## Elerix Cells And Batteries

**ELERIX** may sound as a fresh new brand, and actually it is, however there is a decade long experience in doing business with a number of battery cell manufacturers, of product design and active sales to entities of different size and scope.

Behind the brand stands a team of experts from various fields of business and industry. ELERIX was created with the aim of having a range of products that we, ourselves, believe in.

**All ELERIX batteries are manufactured in renowned factories in China, owned by Foxconn (which also makes iPhones for Apple) and Tsingshan Group, China's largest metals company. BMS is designed and manufactured exclusively in the EU.**

# WINSTON CELLS AND BATTERIES

**Water-based lithium power battery - is the only globally insured product by international AXA and AIG insurance companies**

**Modular Solutions / Configuration - Wide selection of sizes - allowing transparent design to easily check or replace single cell**

**<https://www.thunderskywinston.uk/>**

# Winston Cells and Batteries LYP or LFP - 1

## ***LYP ≠ LFP: Why This Battery Innovation Deserves Your Attention***

Think "LYP" is just a typo for LFP? Think again.

This next-gen battery technology represents a true paradigm shift in energy storage.

### **THINK - WINSTON**

#### **Key Differentiators:**

- ✓ **Rare-Earth Enhanced:**  $\text{LiYFePO}_4$  with Yttrium doping for superior structural & thermal stability
- ✓ **Extreme Performance:**  $-45^{\circ}\text{C}$  to  $85^{\circ}\text{C}$  operating range | 8,000+ cycles | 20-year lifespan
- ✓ **Truly Sustainable:** Water-based binders (no toxic PVDF/heavy metals) enabling clean manufacturing

While LFP batteries deliver solid performance, LYP pushes boundaries in safety, longevity, and eco-efficiency. This isn't an incremental upgrade—it's a redefinition of what's possible.

## Winston Cells and Batteries LYP or LFP - 2

### Why LYP Should Not Be Simplified as LFP

# LYP $\neq$ LFP

#### Material Innovation

**LFP:**  $\text{LiFePO}_4$

**LYP:**  $\text{LiYFePO}_4$  doped with rare-earth Yttrium enhancing structural and thermal stability

#### Eco-Friendly Process

**LYP:** Water-based binder, no PVDF or any heavy metal enabling clean, sustainable production

#### Structural Advantage

**LFP:** Only two terminals, metal casing

**LYP:** Multi-terminal + anti-corrosion polymershell, allowing high-current and large-scale discharge

#### Superior Performance

Feature	LYP Battery	LFP Battery
Safety	Extreme high	High
Cycle Life	Over 8000+ cycles 20 years	2,000-3,000 cycles
Operating Temp	-45°C +85°C	-20°C +80°C
Discharge Rate	High C-rate (Starting/Traction)	Moderate
Green Manufacturing	Water-based non-toxic	PVDF pollutant and contain toxic fluoride

**LYP is not a typo—it's a paradigm shift.**
