 'jugaad' for quick productivity and efficiency boosts. However, these temporary jugaads usually fail to scale and meet international standards. Furnisys formalizes these jugaads with flexible, scalable furniture systems that adhere to global trade standard.

## Ergonomics

Businesses must decide whether to spend on heavy and recurring workforce training costs or on the right workspace systems to maximize work performance. Furnisys products integrate the principles of workspace design and human physical demands, balancing well-being, convenience, and efficiency of the workforce.

# HOW TO BUY

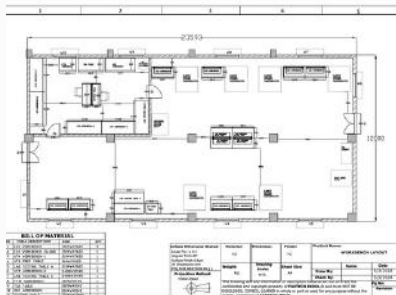

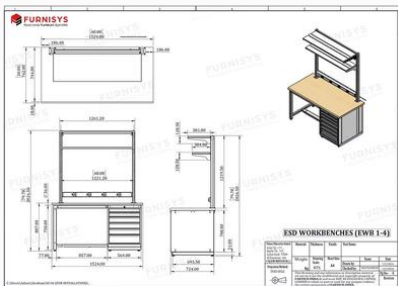

## 1

### Free Consultation

- Talk with our technical experts
- ROI analysis and justification
- Product configuration, project alignment and budget planning

## 2

### Advice, Planning & Visualization

- Techno-commercials delivered within 48 hours\*
- 2D & 3D Product Visuals
- 2D & 3D Space Visuals

\*Subject to change based on requirements

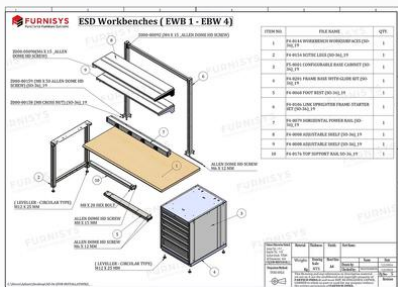

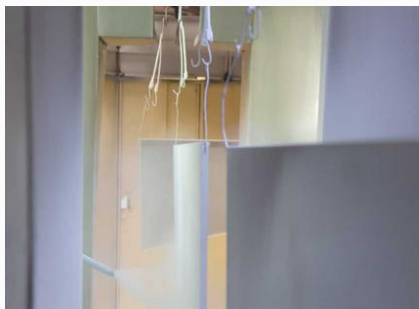

### 3

#### Efficient Manufacturing

- Manufactured within 5-7 weeks\*
- Engineered and manufactured in-house
- Our project team will track your project every step.

### 4

#### Professional Installation

- The Perfect Finish
- Easy to follow assembly instructions
- Self Assembly Friendly

\*Subject to change based on requirements

# CASE STUDY

## Kritsnam Technologies

Hyderabad

### Introduction

Founded in 2015 in Kanpur, Kritsnam Technologies creates AI-backed solutions for sustainable water resource management. Their product, Dhaara, is a revolutionary water budgeting application for businesses.

### The Story

Their procurement head connected with Furnisys via an online marketplace seeking workstations for assembly and testing. A meeting with their Opex specialist covered requirements such as operation type, weight capacity, applications, number of users, accessories, and ESD safety. Based on these discussions, Furnisys proposed an ESD-safe workstation.

### The Challenge

Kritsnam faced issues with fabricated tables that lacked configurability, had poor powder coating, and underwhelming design.

### Why Kritsnam Chose Furnisys

Furnisys impressed Kritsnam with their versatile, configurable offerings and pre-configured series, which facilitated swift decision-making. The products' future scalability, seamless accessory integration, and easy assembly helped avoid additional installation expenses.

### How Furnisys Responded

After discussions and resource exchange, Furnisys delivered Link Workstations with ESD provisions.

### The Results

The workstation came with user-friendly assembly instructions, enabling effortless setup. The integrated ESD protection created a secure testing environment, enhancing operational safety and efficiency.
